On the right hand and on the left loomed up gray old islands, with tracings formed and worn by the waves of the old azoic. There was no beauty in the landscape, all was silence and desolation, we seemed to be journeying "in a waste land where no one comes or hath come since the making of the world." We pushed our way through the tall rustling flags, keeping a close lookout forward for the open channel which seemed to turn in every direction. The boats soon lost sight of each other, and shortly we were in the midst of fallen trees and driftwood which barred our passage. Standing in the boat, nothing could be seen but the expanse of reeds and rushes in front, behind and around, with the desolate hills looking down on either side. Our shouts brought no response, so we forced the boat backward for fifty yards and turned off to the left, where there seemed to be a sort of channel through the flag. Following this for a hundred yards, we again turned to the right and entered a channel of open water a trifle wider than the boat. For three miles we labored, before open water was reached; then, as we turned a headland, Hart Lake spread out before us. The other boats were far in the lead and the foremost one was making over to the western shore, in search of a camping place. When we joined them the traps had been unloaded and the tent was being set. It was on a long rocky point, overgrown with bushes, and a miserable place for a camp, but it seemed the only one within sight, so we deposited our bundle with the rest and dropped on the nearest rock to watch the process of camp building. Ye Gods, what a camp it was. A pile of sumac bushes were spread for the bed within the tent, a long pole was projected over a rock, the pot hung on its end, a place was made for a fire beneath and the Canuck was content. It was within two hours of darkness and every one was hungry to a degree that made the thoughts of a cold supper exasperating, so we softly jointed the fly-rod and started for something warm. A couple followed, and while they trolled we tried the fly. At the end of an hour we came together and took an inventory of the catch. Two small rock bass had fallen in our way, while a ten-inch pike, a half-pound perch and a sunfish, in the boat of our friends, made us haug our heads. These, with the two bass taken on our way, made a scant meal, but with the coffee and boiled potatoes we fortified ourselves for the night. Then a camp fire was started, and as the neighboring mosquitoes dropped in, one by one, to enjoy themselves, it was supplemented by a smudge. When the delegation from over the lake arrived, two more smudges were started in their honor and a plainly discernible reinforcement prompted some one to start another. We spread our couch on a rock with the sail of the Pizen Ann for a base, and half of our double blanket over it, applied the killer and sat up to take in the situation. The Canuck threshed his head with sumac branches, sat in the lee of the smudge and expressed his sentiments in florid rhetoric. The hills stood out dark against the sky, and limned themselves into a horizon like the rim of a huge bowl, within whose concave we seeemed isolated from the world. The fire light flashed and glared on the strange scene, shone in long trails of light across the water and threw in bold relief the uncouth figures against the rocks. For a long time we watched it all and until drowsiness came, when we rolled into the blankets, turned our face toward the stars and slept. Not so the Canuck; he tossed restlessly upon his sumac boughs in the tent, courted sleep in vain, wandered aimlessly about the fire which he kept replenished through the night, and, with the first signs of dawn, was off in search of berries. Never shall we forget the radiance of that morning. How the deep breath of the great wilderness came to us, laden with all he fragrance that it had to give. Our opening eyes rested on the glittering waters in front and below, with the great loons wheeling in the air over the broad bay which stretched on the left down to Opinicon, while the eastern hills were burning with the glory of the resurrection of another day. And that morning meal with its coffee, pilot bread, bacon and fried potatoes, how its recollection throngs foremost among the many bright recollections of the summer.

Leaving our friends to gather berries we again got under way and headed toward an opening in the hills to the north where we knew we would find a passage to the lakes beyond. Nothing rose to our repeated casts as we followed the western shore, the waters seemed as barren of dwellers as the hillsides around. In a couple of hours we were at the foot of Hart Lake, where we entered a narrow stream which wound its way, without the sign of a current, through a wilderness of rushes. As far down in front as we could see reached the vast expanse, with bays to the left and high rocky islands standing in a sea of brown and green. There was undoubtedly water everywhere about us, but none was visible save in the narrow stream which we were threading The far away shores of this great sea of rushes rose grim and steep and rocky, barriers which once had withstood the wild dash of waves, but against which they would wash no more forever.

For three miles we held on a straight course and then, as we approached the great northern barrier of hills, the channel turned short to the right, made a sweep around a headland with another right hand turn, and the bow was pointed in the direction from which we had started. A half mile further we found an immense pine lying across the stream and we were compelled to land in the ooze and drag the boat around the obstruction. A short distance beyond, the channel widened and we came into an open sheet of water with an island in front which, robed in pine and hemlock, towered in primeval beauty. As we rounded its eastern side, Crow Lake opened before us, a magnificent sheet of water without an island to break its broad expanse. With its shores of rock, and lined with the green forest, it reminded us of some of those lovely mountain lakes of Northern New Jersey, before the hand of the vandal had reared his summer hotels and boarding houses, and brought it to pass that they who fished must surely come into his net. Fairer than Greenwood or Hopatcong, rivaling Double Pond and Truxedo in the purity of its waters, Crow Lake is as beautiful a sheet of water as has ever been permitted to us to behold.

As we entered the lake, a loon rose with shrill screams, a hundred yards away and, churning the water into foam as he came, made a circuit of the boat within easy pistol range, and standing upon the water, flapped his wings and greeted us with a series of shrieks. Then, diving beneath the surface, he reappeared in the same spot and repeated the performance half a dozen times. Twice we cocked and raised a revolver to fire, but could not find it in our heart to kill, wound or terrify the graceful bird which, in apprehension for the safety of its young which were probably somewhere close at hand, was endeavoring to entertain us at the risk of its life that they might go unnoticed, and the Madame's longing for a loon skin went unsatisfied for that day, at least. While no bird is more wary, none is more bold when the safety of its young is at stake. Twice we have known the mother bird, when pursued, with a young one upon her back or by her side, to refuse to dive and leave it upon the water or desert it until the boat was fairly upon her. In both instances, after the young one had been captured, the mother would follow and circle about the boat with cries that were almost human, until the captor in sheer pity dropped her treasure overboard, when she immediately rejoined it. Only two attempts to our knowledge have been made to keep the grand old bird in captivity, and they were mournful failures. Last spring, as Sabattis told us, one of his boys found a loon fastened in a trap which he had set for mink. The bird was tied by one of its legs to a line, two hundred feet long, and put out on the lake. For two days and nights the wail of the poor bird wrung the heart of old Sabattis sore, and he ordered that it should be killed or set free. But the boy plead for another day, and on the morning of the next, it was dead. We left the loon which had so entertained us, in a state of apparent content as it saw the boat draw slowly away, and then, as it turned toward the island where it probably had left its young, we faced once more to the front, jointed up the Mitchell and prepared for work.

WAWAYANDA.

CLIMATE OF THE WEST.

SANTA BARBARA, California, Jan. 2, 1886.

Editor Forest and Stream:

I am in receipt of your issue of Dec. 17, and in it find "A Special Correspondent's" second article upon the "Climate of the West," which he claims is in reply to my comments upon his first article on the subject. Unfortunately my copy of the paper is an imperfect one, a folding of the sheet when passing through the press having somewhat curtailed Mr. Correspondent's article. However, I am enabled to follow his arguments pretty clearly, and I am gratified to observe that he entirely abandons his former position, although he does so without admitting the fact. In my former letter I was too generous by half in explaining to Mr. Correspondent, and to your readers, how and by what process his informants became possessed of the belief that the seasons were changing —changing rapidly—from dry to wet. Mr. Correspondent now adopts the substance of that explanation as the basis of his theory. How much better it would have been if he had pursued that course in the first place (if he had only thought of it), instead of stating, as he did, that a great and rapid change was going on in the character of the seasons. Why mislead and deceive badly informed or unthinking people into the belief that the peculiarities of any country or any climate will change just to suit or accommodate them?

Mr. Correspondent pretends—it is only pretense—to think that the table of figures I gave was for the purpose of proving that the seasons were steadily growing dryer. Why did he not say plainly and bluntly that I was a fool? It would have been quite as complimentary. The figures were given simply to show that Mr. Correspondent's statement that the rainfall was rapidly increasing year by year, or that it was becoming far greater, was not true. This was the exact thing in his article which was calculated to work harm. Now, since seeing my explanation of how his borrowed opinions were reached, he admits that the change may be more apparent than real; that application and economy of water, just as I explained, may and do secure the results that have by many been wrongly credited to a vastly increased rainfall. Now let Mr. Correspondent pursue his argument from the new departure; show people how they can adapt themselves to new countries and strange climates; that by good judgment, industry and perseverance they can reclaim naturally arid wastes and make even deserts blossom with roses. By so doing he will secure good settlers for his chosen region in the Great West instead of a horde of unthinking people who might come upon the strength of promises held out in his first letter, and who themselves must inevitably be disappointed and will then hold him responsible for their misfortunes.

It is true that I did remind Mr. Correspondent in the latter part of my former article that no arid climate had ever changed to a humid one; that the tendency of all such is to grow dryer. I cited the evidence of all human history, the geology of the earth, the shrunken streams, etc., and asked him to prove the contrary in support of his position. He conveniently omits to answer except by citing my figures to disprove my assertion, which had no reference to the figures. I did not claim that this gradual change was noticeable from year to year, from decade to decade, from generation to generation, nor from century to century. I doubt if the observations of a hundred years will prove the fact and its exact dimensions. But the face of the earth proves it. Our shrunken river beds prove it. Fossil and other traces of vast forests, where none do or can grow now, prove it. Thousands of miles of gravel beds where there is now no water to make gravel, prove it. The ruins of great cities and other evidences of dense human populations where such cannot be now supported by the products of the country, prove it. The fact is the earth of this Earth is growing dryer. Arid portions are changing from dry to dryer with the other. Man cannot change or check it. Newspaper writers cannot prove the contrary. Man can improve his methods and modify in some degree his surroundings. That is the best he can do.

Perhaps Mr. Correspondent can torture some portion of this article into evidence that Palestine, and Egypt, and Assyria, and the "back counties" thereabout, once the granary of the world and the great center of human life and industry and prosperity, lost its prestige and its people by a change of climate from just right to too humid, by reason of too much irrigating and plowing, and consequent dew on the grass. According to his reasoning it could hardly have been the other way—become too dry—after the first Egyptian began scratching his corn patch with a forked stick. Perhaps he can tell why the ancient cities of southwestern Colorado, New Mexico and Arizona were abandoned. Their great canals can yet be traced, but there is no water to fill them. Perhaps he can tell why Mexico has not changed its climate from arid to humid in accordance with his theory; or why this region, where I now write, with its three hundred years of civilization, has not done the same. Per contra, I find Spanish traditions here say that when their people first came hither the Santa Ynez range of mountains, which rises about six miles distant to the northward, and stretches sixty or seventy miles southeast by east and northwest by west, was covered upon the seaward slope with a luxuriant growth of forest timber. Now it produces

nothing but chapparel, and the drouth is such that tress cannot grow.

Mr. Correspondent says: "One fact, worth any array of figures, is that land formerly dependent on irrigation for a crop, will now produce good crops by dry cultivation." He states this as a fact—emphasizes it as "a fact"—just as he stated in his first article that the amount or annual rainfall was largely increasing, yet in the broad significance of the words used it is not a fact—no more a fact than was the other. Let him substantiate his assertion by the evidence of one State, one section, one county, one farming settlement, or one farm in the truly arid regions of this hemisphere, where irrigation once practiced has been abandoned and "good crops" are yet produced year after year. In an exceptional season when plowing and planting are done just right and at the right time, and the scanty rainfall comes at the right periods and with the best distribution, a good crop may be produced by dry cultivation upon ground that has been previously irrigated. It may also be done on ground that has not been irrigated. It may be done upon ground that has neither been plowed or irrigated previously. I have seen it done. I have done it—once. I make these admissions in full knowledge of the danger of admitting anything to my disputant. Upon this evidence he may claim that irrigation is always unnecessary—that the mere presence of a man and a plow, with faith, will make the country fruitful and the climate humid.

BIRD PROTECTION BY THE A. O. U.

BIRD destruction in this country is every year assuming a more and more serious aspect. The startling decrease in the numbers of many of our birds, brought about of late years by the unceasing persecution waged for the sake of fashion, has aroused the American Ornithologists' Union to a recognition of the necessity for instant and decided effort in behalf of our birds. To answer this imperative demand the Union has appointed a "committee on the Protection of North American birds." This committee was lately organized in this city with the following membership: Mr. George B. Sennett, Chairman; Mr. Eugene P. Bicknell, Secretary; Mr. J. A. Allen, Dr. J. B. Holder, Dr. George Bird Grinnell, Mr. William Dutcher and Mr. L. S. Foster, all of New York city; Mr. William Brewster, Cambridge, Mass.; Mr. Montague Chamberlain, St. John, N. B.; Col. N. S. Goss, Topeka, Kansas.

The objects of the committee are as follows:

1. The gathering of all possible information bearing on the subjects of the destruction and the protection of North American birds.

2. The diffusion of information among the people in respect to the extent of the slaughter of birds for millinery and other mercenary purposes; the wanton killing of birds in sport by men and boys; the robbing of birds' nests; the destruction of the eggs of rails, terns, gulls and other birds for food; and the marked recent decrease of many species resulting from this general destruction; the spreading of information, also, in respect to the utility of birds as a natural check upon the increase of insects injurious to vegetation, and with reference to their interest and value from an æsthetic point of view. This with the object of developing a public sentiment in favor of the rigid protection of our native birds, a sentiment that will naturally spring up strongly and widely as soon as attention is called to the subject.

3. To encourage the formation of bird protective associations and anti-bird-wearing leagues.

4. The perfection of a statute for the protection of birds, drawn with regard to its availability for enactment by all the States and Territories, leaving, however, the game birds, properly so considered, to the care of the game protective associations.

5. The prevention of the collecting of birds and eggs for pseudo-scientific purposes, and the development of a system of co-operation between this committee and the various authorities to whom may be assigned the power of granting permits for the collection of birds in the interest of science.

6. The consideration of the best means for securing the enforcement of bird protective statutes. The committee are desirous of collecting facts and statistics bearing upon the subject of the destruction of our birds, and will welcome information from any source. It also extends the promise of its hearty co-operation to all persons or societies who may be interested in the protection of our birds.

The headquarters of the committee are at the American Museum of Natural History, Central Park, where the officers or any of the members may be addressed.

A SCHOOL OF SEA DEVILS.—Your issue of the 7th, containing account of the sea devil, calls to mind an interesting sight which I once witnessed off the mouth of the Tabasco River on the gulf coast of Mexico. A cry of "Manta, Manta" from the natives drew our attention to a great number of black "bat-like wings" cutting the water in all directions, very like the dorsal fins of sharks and we at once recognized the sea vampire, or as it is called in Spanish, "Manta." Occasionally one would leap into the air, showing his entire form, and falling into the sea with a resounding splash. Others approached the ship within a few yards. The display lasted nearly an hour, and at one time we counted over one hundred. Tabasco River is as noted for these monsters as is Progresso on the same coast for the vast number of sharks which infest its waters.—E. W.

A MIDNIGHT BOTANICAL EXPEDITION.

GREAT was the excitement at the New York Aquarium, one night in the summer of 1880, when Mr. Reiche gave the order that all hands must be on deck to assist in handling a fifteen hundred pounds manatee, the largest, longest, fattest and heaviest ever captured in Florida. I had never seen a living manatee, nor for that matter a stuffed one, and it was but natural that I should feel deeply impressed by the announcement of the expected arrival of one of nature's most grotesque looking children.

About 9 o'clock a loud pounding at the back entrance of the building announced the arrival of the monster, and all hands quickly assembled to assist in the safe introduction of this strange visitor from the sunny South to his new home in the great city of the North. On one of the largest of trucks, placed crosswise, and securely fastened with ropes, rested a long tank, built of heavy pine timbers, and in this tank was the sea cow or monster manatee over ten feet in length, packed in some dark, grayish colored material. The tail or fluke was securely held down by a piece of cross timber. Examining the packing material, I concluded that it was composed of vegetable substance, and that it was used as a packing to prevent the manatee from becoming chafed, and as food, and also to cover him with so that his skin might not become too dry and crack. The vegetable substance or packing perplexed me greatly, for it had become much decayed, and ground up fine during the long journey from the Indian River, Florida, so much so that I had but little hope of determining it. However, I secured a good quantity of this puzzling material in hopes of determining what herb or alga it might be.

After the sea cow was safely landed in the seals' tank, I questioned the two Germans, who were the joint owners and captors of the "cow," as it was familiarly called in the Aquarium, if they knew the common or scientific name of the plants on which they fed the animal; but either they did not know or cared not to tell me; perhaps they were suspicious and looked upon me as a Yankee. When the cow was lowered into the water it sank instantly to the bottom, and it was some time before it came to the surface to breathe. The Germans looked very anxious, for it must be understood that the manatee cannot remain under water as long as the seal; but at length, after a long wait, the creature's curious looking nose broke the surface of the water and every one experienced a great sense of relief, but I made up my mind that it was either a very sick or a very tired out and weak sea cow. Carefully the Germans gathered up every particle of the decayed vegetable substance and deposited it in the tank. I felt guilty as I thought of the double handful of the puzzling stuff I had so carefully placed in my room, but still determined to hold on to it. The Germans now held a conversation in low and serious tones, looking so solemn all the while that I felt almost positive they were trying to determine how and where the next meal for their aquatic pet was to be obtained, for the cow must have a bountiful supply of food very soon, or there was great danger of its collapsing.

Every one seemed to take in the situation. The "hippo" keeper said give it bread and vegetables; the giraffe man said give it hay and oats; the chimpansee man said dates and bananas; the sea lion man said give it herrings, and the white whale man said give it live eels. I kept silent and was wishing most heartily that the others would do the same, for what's the use of talking when you don't know what you are talking about? At last one of the Germans started off with a basket, and returning in two hours, emptied on the floor a large mass of purslane (*P. oleracea*). Hastily the water in the tank was lowered to within a foot of the sea-cow's nose and one of the Germans entered the tank and placed a quantity of the purslaine just above the animal's nose, but not a motion did it make. Then the German lifted up its head, and patting it kindly, spoke to it in German, trying all the while to coax the cow to eat, but it was of no use. The cow was either very sick, or purslane was not what it wanted, and it seemed to me the Germans looked still more sad and gloomy.

It must be borne in mind that it took these two brothers six months' watching at night and working with an immense seine made of rope before they captured this pet of theirs. Twice they had it in the net and twice it got away from them. The time and money spent in its capture and the cost of transportation North had nearly exhausted their funds. If the cow should die on their hands, how would they get back to Florida?

All next day one of the Germans was off looking for the proper kind of food, but returned at night empty-handed. If they had been possessed of only a little botanical knowledge how quickly their trouble would have ended.

I deeply sympathized with these two Germans who had worked so hard to get this ugly looking brute of a sea cow to this Eldorado—New York city—and then to see their dream of wealth slowly passing away. I know what it is to work hard night and day to get together a collection of fishes, and then by some mishap or mistake lose them all when within a few miles of your destination. 'Twas past midnight, and still the brothers hung about their pet. The sight being painful, I retired to my room for the night, but could not sleep.

Once more I closely examined the mass of rotten vegetable matter and this time with a strong hand glass. By rare good luck I found a fragment of a leaf hardly an eighth of an inch square. Washing it carefully, I placed it under a microscope which plainly showed up the fractured ends, and the perfect sides of the leaf were determined by the natural termination of the cellular structure. Using a higher power objective on the microscope, out came the cellular structure in all its beauty, and had that insignificant, dryed out, uninteresting looking fragment of nature been green and possessed of life, it would have displayed one of the most wonderful of all nature's wonders, one over which the scientific world is still in the dark, the cyclosis that is so beautifully displayed in the leaves of *Vallisneria spiralis*, or as sportsmen call it, "wild celery," the aquatic herb that is supposed to give that delicate flavor to the canvasback duck. Now then, here is a streak of daylight at last. Where is this *Vallisneria* to be had in sufficient quantities, and in time to do the sea cow any good? I might go to New Jersey and gather it from the numerous drains along the Midland Rail road, that empty into the numerous small creeks and branches of the Hackensack River. There is some of it there, but hardly enough, even if I worked hard all day, to fill a barrel. No, that would not do; there must be some other way out of this difficulty. Let me see. What herb is there that lives in the water which closely resembles the *Vallisneria* both in form and habit? Oh, I have it; I have the secret of the small bits of black and shining roots that I found in the packing. No, not to New Jersey, but to Brooklyn as fast as I can go. But first I must tell the Germans of my discovery.

Finding one of them awake, I asked him how much would he pay me a barrel for the right kind of plants if I could procure them. He awoke his brother, and they consulted together and presently informed me that for closely packed flour barrels they were willing to pay all railroad freight and five dollars a barrel. "All right," I replied, and shaking them by the hand wished them good night and started off on this novel botanical expedition. How fearfully slow the horse car seemed to drag along on its way to Fulton Ferry, and the ferryboat wheels to go round, but at last I did get to Brooklyn, and stopping at the house of a friend who had often accompanied me on various expeditions, I rang him up, told him to dress quickly, and come with me. On the Greenwood cars I recounted all that had happened at the Aquarium within the last twenty-four hours, and the consequence was that he got into as excited a state of mind about the sick cow as I was. After a very brisk walk of four miles we reached our destination. "Now for the sea cow's staff of life by the barrel full," I remarked. I was somewhat disappointed to find the water so high. Well, what of it? I am a good swimmer, and as for diving and being long-winded under water, I think I am there too. High water or low water, that cow must have a good half bushel of special diet within three hours' time.

Off went my clothing and in went I head first. The water was beautifully warm, the moonlight clear and strong and I was happy. Wasn't there five dollars a day ahead of me? or, if I preferred to have it so, a kindly act performed? something to remember all my life? After swimming out a short distance, I thought I had about reached the spot and was in hopes that directly under me was to be found this much-desired manatee medicine. Taking a strong dive and quickly reaching the bottom, I moved about rapidly, but failed to find a particle of the plant. Coming to the surface of the water, I swam off in another direction. Again descending to the bottom and groping about with one hand and swimming with the other, I struck a large mass of the plant. Holding on to the plant with my left hand and passing my right hand close down to the roots, I quickly broke off handful after handful, well knowing that it would rise to the surface and float where I could gather it at my leisure. It was glorious and novel work, this being five feet under water, gathering food for a sick sea cow. When I thought I had collected nearly a bushel of it, I swam back to the shore, and was much pleased to find that most of it had already got there ahead of me. When all the plant was put together I placed it in a bag, and leaving my friend behind to collect all he could till my return, I caught the first dummy train to Greenwood Cemetery and was soon back again to the Aquarium. Handing the bag to the Germans, I sat down to watch the result. They glanced at the plant for but an instant, but in that instant a wonderful change came over their faces, and before I knew it they were grasping my hand. A large bunch was offered to the cow. She aroused herself and eagerly devoured it, and then she took more till all was gone.

They urged me so earnestly to go right back that at last I consented, and surprised them beyond measure when I asked one of them to accompany me so that in future they would know where to obtain the food in large quantities, every day. After that the sea cow improved rapidly, so that the lighter German of the two, when exhibiting, it used to walk on its flat back as it lay in its tank, and they were making arrangements to go to England, when suddenly and most unexpectedly the sea cow died. The skeleton was sold to a museum in Cincinnati for $50. The Germans retired from the manatee business forever, sadder but wiser men.

Now for the botany of this narrative. The Germans had told me that the manatees often descended the rivers to their mouths to feed on a plant that they were very fond of, and that they were often driven out to sea, and being very poor swimmers, perished. To confirm this statement, an acquaintance, who had spent over thirty years on the coast of Florida, dredging and collecting corals, informed me that is was no uncommon thing when working the dredges near the mouths of rivers to find the bones of the manatee in the dredges. I asked him if he could account for the manatee, a fresh water animal, leaving his fresh water feeding ground and preferring one so near the ocean, particularly as the manatee was a very inferior swimmer, in fact, was hardly more than a diver. He immediately answered that without doubt there was some particular family of plants that grew in brackish water near the mouths of the rivers of which the manatees were inordinately fond, and, perhaps, venturing out too far, they were driven to sea during a blow and were drowned. Putting these statements together I formed a theory. I placed an imaginary manatee in one of the drains that empties into a branch of the Hackensack River. The drain and the branch constitute the Indian River, the Hackensack River is the ocean. The most abundant plants that grow in my Indian River at its source (the drain) are *Vallisneria* and the Potamogetons. The fragment of *Vallisneria* leaf found in the packing from Indian River corresponds with the *Vallisneria* in my Indian River. I will place an imaginary manatee in my river. He wanders in search of "pastures new," or perhaps winds blowing in from the ocean (the Hackensack) have driven a few masses of the floating leaves of a marine plant into the manatee's feeding ground. He tastes it and is charmed, determines to seek it out, follows the drain to its mouth, enters the branch and finds a new family of plants, the *Zostera marina* and *Rupia maritima*. My manatee is delighted and concludes to feed on them for the rest of his life, and so he goes on and on till he is at the very mouth of the branch. A storm comes up and he is driven into the Hackensack River (my imaginary ocean) and is lost.

When *Zostera* dies its roots dry up and become in color an intense shining black. The bit of black and shining root I took to be that of *Zostera*, of which the Germans had taken in large quantities near the mouth of the Indian River before entering the ocean and taking steamer to New York, and the bit of *Vallisneria* leaf plainly indicated that the food of the manatee during the early stages of its journey down the Indian River consisted entirely of this plant.

It took me some time to get all these facts, conclusions and guesses together, but when I did get them together I made up my mind positively that the Germans had been looking for *Zostera marina* either in Newtown Creek, New York Bay or places where it did not grow. If they had gone straight for Gravesend Bay, as I did, they would have been all right, or if they had been possessed of but "a little botanical knowledge," an immense amount of anxiety and trouble would have been saved them.

Zostera marina, grass-wrack. Grass-like marine herbs, growing wholly under water from a jointed creeping stem or

root stock, sheathed by the bases of the very long and linear, obtuse, entire grass-like, ribbon-shaped leaves. Common in bays along the coast in water of five to fifteen feet deep (Gray).

The *Zostera marina* and the *Rupia maritima* are the only two herbs that inhabit the salt waters of our bays and rivers and that bear perfect flowers and seeds. All other vegetable forms belong to the grand division of cryptogamic plants known as alga or sea weeds.

The farmer fishermen of our coast use the *Zostera* for composting and bedding down cattle. Several attempts have been made to use it for paper stock, but without success. Previous to the introduction of the Spanish moss hair and excelsior, it was very extensively used by upholsterers, but at the present time has nearly passed out of use. Its grandest use of all is to afford shelter and protection to myriads of the fry of the blackfish, kingfish, weakfish, sea bass, etc., etc. In its beautiful emerald green labyrinths constantly lurks the voracious eel, seeking the helpless fry whom he may destroy—hence the common name of *Zostera marina*, eel-grass. A. W. Roberts.

Cats as Bird Destroyers.—We are friends to the birds. Before the snow has disappeared from the pastures our hearts are cheered by the unseen musicians. Soon we hear them in every lane and valley, and their twittering and warblings seem to hasten the departure of winter. Still later the robin appears in his former haunts, then the swallow and the phœbe birds, and lastly the oriole. The bluebird that in old times was first to arrive, is scarcely ever seen now. Possibly the cat can explain the cause of his absence. Certainly the birds have no worse enemy. As he folds his wings in peaceful slumber at night, the cat prowls about with fiendish intentions. The birds build their nests in the arbors, the tree tops, in the swaying boughs that bend with every breeze, in the vines, and turfs of grass, in the twigs of the berry bushes and among the thorns and briers of hedge row, but nowhere can they escape the sharp claws of the cat, which tears the little fledglings ruthlessly from the nest, and disappointment and sorrow reigns among the songsters of the spring-tide. There are people who glory in destroying birds. They complain that they prey upon cherries, strawberries and grapes. If their ripe peaches are punctured, or the blossoms blighted on their fruit trees, they charge it on the birds. Hence with revengeful spirit they shed the blood of the innocent songsters, little dreaming that the good the birds do in destroying myriads of destructive insects overbalances far their destructiveness. If the reader is an enemy of birds let him keep cats by the dozen. Every step you take you should tread upon the tail of a cat, or disturb him in his stealthy search for a victim. I do not doubt that one able-bodied cat will destroy 500 birds in one season, if at all inclined that way, as most cats are. When we consider that one bird will destroy 10,000 insects in one day, which is probably more good than a cat can accomplish in its "nine lives," I cannot be enthusiastic on the cat question.—*Green's Fruit Grower.*

Heronry Near Philadelphia.—Bethlehem, Jan. 14.—A Philadelphia correspondent would like to know of a heronry within 150 miles of that city. I know of a heronry within six miles of this place; 50 to 100 birds nest there regularly every year, but the proprietor will allow no trespassing.—John F. Rauch. Wilmington, Del.—There is a heronry of quite large proportion within an air line of less than fifty miles of Philadelphia. The birds have frequented the same place for a number of years, and I have taken quite a number of birds and eggs for different local naturalists. I propose visiting the place the coming spring, and would be pleased to take any one there—that is for a good purpose—but positively refuse to take any one but a person interested in natural history. I scorn the idea of having it disturbed by bird fanciers or pot-hunters.—R. B. Gilmer (100 Maryland avenue, Wilmington, Del.).

Meadow Lark.—Syracuse, N. Y., Jan. 10.—While J. F. Wallace, of No. 206 Alvord street, was gunning Jan. 6 (last Wednesday) at East Syracuse, a distance of some four or five miles east of here, he shot a meadow lark in beautiful plumage, and the same is in the hands of T. H. Bex, taxidermist. It is a rare occurrence to find them here this time of the year.—Ed. Collins.

Camp Fire Flickerings.

"That reminds me."

179.

"SOME of the biggest lies told about hunting and fishing are true," said Mr. Less, who in his younger days had been a persistent "proguer," to the company lounging in the store. "For instance, I once had a catfish go into a box trap, take the bait and spring the trap, and I caught him, and the trap was on the upland, too." It was intimated by the party that their credulity was sufficiently strained, and that an explanation was in order. "Well, the facts were these. One afternoon I set a box trap for mink near the edge of the Cohansey, baited with a piece of muskrat. During the night there was a very high tide which flooded the trap, and when I visited my traps the next morning I found the trap sprung, with the catfish inside of it, and the bait inside the catfish." F. S. J. C.

POINTS WORTH CONSIDERING.

1. Because of the compact style of its typography the Forest and Stream actually contains, weekly, more reading matter pertaining to its chosen field than is found in any similar publication in the world.

2. In general excellence the reading columns of the Forest and Stream are of a higher grade than those of any similar publication the world.

3. Taking into account the amount and the character of weekly reading given, the Forest and Stream is away ahead of any similar publication in the world.

4. If a sportsman wishes a sportsman's paper, he will be better suited by the Forest and Stream than by any similar publication in he world.

The *Transcript* speaks of the Russian knout when applied to the Pole as a Pole cat. This is an knoutrage on common scents.—*Boston Commercial Bulletin.*

ADIRONDACK DEER.

Editor Forest and Stream:

I am pleased to note in your issue of the 31st ult. the general good feeling from different sections of the Adirondack woods in regard to the working of the non-hounding law for the past year. The report so far is fully up to my expectations. Of course it was vain to expect the hounding community to relinquish their pet mode of hunting without a struggle. But the idea of trying to bolster it up by untruthful tales spread broadcast, and that would be of no value to their cause if true, shows bad taste if not weakness in their cause. Your Booneville correspondent "D. C." thinks "to save the deer, we ought to have open season from Aug. 1 to Oct. 15, with the privilege of hunting with dogs." He does not give his reasons. If he should one might judge of their soundness or reasonableness. I am at a loss to understand how his plan would help preserve the deer. Of course it would shut out nine-tenths of the still-hunting, as no still-hunter would try to kill before the leaves fell, for he would stand no show whatever. Neither would he kill at that season of the year if he could, as he could not keep it, nor ship it to market. That would give the hounders and jack-shooters living in that section full sway, in fact, monopoly of the whole business, while the sportsmen of the balance of the State could sit and look on. All we still-hunters ask is a fair and equal show. They claim that we could hunt during the open season as well as they. But such is not the fact.

Furthermore, if the open season is to be shortened, it should be cut off from the first end instead of the last end of time. The month of November is all the time that should be allowed to hunt deer, as at this season the fawns are all weaned and able to care for themselves. The season is usually such that venison can be kept or shipped without spoiling. Furthermore, the hunter on snow can follow up a wounded deer and secure it, where he would lose it on the leaves. But if the open season is to be cut off from Oct. 15 to Dec. 1 and the dogs let loose again, then I can see no reason for passing game laws, or for game constables to bother themselves in trying to preserve the game left in the Adirondack woods, as a few seasons' hunting with dogs like that of 1883 and 1884, would reduce the stock so that the dog would be the only resort left to chase down the few that remained. In fact the Beaver River country in the fall of 1884 had been nearly stripped of its game by driving, so much so that it was hard to start a track on the north side of the river in November, by a still-hunter. Hounding parties had camped on the north side of Beaver Lake and run in deer all through September and October, killing as high as six or eight in a single day, until a deer could not be started within three or four miles of the lake. The Fentons had two camps on the north side of the lake that they occupied in November still-hunting. But that fall finished their hunting in that locality as they could do nothing and had to move camp to other more remote sections where there were no lakes within reach or waters that a deer would run into when pressed by the hounds.

Last spring and the early part of summer it was found out that unless something was done more than could be expected from the game constable of that section (Mr. Brinkerhoff), he being in sympathy with the hounders, the latter were going to run deer regardless of the law. So the residents chipped in around and hired a man, whom they could trust, to watch the whole upper Beaver River country. He proved to be the right man in the right place and completely shut off all dogging. Its effects could be plainly seen, as the deer came back around the lake and became so plenty that it was no uncommon sight to see two or three most any evening last fall out in the edge of the lake fighting flies and picking lily pads. Many of the guests at the Fenton House, especially the ladies, became much interested and used to go out riding toward evening on purpose to take a look at the deer. Mr. C. Fenton and also Mr. Dunbar, who keeps a hotel eleven miles above, are both trying by every means possible to save this slaughter of deer by jack-hunting and driving with dogs. They saw that it was a question of only a few years more, at the rate the slaughter was going on, when there would not have been a deer left in their section. The residents of that section pretty much to a man seem to fall in with the new order of things and consider it as a good law. I can but think that the same would have been the case (had some good and active non-hounder been chosen in the place of Mr. Brinkerhoff) all through the Moose River country. It seems to me very essential that our game keepers be chosen from men that are in sympathy with the law. A man acting against his will is quite liable to cast a wrong influence. When any one states that more deer have been killed by still-hunters the past fall than by all other methods any season heretofore, I for one do not believe it. Nor do I believe that the still-hunters are going to annihilate the game, or that the dogs must be let loose again to preserve it. If the law can only be left to stand as it is, a few years will suffice to convince all that our Legislature did a good thing in passing it when they did. Adirondack.

Editor Forest and Stream:

The majority of the people living in this section of the country are satisfied with the non-hounding law. The hotel owners, club house owners and guides are pleased with the law.

The men who are not pleased are the ones who have rented a hotel for a year and want to kill the last deer before the year is up; also the outsiders who want to go into the woods in the fall and camp out for a couple of weeks, and with the aid of a dozen hounds kill or drive every deer off the range.

None of the old-time hounders have indulged in the pastime here this season. I don't think a dozen races were made at this lake the past fall, and we have seen the good effect of it. The deer come to the water late as well as early, and are now yarding within a mile of where I write this at my office desk. Bears also were very plenty around the lake all the fall, owing—without any doubt in my mind—to the fact that no dogs were run, as bears do not like the barking of dogs. A little hounding was done ten miles southwest of here by parties who went from Malone and Loon Lake; but, judging from the inquiries made of the writer and letters received, they lost more dogs than they got deer.

This season has been the best one for still-hunting we have known for a score of years, and yet very few deer were killed—only twenty at Chateaugay Lake, and these by five different hunters; three were killed from this house, two from the Merrill House and fifteen from a hunting camp four miles south of here.

If there is any legislation this winter in regard to the game of our State, let them provide a game protector for each town where needed, appoint good men and true and pay them for their services. If they serve the State, keep them; if not, discharge them and appoint others. Keep a good man at each game center and game will increase.

R. M. Shutts.

Indian Point, Chateaugay Lake, N. Y.

Editor Forest and Stream:

I have no doubt that every reader of the Forest and Stream will be greatly interested in its late acquisition of a pair of pet bears, and grizzlies at that. Still, notwithstanding the fact that all are aware how deeply you are interested in the study of wild animal life, it is not quite clear whether you have lost any grizzlies or not. It seems to me that a pet of this kind, under certain judicious retrictions, might be a valuable adjunct to the office in case any of the pot-hunters, close-season butchers and trout hogs, who from time to time have been so scathingly rebuked in its columns, should make a descent upon it with hostile intentions. The presence of a full-grown grizzly, as an auxiliary persuader on the side of the defense, would have a wonderfully soothing effect upon any irate individual of this class entering the sanctum with belligerent intentions, and enable him to argue the matter with a decidedly more delicate appreciation of the feelings of the party he was interviewing than would be possible under less mollifying circumstances. I suggest that at least one of the little jokers be assigned a place upon the editorial staff to preserve the balance of power and give tone to the establishment. Forked Deer.

San Francisco, Jan. 6.

Editor Forest and Stream:

In reply to a pernicious attack made on the Pennsylvania hunters by some narrow-minded correspondent of the Booneville *Herald*, I beg to submit that, take them as a class, the hunters from our State will compare very favorably for morality and honor with those of New York or any other State in the Union, and may possibly eclipse some of them in the hunt. But this probably is where the shoe pinches. Wm. Williams' party, while hunting in the mountains last season, killed thirty-seven deer and one bear, while several other parties, mostly residents of Herkimer and adjoining counties, located in the same vicinity, hardly succeeded in bagging a single deer. This is what caused green-eyed envy to creep into the bosom of the sylvan scribe, and in order to get even, he sought to vilify them by calling hard names such as "vagabonds" and "pot-hunters." But there may be other grievances gnawing at the heart of the author of the *Herald's* impertinent attack. Wealthy sportsmen going into the woods for a hunt usually hire guides to pilot them in pursuit of the "little cervine creatures," as the *Herald* correspondent tenderly puts it; and as the "law-breakers" feel capable of taking care of themselves, the scribe howled that our boys lived very "scantily" and spent but a "pittance." G. W. Casper.

NOTES FROM A WINTER CAMP.

Editor Forest and Stream:

As long ago as July when we pitched our tent on the shores of Brassua, we promised you as well as ourselves to write a series of letters for your excellent journal; but it is no easy task for a man of the woods to take his pencil and ponder over the phrasing of sentences for critical eyes to read. He may not hesitate, nay, he enjoys to take his corn cob pipe between his teeth, and after locating himself in good range of the hindmost log of the fire-place, a half dozen old mountain salts as his companions, and spin out lies about the size of the trout he caught the day before, or the height of a windfall that a buck deer that he was chasing last winter jumped over. Should he now and then in his narrative stray away from his old-time teachings of Lindley Murray, there is no unkind comment, nothing confronts him at the finish but gaping mouths and dilated eyes, for it is almost a religious dictum among these big-hearted men of the forest to believe, or pretend to believe, every lie that's told them; and the bigger the lie the more unbounded this seeming credulity. But when one puts himself in print he calls forth, not alone criticism on his literary effort, but the wrath of the conflicting witness. With this fear before our eyes we have postponed our advent into your columns until a sufficient number of incidents should really occur to build up a letter that should at least be free from parry and thrust from the latter.

Our cabin is on the south shore of the lake, Norway Point, with its rugged pines, affording excellent shelter from the north winds. The famous deer park, extending from Lower Moose River to Brassua Stream, is within five minutes' walk of camp. This territory, six miles square, presents a sight at present that could not fail to enrapture the eye of any lover of a deer chase. The fall of snow is not yet sufficient to drive the deer to yarding, and their roamings have literally beaten down the snow covering nearly the entire park. The tracks are so numerous that it is impossible to select any particular one and follow it. Reports from all parts of the lake region, however, proclaim deer to be more numerous this season than ever known before.

The fact that deer are plentiful and trout scarce in this section is not a hard one to understand to any one spending a year here in camp. Just as soon as the spring season opens for trout the boats plying the lake are crowded with sportsmen, and the Mount Kineo Hotel, which affords accommodations for five hundred persons, is soon crowded to overflowing. Not a day is to be wasted. On the evening of their arrival they arrange their rods and tackle, and, although many of them make a three-months' stay of it, the next morning bright and early finds them en route to the alleged best fishing grounds. The waters of the different streams are kept in a foam by constant fly-whipping until the law kindly interferes and leaves barely enough grown trout to carry on preparations for the next season's sport. And even the law has no terrors for some of these men, as a neighboring magistrate's docket will bear witness. Many of these self-styled sportsmen catch as many as one thousand trout in a season, and they are proud of it, too; but it costs them persistent hard work every day.

Mount Kineo is the beast center for nearly all sportsmen intent upon the streams and forests of Northern Maine, affording as it does, large facilities by steamer and canoe for fifty miles in any direction. It is curious to note how the preference runs toward summer, rather than winter sports. During the summer Mr. Dennen, of the Kineo House, is con-

stantly at his wits' end to know how to provide for his great number of guests. Yet, almost the first blast savoring of winter that comes from the north overcrowds the homeward bound steamboats, and within a week all is solitude. During the summer a dozen canoes might be seen on Brassua Lake any day, and its banks were dotted with tents, while now, just at the zenith of the real sport of this section, Camp Annie contains the only remnants of the summer boarder. Why is this? Do sportsmen really not care for the larger game? It is certainly more conducive to health, more pleasurable to spend a few weeks of a winter in the woods, especially where game is so abundant and deer can be had for the going for them, than to sit in a canoe with the thermometer in the nineties, engaged in constant battle with black flies, midgets and mosquitoes, with the phantom hope of an occasional trout. And this is the same thing day after day, while in the winter woods, with trapping and shooting, there is always an occurring novelty.

We have, thus far, killed one moose, one caribou and two deer—just enough to satisfy our fancy in the way of hides and horns and supply us with fresh meat. We do not exaggerate when we say that with persistent hunting we believe we could have killed fifty of these animals since the open season came in. Our moose weighed 1,100 pounds and had a fine pair of horns, as did our caribou, which weighed 550 pounds. The deer were small.

Although we have all the romance and solitude pertaining to a howling wilderness, yet we are not, as the uninitiated suppose, shut off from civilization, by any means. Mt. Kineo, our post office, affects a telegraph office and a very good store where all articles necessary to camp life are purchasable. It is a ten-mile trip, on snowshoes, from camp, and is taken fortnightly. We append a bill of fare for our Christmas dinner. Of course we brought many of the delicacies from New York, but most of the articles were obtained here. It will prove to many of your readers that winter camp life is not all bacon and beans, as Nessmuk would lead them to suppose; bat that with a little care exercised in the selection of a location and the forethought to lay in a varied supply, much solid comfort may be experienced within the logs of a winter cabin. Our thermometer has registered 15° below zero, and for a month has clung constantly near the dividing line; yet we have never experienced a day when the closing of our cabin door has been essential to our comfort, so perfect is our shelter. We are comfortable and happy in our seclusion.

THE LYMAN SIGHT.

Editor Forest and Stream:

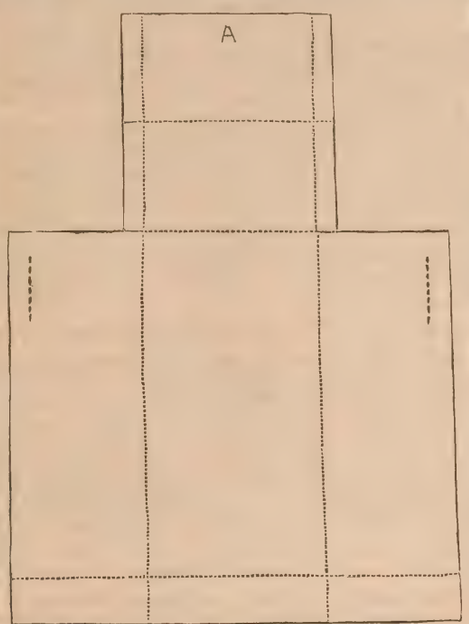
I see that my article of Dec. 17 has been answered by Mr. Lyman, and also by "L." of Akron, Ohio; both take issue with me. I do not think, however, that Mr. Lyman and I are far apart in our views. Recognizing the force of all he says, I still think a middle sight an advantage in some cases, and not in the least in the way, except perhaps in shooting with both eyes open. I do not shoot that way, and will leave it for others to decide that point.

Mr. Lyman speaks of shooting when it is too dark to see the rim of this sight. Now, I have shot and killed at least one deer when I am sure it was too dark to see the hole in his sight. I have also fired at stumps and logs, and am sure I can hit a large object when it is too dark to see through the Lyman sight at all. My experience, however, in night shooting is that I am liable to shoot under rather than over the object. I believe a fair trial with the sight which I recommend, when it is very dark, will show its value if used with a coarse ivory front sight.

Mr. "L." says that my statement that the range of a rifle can be increased by looking high through the Lyman sight "calls for explanation." What explanation? I should like to ask. I said that the range could be increased as much as one lift on a common middle sight, and I say so still. As to how much, that depends on how well the gun will carry up, and from the standpoint of the hunter, who can only guess at his distance, this can best be ascertained by the practice which Mr. "L" speaks of—shooting at objects in the woods and learning how to aim at them. He says the large aperture in a Lyman sight is $\frac{3}{32}$ of an inch. Now with a .40 60 Winchester, 28 inch barrel, the distance between sights is about 26 inches. Suppose your rifle is sighted at 100 yards. The trajectory tests show that at 25, 50 and 75 yards the bullet will rise only two inches (leaving out fractions) above the line of sight, which is near enough an exact level for all ordinary game shooting. At 150 yards, if I understand the trajectory tables, the bullet would fall about $8\frac{1}{4}$ inches below the line of sight. If you look $\frac{1}{5}$ of an inch higher through the Lyman sight the difference in elevation at 150 yards will be $\frac{1.65}{16}$, or $9\frac{3}{8}$ inches.

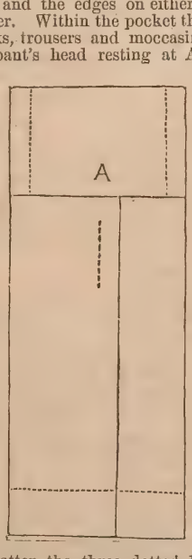
Assuming the above reckoning to be correct, I will do now what I did not attempt to do before, that is to give a rule for varying the range of any good rifle which is sighted for 100 yards. At all distances under twenty rods make no allowances, and what appears fairly over twenty rods up to thirty rods, look through the upper part of the Lyman sight. At a partridge's or squirrel's head at short distance, look through the lower part of the Lyman sight.

I did not, of course, claim anything original in the middle sight recommended in my previous article, but wished mainly to call the attention of deer hunters to the advantage of that form over the buck-horn sight in common use, which takes away almost all the advantage to be gained by the use of the Lyman sight.



In conclusion let me say that I think the trajectory tests will be of great value to sportsmen, and that every hunter should study them carefully. BACKWOODSMAN.

EAU CLAIRE, Wis., Jan. 5, 1886.



COLD-WEATHER CAMP BED.

THE brief description of a sleeping bag, which appeared in a recent issue, has brought us several suggestions with regard to cold-weather beds. The main advantage of the sleeping bag is that it is to all intents and purposes air tight except at the mouth. When once within his bag, it is impossible for the sleeper to kick the clothing off, nor can the wind find its way in at the foot of his bed and chill first the soles of his feet, then his ankles, and then his knees. It will be readily seen that these sleeping bags may be endlessly modified, until finally they cease to be bags at all. Many, many years ago when we first went into the Western country, we were taught to sleep with our feet to the wind, folding the buffalo robe which constituted the outer covering of the bed so that the sleeper reclined on the side flaps, the foot end being snugly tucked far under the feet.

The accompanying diagrams show a camp bed which has been used by Mr. J. U. Gregory, of Quebec, Canada, in his caribou shooting expeditions, and which, he informs us, answers every purpose. The larger of the two diagrams shows the bed open, and in the smaller one it is ready for occupancy. Taking first the larger diagram, the solid lines

denote the margins of the bed, while the dotted ones indicate the folds. When the bed is made up the wings on either side turn over, lapping over each other above the sleeper, and either buckle or button together until about half way up the breast, where there are eyelet holes for a lacing, which can be drawn snug and tight after the occupant has got into bed. The wings having been folded over so that they lap, the bottom of the bed is turned under, following the dotted cross line nearest the foot of the diagram. Then the headpiece is folded from above down to meet the wings and the edges on either side of the headplace turned under. Within the pocket thus formed can be stowed extra socks, trousers and moccasins, which make a pillow, the occupant's head resting at A in the small dia-

gram. In this latter the three dotted lines represent the turned under edges of the folds at foot and sides of head. The bed here described is made of canvas, lined with sheepskin. When it is to be packed in the morning, all superfluous articles are tucked into the pocket, which at night serves for a pillow. This is folded over and over, and the whole bed becomes a small, flat package, which makes only a part of a man's pack.

It has been suggested that such a bed, made of waterproofed material and lined, might be very useful to campers anywhere. The flaps might be separate, except at the dotted lines (in large diagram), so that they need not be used as covering except in cold or wet weather. Or such flaps might be put on either edge of an ordinary sleeping bag, and used indifferently as a covering or to sleep on.

CENTRAL NEW YORK.

Editor Forest and Stream:

Bird shooting in this locality during the past season has been tedious, and could scarcely be termed a pastime. It is the opinion of local sportsmen, however, that the poor shooting is attributable to a general decrease in the number of birds rather than to anything unfavorable in the weather or nature of the season. In 1884 the season was dry, and though the flight of woodcock was much smaller than the year previous, hunters acquainted with the habits of the birds concluded they had sought more prolific feeding grounds for the time being, and would return to their former haunts the following season. Unfortunately the hunters in their calculations shot wide of the mark, for in spite of the fact that the season, which in Oneida and Delaware counties opened Sept. 1, was remarkably wet and consequently favorable for woodcock, these birds were never scarcer in this part of the State, and the isolated specimens flushed by the sportsman or his dog were unusually wild. The unwelcome inference to be drawn from this state of things is that woodcock are rapidly decreasing in Central New York, and that their utter extermination is threatened if measures are not taken to check the destruction of the birds in some manner. Even in the counties bordering on the great northern wilderness the scarcity of woodcock has been noticeable.

Partridges have also been very scarce in this part of the State, and it is feared by sportsmen that these birds may become extinct. Their greatest enemy is the snare, and near Oncida Lake, Camden and Taberg many of these birds are annually taken in this way. A man who resides near Cleveland, Oswego county, is said to have captured between 500 and 600 partridges with snares during the past season. Other parties, who are known to the Utica Fish and Game Protective Association officials, have also been concerned in the business and will doubtless be called to account. Utica sportsmen say they never knew partridges so scarce in this county before. The only way to protect the few remaining in this vicinity seems to be to shorten the shooting season. In the Adirondack region grouse have been comparatively plenty and many goods bags have been made by Utica sportsmen visiting the woods; but even there the shooting is not what it was five years ago.

There are few if any quail in Central New York, although some have been killed between Syracuse and Manlius within two or three years past. In 1878 about fifty pairs of quail were released in the woods of Deerfield, in this county, but they were never heard of afterward, and it is generally conceded that our winters are too severe for these birds.

PORTSA.

DEER IN ARKANSAS.

Editor Forest and Stream:

I notice in your columns a sorrowful wail from the deer hounders of your State, drawn forth by the sad fact that the new anti-hounding law has been partially successful in its object, and the still-hunter in the Adirondacks has been allowed to slaughter a few hard-earned deer in the old legitimate way. No doubt the friends of the shotgun and hound are terribly aggrieved at this fearful state of affairs—I can immagine the feeling of our own local deer drivers under similar circumstances, but if they can be persuaded to submit to the inevitable, it will be best for them to remould their buckshot into rifle balls, and dispose of their dogs to the highest bidder. Send them to Arkansas or to some other unenlightened region, where public sentiment has not as yet learned to discriminate between the true sportsman and the avaricious and unscrupulous pot-hunter, who, for a trifle of gain or a little added reputation, would gladly connive at the extermination of all the deer in the country; or, if you can spare them best, please retain the dogs and send us a few of the Albany legislators who aided in forming the law which is the cause of all your sorrows. They would be gladly welcomed by at least a few of our resident hunters.

We need anti-hounding legislation, and need it badly. Deer are quite plentiful here as yet—in fact, they are numerous anywhere in Arkansas east of the Iron Mountain Railway—but nearly every farmer has one or more deer dogs; town sports are supplied fully as well, and the poor deer, like the "Heathen Chinee," must eventually go unless something is done to put a stop to this murderous style of hunting. If there was nothing else about the noble art of deer-driving to render it obnoxious to those whose feelings of common humanity have not been blunted by constant participation therein, the common practice of allowing a deer to escape after being filled with shot would be more than sufficient. Perhaps nine-tenths of the deer in this neighborhood have "retreated under fire" since the season opened in September, and a fair proportion of those old veterans carry mementoes of the fall campaign in the shape of various sizes of shot, ranging from No. 6 standard up to the largest buckshot. A friend from Peoria, Ill., who hunted with me this fall, killed a yearling buck whose sides were filled with squirrel shot, and last week I shot a large deer and found a handful of No. 5 distributed up and down his hindlegs, from the backbone to within an inch of his hoofs. No doubt the number of deer that die a lingering death from the effects of so-called "misses" amounts to nearly as many as those secured by the hunters.

Last year our game for the first time was thought worthy of protection by our Legislature. Killing deer was prohibited until Dec. 1. As a natural result on the first day of the open season the woods were filled with hounds and their masters, and the deer have been kept on the *qui vive* ever since. Old hunters have declared the "kill" this season to be the largest for many years. Hence the law is pronounced a failure by most of the population, and there is danger that it will be repealed by the next Legislature. In that case we still-hunters will be compelled to resort to the mode of precedure that has wrought good results in former years—in your State among others—simply allowing the deer to pass, and bestowing our full attention and something else upon its canine pursuers. It is a harsh remedy for hounding but is generally found effective.

By a combined effort, however, I believe that the sportsmen of this State might influence the Little Rock lawmakers into trying the anti-hounding law as an experiment for a couple of years, and I think it is the duty of my brother still-hunters to exert themselves to the utmost with this end in view. I could easily procure in this county a half hundred signers to a petition to that effect, and will gladly join in any combined effort to procure such legislation as may be best suited to secure protection to our game.

S. D. BARNES.

BEEBE, Ark.

FOREST AND STREAM'S GRIZZLIES.

Editor Forest and Stream:

You invite the counsel of your friends as to the disposition to be made of that valuable gift, the two grizzlies. I fancy FOREST AND STREAM is in much the same situation as the unfortunate and too enterprising Paddy, who in an evil moment having caught a coon, bellowed lustily for his mates to come and help him "turn the dom baste loose." Still there are several uses to which grizzly bears might be put. For instance, if the editor of FOREST AND STREAM had an idea of going into stock speculations, he might take the grizzlies into partnership, and by introducing them upon the floor of the Stock Exchange he would obtain complete control of the market, in spite of the horny-headed bulls; in fact he would find himself master of the situation. It is said that Vanderbilt did not himself speculate, but controlled the market in which others speculated. FOREST AND STREAM might take a hint from him and bear the market. Or the grizzlies might be commissioned as game wardens and turned loose on Long Island to preserve the few remaining deer that still languish there. Or they might be used as patterns of deportment for the guidance of dudes who travel on street cars. Or they might be chained to the portals of churches in rainy weather to prevent too large crowds from assembling. There are times when they might be highly useful about the White House in Washington, or in the editor's sanctum when spring poets are wont to assert themselves. But none of these suggestions seem to rise to the dignity of the occasion, and as the last shot in his locker, "Coahoma" suggests that brass tags be appended to their ears, with names and dates inscribed thereon, and perhaps the American flag painted across their backs, and that they then be turned loose in the National Park. COAHOMA.

MEMPHIS, Tenn.

NEW ENGLAND GAME.

IF all reports are true, the Maine and New Hampshire open season on moose, caribou and deer, which closed Jan. 1, must have been a losing one to the hunters, and a good one for the increase of those animals. Hunters and trappers in Franklin county, Me., who usually spend the months of October, November and far into December in the woods, come out this year with but little fur and report the season miserable for tracking large game. The same report comes from New Hampshire and Western Maine. It is certain that deer from those sections have not reached the Boston market in anything like former qualities, as has already been stated in FOREST AND STREAM, though Western deer are being received—fifty more saddles being received from Minnesota the other day.

A gentleman from this city, of a good deal of experience in the Maine Woods, left for the Upper Moosehead Lake region the last of November and was absent some four weeks. He killed one caribou, but no moose or deer, though he heard of moose being killed still further north. He reports the deer wonderfully plenty, as indicated by their tracks, but he found them very hard to approach. The ground was either half covered, or with the snow carried away by frequent rains. Such weather made very poor tracking, and he found the deer very shy. He has visited the same sections before, and thinks the increase of deer has been very great. Caribou have also multiplied in his opinion, though he suggests the impossibility of certainty in this direction, from the fact of the roving habits of the animal. Dog hunting he is glad to find to be dead in Maine. But, alas, for the lumbermen. Lumber camps are numerous in the north woods and nearly every camp has its hunters. They are encouraged by the proprietors of the camps in many instances to kill more than one moose, two caribou and three deer, as the law allows every man to do. It affords cheap, fresh meat. These proprietors will pay the hunters rather less for venison than what fresh beef would cost. These logging crew bosses have, as a rule, no interest in the protection of fish and game. Many is the big trout which gets "hooked by the oxen when drinking" from the watering place on the lake. But, alas for the truthfulness of human nature where the appetite is concerned! The "hook" is usually baited with live bait the night before and the watering place is cut where trout most do congregate. In one instance, two years ago, a teamster swore that the "oxen hooked the fish." But he tied the line to the yoke, and as the cattle moved away, the trout, a four-pounder, was drawn out. The lumbermen and loggers, too, must be converted. SPECIAL.

ANTELOPE HUNTING.

Editor Forest and Stream:

I have had considerable experience with the rifle out here in the Far West, having killed almost every kind of game that is to be found out here. I notice an article in the last issue of the FOREST AND STREAM which treats upon the excitement there is in antelope hunting; it is signed "Ex-Cowboy." I cannot agree with the writer when he makes the statement that there is more excitement in antelope hunting than any other, and if he could be with me a few days I think I could convince him that in shooting and hunting the blacktail deer—especially the old bucks that have horns almost as large as an elk—there is more excitement than in any other shooting outside of grizzly bear hunting. To show what a very little amount of cunningness is required to kill an antelope I will relate one of many instances where I have killed them without any trouble. One afternoon early last fall I was out a few miles from our little city, and not finding any game I thought I would try a scheme to get a shot at a coyote. I knew where there was a coyote's den under some lava rock. Shooting a jack rabbit, I placed it near the mouth of the den, and hid myself and waited for the coyotes to come out. I had been waiting only a short while when I caught sight of a moving object in among some rocks fifty yards from the coyote den, to the right. I kept a close watch, and in a short while out stepped a huge lynx. I drew aim on him and downed him in his tracks. As I rose from my crouching position I saw a band of eight antelope that had been startled by the report of my gun and were running directly toward me. The moment I saw them I fell back into my crouching position, and as I did so they discovered me and immediately came to a halt about 200 yards from me. I had only a small .44-40 Winchester with me, and was afraid to try them so far. One who has hunted antelope knows that they possess a greater amount of curiosity than a woman, and if they once see you they will not run away until they have made out what you are. I was well aware of this fact, and soon noticed a disposition on their part to pry a little further into the hidden mystery behind the rocks. They soon began to circle and gradually drew nearer and nearer to me until they had worked up to within fifty yards of me, when I rose and succeeded in killing three of them before they could get out of range. I could relate several instances of a similar nature, which show that any one experienced in antelope hunting can kill them with very little trouble. But it is not so with the black-tailed deer, I assure you. A friend of mine who has a ranch on Snake River, about fifty miles from here, told me that he was out hunting several weeks ago and got into a band of about a hundred antelope, and after they had fed up to within shooting distance of him he killed eleven before they could get out of range. I have this statement direct and can vouch for its truthfulness. I am killing a great many deer just now and hope to be able to give an account of some of my many hunts through the columns of your appreciated paper. CAL.

SHOSHONE, Idaho.

TO PROTECT LONG ISLAND.

THE following bill was introduced into the Assembly at Albany last Tuesday by Mr. Huntting, of Suffolk county. Our comments on it will be found elsewhere:

AN ACT FOR THE PRESERVATION OF WILD DEER, [AND OF EXOTIC SPECIES OF] PARTRIDGES, PHEASANTS AND HARES.

The people of the State of New York represented in Senate and Assembly do enact as follows:

Sec. 1. No person shall hunt or pursue any wild deer [*Cariacus virginianus*] in the counties of Queens or Suffolk, with dogs or otherwise, or cause to be killed any wild deer in the counties of Suffolk or Queens at any time within five years from the passage of this Act. If any dog or bitch shall be found so hunting or pursuing in the counties of Queens or Suffolk, it shall be *prima facie* evidence of the violation of the foregoing provision of this section by the owners of or person or persons having or harboring such dog or bitch. Any person offending against any of the provisions of this section shall be guilty of a misdemeanor, and in addition thereto shall be liable to a penalty of fifty dollars for each and every such violation, to be sued for and recovered as provided by Chap. 534, of the Laws of 1879, as amended for the recovery of the penalties thereby imposed.

Sec. 2. No person or persons shall kill or cause to be killed any [gray] partridge [*Perdix cinerea*], [English] pheasant [*Phasianus colchicus*], or [European] hare [*Lepus timidus*] within five years from the passage of this Act, except such persons, associations, or their agents as shall turn out and stock such gray partridges, English pheasants, or [European] hares, and then only upon the preserved lands. Any person offending against any of the provisions of this section shall be guilty of a misdemeanor, and in addition thereto shall be liable to a penalty of fifty dollars for each and every such violation, to be sued for and recovered as provided by Chap. 534, of the Laws of 1879, as amended for the recovery of the penalties thereby imposed.

To the Honorable, the Senate and Assembly of the State of New York:

We, your petitioners, respectfully represent that the Legislature passed a law permitting deer to be killed on Long Island with dogs also during the months of August, September, October and November. Your petitioners further show that the deer on Long Island are nearly extinct, and can only be found within a radius of a few miles, and in one or two towns in Queens and Suffolk counties. Your petitioners further show that a subscription has been started and can be raised to restock the whole island with deer, provided they can be protected for five years. That the subscription will extend to the stocking the island or a part of it with English partridges, English pheasants and European hares, if such game can be protected by an act of the Legislature of this State. Your petitioners thereupon request that your honorable bodies will be pleased to enact the necessary laws for the purpose afore said.

[The matter of this bill is excellent, but it is somewhat loosely drawn, so that its meaning is likely to be wholly misunderstood. We have therefore introduced in brackets a few words showing that, except in the case of the deer, the bill is intended to protect exotic species, which do not now exist on Long Island, but which will no doubt be introduced in case their protection can be assured.]

THE ILLINOIS GAME WARDENS.—*Editor Forest and Stream:* Our new game law seems to be a success. C. M. Hardy, the warden for this part of the State, has made a very thorough search of the premises of all the Chicago dealers without finding a feather. Last year game was shipped east as late as the last of February, but the new law gives dealers only until Jan. 6 in which to dispose of their stock. Any game found in their posses sion after that date is confiscated. To punish both consignee and consignor by fining the one and confiscating the property of the other—who is pretty sure to be a market-hunter—is what the law aims to do. I purchased a coop of live quail in Chicago last month, but before they could be got into their present comfortable quarters a number of them died. There are nine left, however, and they seem to be as lively as crickets. If they survive the winter I shall turn them out in the spring. Quail were fairly abundant here a few years ago, but cold winters and market hunters have cleaned them all out. If this experiment succeeds I propose wintering over next year as many as I can buy.—HARRY HUNTER (Highland Park, Ill.).

WILDFOWL IN CURRITUCK SOUND.—The month of December and the first few days of January gave no sport at all in Currituck Sound, and it was reported that the house of the Palmer's Island Club was to close for the season about Jan. 8. With the bitter cold weather which spread all over the country about that date, those who were familiar with Currituck Sound predicted grand sport for those who should be there. That the event justified these predictions we have just learned. Two members of the Narrows Island Club, shooting from the same blind, killed in four days 600 fowl, principally canvas and redheads. We give the score of one of these gentlemen for nine days: 25, 26, 10 (a warm, still day, did not go out till afternoon), 29, 19, 62 (44 of them canvas), 135 (92 canvas), 72 (47 canvas), 36 (14 canvas). This gives an average of a little over 45 birds per diem for nine days' shooting, a record that stands very high. We hear occasionally of early autumn shooting at fresh water ducks which is better than this, but it is rarely equalled at sea ducks in winter.

TALLAHASSEE, Fla., Jan. 11.—Deer are unusually abundant in this vicinity this season, and sportsmen are having good success. Mr. Samuel Charis killed nine in a two days' hunt, the Hopkins brothers four, and A. J. Crichlow one. Large numbers have been killed by other parties not known to the writer. The weather has been too dry to make quail shooting as good as it usually is here, but nevertheless some large bags are made daily. A few miles from the city wild turkeys are abundant. Owing to drought waterfowl shooting has been below par inland, but on the coast, twenty miles distant, it is excellent.—H. A. KLINE.

A MATCH HUNT.—New Orleans, Jan. 11.—The annual match hunt of the members of the Southern Sportsmen's Association has begun and ended during the blizzard that struck the Crescent City a few days ago, and which as yet shows no signs of abating. The teams consisted of fourteen men, headed respectively by Capt. Bickham and Capt. Lewis, though both Captain's failed to take the field. The points were as follows: Quail 10, snipe 10, hawks 25, owls 25, woodcock 25, chickens 25, robins 3, doves 5; other game than that named not being counted. The reports were handed in at Febiger's gun store to-day, those not in by noon not being counted. The points scored were as follows: Capt. Bickham's team—H. Fontaine 800, John T. Brodnax 105, L. H. Jury 365, G. H. Green 120, Wallace Wood 130, R. C. Nicholson 620, E. T. Leche 660, E. Dupre 581; total 3,381. Capt. Lewis's team—W. D. Wallace 250, John K. Renaud 420, E. T. Manning 220, F. B. Hoffman 130, R. Frotscher 375, H. Barton 702, total 1,465. From the above it will be seen that Capt. Bickham's team was victorious by a majority of 1916 over Capt. Lewis's team. Mr. H. Fontaine heads the list of points scored with 800, having made them on snipe alone, and, therefore, takes the gold medal offered by the Southern Sportsmen's Association. These snipe were killed at Lafayette, on Mr. R. C. Nicholson's grounds. Mr. Nicholson himself made his score of 620, the third highest, on the same ground, on Saturday, but he had fatigued himself by hunting all day in other places without any luck, and was too tired to bag more than the figure named. Coming up to town the same night he met Mr. Fontaine and referred him to the spot in question, whither that gentleman betook himself Sunday morning, and by hunting all day bagged 80 snipe and secured the gold medal. Mr. Leche, who hunted at Payne Station, scored second highest, with 660. Most of the hunting was done along the Morgan Railroad, the principal points being Lafayette, New Iberia and Payne Station. The cold weather drove the quail to cover and more points were made on snipe than anything else, quail ranking next. About ten woodcocks were killed and a few robins, hawks, etc. Considering the severe weather the scores are deemed excellent, of course ranking much below those of last year, which were made under far more favorable circumstances. It was hard work hunting over the swampy snipe grounds, a thin crust of frozen earth often enticing the sportsman into a knee-deep bog. One or two members of the opposing teams wandered as far away as Orange, Tex., in the hope of killing chickens, but very few chickens died. Mayor Guillotte made a score that would have ranked second—690, but unfortunately could not conform to the conditions and report before 12 o'clock, his achievement being therefore uncounted. Capt. Lewis' team having lost, give the annual hunt dinner. Jan. 14.—The rival teams enjoyed their banquet to-night, and the affair passed off most agreeably. The return hunt which grew out of a challenge by the defeated team, will be shot Jan. 23 and 24, under the same rules as the previous hunt.

FASHION VS. SPORTSMEN.—*Editor Forest and Stream:* It is a common habit of women and non-sporting men to cry out against the killing of birds and animals by sportsmen. On several occasions in my own somewhat limited experience I have heard ladies remark that they did not see how sportsmen could be cruel enough to deprive the poor little inoffensive things of their lives, but when I would point to their gorgeously bedecked bonnets or their elegant fur-trimmed cloaks and ask, "How about these trimmings? They were alive once, and were sacrificed upon the altar of fashion." The answer would be, "Oh, well! that is altogether a different thing; we must have birds for our bonnets." If the fair sex only knew how exceedingly small the number of birds which fall before the sportsmen's guns is, when compared with the victims of the man who makes it a business to kill our most beautiful native birds for the fashionable world, there would be less blame laid at the sportsman's door. Sportsmen of the genuine type kill the birds for food, or more generally for the sake of the invigorating pleasure which a day in the field with gun and dog affords them. Sportsmen never kill birds which are not of the game species and whose flesh is not edible, and they only shoot these in certain seasons. Their guns are never brought to bear upon the songsters, whose presence goes so far toward making the world beautiful. Many people wonder where our native birds have gone. It seems but a short time since they could hear the whistles or songs of a great variety of birds right in their door yards, but now they hear only the incessant chatter of the sparrows. Let these people glance into a milliner's window, and they will quickly see the cause of this disappearance. Imagine for a moment the immense number of birds which are daily used in the making up of artificial breasts and those abortions called fancy birds found in the milliners' shops. Just step inside of one of these shops for a few minutes and you will see the feathers of nearly every bird common to this country, and you will also see great numbers which are so changed and disguised as to be unrecognizable, and still others that you have perhaps never seen. I have noticed upon the bonnets of ladies at a public gathering, the wing or breast of some of our most common birds, such as the bluejay, crow and redwing blackbird, meadow lark, brown thrush, swallow, yellowhammer and others, too numerous to mention. Even the domestic pigeon is slain for the sake of its pure white feathers. Some of the tricks resorted to for obtaining these birds are cruel in the extreme.—WATT (Cleveland, O.).

LOS ANGELES, Cal.—Last year ducks were here by the millions; this year there are scarcely any. Hunters in the mountains report quail as being very scarce also. The dry season is probably the cause. This part of California cannot compare with the north in the game line, although we have a few quite fair hunting grounds. Nigger Slough, six miles from here, is the favorite resort for hunters. One does not need rubber boots nor a boat there, but can get a fair bag on dry land by shooting as the ducks fly over. The flight of ducks lasts only about two hours morning and night. A great many of the small ponds near here are very offensive in smell, owing to dead waterfowl shot by dude sportsmen who are too lazy to gather the game after shooting it.—C. B. W.

RIFLE LOADING.—*Editor Forest and Stream:* I think "En Ami's" method of loading his .40-60 repeater can be improved. Let me give my way. I use a Ballard .38-55. Load the shells full of powder, and put a cardboard wad on top. Insert the loaded shell into the rifle chamber. Then place a round ball (90 to the pound), patched with a linen patch, on the muzzle of the rifle, and push it down to the shell; the ball is left in the rifling just as in a muzzleloader. As a result I get a flat trajectory and no recoil—an excellent thing in squirrel hunting.—TAMARACK (Cargill, Ont.).

TAUNTON, Mass., Jan. 9.—*Editor Forest and Stream:* This year J. C. C. and myself spent two weeks among the shore birds on Monomoy Island, two weeks among the quail, snipe and teal at Harwich, Chatham, Brewster and other towns on Cape Cod, and now and then a day with the quail, partridges and rabbits here at home. We have very good duck and goose shooting among the large ponds here. Our city has probably as many gunners and fishermen as any city of its size in the country. The Sportsman's Club is composed of sporting men and not sportsmen, but the American Fur Company is a body of our best citizens who make a practice of spending their vacations at the Cape. As most of them hunt only fur, however, there is a lack of interest in game protection here. We have four gun clubs in the outskirts, but none in the center of the city.—COHANNET.

A MASSACHUSETTS BATTERY SHOOTER IN THE TOILS.—The complaint of the Massachusetts Fish and Game Protective Association against Orville D. Lovell, of New York, and Nathan E. West, of Osterville, for illegally shooting wild fowl by the use of a battery in Waquoit Bay, was heard last Thursday before Trial Justice Hopkins at Barnstable. Judge Harriman, of Barnstable, appeared for the defense and J. R. Reed, counsel of the association, for the prosecution. The defendants were both held and bound over to await the action of the grand jury.—HUB.

DIDO OF A SPENT BULLET.—Cleveland, Jan. 15.—A relative being requested to kill some chickens one morning, he brought into play a small rifle of the "Hunters' Pet" model. He shot at a young pullet which was perched upon a cock of hay in the upper floor of the barn, and the ball, after killing the chicken, passed through the side of the barn, which was of one-inch pine, and, flying 150 yards, it wound up by crashing through a neighbor's window and falling spent upon the floor. Pretty good performance for a .22 short.—WATT.

THE ADIRONDACKS IN WINTER.—From a letter from Mr. F. A. Walters, Superintendent of the N. Y. State hatchery at Lake Brandon, Essex county, we learn something of the temperatures which prevailed there last week. He writes under date of Jan. 11 and gives the following, all the figures being below zero, Fahrenheit: Jan. 6th, 3°; 7th, 10°; 8th, 14°; 9th, 4°; 10th, 5°; 11th, 8°, and 12th 40° at 9 A. M. He adds: "Although it was four degrees below zero on the 9th, we had a fall of snow which piled up thirteen inches in four hours."

NEW JERSEY GAME LAWS.—At the annual meeting of the West Jersey Game Protective Society at Gloucester City, on Thursday morning, it was resolved to petition the Legislature for the following changes in the game laws: Opening of reedbird season, Sept. 1; squirrel season, from Sept. 1 to Nov. 1; to close the deer season for three years; and to pass a law making it finable for any person to have game in their possession killed or caught contrary to law.

PENNSYLVANIA GAME.—Watsontown.—The past shooting season has been a very good one for deer and pheasants. Many bears have been killed in the mountains close to Watsontown. We look for a great increase in the number of pheasants for next season, the mountains are full of them. During the past season it was not unusual to put up thirty or forty in a morning's hunt.—J. R. H.

A MASSACHUSETTS WILDCAT.—A large wildcat was killed in Taylor's Notch on Mt. Holyoke last Saturday morning. The beast measured 3 feet 10 inches in length, and, from looks, was apparently in a starving condition. A foxhound was so torn by the animal that it had to be killed.

LONG ISLAND.—Atlanticville, Jan. 13.—I killed two frost snipe to-day, which is about four months too early for snipe. The bay is all frozen up now, and there are very few ducks here, though there have been a good many. Think there will be good battery shooting this spring.—H. E. L.

PANA, Ill., Dec. 28.—Game is very scarce here this year, especially quail and rabbits; they seem to have been frozen out last winter. Chickens are collecting now in great gangs, and if nothing happens to them during winter and spring we will have good shooting next fall.—F. A. N.

NEW YORK.—The game committee of the Senate are: Messrs. Vedder, McMillan and Wemple. In the Assembly: Messrs. Hadley, Titus, Berry, White, Demers, Kraus, Haggerty of New York, Doyle and Giese.

NEW JERSEY.—A few of the residents of Seabright and Rumson, Monmouth county, who are interested in shooting, have procured a lot of quail which they will release in spring.

The Cloverdale (Cal.) *Sentinel* reports another danger to which hunters are subjected in that region. It states that about two weeks ago, when the fire, which was plainly seen from Cloverdale, was raging in the mountain back of Mr Allen's place, John Hixson had a narrow escape from death. On the day the fire started, John was out hunting, and, having just killed a deer, lay down in the brush to rest. He presently discovered that the air was quite smoky, and thinking there was fire near by, he picked up his game and started to make his way out of the brush, when, to his horror and surprise, he found he was completely surrounded by the fire, which was making rapid headway with a high wind. Escape seemed impossible; he considered himself a "gone coon," when he came to a deep canyon with water in it. He lost no time in getting to the bottom of it, and by throwing his deer in the water and lying in it himself so as to cover his body as nearly as possible, he managed to save both himself and venison. He was there over two hours, and once during that time he became insensible from heat and smoke. The upper side of the deer carcass, which was out of the water was burned almost black. John says it was the hottest place he ever was, or expects to be in. After the fire passed over, Mr. Hixson made his way home as best he could, and was confined to his bed for four days by sickness, caused by the heat and smoke. It was indeed, a narrow escape.

Another fatal accident has occurred through a hunter being mistaken for a deer and receiving a bullet in the body. In order to avoid these fearful mishaps it would perhaps be better for our hunters to take to dark-colored clothing instead of using the tawny shades now so much in use, and that so resemble the deer skin in color.

NEW RIFLE SIGHT.—The kind you have been looking for. See Fremd's advertisement elsewhere.—*Adv.*

IS IT A MATTER OF TASTE?

Editor Forest and Stream:

The Jews were clean feeders. Why they abhorred a slice of nice ham I don't know, unless their hogs were fattened on beech nuts. In this case I agree with them.

The ducks we get here in the spring are poor, dark in flesh and fishy. On their return in the fall fleshy, fat and juicy.

A grouse in the winter is dry and bitter.

A speckled trout out of a muddy pond is not fit for the table.

Mascalonge, pike, bass or pickerel, if killed in our marshes and bays, are the same, providing they have been there some time and it takes not long to effect the change.

Eggs, no matter how fresh, depend on their mother's gastronomics. I speak from experience. How is this? Simply the food they live on. On a ducking expedition I stayed at a log cabin on an island. They had no meat but lots of fresh eggs. The very thing I craved for, more particularly as the surroundings were anything but clean, and I felt sure they could not foul the inside of a boiled egg. The eggs came on in due course, fresh and done to a turn. My appetite was ravenous. Oh, the vanity of human wishes. I hastily knocked off the top of one. "Pish! The smell—rats!" I exclaimed. And so it was. The old man was a "musk-rat" hunter and fed his hens on the carcases. I went supperless to bed a wiser if not a happier man.

Once on a time I bought in the market a dozen of the finest speckled trout I ever saw; none of less than a pound weight. What a treat I had for my friends. The party sat down with juicy mouths, yet, alas, no wine I could pour down their throats could wash out the mud. I found out later that the fish had been caught in a pond. I never knew of a fish taken in a rapid stream that was not to be relied on as food. I have taken the mascalonge in Pigeon Creek, that runs ten miles through a marsh, and were not worth the trouble of landing, and yet in the lake below, where the bottom was rocky, it was the king of fresh-water fish. No fish that swims in the clear and rapid waters of the St. Lawrence but is worthy of a place in the frying pan.

Just as I was closing this letter I remembered an instance that I think worthy of record as a warning to brother piscatorials. A friend and I discovered a trout pond near the head of the stream (no muddy bottom). We arrived late in the evening and caught enough for supper. The trout were prime. Next morning we fished and fished on till evening, making the largest catch known in that quarter, and the best average. We filled a champagne basket containing nearly 400. We packed them in new pine sawdust, and by the way, a boy showed us a new way of cleaning them. Thus: cutting out the gills and pulling out therewith the entire intestines, thereby not disfiguring the fish by cutting it open. When we arrived in town next day, no such show as the one we exhibited in a restaurant window had been seen before. Our many admiring friends rivalled with each other for their share. After the exhibition we divided up. The next day our friends "soured" on us. They told us the fish were not fit to eat. They all cried turpentine.

Take a lesson my dear friends. Don't use pine sawdust.

R. P. I.

PROTON, Ontario.

AN INGENUOUS RELATION.

Dear Mr. Editor:

Having often read with pleasure the very many interesting accounts of fishing and hunting expeditions contained in your FOREST AND STREAM journal, but never having found one written by a lady, I wonder if a few lines from one would be acceptable?

Although of the "weaker" sex, I have enjoyed many a fishing expedition. The very first one I participated in I shall never forget. Being city bred, my ideas about fishing were very vague and consequently, when this one was proposed, I enjoyed that keen delight with which the young always anticipate a new pleasure. On a bright July morning, a party of sixteen, with two married couples as chaperones, started to camp out on a little island, in the midst of a very lovely lake called Brome, in the eastern townships of Canada. After enjoying a most beautiful drive over hills and on a road as well kept as any city street, we at last reached our destination. It was proposed that we have breakfast and then literally "fish" for our dinner. Never will I forget the pride with which I surveyed my rod and line, for of course, being a verdant one at the sport, the others were all anxious that I should take part in it. After receiving a few instructions, I cast the line into the water, feeling sure of success. Shortly afterward I gave considerable amusement to my companions, by innocently asking "how I should know when a fish was on my hook?" Well, for all my verdancy, I was the first one to catch a fish, and when I drew it in, fully expecting to see it dead, as I thought the hook killed it, I will never forget the terror that seized me, when I saw the nasty, snaky thing wriggling in the air, and as I was too excited to lay the rod down, but held it straight up in the air, the struggles of the fish sent it whirling round my head. I became perfectly agonized with terror and very nearly jumped out of the boat. The screams of laughter from my companions, however, reassured me, but nothing in the world could induce me to touch that fish. After it was taken off the hook and lay quiet in the bottom of the boat and I saw that it was quite a large pike, pride conquered terror and I cast my line into the water again. Success attended my every effort and when the pangs of hunger had made an aching void that only dinner could fill, my string was the largest in the camp. Shall I ever forget our dinner cooked in the woods? It seemed to me, then and always will, a feast for the gods.

The gentlemen of our party then put up our tent and arranged everything for the night. The remainder of the day was spent in boating and fishing as suited our fancy. After supper, while we were enjoying the balmy air and talking of our day's sport, a most terrible storm suddenly arose. The thunder and lightning were truly awful and soon our tent became soaked and we were all in a pretty drenched condition. It was thought advisable by the elders of the party to seek the main shore. Well, we set out, but the night was so intensely dark, we could only guide our boats by the flashes of lightning, and reached land after what seemed to me to be an interminable time. Just as we reached shore a lightning bolt seemed to strike the earth at our very feet, causing two of our party to spring backward into the water. Immediately a tongue of flame shot upward a short distance from us. The gentlemen of our party having seen us safely landed at a hospitable farmer's near by, went to the fire and found a large house completely in flames. They were just in time to get a poor sick woman and her children out of danger, when the whole building collapsed, leaving the owners completely ruined. As the bad weather continued next day and seemed likely to do so, we thought it wisest to return home, which we did next evening, and so ended my first expedition of the kind.

DIANA.

CANADA, Jan. 6, 1886.

THE CHUB AS A GAME FISH.

IN England many of the cyprinoids grow to large size and are counted among the game fishes. In America this family of fishes is a very large one, but as a rule the species are small in size. One, however, the "fall fish," *Semotilus bullaris*, is really worthy the attention of the angler. It grows to a good size, takes the fly readily and is eatable. Its range is given by Jordan and Gilbert as "abundant from Massachusetts to Virginia, east of the Alleghanies." It bears the name of "chub," which is applied to half a dozen different fishes. The only one it might be confounded with is the "horned dace," *S. corporalis*, which, by the way, confines its "horns" to the male in the breeding season, but the latter fish has a larger head, is not as shapely as the fall fish, and has a dark spot on the dorsal fin where the first few rays join the body.

The name "fall fish" comes from its habit of lying below rapids when practicable. We have taken them with the red ibis in Virginia waters and found them to be good fighters. Of course they cannot be expected to equal the black bass or the trout in vigor and staying qualities, but they afford sport.

That they grow to great size in some waters the following extract from "Adirondack Fishes" will show. It is a letter from Capt. L. A. Beardslee, U. S. N., to the author. He says: "Piseco Lake is, or was five years ago, infested by 'Mohawk chubs,' which lie in just the waters that big trout like, and used to rise and strike at anything that a trout will. They have utterly ruined the trolling in the narrows and across some bays, for a chub of from one to three pounds is sure to strike every spoon at about the same time. These fish are the descendants of a pailful of minnows that some twelve years ago were carried to the lake by men who fished through the ice and threw in their surplus bait, hence these chubs, which average much larger than in their native river."

We understand that Capt. Beardslee was trolling for lake trout and these chubs were in deep water. Had they been in shallow water he might have tried them with the fly, in which case he would have found that a chub "of from one to three pounds" was considerable of a fish on light tackle. A trolling spoon, leaded for lake trout, reduces the fighting capacity of any fish, and the good Captain's disgust at the impertinence of a plebeian chub's presumption in coming between him and a trout prevented him from noting any possible game qualities in the despised fish.

Mr. W. T. Loomis bears testimony as to their size in the following extract from a letter: "The last time I was at Piseco, ten or fifteen years since, I took three 'Mohawk River chubs,' *S. bullaris*, I suppose, with a fly while fishing for trout. One of them weighed a pound and a half, I should think."

PROTECTION IN CANADA.

AT the annual meeting of the Fish and Game Protection Club of the Province of Quebec, on the 9th inst., the secretary read the twenty-seventh annual report as follows:

"Your executive committee in reporting the work done by the club during the past year, have much pleasure in here stating that only fifteen actions were taken during the year and all of the accused found guilty and accordingly fined. Out of the fifteen actions, only two were particulary important, one for killing fish with dynamite, in which two persons were engaged; they were fined $20 and $10 respectively and costs, amounting altogether to $56.80. The other case was for killing one deer out of season; two persons were also engaged in this case; one was fined $30 and the other being poor and having no money to pay a fine, however small, was jailed a few days, when, on inquirening as to particulars concerning him, your committee judged fit to concur in his release. The remaining thirteen cases were for petty offenses. If we have no more cases to report it is through no lack of care on our part, or that of the guardians, but that the fish and game laws now appear to be well known, not only to traders, but the public in general. Some of our game keepers seem despondent over it. Altogether the year just past has been an unusually fruitful one. Partridge, our national bird, has been added to the list of birds 'not to be exported.' This has been done through the exertions of your committee, who waited on the Minister of Customs at Ottawa last winter, and with the aid and recommendations of our city representatives in the House, the matter was soon settled. The Deputy Minister of Fisheries and his able assistant, Mr. Beauset, we have also to thank for backing all our efforts. Your secretary during last spring visited and reported on the following rivers, viz., Pamaska, Chateauguay, Richelieu, Beaudet and De Lisle, after which Mr. Beauset made the same round; the consequence is that fish ways have been made in the Chateauguay River at the Nun's Mill, also at St. Martine, so that the breeding fish will now have a fine run, and your committee have the promise of the Deputy Minister of Fisheries that if this proves as successful as expected passes will soon be made in the dams of Howick and Dunham. As regards the other rivers above referred to, they are to be attended to the coming season. A club such as ours should boast of a membership of 1,000, which is considerably above double of our present number. The dinner last year was as usual well attended—*ce va sans dire.* To the incoming committee will be left the management of this year's dinner. We have to deplore the death of several members during the year just ended. Among others, Mr. W. S. Macfarlane, president of our rooms, and who presided at our annual dinner last year, a genial friend and a keen sportsman, also Captain de Montenach, widely known and much respected. Both will long remain in our memory. Before closing we would ask the incoming committee to do all they can to induce the local government to pass a law prohibiting the snaring of partridge. An annual report would not be complete without this. All of which is respectfully submitted. JOHN NELSON, Jr., Hon. Sec."

The election of officers then took place, resulting as followers: President, George H. Matthews; Vice-President, Selkirk Cross; Secretary-Treasurer, John Nelson, Jr.; Committee, W. H. Rintoul, Robt. McKay.

GAME QUALITIES OF THE BASSES.

Editor Forest and Stream:

I notice that "Wawayanda" is not content with the scalp he took from me last summer, but is now after the ears which grow below it. In your last issue he throws down the gauntlet to me and invites me to a contest, Marquis of Queensberry's rules, to see if he cannot name the species of black bass that is hooked, the rounds to be ten seconds. I had thought that he would give me time to get my wind while he was putting on the gloves with "Nessmuk." If I decline he threatens me with "A. N. C.," who he thinks can raise my hair in an artistic manner. Of this I have not the slightest doubt.

I will still claim, however, that the big-mouth has been badly maligned by anglers generally. My old Virginia friend, Alexander Mosely, always spoke of him as a "vulgarian," against which term I invariably protested. I have conscientiously done my duty to the big-mouth in speaking of him as I found him, a strong, gamy fish, which when under two pounds weight is at his best, and very little, if any, inferior to his congenor. In the matter of reliability in accepting the fly I am on record as declaring the big-mouth to be much superior to the other. The first part of this "Wawayanda" does not believe, and is silent as to the second claim.

It is my present notion that if I wished to stock a pond with black bass for fly-fishing exclusively, I should choose the big-mouth. I have gradually dropped out of bait-fishing and have not done any of it in two seasons, and therefore I prefer the fish which I think is the most likely to take the fly. Further discussion on my part seems useless, for I have said all that I have to say and can add nothing more. I read with great pleasure the "Camp Flotsam" stories and smiled when I saw that the genial author was trying to take another rise out of me, and I thought at first that I wouldn't rise to that lure, but afterward concluded to nibble a little and see if he could get any sport out of it. He is as confident and firm in his belief as I am—perhaps more so—but I cannot see just why he left "Nessmuk" to stir me up. "Insatiate archer, would not one suffice?" F. M.

TIP-UP FOR PICKEREL.—Springfield, Mass.—Will some of your readers give instruction in FOREST AND STREAM how to make some first-class tip-ups for fishing through ice? —PICKEREL. [There are several forms of tip-ups in use. Some have spiral springs and triggers to hoist the flag when a fish is hooked. A great deal of ingenuity is displayed in some of these, while others are simple and equally effective. We prefer to let our correspondents tell how they make them and thus bring out different methods.]

TWO HOOKS FOR BASS.—Kansas City, Jan. 9.—*Editor Forest and Stream:* I am a constant reader of your paper and have never seen anything relating to fishing for small-mouthed black bass with two hooks, either with the same bait or different. Will the additional amount of tackle increase the fear and reduce the chances, or will an assortment of bait (live) tempt more fish? I wish some of your learned fishermen would give some light on the subject.—F. W. O.

BLACK BASS IN WINTER.—Kalamazoo, Mich., Jan. 13.—For the benefit of Dr. Henshall and others I would say that the small-mouthed black bass are now running quite freely and a good many are being caught. The ice is about eight inches in thickness and the average temperature of the weather is about zero.—BEN O. BUSH.

QUEBEC.—Aylmer, Jan. 6.—The *Times* of this place reports that Mr. Edward Gravelle and Capt. Noel, his brother-in-law, went to Lake Constant on Monday last, on a fishing expedition, and returned home the same evening with over 100 pike. They were all large ones. They say the fish bit well.

STRIPED BASS IN NEW YORK.—In the Albany Senate last Tuesday Mr. Pierce introduced a bill to exempt striped sea bass from the provisions of the law applying to the fresh-water fish bearing that name.

DECORATION DAY IN NEW JERSEY.—An attempt will be made in the New Jersey Legislature to change the opening day for black bass to May 30 instead of June 1, to provide legitimate recreation for Decoration Day outers.

THE WISCONSIN FISH COMMISSION.

Editor Forest and Stream:

This season will be the most successful of any for the Wisconsin Commission, as far as hatching the largest number of fish is concerned. The commission will have for distribution to the public streams of this State some four millions of brook trout fry, five hundred thousand rainbow trout, three million lake trout, fifty million whitefish fry for the great lakes, and the expectation is that we will have some forty millions of wall-eyed pike for inland lakes.

The first mountain trout eggs were taken this year on the 2d of January; last year the first eggs were taken on the 20th of January; in the year 1884 the fish commenced to spawn on the 20th of February, which goes to show that these fish will, in course of time, become autumn spawners. On Monday, the 4th of this month, one large male rainbow trout was taken from the creek below the fish ponds that weighed some five and three-quarter pounds, this is the largest fish of this kind that has been seen or caught in the neighborhood of the fish hatchery.

The Fish Commissioners of this State have taken great pride in their work and have spared no expense in putting the ponds, buildings, and grounds in first-class order. Through the zeal of the Hon. Philo Dunning, president of the Commission, an appropriation of $24,000 for two years was secured to carry on the work. The past summer there was spent at the Madison hatchery some $6,000 for permanent improvements. The superintendent's residence was moved from its former location to a more suitable one upon the rise of ground, surrounded by a beautiful grove and in full view of the grounds, fish ponds and hatchery houses below. The residence also received a touching up and looks more modern in appearance.

The ponds here when first built were put together in a clap trap kind of way and were out of keeping with the times. This past summer they have most all been rebuilt with two-inch matched planks and made water tight, so there are no cracks nor crevices for little fish to get in and hide and starve to death and die for the want of pure water. The Commission has put up this past season a building the most convenient of its kind of any in the United States. This building is one hundred feet long by twenty-five wide, is built in gothic style and to answer four purposes, feed house, hatching house, aquarium show, and spawning race; all spawning races heretofore known are out of doors. The men that have worked here for years taking spawn know how to appreciate it this winter when they think of times, for weeks on a stretch, when they have, day after day, had to go and handle fish from the spawning race when the mercury was from ten to twenty-five below zero. Now it is all done within six feet of the stove.

The first twelve by twenty-five of the building is used for a feed house where the liver is kept in a box with fresh spring water running through it to keep it fresh and cool. In this room is the chopping machine and meat block for cutting the coarse food for the larger fish. Troughs are arranged with fresh water running through them where the pans are kept with the fine food in them for the young fish. All young fish less than a year old are fed twice a day, and for the first four months three times a day. Underneath the feed house is the wheel house where there is an over-shot water wheel used for driving the chopping machines and the grindstone for sharpening the tools about the place. Along one side of the next room, eighty-eight feet, is a row of glass aquariums with all the different varieties of fish in them, with an aisle of four feet the full length of the aquariums. The next twelve feet in width and seventy-four feet in length is taken up with hatchery troughs running lengthways. On the opposite side of the room from the aquariums is the spawning race, one hundred feet long and six feet wide, underneath the floor. The race is built of two-inch matched planks, bottom and sides, with about six inches of gravel on the bottom. The water at the mouth of the race is eighteen inches deep and runs to a gradual slope up the water wheel to six inches of water. All the water from the ponds above runs through this race and makes a good current of water, and the fish in the pond below are bound to find their way up stream.

Part of the floor of main room for six feet wide makes a covering for the race by means of trap doors eight feet long with strap hinges next to the outer wall, so that when the race needs to be uncovered these trap doors are turned up and rest against the wall. The pond at the mouth of this race is four hundred feet square. All the spawning fish that are in the ponds above during the summer months are let down through the gates to this large pond at spawning time, and when they want to spawn they have to run into this race as the pond is of a mud bottom. When there is any spawning to be done the men go inside the building to the mouth of the race and drop a gate made of perforated zinc. All fish that are inside will have to remain. The trap doors are then turned up, one man with a pair of rubber boots on goes to the head of the race with a gate also of perforated zinc the width of the race and walks down the race with the gate in front of him and drives the fish all before him till he gets them down to where he wants them. He then makes the gate fast, turns down the doors with the exception of the two lower ones, takes his scoop nets and dips what fish he wants into tanks on the main floor where they remain till they are handled over and the spawn taken from them. To feed the vast army of fish that is gathered together here costs from $75 to $125 per month. BADGER.

MADISON, Jan. 3.

LOCAL MOVEMENTS OF THE SALMONIDÆ.

THE following paper was read at the half yearly meeting of the Scotch Fisheries Association, Edinburgh, Nov. 3, 1885, by W. Anderson Smith, Ledaig, Argyllshire:

The general movements of the Salmonidæ, in sea-water more especially, are so little known that it may help the subject if I endeavor to bring together a few facts concerning those frequenting the waters of this part of Lorn. Even should the facts in themselves not be absolutely new they may corroborate, or suggest new departures for, the facts gathered by, or the observations still to be made by, other inquirers.

The great water-way of the Linnhe Loch furnishes an admirable ground for the student of this particular class of fishes. For the lochs that form sub-waters are so extensive, and so wide apart, that the various fishes have ample range and sufficiently diverse conditions to differentiate to a remarkable extent, quite enough to be readily distinguished one from the other by unscientific but otherwise skilled and practical observers. If, in the case of the herring—as is assumed on presumptive evidence—the varieties are mainly produced by variety of feeding provided by each loch or range of feeding ground, this can scarcely be the case with salmon, as this fish cannot be said to feed to any practical extent in fresh water except in its early stages as parr and smolt, when it is just possible the peculiar characteristics may be given, however difficult it would be to distinguish them at that stage.

At any rate the salmon of the various rivers from the Lochy to the Nant gradually find their way into Loch Linnhe, and thence apparently proceed in a great body out to sea beyond Mull. What they do there it would be difficult to assert positively, as facts are greatly wanted in this connection—but the probability is that they go to fatten upon the herring, as most other fishes do that are greatly voracious. That the salmon must be of such a character, is abundantly evident from its rapidity of growth when it once gets to salt water.

These fish go, not in one, but in various shoals through the season, and commence returning early, striking Mull near Lochbuy, and thence advancing by Kerrera toward Loch Linnhe. The consequence of this is, that the man who some years ago commenced a fishery on the island of Kerrera, levied virtual blackmail on the shoals that passed on to all the higher rivers, and made a marked difference on the fishing of such rivers as the Awe.

As the shoals passed up Loch Linnhe the fish of the Loch Etive streams first left the main body, and then those of Loch Creran, Loch Leven, &c. Those of Loch Etive had thereafter to divide as they reached the Nant, the Awe, and the numerous other salmon streams that enter that noble Loch. Now a remarkable but recognized thing is, that while the mouths of the Nant and of the Awe are close alongside, the fish of either will not enter the other beyond a certain point. Thus, those of the Nant may enter the mouth of the Awe should the water of the former river be too low to permit their ingress at all—but they will not proceed beyond the mouth. Again, the Awe fish have been caught at the head of Loch Creran but not in the Creran river. They may blunder so far as to miss the mouth of Etive, but they apparently soon discover their error, and return again upon their course. The difficulty of finding the entrance to Etive or Creran is not little, and it cannot be wondered at that a few fish occasionally fail to leave the main body along with their comrades. But it is to be wondered at that, finding out their error, they should start off again to repair it.

When the fish come in toward the shore, they may be taken in the nets at Dunstaffnage Bay before entering the Etive Loch, and again in Aird's Bay before entering Loch Creran, but once they have entered these lochs their course seems to be straight up toward the head in the case of Creran, or toward the Awe and Nant in the case of Etive. We are not aware of any case (except one) in which salmon have been taken in these lochs in shallowish water or near the shore. Those who "scringe" or seine for sea-trout do not find the salmon among their prey, nor do we believe that the salmon delays in ordinary cases between the mouth of the loch and the mouth of its own river. A friend informs us that only twice in twenty years has he seen a salmon leaping in play in lower Loch Creran, and we have frequently observed the swift course of a salmon near the surface of the water in mid-loch, going straight toward the head of the loch without halting.

The sea-trout, on the other hand, keep close inshore, comparatively speaking, and lay themselves open to the operations of the scringers. At regular intervals, more especially at spring tides in June and July, the sea-trout pass slowly upward along the shore to their various rivers, continuing to do so on till October. By the middle of November they have mostly left the fresh water.

These shoals of sea-trout open up questions of great interest most difficult to answer. "Sea-trout" they are all roughly called in the west of Scotland, but they undoubtedly represent several species, and perhaps many varieties. Not only have the fish of each several stream a character of their own, but they are found intermingled with the *Salmo fario* from the smaller streams, that have taken to the sea, and in consequence donned a livery of silver more or less pronounced. These include the common *Salmo fario*, as well as the species *estuarius*, which may be considered as intermediate. We have little doubt that the *Salmo fario* takes to the sea at certain seasons, when we cannot find a single representative in the small streams that enter the Western Highland lochs. We have found them among the shoals of sea-trout and their dark-colored congeners in the burns. It has long been well known and throughly proved that the external coloring and superficial characteristics of fishes alter readily under changed conditions; and the marked differentiation evident among the various fishes in the different streams, as well as between the same fishes in the said stream or off them in the salt water, point to great facility of alterations and mobility of physical characteristics.

We have also taken in certain streams fishes that we would have called sea-trout but for their complete absence of silver coloring, the marking pointing to them as bull-trout.

These we are disposed to consider sea-trout that have remained long in fresh water and lost their silver coat as the *Salmo fario* acquires it in the salt water.

These sea-trout shoals are most voracious; we have taken young herrings in quantities, and squids also, from their stomachs, and this may be the reason they keep toward the shore in this progress riverward, in place of rushing thither in mid-loch.

The salmon, on the other hand, when it approaches the shore, is not bent on feeding, although we have heard of them being taken by boys with line baited with sand-eels for flounders. They are like our best herring, which are no longer on the feed when they approach the shore for spawning purposes. It is extremely difficult to obtain facts regarding sea-salmon proper, or to distinguish them from the fish of the rivers in the vicinity of the coast where they are captured. Mull and the other islands have rivers and plenty of fish of their own, or else we might seek to ascertain what food they are supplied with when they first make the shores of Mull on their way to Loch Linnhe. These fish are sent to the South untouched, and therefore the question remains unanswered so far as we are concerned. But we wish to direct special attention to the point, believing as we do that the salmon goes to sea in pursuit of the herring, whose oily nature supplies the rich body of the salmon with its heavy juices, until the fish becomes so gorged and plethoric with its wealth of feeding that it becomes a prey to the parasite that is ever ready provided to prey upon any rich constitution. This parasite, and its instincts of reproductions, drive the body of fish from the rich feeding grounds of the outer waters in toward the rivers, in which, although they may swallow some trifling article of food, they may yet be said to live upon their plentiful fat until—reduced to famished and voracious skeletons—they once more, as kelts, seek the outer waters, and the abundant herring harvest that awaits their onslaught.

The fact that a fish will return in six weeks to its native river many pounds inweight additional, points to a rich and plentiful supply of nourishment, that only this "rabbit of the sea," as it has been termed—the herring—prolific and nutritious, could possibly supply to such vast shoals of large and voracious fish.

Had the salmon hunted in isolated bodies like the small shoals of sea-trout, that do not apparently go very far out to sea, and are more readily supplied with an omnivorous diet, it might have been possible to understand their living on a mixed and widespread table. But their coming together in such important bodies, increasing as they pass seaward, points to an important food supply, that only the herring shoals, never absent from these outer waters, can well be supposed to constitute.

The study of the food of most animals goes a long way to elucidate the principles that actuate their movements, and we wish to direct attention to the apparent fact that the salmon returns to the rivers and streams with such a store of vitality that it virtually carries them through the period of gestation and spawning, and consequently what it may or may not eat in these waters is a matter of trifling economic import. What we wish to discover is whether facts have been or are forthcoming to settle if this noble fish preys, like the bulk of our food fishes, upon the herring, as thereby we would arrive at another definite principle whereby its movements could be somewhat calculated,

For the division of salmon in most rivers into spring, summer and autumn migrations may be necessitated by the difficulty of procuring nourishment for the whole salmon population of a river in one great body, and through our modes of fishing out certain migrations we may really be lessening the power of a river, not by lessening its fish capacity, but by too great concentration of the fish shoals, that ought naturally to be spread over the year. We have looked upon the sea as inexhaustible, nor troubled ourselves about how or where the sea-salmon can derive nourishment, but the salmon will doubtless have arranged this to its own satisfaction long ere we set about altering the condition of the problem by unwise and inconsiderate fishing.

In this connection it may be well to add that the sea-trout, while freely devouring herring-sile, does not apparently return so plethoric, nor so capable or willing to starve in fresh water. It is one of the most formidable enemies of the salmon, eating it in quantities in the early stages; and while the youngsters can escape the voracity of the kelts by seeking shallow waters, the sea-trout is too well fitted to follow them thither. The undue protection and cultivation of the sea-trout is a matter to which careful attention should be given. It can people streams to which the salmon cannot aspire, but it levies heavy tribute from the nobler fish, and it may be well to ask ourselves whether the cultivation of the sea-trout conterminously with the salmon in some water is not an attempt to "eat our cake and have it." In the smaller rivers and streams the sea-trout is probably the more valuable economic inhabitant of the two, but in larger rivers it may be found that its presence is purchased at too great a price. At any rate we are satisfied from our observation that the habits of the two fishes are markedly different, and that in the case of the salmon the estuary of a river in such a water system as Loch Linnhe may really and truly extend beyond the island of Mull.

THE HOME INSURANCE COMPANY.—The statement of this company, published in another column, well deserves the inspection of all those interested in insurance. The net surplus of the company is about a million and a quarter dollars. The total assets amount to $7,618,116.08, of which over $3,100,000 consist of cash in bank and United States bonds. Bond and mortgage first liens on real estate held in fee, make up two millions of dollars more, and the remainder consists of railroad, State and city bonds, bank and railroad stocks, and call loans. The statement speaks well for the management of the company.

FIXTURES.

BENCH SHOWS.

Jan. 19, 20 and 21.—Annual Exhibition and Beneh Show of the French Creek Valley Poultry and Pet Stock Association. A. L. Braden, Secretary.

Jan. 26, 27, 28, 29 and 30.—Fourth annual dog show of the Southern Massachusetts Poultry Association, at Fall River, Mass. R. G. Mosher, Secretary.

Feb. 8, 9 and 10.—Fourth annual exhibition of the New York Fanciers' Club, at Madison Square Garden, New York. Chas. Harker, Secretary, 62 Cortlandt street.

March 16, 17, 18 and 19.—Western Pennsylvania Poultry Society's Dog Show, at Pittsburgh, Pa. C. B. Elben, Secretary.

March 23, 24 and 25.—First Annual Dog Show of the New Jersey Kennel and Field Trials Club, Newark, N. J. A. P. Vredenburgh, Secretary, Bergen Point, N. J.

March 30 to April 2.—Third Annual Dog Show of the New Haven Kennel Club. S. R Hemingway, Secretary, New Haven, Conn.

April 6, 7, 8 and 9.—Second Annual Dog Show of the New England Kennel Club. Edward A. Moseley, Secretary, Boston, Mass.

April 14, 15 and 16. First Annual Dog Show of the Hartford Kennel Club. A. C. Collins, Secretary, Hartford, Conn.

A. K. R.—SPECIAL NOTICE.

THE AMERICAN KENNEL REGISTER, for the registration of pedigrees, etc. (with prize lists of all shows and trials), is published every month. Entries close on the 1st. Should be in early. Entry blanks sent on receipt of stamped and addressed envelope. Registration fee (50 cents) must accompany each entry. No entries inserted unless paid in advance. Yearly subscription $1.50. Address "American Kennel Register," P. O. Box 2832, New York. Number of entries already printed **3185.**

THE A. K. C. CHAMPION RULE.

Editor Forest and Stream:

Is there not a trifling inconsistency in Mr. Wade's production in your issue of Jan. 7? The amendments which he calls the "Sensation" amendments are no more than what he advocates in that letter? It strikes me as a little odd that he should advocate the preparation of "a list of shows in the past conspicuous by good management, good judging and good classes, and let them count for champion honors;" and yet when I suggest the recognition of the three clubs most conspicuous in the past for just such qualities, that he should impugn my motives.

There was no American Kennel Club in 1877, but I have heard that the Massachusetts, the Baltimore, the St. Louis and the Westminster Kennel Clubs agreed to adopt the same rules, and that the rules thus jointly passed have, with trifling alterations, prevailed till to-day, or at least till the forming of the American Kennel Club.

These clubs were the leaders of the pioneers in bench show matters in America, and to their joint action and the spirit of friendliness and amity that existed between them is due much of the success of such matters in this country to-day. Three of them have practically gone out of existence, but I see no reason why the trifling tribute to their memory that a recognition of their awards implies should not be accorded them.

When the A. K. C. was formed I advocated the recognition of such shows as had formerly appeared in the W. K. C. list, for the reason that up to that time as far as I know, no question had been raised as to the appropriateness of their selection. I went further and asked that several of the most prominent English shows be included. I had no particular dog in mind; but I thought that an aged animal that had won in his youth should not be turned back to contend with the younger and newer comers. A three-win rule would have kept from the champion class all these accidental brutes that had jumped into the champion class through the inferiority of the class they had won in, or through the incompetence of a judge, and I have seen no reason to change my views since. My views, however, were not indorsed by the majority of the meeting, and the much criticised champion rule was adopted.

If Mr. Wade would forget for a moment that Sensation existed I believe he would agree with me that the amendment I proposed was a step in the right direction and should have been carried. Why, he goes much further than I did and advocates the recognition of every show that had good judges, etc. A fine mess that would get us into. Has he ever heard that shows were held not many years ago at Mineola, Springfield, Watertown, Syracuse, St. Paul, and many more places besides, not bad shows in their day, and where the judging gave at least equal satisfaction with that we have since seen at more pretentious and better exhibitions? Who, if his rule were adopted, would weigh such in the balance? The suggestion is absurd, at least impracticable. Suppose a show held at Podunk. The judges in half of the classes were men of standing and knowledge, in the balance of no position and of dense ignorance. Shall that show be recognized or would he divide the classes according to the judges? If good management, classes and judging be all required, how many shows would reach the standard? No, Mr. Wade's suggestion is not a feasible one, and till a better plan is forthcoming I shall continue to advocate the recognition of all important shows held under the auspices of a club in good standing before the formation of the A.K.C., the awards of the members of the A. K. C. and none others (unless, perhaps, some of the principal English ones), though the result would be that several private shows of real merit like Washington would be left out.

ELLIOT SMITH.

FIELD AND COCKER SPANIELS.

Editor Forest and Stream:

Some time ago you published a letter signed "Cave Canum" asking the question whether a cocker, winner in the champion class, if he became over weight, would go in the champion class for field spaniels, or have to go in the open class and work his way up again. It seems to me that this question involves a still more important one, and that is, should a dog which is capable of winning champion honors as a cocker, be considered worthy of honors in the field spaniel class? It is certain that the rage for blacks has not worked unmixed good by any means, and that the American Spaniel Club's standard allows a loop hole through which dwarfed field spaniels can creep into the cocker class, that is, allowing that there is any fundamental difference between the two.

Any division by weight alone must fail in its object, for typical cockers will occasionally appear, of more than the specified weight, in spite of all the standards ever laid down, and at the same time dogs of the field spaniel type will occasionally be found under the limit, which, if shown as field spaniels will be protested under weight, and if as cockers as not of cocker type, but in the words of Boss Tweed, what are you going to do about it? It is, or should be, admitted that there is a distinction of type between the two, but either this distinction is not made plain enough by the A. S. C's. standard or judges have not followed the standard very closely in their awards. The former is this much true that a muzzle "tapering gradually from the eye" (I don't know whether this is the exact wording, but it is the sense of the passage) is called for. Every dog's muzzle tapers a little, that is, is narrower at the end than where it leaves the skull, and I think the allusion to it a mistake. It makes it possible for owners of sharp-muzzled cockers to say, "Well, the standard calls for a tapering muzzle!" and I do not think this was the intention of the club. The model taken was the head of an English setter, that is a good-headed English setter, only that the muzzle should be shorter, but unfortunately, this is not stated in the standard, and the attempted description of such a head, part by part, is not a complete success—so little so, that a small field spaniel can be nearly correct, since the only distinction made is that "there should not be the heaviness of the field spaniel," which (the mere heaviness) might and in fact would most probably be almost entirely absent in the head of a small, dwarfed specimen.

An evidence that this difficulty exists is found in the fact that Pluto (Obo II.—Critic) won in the open class for field spaniels at the Philadelphia October show, a dog of thirty or thirty-one pounds weight (and perhaps more) but of as good cocker type as any black I know. His dam Critic is another of the same kind, of good cocker type, a producer of dogs of good type, and yet shown and awarded prizes as a field spaniel. Is not this rather absurd?

A weight limit is all right enough as far as it goes, for it will not do to allow dogs to be called cockers which are as big as mastiffs, but I claim that if there is any difference in type, cockers should not be allowed to win in the field spaniel class, simply because they are twenty-eight pounds, or field spaniels in the cocker class, because they are under that weight. If there is not a difference, "Cave Canum's" suggestion should be taken, the standard thrown to the winds, and the breeds divided as bulldogs and pointers are—spaniels over and under twenty-eight pounds. If this is done, no great harm will result, any more than has already resulted from the field spaniel cross, which has certainly been used by most breeders, to get color, substance, length and other desirable points. Fashion has already condemned the sharp muzzle type, both in cockers and field spaniels, and rightly, for it is a most unspanielike formation. I doubt very much whether the field spaniels showing it would be considered good specimens in England. It is certain that Newton Abbot Lady has not a "chisel-face," yet she is considered a very good field spaniel; and more certain still that the brothers in blood and sister of Benedict, which did not come to America, had much blunter, squarer muzzles than he has. Those who remember that English breeders do not usually sell the choice of their young stock to foreign buyers, will perhaps understand how this is.

To conclude, the American Spaniel Club have a task before them, on the performance of which will depend the estimation in which they are held by the general public and the interests of the breeds they patronize, and that is, either to define strictly the difference between these two breeds and insist on the disqualification of specimens of either which are ineligible for their own class on account of size, or to decide that there is no difference, and take measures accordingly. Let us know where we stand. RAVEN.

GREENVILLE, N. J., Jan. 11, 1886.

THE INDIANAPOLIS DOG SHOW.

Editor Forest and Stream:

Considering the season of the year and the inexperience of the managers of the Central Indiana Poultry Association in dog shows, their show here was quite a success. There were about fifty dogs on the benches, besides several litters of puppies, and a great many parties expressed regret at not having brought more in. In all probability they will have a much larger show next year. The quality was only fair, with three notable exceptions in the puppy classes for Irish setters, mastiffs and rough-coated St. Bernards. The puppy in the last class also won in the open class and can hold his own in exceedingly good company. The judging was performed by Mr. T. B. Dorsey, of Ellicott City, Maryland.

AWARDS.

ENGLISH SETTERS.—*Dogs:* 1st, S. H. Socurie's Change; 2d, W. T. Christian, Jr.'s, Colonel. *Bitches:* 1st, C. Valentine's Lucy V.; 2d, H. Bradshaw's Flora Glen. PUPPIES—*Dogs:* 1st, A. Bradshaw's Tramp Glen. *Bitches:* 1st, E. G. Clark's Kate H.

IRISH SETTERS.—*Dogs:* 1st, H. A. Comstock's Royal C.; 2d, U. S. Kennel Club's Dude. *Bitches:* 1st and 2d, U. S. Kennel Club's Flipper and Dimple. *Puppies:* 1st, J. M. Freeman's Grace Glencho; 2d, M. Bowman's Joe.

GORDON SETTERS.—*Bitches:* 1st, M. B. Hitchcock's Rose. *Puppies:* 1st, M. B. Hitchcock's Harry.

POINTERS.—*Dogs:* 1st, G. Seifert's Dan; 2d, C. M. Foster's Spot. *Bitches:* 1st, N. Lanty's Queen; 2d, A. Edmund's Queen. *Puppies:* 1st, H. Coburn, Jr.'s, Tom; 2d, M. R. Williams's Topsy H.

BLACK SPANIELS.—1st, B. D. Walcott's Guardo.

GREYHOUNDS.—1st, W. F. Christian, Jr.'s, unnamed.

MASTIFFS.—*Dogs and Bitches:* No entries. PUPPIES.—1st, G. E. Townley's Ashmont Victor; 2d. K. M. Hood's Duff.

ST. BERNARDS.—ROUGH-COATED—*Dogs:* 1st, W. H. Talbot's Rajah; also 1st in puppy class. *Bitches:* No entries. SMOOTH-COATED—*Dogs and Bitches:* No entries. PUPPIES—1st, Mrs. M. D. Lyfer's Romeo.

NEWFOUNDLANDS.—*Bitches:* 1st, T. Lewis's Creo.

COLLIES.—*Bitches:* 1st, L. Haag's Nellie Pride; 2d, W. Haag's Frank Belle.

TERRIERS.—ROUGH-HAIRED—*Dogs:* 1st, withheld; 2d, T. Lewis's Fret. SKYES—*Dogs:* 1st, Mrs. A. Dorland's Major. YORKSHIRES—*Dogs:* 1st, E. Morrison's Grail.

PUGS.—*Dogs:* 1st, withheld; 2d, W. C. Dickson's Punch. *Bitches:* 1st, E. L. McKee's Trust; 2d, E. Zoller's Nellie.

MISCELLANEOUS.—1st, J. W. W. Sanman's Nippy; 2d, George Vandyke's Tuft. S. K.

THE NEW HAVEN DOG SHOW.

THE third annual dog show of the New Haven Kennel Club, to be held at New Haven, Conn., March 30 to April 2, will undoubtedly prove to be the best given by the club. The premium list will be liberal, and the management have the confidence of exhibitors. A large entry list may confidently be looked for. A new departure will be made in the care of the dogs; the feeding being intrusted to Spratts Patent, who will undoubtedly put forth their best efforts to please the exhibitors as this is their first attempt in this country, though they have had large experience in England. The management have been very fortunate in the selection of judges, selecting gentlemen whose reputation for ability and honesty is such as should insure full classes. The list of judges with the classes assigned to each, is as follows:

Setters and pointers—Mr. John Davidson, Monroe, Mich.

Greyhounds, deerhounds, spaniels, mastiffs, Newfoundlands, bull-terriers, Yorkshire and toy terriers, toy spaniels and Italian greyhounds—Mr. C. H. Mason, Bay Ridge, L. I.

Foxhounds and beagles—Mr. L. C. Sloan, Philadelphia, Pa.

Basset hounds, dachshund, St. Bernards, collies, bulldogs, fox terriers, poodles, black and tan and other terriers—Mr. R. H. Barlow, Philadelphia, Pa.

Miscellaneous—Messrs. Mason and Barlow.

EXPRESSAGE ON DOGS.—Wellsville, N. Y., Jan. 15.—*Editor Forest and Stream:* Some months ago I wrote you of the difficulties and expense attending shipping dogs over the lines of the United States Express Company. You published my letter, together with the release which the agents of that company compelled the shipper to sign before accepting the dogs for shipment. But the United States Express Company to-day carries dogs at regular freight rates—just one-half their former rates. I believe this rate applies to breeders only, but the buyer derives the same benefit as the breeder. This is one step in the right direction.—BURR HOLLIS.

SENSATION.—The Westminster Kennel Club have presented their well-known pointer dog Sensation to Mr. Robt. C. Cornell.

MERCHANT PRINCE.—*Editor Forest and Stream:* The Americans seem to go in for big dogs, they bought the giant St. Bernard Rector, and now they have not been beaten off by a stiff price and have bought Merchant Prince. Rector may be said to have been the biggest dog ever known, being 35 inches at the shoulder, and Merchant Prince is only one inch less. To convey an idea of what this means, supposing he entered into one's room, he would considerably, at the shoulder, overtop the dining room table, and his head carried high would be on a level with our mantel piece, and his weight 190 lbs. just as heavy as a big Yorkshire farmer. The spirited purchaser of this grand dog, Mr. E. Moore of Boston, is to be congratulated, for Merchant Prince will be sure to leave his mark for all future time upon the giant race of Yankee St. Bernards yet to come, for as a stud dog he combines the direct blood of our two oldest champions, Barry and Bayard. He is only two years nine months old and has won over twenty prizes, or an average of one in a fortnight all through the year. In January he took first and cup, at Crystal Palace; in June first Glasgow; in July first, Darlington; in August first at Bangor and special, beating Bayard; in December, first Birmingham, and the same month he crowned all by taking first and cup in the open class at the last St. Bernard Club show, and this we consider a wonderful feat, because it was admitted on all hands that there never was such a collection of high class dogs brought together. We bid our noble friend adieu, and much luck to his new owner, in the new country. We will not say that we shall never look on his like again, for such are the strides made by St. Bernard breeders in England that they go on from excellence to greater excellence, and no sooner does one champion vanish from the scene but another grander and more beautiful steps into his place.—SYDNEY W. SMITH (79 York Road, Leeds, Yorkshire, England).

HOW TO APPROACH A DOG.—"Dan Browne," who is probably "Seneca," says in the Rahway, N. J., *Advocate*: Mad dogs are scarcer than hens' teeth, and always have been. I have doctored and bred dogs, hundreds of them, and have been sent for perhaps a dozen times to see a real simon-pure mad dog. The first question I would put to the dog's owner would be, "Does the dog froth at the mouth?" Each owner invariably replied in the affirmative, and would manifest the utmost concern when I thereupon walked straight up to the animal, let it smell my hand, and then loosened its collar or removed its muzzle as the case might be. A mad dog never froths at the mouth, but nearly every man, woman and child in the world believes to the contrary. And the worst of it is, that the belief has become so rooted through its constant repetition by ignorant persons, that it is well nigh impossible to make people believe otherwise. A man who signed his name with an "M. D." after it not long ago wrote to a New York journal about his adventure with a mad dog, which he saw coming along a country road at great speed. The "M. D." took to his heels when the dog got near, and as the dog immediately changed its course and pursued the frightened doctor, he therefore immediately concluded the dog had rabies and managed to shoot it with a revolver. Now if this poor foolish "M. D." had only possessed sense enough to stand stock still in his tracks, or to walk along quietly minding his own business, the dog would have passed without taking the slightest notice of the man. I have handled strange dogs a good deal in my life, and I have yet to receive my first bite from one of them. Walk up to a strange dog as you would to a strange man, as if you wanted to talk to him about the weather, and he won't bite you; but sneak up to him as though you are in imminent fear that his intentions are dishonorable, and the strange dog, if he is ugly, will nab you in a jiffy—and you deserve to be nabbed. Turn your back and scuttle away and the dog will chase you; but walk right up to him as if you had as much right there as he—not threateningly, however—and he will not molest you, no matter how ugly his disposition.

KENNEL NOTE BLANKS.—For the convenience of those persons who have occasion to use a number of our Kennel Note blanks, we have prepared a special series of 200 blanks of each class, bound in convenient form, and so arranged that a duplicate of each blank sent us may be kept by the sender for his own future convenient reference. These pads will be sent on receipt of 30 cents, including postage.

DEATH OF RABY TYRANT.—Hillside Kennels, Jan. 17.—*Editor Forest and Stream:* I had the misfortune to lose Raby Tyrant to-day. He got through the wire fence into the deerhounds' yard and caught Lance by the throat. The others cut him to pieces in a few seconds. I feel as if I had lost an old friend.—BAYARD THAYER.

THE NEW YORK FANCIERS' SHOW.—The entries for the New York Fanciers' dog show close on Tuesday next. The managers will spare no pains to make this department of their annual shows as successful as those devoted to other exhibits, and it is to be hoped that exhibitors will second their efforts by a liberal entry.

WANDA T.—Hoboken, N. J., Jan. 13.—*Editor Forest and Stream:* My cocker spaniel bitch Wanda T. has been booked under a wrong pedigree. She is by Don instead of Col. Stubbs. —E. F. THOMAS.

KENNEL NOTES.

KENNEL NOTE BLANKS.—For the convenience of breeders we have prepared a series of blanks for "Names Claimed," "Whelps," "Bred" and "Sales." All Kennel Notes must be sent to us on these blanks, which will be forwarded to any address on receipt of stamped and directed envelope. Send for a set of them.

NAMES CLAIMED.

☞ **Notes must be sent on the Prepared Blanks.**

Compton. As a prefix to the names of all spaniels owned and bred by Arthur E. Rendle, the following in particular: Champion Compton Brahmin, Compton Gladys, Compton Bedouin, Compton Zelda and Compton Sheila.

Belle Meade. By Coffin, Zimmer & Co., Glens Falls, N. Y., for orange tawny and white St. Bernard bitch, whelped Oct. 7, 1885, by Czar (Don—Gretchen) out of Laone (A.K.R. 2416).

Donna. By Shaw & Bates, Clinton, Mass., for fawn mastiff bitch, whelped Nov. 17, 1885, by Agrippa (A.K.R. 449) out of Delph Viva (A.K.R. 1432).

Dorcas. By Shaw & Bates, Clinton, Mass., for fawn mastiff bitch, whelped Nov. 17, 1885, by Agrippa (A.K.R. 449) out of Delph Viva (A.K.R. 1432).

Duva. By Shaw & Bates, Clinton, Mass., for fawn mastiff bitch, whelped Nov. 17, 1885, by Agrippa (A.K.R. 449) out of Delph Viva (A.K.R. 1432).

Dina Stubbs. By A. F. Hausmann, Binghamton, N. Y., for chestnut and tan cocker spaniel bitch, whelped Nov. 15, 1884, by Colonel Stubbs (Captain—Flirt) out of Daisy Coon (Racer—Nellie C.).

Flossy Stubbs. By A. F. Hausmann, Binghamton, N. Y., for liver and white ticked cocker spaniel bitch, whelped Nov. 15, 1884, by Col. Stubbs (Captain—Flirt) out of Daisy Coon (Racer—Nelly C.).

Hilda. By A. F. Hausmann, Binghamton, N. Y., for black cocker spaniel bitch, whelped May 4, 1885, by Obo, Jr. (Obo—Nellie) out of Beauty W. (Obo II.—Lofty).

Putnam. By F. C. Moore, Ashtabula, O., for white and black English setter dog, whelped Sept. 11, 1885, by Pride of Dixie (Gladstone—Countess Druid) out of Prue (Perfection—imported Beauty).

Don of Dixie. By F. C. Moore, Ashtabula, O., for black and white and ticked English setter dog, whelped Sept. 11, 1885, by Pride of Dixie (Gladstone—Countess Druid) out of Prue (Perfection—imported Beauty.

Dick J. By F. C. Moore, Ashtabula, O., for white and chestnut ticked English setter dog, whelped Sept. 11, 1885, by Pride of Dixie (Gladstone—Countess Druid) out of Prue (Perfection—imported Beauty).

Harry Obo. By A. F. Hausmann, Binghamton, N. Y., for black

cocker spaniel dog, whelped April 30, 1885, by Obo, Jr. (Obo—Nellie) out of Phonsie (Obo II.—Blackie III.).

Wanda. By A. F. Hausmann, Binghamton, N. Y., for black and white cocker spaniel bitch, whelped Oct. 15, 1885, by Colonel Stubbs (A.K.R. 302) out of Daisy Dean (A.K.R. 304).

Anita. By A. F. Hausmann, Binghamton, N.Y., for liver and white cocker spaniel bitch, whelped Oct. 15, 1885, by Col. Stubbs (A.K.R. 302) out of Daisy Dean (A K R. 304).

Sonsie. By W. G. Simons, Manchester, N. H., for red Irish setter bitch, whelped May 10, 1885, by champion Elcho, Jr. (Elcho—Noreen) out of Ruby (Berkley—Syren).

Shady. By Fred H. Perrin, Boston, Mass., for black cocker spaniel dog, whelped Aug. 29, 1885, by Obo II. out of Darkie.

Cathcart's Echo, Albert, Dude and Wonder. By J. A Cathcart, Atlantic City, N. J., for four red Irish setter dogs, whelped Sept. 11, 1885, by champion Chief (A.K.R. 231) out of Lady Bess (Dash Elcho—Bess).

Count Rapp. By P. Cullen, Salmon Falls, N. H., for black cocker spaniel dog, whelped Oct. 28, 1885, by Black Knight (Obo II., A.K.R. 432—Darkie, A.K.R. 250) out of Bessie C. (Obo II., A.K.R. 432—Darkie, A K.R. 250).

Black Spectre. By P. Cullen, Salmon Falls, N. H., for black cocker spaniel dog, whelped Aug. 29, 1885, by Obo II. (A.K.R. 432) out of D rkie (A.K.R. 250).

Sparrow. By P. Cullen, Salmon Falls, N. H., for black cocker spaniel dog, whelped Aug. 29, 1885, by Obo II. (A.K.R. 432) out of Darkie (A.K.R. 250).

Mac Kavett. By A. C. Pickhardt, New York, for liver and white pointer dog whelped Feb. 17, 1885, by Hecksher's Dan (Strong's Pete —a bitch of Gen. Wade Hamptou's) out of Johnson's Polly (Croxteth —Dolly Varden).

Hector. By J. W. Newman, Boston, Mass., for white bull terrier dog, 8yrs. old, by Keily's imported Brick out of Doyle's Bessie.

Lee II. By John Kaschenbach, Wilkesbarre, Pa., for black, tan and white beagle dog, whelped Aug. 20, 1885, by Dodge's Rattler (Turner's Warrior—Rowett's Rosey) out of Dodge's Spider (Rally—Dodge's Dolly).

Laone II. By Coffin, Zimmer & Co., Glens Falls, N. Y., for orange tawny and white St. Bernard bitch, whelped Oct. 7, 1885, by Czar (Don —Gretchen) out of Laone (A.K.R. 2416).

Fritz. By S. M. Young, New York, for red Irish setter dog, whelped Jan. 1, 1885, pedigree not given.

Minnehaha. By Walter A. Lovering, Nashua, N. H., for rich brindle, white breast, bull bitch, whelped Oct. 31, 1885, by Guillermo (A.K.R. 671) out of Patti (A K.R. 2528).

Dido. By Walter A. Lovering, Nashua, N. H., for white bull bitch whelped Aug. 1, 1885, by Guillermo (A K.R. 671) out of Lilly Langtry (A K.R. 2453).

Nimrod, Jr. By Freestone Kennels, Middletown, Conn., for red Irish setter dog, whelped Aug. 28, 1885, by champion Nimrod (champion Elcho—Lorna) out of Bizorah (A.K.R. 1388).

Doctor Tryon. By Freestone Kennels, Middletown, Conn., for red Irish setter dog, whelped Aug. 28, 1885, by champion Nimrod (champion Elcho—Lorna) out of Bizorah (A.K.R. 1388).

Rose Bud Kennels. By F. E Lee, Southington, Conn., for his kennels of sporting and non-sporting dogs.

Boston Kennels. By J. W. Newman, Boston, Mass., for his kennels of bull terriers, Newfoundlands and fox-terriers.

BRED.

☞ **Notes must be sent on the Prepared Blanks.**

Titania—Sam. Essex Kennels' (Andover, Mass.) pug bitch Titania (A K R. 471) to Forest City Kennels' Sam (Young Toby—Judy), Jan. 6.

Nellie—Dutch, Jr. By George W. Dixon's (Worcester, Mass.) bull-terrier bitch Nellie (A.K.R. 2194) to R. H. Dudgeon's Dutch, Jr. (A.K.R. 1887), Jan. 11 and 12.

Posey—Fly. Jas. E. Hair's (Bridgeport, Conn.) Italian greyhound bitch Posey (Prince—Gypsey) to his Fly (Duke—Topsie), Nov. 6.

Darkie—Toots. H. Goodwin's (Manchester, N. H.) pointer bitch Darkie (Nat—Lill) to Julius E Wilson's Toots (A.K.R. 21), Jan. 7.

Gala Day—Duke Royal. H. A. Saunders's (South Norwalk, Conn.) pointer bitch Gala Day (Vic—Flirt) to A. A. Raymond's Duke Royal (Nat—Susie Royal), Jan. 4.

Lady Charm—Royboy. Associated Fanciers' (Philadelphia, Pa.) collie bitch Lady Charm (Wolf—Eva) to their Royboy (Roy—Nellie), Jan. 6.

WHELPS.

☞ **Notes must be sent on the Prepared Blanks.**

Posey. Jas. E. Hair's (Bridgeport. Conn.) Italian greyhound bitch Posey (Prince—Gypsey), Jan. 8, three (two dogs), by his Fly (Duke—Topsie).

Mystic. Dr. J. J. Board's (Lynch's, Va.) beagle bitch Mystic (Ringwood—Myrtle), Dec. 1, five (three dogs), by A. C. Krueger's Bannerman (A.K.R. 1709).

Miss Nance. S. R. Hemingway's (New Haven, Conn.) cocker spaniel bitch Miss Nance (A.K.R. 1313), Jan. 1, seven (four dogs), by J. P. Willey's Obo II. (A.K.R. 432); one white dog, the others black.

Hazel. Dr. C. B. Hammond's (Nashua, N. H.) fox-terrier bitch Hazel (A.K.R. 1987), Dec. 21, six (three dogs), by John E Thayer's Mixture (champion Spice, E. 9,859—Fairy III.); one since dead.

Lady Mac G. H. Nixon's (Leesburg, Va.) pointer bitch Lady Mac (Faust—Gertrude), Nov. 5, seven (five dogs), by his Joker, Jr. (Beaufort—Nymph).

Daisy Dean. Fishel Bros.' (Hope, Ind.) Irish setter bitch Daisy Dean (Sancho—Queen Astoria), Dec. 22, eleven (six dogs), by B. B. Jones's Swing (Rufus—Fan).

SALES.

☞ **Notes must be sent on the Prepared Blanks.**

Obele. Red Irish setter dog, whelped Aug. 1, 1885 (A.K.R. 3067), by Harry A. Fletcher, Portland, Me., to Charles A. S. Holland, same place.

Dick J. White and chestnut ticked English setter dog, whelped Sept. 11, 1885, by Pride of Dixie out of Prue, by F. C. Moore, Ashtabula, O., to R. P. Jones, Fayette, Mo.

Topsey White, black and tan beagle dog, whelped April 10, 1885, by Duce out of Juno, by A. C. Krueger, Wrightsville, Pa., to Campbell Brown, Spring Hill, Tenn.

Bell. Black and tan beagle bitch, whelped Aug. 18, 1885, by Grand Duke out of Gipsey), by A. C. Krueger, Wrightsville, Pa., to Associated Fanciers, Philadelphia, Pa.

Arly White, black and tan beagle bitch, 1½yrs. old, by Bluecap out of Lill, by A. C. Krueger, Wrightsville, Pa., to Associated Fanciers, Philad. lphia, Pa.

Bessie Obo. Black cocker spaniel bitch, whelped April 1, 1885, by Obo II. out of Hornell Ruby, by T. W. Watkins, Boston, Mass., to W. H. Beede & E. A. Haight, Lynn, Mass.

Rattler—Spider whelp. Black, white and tan beagle dog, whelped A g. 20, 1885, by J. N. Dodge, Detroit, Mich., to John Kaschenbach, Wilkesbarre, Pa.

Colonel Stubbs—Daisy Dean whelps. Cocker spaniels, whelped Oct. 15, 1885, by A. F. Hausmann, Binghamton, N. Y., a black, white and ticked dog each to F. I. Bayless ond Cyrus T. Strong, same place, and a liver, white and ticked bitch to Leveret Barnes, Washington, D. C.

Dude (A.K.R. 1842)—Dimple (A.K.R. 1841) whelps. Red Irish setters, whelped Oct. 12, 1885, by U. S. Kennel Club, Lafayette, Ind., a dog to John Singley, same place, and a dog and four bitches to Jas. A. Hill, Mechanicsville, Ia.

Dunrobin—Shellock whelp Deerhound bitch, age not given, by Geo. Shepard Page, Stanley, N. J., to R. M. Boyd, Racine, Wis.

Judge—Lucy whelp. White, black and tan beagle, whelped Jan. 28, 1885, by N. Elmore, Granby, Conn., to J. K. Roe, Newburg, N. Y.

Saxon—Zook whelp. White bull-terrier, whelped Oct. 10, 1885, by Associated Fanciers, Philadelphia, Pa., to Arthur Readle, Pawtucket, R. I.

Young Obo—Hazel Kirke whelp. Brown cocker spaniel dog, whelped Aug. 31, 1885, by Herbert Flint, Haverhill, Mass., to Henry Macomber, Taunton Mass.

Obo II. (A.K.R. 432)—Darkie (A.K.R. 250) whelps. Black cocker spaniel dogs, whelped Aug. 29, 1885, by P. Cullen, Salmon Falls, N. H., one to Fred H. Perrin, Boston, Mass., and one to James M. Courson, Dover, N. H.

Mixture—Nettle whelps. Fox-terriers, whelped Aug. 19, 1885, by W. H. Cookson, Hudson, N. Y., a black, tan and white dog to Chester A. Miller, same place; a black, tan and white dog and lemon, tan and white bitch to J. M. Overton, Cambridge, Mass., and a tan and white bitch to Horace Ketchum, Albany, N. Y.

IMPORTATIONS.

Ananias. Bedlington terrier dog, whelped May 13, 1884 (Quayside Lad—Jean), by W. S. Jackson, Toronto, Ont., from J. S. Watson, Newcastle-on-Tyne, Eng.

Sentinel. Bedlington terrier dog, whelped Aug. 31, 1883 (Pioneer—Dusky), by W. S. Jackson, Toronto, Ont., from J. Corrforth, Leiston, Eng.

Beatrice. Sable and white collie bitch, age not given (Wolf—Eva), by Associated Fanciers, Philadelphia, Pa., from I. J. Steward, Clifton, Eng.

Lady Charm. Sable collie bitch, age not given (Champagne—Brenda II.), by Associated Fanciers, Philadelphia, Pa., from I. J. Steward, Clifton, Eng.

DEATHS.

Donald II. Liver and white pointer dog, 3½yrs. old (A.K.R. 2515), owned by Clifton Kennels, Jersey City, N. J., Jan. 17.

KENNEL MANAGEMENT.

☞ **No Notice Taken of Anonymous Correspondents.**

M. T. M., Easthampton, Mass.—A pointer, 8mos. old, is paralyzed in foreleg. Ans. It will be impossible to give advice without further facts as to cause, duration, symptoms, etc.

S. A. B., Fond du Lac.—My young Irish setter, four months old, has one of his legs bent at the knee. Do you think it was caused by a sprain? What shall I do to straighten it? Ans. Consult a surgeon. It might be straightened and put in splints. The bones of puppies are very pliable.

J. C., Madison Avenue.—I have a fox-terrier nine months old, apparently in good health, with hearty appetite and regular in bowels, but its coat is shedding too freely, apparently, for this season of the year. Are worms the cause? Ans. Shedding hair is not a sign of worms. Keep his bowels free and give five drops of Fowler's solution of arsenic twice daily in the food.

E. B. B., Hartford.—Will you kindly inform me what is good for weak eyes in a dog. Every morning there will be quite a collection of matter in the corners of them which I conclude is caused by weakness. Otherwise the animal is well and lively. Ans. Drop a weak solution of zinc sulphate into the eye night and morning. The strength should be one grain to the ounce of water and only a few drops used at a time.

Miss C. R., Warrensburg.—What shall I do for Irish setter, 3yrs. old, that has distemper for second time? Ans. Commence treatment by giving 10 grains of quinine. Keep the fever down, if present, with three-drop doses of aconite tincture. You may use alum water for running at the eyes, or borax and glycerine, sponging carefully as often as is necessary. Inhalations of carbolized steam are exceedingly beneficial. If exhaustion be present, you must depend on brandy and whisky. Repeat quinine once.

C. F. C., Waterbury.—For the past year my dog has been sick at stomach a great deal, throwing up phlegm continually. For the past two weeks he is much worse, with two large lumps in his throat, being very weak, hardly able to stand up. Aus. From description should say that your dog has chronic indigestion. He also seems to have enlargement of thyroid gland. Be careful with his diet. Feed on milk and fluid food; give a little raw meat each day minced and mixed with the white of an egg. Add five drops of Fowler's solution to the food once daily.

W. O. M., Erie, Pa.—About two years ago you gave me valuable information as to the treatment of an abscess on my setter dog's ear, and by your directions I cured him. A tumor on my pup's neck, immediately below the right ear, is swelling toward the front part of the neck. Possibly it was caused by a blow from a hard snow ball. The pup is 8 months old and lively as a cricket; the lump on his neck is round and quite hard, about as large in circumference as the top of a tea cup, does not stick to the skin, I think, but seems attached to the meaty part of the neck. It does not pain him any. We noticed it a week ago; it seems to be growing rapidly. Ans. We should say that the swelling was an abscess. If a hypodermic needle brings pus from it, it proves that it is such. An abscess should be opened at once. If it is a solid tumor it should be removed. See a good surgeon.

K, Wrightsville, Pa.—It looks decidedly as though in the case of your puppies there was some form of twisting or strangulation of the gut, and as a result of this, inflammation was set up and the fluid was partly inflammatory and partly from obstruction to the circulation in the part. If this diagnosis is correct the treatment would be to try to straighten the gut. Holding the animal by his hindlegs and shaking sharply while inverted will sometimes overcome a twisted gut (volvulus) or an invaginated intestine (intussusception). An enema may be given, but never a cathartic. When inflammation is present (swollen, painful abdomen with fever) aconite tincture in one drop doses every two hours to a puppy. Hot cloths to the abdomen with a few drops of turpentine mixed in, gives relief, opium hypodermically, two or three minims (drops) every three or four hours or a few drops of laudanum modifies the pain and the inflammation. The outlook in such cases is always bad.

Rifle and Trap Shooting.

WORCESTER, Mass., Jan. 8.—A goodly number of sportsmen went out to the Pine Grove Range yesterday to the regular meet under the auspices of the Worcester Rifle Association. Only a few records were made. The American target was used with the following result:

	Record Match.									
Rice	9	10	6	8	5	8	9	6	4	6—71
Jones	5	6	6	8	5	10	7	9	6	8—70
Fuller	3	9	6	9	4	7	7	3	6	6—66
Clark	8	7	5	6	3	6	7	4	4	7—57
	Practice Shots.									
Fuller	10	8	7	8	6	8	6	10	7	7—77
Jones	8	10	9	2	10	10	6	8	7	7—77
Rice	9	9	5	4	5	7	7	9	9	8—72
Clark	6	8	10	5	6	7	6	6	9	5—68

SPRINGFIELD, Mass., Jan. 12.—The weekly shoot of the Rod and Gun Rifle Club to-day did not bring out many marksmen, the severe cold keeping them away. The shooting was very poor, the day being one of the very worst for rifle shooting. The scores were:

T T Cartwright	6	8	9	5	6	6	10	6	6	5—67
S K Hindley	5	4	7	7	5	5	4	6	5	9—57
H M McDonald	8	3	9	5	6	4	6	6	3	3—53
J Sterling	3	4	6	8	4	3	4	4	4	5—45

A 10-shot match between McDonald and Cartwright, Creedmoor count, with the State military rifle, was won by McDonald. The score:

McDonald	4	4	3	4	4	5	4	4	3	3—38
Cartwright	3	5	3	4	4	3	3	4	3	3—35

BULLS HEAD RIFLE CLUB.—At the annual election, Jan. 8, the following were chosen: M. Dorrler, President; J. H. Brown, Vice-President; D. Holland, Treasurer; A. Lober, Secretary; G. Zimmerman, Captain. Gallery class shooting, 10 shots per man, 3lb. pull, 12-ring target, possible 120. Jan. 8: G. Zimmerman 117, E. Holzmann 116, L. Flach 112, A. Liss 103, M. Dorrler 117, J. Shutz 114, J. F. Schrader 112, H. Lindlinger 103, C. Rein 116, C. F. Gensch 113, C. W. Karcher 105, H. Gunther 108. Jan. 15: M Dorrler 117, J. H. Brown 116, D. Louitzki 106, H. Wasmuth 104, G. Zimmerman 117, J. Jordon 107, J. Shaw 96, V. Steinback 108, C. Rein 113, D. Holland 98, E. Holzmann 114, H. Lindlinger 109, J. Shutz 112, A. Liss 103, E. Schneckenberg 90, C. Karcher 110, D. Holland 98, C F. Gensch 116, L. Flach 114, J. F. Schrarder 112.—A. LOBER, Secretary.

ZETTLER RIFLE CLUB.—Jan. 12, regular club shoo. ring target, gallery 100 feet, possible 120: D. Miller, 110; M. Dorrler, 114; M. E. Engel, 110; W. Kline, 109; A. Lober, 118; B. Walter, 109; G. Zimmerman, 115; C. G. Zettler, 117; B. Zettler, 111; H. Holger, 117; T. C. Noone, 108; L. Flach, 103; C. W. Karcher, 101; M. L. Riggs, 112.

RIFLE AND TRAP.—Rome, N. Y., Jan. 12.—I would like to shoot a friendly match at glass balls with any one under twenty-one in the State of New York, at rises from 10 to 18 yards, to use rifles. Will shoot doubles or for speed, using repeaters; don't wish to shoot less than 10 yards; prefer 12. I would be glad to hear from shooters.—W. A. F., Box 982, Rome, N. Y.

HAVERHILL, Mass., Jan. 13.—The Haverhill Rifle Club held its annual election on Jan. 12: J. E. Brown, President; H. H. Poor, Vice-President; L. W. Jackson, Captain; S. E. Johnson, W. Worthen, F. R. Merrill, Executive Committee; J. P. M. Green, Secretary and Treasurer. The club has thirty members, and has matches Saturday afternoons and holidays.

AT CONLIN'S GALLERY a go-as-you-please rifle match for a gold medal will commence on Jan. 21 and continue one week.

ELIZABETH, N. J.—The New Jersey Schuetzen Bund is just now discussing a change in uniform, and the proposition for a new garb is meeting with much favor from the marksmen. The financial report just made shows $11,850 in the united treasury, being an increase of $,400 in three months. There are eight batallions in the bund, divided as follows: Jersey City 2, Newark 1, Hoboken 2, Paterson 1, Orange 1, Elizabeth 1. The total membership is over 1,000. The benefits paid to sick members are $6 per week and medical attendance free. Elizabeth has the strongest battalion numerically in the State. It comprises four companies, with a constantly increasing membership.

THE TRAP.

Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

HOW TO HOLD ON FLYING TARGETS.

Editor Forest and Stream:

I propose to give my experience with these targets, not so much for the benefit of old veterans at the trap as for that class of sportsmen who do not have the time—and in many cases the cash—to spare for the necessary practice required to become an average good shot at the Peoria blackbird or Macomber targets. I will travel with you from twenty straight "goose-eggs" to twenty straight hits, and will try to touch all of the important points of interest.

When our club commenced—last April—using the Peoria blackbirds, we had in the club what we supposed to be some of the best shots in our State at glass balls and clay pigeons. I have at different times broken fifty straight glass balls, also thirty straight clay-pigeons, and have repeatedly made twenty-five straight hits, and have killed thirty-five straight prairie chickens; but when it came to hitting the blackbirds and metal targets, I was "terribly off" that day. I believe the club shot at twenty blackbirds each, and the highest number of hits was eight. As I said, we commenced shooting at the new targets in April last, and it was so until August that we commenced making any marked improvement in our scores. We tried different brands of powder, all sizes of shot from No. 10s to 6s, both soft and chilled; but with about the same results. I thought surely that I must have "lost my grip," and as a test I decided to take out twenty-five glass balls, and I succeeded in making a clean score of hits. This I repeated three different times, which again gave me confidence in my shooting, and I then determined to go to work in earnest; and at once bought 25lbs. of American FFG Deadshot powder, five sacks of No. 8 chilled shot, five boxes of pink-edge wads and one dozen boxes of the black-edge, and 1,500 shells, which cost me $18. I used paper shells because they were not as much trouble to load as brass ones, but in a match of any importance I always use the brass shells, as all of my experiments have taught me to do. I then commenced a series of experiments every fine day that I could spare the time, and found as a result that I had been shooting from one to four feet "behind" my birds, and always "over." Now, say your blackbird trap is screwed up to throw an outgoer 35yds. (which it should do to be according to the rules, and this is an important point in practice), if the weather is pleasant, with but little wind, I found that in shooting at birds thrown at the five angles, the outgoer needed the most careful handling of any of the angles. If I shot before the bird was done rising (which takes quick work), I would shoot under or get a piece of the lower part; and if I aimed until I thought the bird was on the turn, I would invariably shoot over, often getting a piece of the upper part. How I succeed in hitting outgoers now is by waiting until the bird is done rising and then hold from 6in. to 1½ft. under, according to the distance and the speed at which the bird is falling, at the same time being careful to note if the bird is "drifting" the least bit with the wind, which is often the case, and then I hold from 1ft. to 18in. ahead for windage. Unless the shooter has a gun that will pattern at least 400 No. 8 pellets in a 30in. circe at 35yds, he dare not take the chances of waiting for the bird to turn, but must blaze away as soon as possible to save his inferior pattern, and then perhaps undershoot or straddle the bird. Pattern is everything with these targets, and one of the first things to be looked after is selecting a gun.

The gun that I am now using is a 10-gauge, made by the American Arms Co., and weighs 9¾lbs. and patterns 430 No. 8 pellets in a 30in. circle at 35yds., and 201 pellets in a 24in. circle at 45yds. with 4½drs. of Miami FFG powder and 1¼oz. No. 8 soft shot, with three black-edge wads on the powder and one on the shot. I would have it choked more if I was sure of an improvement in pattern, but I have seen so many good guns tampered with in trying to improve the pattern that I am contented with my 430 pellets at 35yds, and will use it as it is; for every shooter must make it a main point to hit these targets within 35yds. of the score, and in so doing he will perforate them with at least from 6 to 10 pellets (if his gun patterns 400) and when hit with that number of pellets there is but little use for judges or referee; bear in mind that in order to do all this (after he has such a gun) he must get the gun up on the word "pull" and not wait to see the direction or angle of the bird first.

But to return to some of the other angles, say a half quartering bird. I always make the best breaks by holding from 18in. to 2ft. ahead, and 6in. to a foot low, never holding on a level with the bird under any circumstances, for if the trap is properly adjusted you will shoot over every time by so doing. By the time the marksman has taken the pains to catch the flight of the bird and fall in ahead, as described, and a little under, the bird will always be on its downward flight, unless going against the wind, and then I find it pays to take a little time and see what the bird is going to do. Sometimes it will stop perfectly still, apparently, but don't be deceived, as it is then commencing the "drifting dodge," and windage must be allowed as well as holding from a foot to 18in. under.

With the full quartering bird or the sharpest angle of the five, I always hold not less than 3ft., and sometimes 4ft. ahead and 1ft. under, or more if the bird is falling fast, and it gives lots of satisfaction to see how the bird gracefully sails into the pattern of the load and is completely demolished.

With the Macomber metal target I find that I have to hold much the same with the exception that it falls faster and requires more care on the part of the shooter about holding under. I have made several scores of fifteen and eighteen straight on these targets, holding about as I have stated, but I will confess that I burnt over thirty pounds of powder in finding out what I claim is "how to hold on." Just as soon as a shooter begins to know how he came to miss a bird, just then he has confidence in his holding. If I step to the score and miss a bird, I know instantly why it happened and can give the cause, and have often asked to have a certain bird gathered (which did not break in the fall), when I was sure that I held right in my own judgment, and have found as high as five holes through a single blackbird; while on the other hand when not hit, I was satisfied that the shot had straddled it. I consider the Macomber target the hardest one to hit, but much the cheapest, and as to a sure counting target when hit, there is nothing that compares with the "globe flight," but the Peoria blackbird is my favorite, when thrown at the proper height, but when thrown too high they can be shot through without breaking, which is a detriment to the shooter's score as well as to the manufacturers.

I have now before me a model of a new bird of my own get up. It is made of light galvanized iron, and is the shape of a bird; has wings, head and tail, which will (when either part is hit squarely) cause the wings to flop forward and the bird at once turns over in the air and fall to the ground. To adjust the wings, the trapper simply pulls them back and they snap into place. In showing the bird to some prominent sportsmen, several of them objected to the tail counting a hit, as they claimed the shot would not prove fatal in the case of a live bird; but as a piece from any part of a composition target counts, I have decided to have the tail count when hit. I will forward a specimen of the new bird for your inspection just as soon as I am fully decided as to the proper size and weight to make it, and I would be pleased to hear from some of my brother sportsmen on these two important points in its construction. I am also inventor of the Monarch, single, double, rotary and stationary glass ball trap, and of the Hinman national ground trap, with rotary flusher, for live birds. I merely mention these facts to show that my mind and experiments are continually running in this direction and relative to the gun.

During my experimenting campaign, I would actually wake up at midnight and begin thinking where the fault could be by which I would miss certain birds continually, and I have gone out the next day alone, time and again, and blazed away at some certain bird until I was fully satisfied how I had to hold, and I often found that I had been shooting behind and over. I have tried almost every brand of powder made, costing from 14 cents to $1.50 per pound, and have had the best results from using the American Deadshot and Miami (FFG grade); having these brands frequently side by side, I do not find enough difference to favor one more than the other; but this I will say: they are the only brands with which I can feel assured of a clean gun when using for any number of shots. I also have a point here to be considered, as well as remembered, viz.: don't change powder—stick to one brand and size of grain, as quick powder is a necessity in hitting these fast-flying targets, and a change is liable to throw a shooter off two feet or more. I found by experimenting that No. 7 shot was just the size for the Macomber targets, and No. 8 chilled for Peoria blackbirds, and No. 9 soft for globe flights.

I have seen a friend break 50 straight glass balls from a rotary trap and have seen him shoot at 15 Macomber targets and never score a single hit, which goes to prove that the difference in holding as well as loading amounted to several "goose eggs" on his score. Amateurs (for every shooter is an amateur when he commences at those targets, I don't care how many glass balls he has broken or

can break) have three important points to look after if they ever expect to be a success at the trap with the present flying targets, viz.:

First—If your gun does not pattern 400 or thereabouts in a 30-in. circe, as heretofore referred to, trade it off and get one that will.

Second—Practice the National rules on getting your gun up on the word "pull," which will enable you to make a bit within 35yds. of the score and this is what tells.

Third—Drop in ahead of all quartering birds from 2ft. to 3ft. and sometimes 4ft., a little low (and never on a level), just as quick as the old scratch will allow you and pull, and in this way you will hit your bird with a dozen pellets of shot instead of two or three pellets. In making my last score of 25 straight blackbirds, I can truthfully say that I did not hold squarely on a single bird out of the whole 25. All shooters may not hold alike; some shoot with a moving gun, while others fall in ahead and stop to pull. My method is to follow up and pass ahead of a quartering bird (holding low) and pull as soon as I am satisfied with my lead. I have endeavored to describe as near as possible my manner of hitting the new targets.

N. B.—After once learning how to hold, stick to one brand and grain of powder, or you will be making lots of those "unaccountable misses" again. W. C. HINMAN.

LEAVENWORTH, Kansas.

BOSTON, Jan. 13.—The range at Walnut Hill to-day was crowded with trap shooters from all over the State, to witness the team match for the Massachusetts Glass Ball Association champion badge, which was won by the Worcester Club by one point. The result was not determined until the last shot had been fired by the Massachusetts Rifle Association. Appended are the results of the different sweeps: Team match for the challenge team badge of the Massachusetts State Glass Ball Association, 20 Knoxville blackbirds per man.

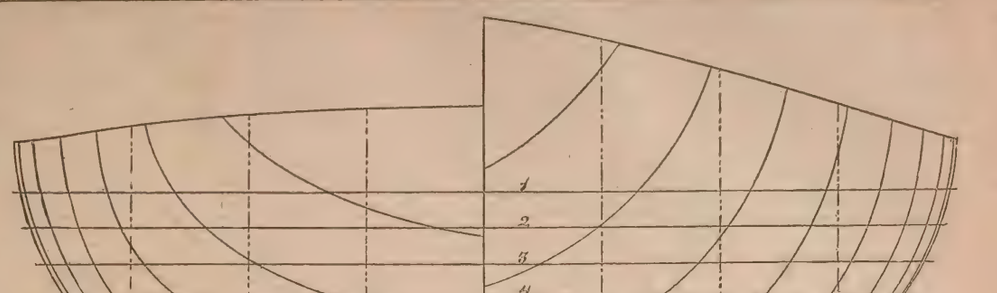
WASHINGTON HEIGHTS GUN CLUB.—Jan. 16.—Match at 10 live birds each, 21yds., 80yds. boundary, both barrels. There has been considerable talk about the respective merits of the contestants and the end is not yet, as the following score will show:

Disbrow	11111111111111111111—20	Harrison	11111111110111111111—19
Terwilliger	11111110111111111111—19	Fountain	11111111111111111111—20
	39		39

Sweepstake at 5 birds: C. R. Terwilliger 3½, Montgomery ½, Dunseth 4½, Brenner 4, Cromwell 1½, Male 4, Ball 2, Roe 3. Second sweepstake at 3 birds: C. R. Terwilliger 2, Dunseth 3, Brenner 2, Cromwell 3, Male 2½, Disbrow 1½, Roe 2.

SINGLE-HANDED SHOOTING.—With the thermometer at twelve degrees, and strong westerly wind whirling the dusty snow about Mr. William Giles, better known as English pigeon grounds as "Mr. Graham," started his match "gun vs. birds" at Erb's grounds, Bloomfield Road, near Newark, N. J., on January 13. The match was for $200 a side, Graham backing himself to kill 35 birds out of 50, five traps, 27 yards rise, eighty yards boundary, the shooter to use but one hand but having the privilege to use both barrels. As was expected, the gun won with two birds to spare, killing 37 birds. As Mr. Graham is well known in America from his shooting contests on the London Club Grounds, England, with Dr. Carver, the announcement of a match secured an attendance of about six hundred persons. Mr. Graham is a very thick-set man of medium height, with abundant self possession to hold his own in first-class company. There is no doubt that he is a very steady shot. When he went to the score he waved his gun about with one hand much after the manner of Theodore Thomas when he leads his famous orchestra. Then he sights his gun at the end traps, his left hand being just in front of the trigger guard. Dropping the heel plate to the pit of his stomach he retires his left hand to the back of his coat tails, as distinguished orators do when making an oration. He calls "Ready," then "Pull" and the instant the bird leaves the ground he raises his light hammerless gun to his shoulder and shoots very quickly, at times his first barrel is a brilliant snap shot. He began his shooting at half past one o'clock, John Erb tapping the birds. The match was concluded at ten minutes past two o'clock. Mr. Graham used Shultz powder and its performance at long distances was remarkably quick and powerful. The birds were retrieved by Erb's Irish setter Nick. Summarizing the shooting it may be said that 16 of the birds were drivers 20 right quarters, 10 left quarters, 2 towers, and 2 incomers. Birds killed with two barrels 10; clean misses two barrels 2; these were the 27th and 37th birds, both low drivers. The misses with the first barrel were the 17th and 21st birds. All the others were hit, some of those which escaped being badly hit. The score is as follows: Graham 11111, 00011, 10111, 10111, 10110, 10111, 11110, 10111, 11010, 11011. Killed 37, missed 13. Referee, C. M. Hedden. Judges, Al. Heritage and Miles Johnson. The attendance included many well known shots, among whom were L. B. Campbell, W. W. Lever, Sam Castle, Dad Applegate, Tom. Badgier, Miles Johnson, Canon, Hughes, Cavanagh, Speir and J. Ryan. After the match two sweepstakes were shot, each containing twenty-two entries. Entrance $2. The first was won by Cavanagh, Graham and Lever, the second unfinished. A $250 cup open to the world has been offered for the championship of the world. Entrance $50; money and cup to go to the winner. Conditions, Hurlingham rules, 50 birds each. Ties to be shot off at 100 birds. The match will take place at Erb's ground and will be shot in heats. This match it is supposed will attract the attention of both Dr. Carver and Capt. Bogardus.



The British visitor is experiencing a storm of paper challenges and the gale is increasing in volume each day. Capt. A. H. Bogardus writes that he will meet Mr. William Graham, the English pigeon shooter, in a match for $250 a side and the championship. Capt. Bogardus stipulates the following conditions: Fifty single birds, 5 traps, 5 yards apart, 25 yards rise; and 25 pairs birds, 21 yards' rise from d hand T ground traps, use of one barrel only for single birds. Graham is firing back the paper pellets and wants a match after his own heart, with Hurlingham rules only to govern. There seems very little chance that any match will result.

NATIONAL GUN ASSOCIATION TOURNAMENTS.—Special Notice.—Members desirous of organizing tournaments in their vicinity, under the auspices of the Association, are requested to notify the undersigned. All the expenses of the same will be paid by us. Make your arrangements for 1886. We propose to establish a circuit of tournaments annually. Claim your dates now. General office and headquarters, Macon, Ga.—MATT R. FREEMAN, Vice-President and General Manager; F. C. ETHRIDGE, Secretary, Macon, Ga. Send 10 cents for hand book containing rules, constitution, etc. "Fairly started and its future depends entirely upon the manner in which the sportsmen throughout the country respond."—C. M. STARK, April 18, 1885.—*Adv.*

PUBLISHER'S DEPARTMENT.

ANOTHER LEGAL OPINION.—Office of Edward W. Sturdevant, Attorney at Law, Wilkesbarre, Pa., Jan. 5.—*Editor Forest and Stream:* Please find inclosed post office order for $4, for which please send me the FOREST AND STREAM for one year, beginning with the number issued this week. I have been buying the paper for several years at a bookstore, and have come to the conclusion that I may as well subscribe for it regularly. I don't suppose you care much for the opinion of a man of whom you know nothing; but, all the same, allow me to say that I have always liked the FOREST AND STREAM, but I think it is a better paper now than it has ever been before. It is very much the best thing of the kind published. Yours truly, EDWARD W. STURDEVANT.

NEARLY EIGHTEEN THOUSAND MEN were paid cash benefits in 1884 by the Travelers Insurance Company, of Hartford, Conn., for losses by accidental death and disabling injury.—*Adv.*

BODY PLAN OF "FOREST AND STREAM" CRUISER.

Canoeing.

Address all communications to the Forest and Stream Publishing Co.

CANOEISTS *are invited to send us notes and full reports of cruises, club meets, information about canoeable waters, and other communications of interest.*

Secretaries of canoe clubs are requested to send to FOREST AND STREAM their addresses, with name, membership, signals, etc., of their clubs, and also notices in advance of meetings and races, and reports of the same. Canoeists and all interested in canoeing are requested to forward to FOREST AND STREAM their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

AMERICAN CANOE ASSOCIATION.

SECRETARY—Dr. C. A. Neidé, Schuylerville, N. Y. Candidates for membership must forward their names, accompanied by the recommendation of an active member of the A. C. A., together with the sum of $3 for initiation fee and first year's dues, to the secretary, who will present the names to the commodore. Money should be sent by *registered letter*, or money order on Saratoga Springs, N. Y.

KNICKERBOCKER C. C.

THE annual meeting of the Knickerbocker C. C. was held on Thursday, 14th, at the Harvard Rooms. The election of officers for the ensuing year resulted as follows: Commodore, Edwin Fowler; Vice-Commodore, Robt. P. Martin; Secretary, Edward W. Brown; Treasurer, M. George Foster; Measurer, James L. Greenleaf. These form also the Board of Trustees, the office of Lay Member having been abolished. On the House Committee were appointed R. P. Martin (chairman *ex-officio*), J. L. Greenleaf, P. W. Foster; on the Regatta Committee, H. T. Keyser, H. Stanton, M. G. Foster.

A number of other matters of importance were discussed, among them the question of camp-fires during the winter months. It was strongly the sense of the meeting that those of last winter were so interesting and instructive that there was every encouragement for the organization of another series. This was felt to be especially important at present, in view of the unusual activity in canoeing circles in devising improved models, rigs, etc., and the great importance of making effective preparation for the distinguished visitors who will try the mettle of American canoeists in the international and interclub cup races of next summer. A provisional committee, consisting of the commodore, Mr. Stanton and Mr. Seavey, were appointed to confer with the officers of sister clubs of New York and its neighborhood and endeavor to secure their co operation, either as bodies or in the persons of individual members, as might seem most advisable.

The Commodore placed at the disposal of the committee his large assembly hall, known as Harvard Rooms, 729, 731, 733 and 735 Sixth avenue, corner of Forty-second street. This is 60x45ft., well lighted and heated and furnished with accommodations for 500 persons if necessary. The floor can be left entirely clear for the exhibition of canoes, rigs, etc., and the height of the ceiling—18ft., with 6ft. additional in the center—give ample room for the tallest masts and sailpeaks. There is ample blackboard space for diagrams, and the central location of the hall, easily accessible by the Sixth avenue and Third avenue elevated roads, as well as by the Broadway, Sixth avenue, Seventh avenue. Fourth avenue and Forty-second street surface roads, renders it very convenient for the canoeists of Manhattan Island and vicinity.

There is a mighty stirring among the dry bones of the K. C. C. club house. Many new canoes are being built—chiefly of the Sunbeam and Ideal types—and unheard-of rigs and sailing devices are evolving from the inner consciousness of the members. The late dinner of the club at Morello's was a decided success. Many members of other clubs were present, among them Com. Munroe and Messrs. Vaux and Burchard, of the N. Y. C. C., and Com. Newman and Messrs. Wilkin and Schuyler, of the B. C. C.

AN INLAND VOYAGE.—It is perhaps natural that when a canoeist is impelled to write, his efforts take the form of technical treatises and discussions, rather than descriptions of what he has seen and enjoyed. Any one can argue over lines and quarrel over reefing gear, but how many are there who can properly describe a canoe cruise? Once in a while an ideal canoeist turns up, not one of your energetic sailors and muscular paddlers who are found everywhere, but one of the lesser number who uses his canoe solely as an introduction to a new side of life, who rejects the element of time, and has the resolution to loaf along slowly, seeing a thousand things that escape the average canoe traveler. Such a one is Mr. Robert Louis Stevenson, whose "Inland Voyage" was made on several Belgian and French rivers, and whose story makes the most interesting reading we have met since Mac Gregor wrote of the same phase of canoeing. The book is published by Roberts Bros., Boston.

KNICKERBOCKER C. C.—At the regular annual meeting of the K. C. C. Jan. 4, the officers elected for 1886 resulted as follows: Commodore, Edwin Fowler; Vice-Commodore, Robert P. Martin; Secretary, Edward W. Brown; Treasurer, Macomb G. Foster; Measurer, Jas. L. Greenleaf. Committee on boat house, Vice-Com. R. P. Martin, chairman (*ex officio*), Pell W. Foster and Jas. L. Greenleaf. Committee on Regattas, H. T. Kyser chairman, Macomb G. Foster and Henry Stanton.

THE CANOE CUP FUND.—Jan. 16.—*Editor Forest and Stream:* I beg to acknowledge this week: From the Brooklyn C. C., at their dinner, through "The Alligator," $20; Royal Mil. Col. C. C.—J. A. Gunn (A. C. A. 882), $1; H. A. Morrow (A. C. A. 376), $1; previously acknowledged, $74; total to date, $96.—WM. WHITLOCK.

BAYONNE C. C.—The annual meeting of the Bayonne C. C. was held on Jan. 11. The officers elected were: Commodore, E. R. Smith; Vice-Commodore, G. W. Heard; Secretary and Treasurer, R. Verner Vienot.

PHILADELPHIA C. C.—The Philadelphia C. C. will hold a camp-fire on Jan. 30 at 8 P. M., at the northeast corner of Broad and Cherry streets. All members of the A. C. A. are invited to attend.

WIDE AND NARROW CANOES.

Editor Forest and Stream:

I have been an interested reader of the controversy, resulting from Mr. Clapham's suggestion of adopting a wider canoe than now recognized by the A. C. A. rules, for cruising, sailing, etc. As I am able to speak from experience, pardon me if I intrude a word or two more on this well worn subject to give my fellow canoeists the benefits of a practical test. I have had a lapstreak, the Zephyr, 14ft. by 29in. beam, about ten years. She was built by a New York man (MacDonald I think). Very light and well modeled, she has proved very swift under sail or paddle, and weatherly too in all sorts of sea or wind. I fancied, however, as did Mr. Clapham, that a little more room would not hurt, so about eighteen months ago I had the Mystic built, 15ft. long, 30in. beam, with a good flat floor, carried well forward and aft. I can carry three adults comfortably; one or two luxuriously. If anything is wrong with the rigging, can stand up to fix it without fear of a capsize. Can shinny out on deck to adjust rudder or painter and feel as if there was something solid under me. I have a Radix centerboard and she works to windward like a witch and carries her sail like a ship. The "balance act" which I have occasionally to introduce when sailing the smaller boat is an unknown quantity in the larger. Of course she is heavy to paddle, but she gets along and on one occasion I had some five or six miles of it. She would never be chosen as a racer under paddle, but with a tandem team she manages to keep up with the fleet. As to getting her in and out of the boat house, the difference in weight is certainly very marked, but one man can handle her comfortably, except at very low tide when either boat needs two. When cruising there is no comparison in the comfort. A larger tent, a larger bed and more storage room, and altogether, as a matter of choice the wider boat is my preference. I had an idea that a medium, say 32 or 33in. beam, would perhaps suit me better, but in our fleet is a 32, a 33 and a 38 inch, and after a trial of all, sailing, paddling, or handling, I am of the opinion that a canoe 15ft.×36in. is an excellent standard for a paddleable sailing and cruising craft.

To-day we were treated to a sight of young Mr. Engelbrecht's new boat, the Falcon, on which he has employed his leisure for several months. She is just 14ft. long, 33in. beam and pretty deep, with full round lines, good floor, plenty of sheer and freeboard. Although the handiwork of an amateur, she would be a credit to a professional. The boy is only sixteen, but has finished this job in every detail in a thoroughly workmanlike manner. She is a fine sailer, and judging from her performance to-day is likely to be among the leaders in most of our cruises. In a very light breeze it is conceded that she will outrun the fleet; to windward however we have not had breeze enough to give her a fair test. I don't think that any narrower boats will be ordered from these waters. Our summer breezes are regular young gales and with a spread of sixty to eighty feet of sail it requires all our talent to get along right side up with care. May be some day although the width of a continent separates us, we may have some representation to send to the meets and it would certainly be agreeble to find a class from which our favorite boats would not be barred. MYSTIC.

OAKLAND, Cal., Jan. 10.

Editor Forest and Stream:

In reading over my canoe letter, published by you last week, I noticed a mistake in the figures for sail area. Wherever "175" and "215" square feet are named, it should read 75 and 115.

ROSLYN, L. I., Jan 16. THOMAS CLAPHAM.

BROOKLYN C. C.

THE Brooklyn C. C. held their first annual dinner on Jan. 12, at the Clarendon, thirty-two members and guests sitting down at the long table over which Com. J. F. Newman presided, the center piece of which was the gilded alligator, the club's totem. After the dinner Com. Newman presented to the club on behalf of Mr. T. G. Eudington, a very handsome challenge cup. The design, in the form of a loving cup, eleven inches high, was made by the Gorham Manufacturing Company, and represents marine life of various kinds, fish, seaweed and the alligator. The inscription on one side reads "Challenge Cup," and on the other "Brooklyn Canoe Club." The cup is given as a perpetual challenge cup, open only to members of the Brooklyn C. C., and the sail area is limited to 75ft. The base, of ebony, will have the names of future winners added, on silver plates. A number of toasts were drank and replied to by the guests present and by members of the club. The proceedings were enlivened by a communication from the alligator in the shape of a $20 bill for the A. C. A. Cup fund, from the members of the club. After a very pleasant evening the meeting broke up at midnight. The club is now on a firm basis and has every prospect of a most successful season.

THE SNEAKBOX FAMILY.

III.—THE "FOREST AND STREAM" CRUISER.

THE sneakbox is essentially a hunting boat, and the Barnegat cruiser shown last week partakes largely of the same characteristics. As the attention of boating men has been more generally drawn to the cruising qualities of the sneakbox, we have received many comments, criticisms and suggestions for the improvement of the model as a cruiser, leaving out all considerations of duck shooting and looking only to the end of a safe, speedy and convenient boat, adopted both for general cruising on open water and as a safe boat for summer sailing. To meet the wants of our correspondents we have prepared the accompanying design, from which a boat has been built and is now waiting suitable weather for a trial. The new craft is based on the sneakbox, the bottom of which is kept almost intact; but an inspection of the former boat showed several features capable of alteration, if cruising only was considered. In the first place, the low sides, excellent if the boat is to be used as a blind, have been built up; the excessive crown of deck has been reduced, and the washboards have been discarded. As the height of the deck in the new boat is less than that of the washboard on the old, the windage is reduced, while the room inside and the stability are both increased by the additional bulk of the new boat. At the same time the new boat will stow for transport in the same breadth and height as the old, the total depth being the same. The increased freeboard and higher bow should improve the boat greatly in rough water.

On the other hand, the high washboards made a convenient receptacle for the oars, etc., but the extra inside room in the latter offers a full compensation. The folding rowlocks are given up entirely, thus removing a troublesome appendage, and cleats are fitted to the coaming in which ordinary socket rowlocks are set. If it is desired to use a longer oar, the cleats may be screwed to the deck near the gunwale. As there is no special virtue in the awkward-looking square stern of the sneakbox, the deck and planking have been extended two feet aft, the latter merely continuing in a fair upward curve, until they meet at the gunwale as in the bow. This gives a handsome finish to the boat, in the shape of an elliptical stern, with an easier run, more buoyancy and increased deck room. The rudder is of the balanced variety, a suggestion of the owner of the Bojum, the stock being of ⅞in. iron, to the lower end of which two flat pieces 1×¼in. are welded, making a shape like a tuning fork. In this fork a piece of 1in. oak is set, forming the rudder, the head of the stock is squared for a tiller, and at the level of the deck a hole is drilled for an iron pin, supporting the whole. To form the rudder trunk a piece of pine 3in. square is fitted from the inside of the planking to the

deck, being set in white lead and well screwed through plank and deck. Through the center of this piece a vertical hole 1in. in diameter is bored for the rudder stock.

Owing to the extended deck aft both the cockpit and centerboard are further aft than in the ordinary sneakbox. The coaming of the cockpit is 2½in. high. The floor boards are raised from 3 to 3½in. above the bottom, so that the bilge water will not slop over them, the extra depth allowing this change. There are no fixed thwarts, the oarsman sitting on a box which holds the stores, etc., on a cruise, while in sailing the crew sit on deck or on the floor. When used for pleasure sailing five or six may be accommodated, and in cruising a bed for three can be made up on the wide floor of the 16ft. boat. A tent can easily be rigged over the boat at night, supported by the boom. For one or two persons such a boat 13ft. over all will be quite large enough for cruising and may be built of light weight. The dimensions and scales are for two sizes, 16 and 13ft. over all.

DIMENSIONS OF "FOREST AND STREAM" CRUISER.

Length over all	13ft.	16ft.
Length on waterline	9ft. 4²in.	11ft. 7in.
Beam extreme	3ft. 8in.	4ft. 6in.
Depth at gunwale	1ft. 1⁶in.	1ft. 5in.
Sheer, bow	5⁶in.	7in.
Sheer, stern	1⁶in.	2in.
Crown of deck	2in.	8in.
Fore side of stem to—		
Mast	2ft. 5¼in.	3ft.
Trunk, fore end	2ft. 8in.	3ft. 3in.
Trunk, after end	6ft. 4in.	7ft. 9in.
Well, fore end	5ft. 8in.	6ft. 11in.
Well, after end	10ft. 11in.	13ft. 6in.
Rowlocks	8ft. 7in.	10ft. 6in.
Rudder	11ft. 11in.	14ft. 8in.
Width of well	2ft. 6in.	3ft.

The stations are 1ft. apart by both scales. In the 13ft. boat the waterlines are 1⅝in. apart, and in the 16ft., 2in.

The scantling for the 13ft. boat would be, planking ⅛in., deck ⅜in., timbers ⅞x1½in., spaced 9in. The larger boat would have ⅝in. planking, ¼in. deck, and timbers 1x1½in, spaced 10in. The stern is framed as described for the stem in the previous articles, two quarter pieces being cut to the outline of deck and fastened to transom and upper end of keel. A sternpost and scag are fitted after the boat is taken from the stocks, and two bilge keels are screwed outside. The centerboard is of yellow pine, edge-bolted with ¼in. iron and weighted with lead. The deck is covered with 6oz. duck, laid in fresh paint. A half-round bead makes a finish around the gunwale and covers the edge of the canvas. If a handsome little sailing boat is desired, the hull above water will be painted black or white, with a gold stripe as shown, the bottom being coated with copper bronze. The rig will be a balance lug of about 125ft. for ordinary sailing. The boat shown was built by J. MacWhirter, of West New Brighton, Staten Island. The cost would vary according to size and finish from $125 for a 13ft. boat with sail and galvanized fittings to $160 for a 16ft. boat finished with brass fittings. We shall give plans of sails especially adapted for these and the preceding boats, as soon as the weather will allow the completion of the trials of various rigs.

Yachting.

THE CRUISE OF THE PILGRIM.—IV.

BY DR. W. H. WINSLOW.

We left Burnt Island to port, passed Tumbler Island on the starboard and began to open out the houses in Townsend. The breeze was right astern and, as I made a course along shore, there came a sudden puff of wind off the hills, and jibed the mainsail. I dodged the boom and shouted, "The boom! lookout!" and all got down except Jack, who was standing on the port side close to the cockpit. The boom struck him in the side and overboard he went head first, but, at the same instant, I threw one arm around his legs and dragged him in, and the next moment he was standing on deck again, wet to his waist on one side only, and looked white and scared, with his eyes widely opened. There was no time to think. The whole thing was over and the boy safely landed in ten seconds. Action seemed to come before thought, though I suppose there was an unconscious cerebration to account for the motor impulse.

We kept on along shore and among the vessels until we were near the head of a little island and opposite the principal part of Townsend, and let go our anchor in three fathoms, at 5 P. M., having made an excellent run from Portland.

Our dinner tasted good, after the sails were furled, and we enjoyed the early evening, sitting upon the deck, watching the fishing vessels coming in, and the people upon shore, and the lights of craft and houses and the stars, for a long time, until the dampness and chilly air admonished us to go below. I took some of the boys and went ashore with letters, then had a row around the harbor, and all hands turned in at 11 o'clock thoroughly tired and happy.

The next morning, I routed all hands out at 5 o'clock. It was a very bright, clear day and everything looked promising, in spite of Old Probabilities, who had the warning signals flying from Eastport to Hatteras, and the warnings of some fishermen, who had seen a sun dog the day before. The yacht Hera, of Boston, had just arrived from the Isles of Shoals, and the grizzly haired skipper with two boys was washing down decks. He did not look at us—we were too small, and besides, had arrived before him—but the boys did, when they saw the South Boston Yacht Club signal go up, and I spoke to one of them and asked where they were from, and how the weather was outside. He reported the sea lumpy. We swept out of the harbor before a strong land breeze, and when the sun came up and killed it for awhile we were many miles on our way, and took advantage of the lull to get a breakfast that tasted as good as if served at Delmonico's. We had come into Booth Bay west of Squirrel Island; we went out east of it, ran down close to Rain Island Lighthouse, past the northern end of Fisherman's Island, and at the savage reef, called the Hypocrite, and headed away east for the Thrumcaps, and up with it, E. N. E. for Pemaquid Point, just off which we enjoyed our matutinal repast. There was a little sloop running up Muscongus Bay, and a beautiful fishing schooner schooning along the coast after the early mackerel. The lighthouse and dwelling up on Pemaquid had a rather dreary look, but there was a little curl of smoke from the kitchen chimney, which told us the light-keeper would soon have his ham and eggs ready. I wish to emphasize the importance of an early start when one desires to make a good run. The crisp air, blue sea and golden arrows of the early sun are very enjoyable and sharpen the appetite for breakfast. The wind is generally good off shore long enough to send one away from the land, where it continues longer; then the sea breeze is caught earlier, and one can be content should he have a little light wind or a calm in the middle of the afternoon. After we got well out we saw a calm had fallen beyond Squirrel Island, and vessels that had started later than ours, were motionless and mirrored upon a sea of glassy smoothness.

We saw some very large pieces of buoys and timber fastened to trawls this morning, and were a little afraid at first they were intended to mark rocks, but close observation with the glasses showed their nature. The round floats usual to trawls are easily recognized, but it is important to know that the economical people of Maine use other kinds. In fact, they don't care for appearances if they can only catch the fish. I have gone out of my way often to avoid sailing over trawls, but I don't do it any more. One can pass right over the upper rope of the net, which is generally several feet under water, without any tangle or injury.

Soon after breakfast we made out the beacon on Eastern Egg Rock, bearing E.¼N., the wind freshened from the N. W., and we soon passed between it and the buoy and headed E. by N. for several islands in line, a northern one wooded, where we saw a schooner coming through Davis' Straits. I remembered these straits from boyhood, but they used to be between Baffin Bay and the Atlantic ocean. Now we were to pass through them. Off Seal Ledges we saw a few seals and many gulls, and the boys got their guns out and blazed away awhile without deadly effect as far as we could tell, but it pleased them to have a little diversion and did no harm. I think we old fellows are too apt to forget that we were boys once, and try to lop off the innocent pleasures of youth because they do not seem wise or profitable to us. It is a mistake. Experience must be gained by each generation, and, though noise disturbs us, it causes a spasm of delight in a boy, especially if he owns the gun that makes it. My two boys and I make three. We have in our possession a fine Ballard, 38 cal., a Bullard, 40 cal., hunting, and a Remington-Whitney, 22 cal., rifle. The baby, 13 years, often beats his pater in target shooting. We have some other arms I will not mention. It is a good thing to let boys have arms and learn to use them early, when they are not so likely to have accidents in later years. Guns are better than dominoes, cards, ten pins and billiards, and tend to improve the health and develop a better manhood.

But, gracious! here we are up with Davis Island, and a pile of shelving rocks upon the port hand, and a red buoy right in the middle of the channel. Which side ought we to go? The chart does not say. It says, "Red buoy to be left in entering on starboard hand." But this is not entering or leaving, it is simply passing through. The Portland yachtman said, "Red buoys to port going east and starboard going west." Is this reliable? Sailors say not. We are approaching the rocks; they run off much from the northern point. "Keep a sharp lookout, Bert." "Rocks right ahead, brown boulders, far out," shouted Bert. Helm to port and hug the bold shore of the island. Passage must be to the right of the buoy, and we will chance it. Sailors say, "In doubt, run very close to the buoy." We pass, and could touch it upon port side with a hand spike. But, rocks ahead off the point of the island! Haul up N.E. and the danger is past. A close shave for a sailor, a closer for a stranger. Then away N.E. by E. for the southern end of Hooper's Island, between the Sisters and Old Horse Ledges. There upon the starboard bow is Hart's Island, and a long, treacherous, jagged ledge, reaching almost to Hooper's. The sun is shining, the breeze is soft and strong, the water reflects the heavenly blue and gray, and the merry ripples along the cutter's side lull us into a pleasant, restful reverie; but, hark to that ominous swash, see that curling line of silvery foam that advances almost across our course, ever and anon, revealing the threatening teeth of the reef; note the pretty lighthouse upon Marshall's Point beyond, and how it seems to invite one to run across to it and take shelter in Herring Gut, and observe how near the buoy and island are. Do not deviate from the course; keep that far, outlying buoy to starboard and run near the island, for outside the buoy the ledge is very near the surface of the water.

After passing the buoy we kept along shore past the light and went swiftly onward toward Mosquito Sound, by Mosquito Head and out to sea again, where we were almost becalmed for awhile by our proximity to the high land. But we worked into a wind after a while, and headed for the bold, rocky promontory of Whitehead Island, at the entrance of Penobscot Bay. The vessels and buildings of Tennant's Harbor were visible to the north, and several small craft were seeking shelter up Wheeler's Bay. Close at hand and all the way to the distant horizon there were vessels standing away from and others heading for the narrow passage of the most beautiful bay in the United States. A sound heard to starboard the doleful tolling of the bell buoy upon South Breaker, and to port the swash of the sea as it beat against the worn and fissured face of Whitehead, with its keeper's dwelling, lighthouse and the great fog bell in its frame.

"I toll the knell," rung the restless bell,
"Of many a good ship here."
"I form the shroud," beat the breakers loud,
"And my waves cover over the bier."

The wind, the sea, the currents, the darkness and the fog conspire upon this coast to break up the beautiful vessels for which its shipwrights are famous; and it is probable that the work of destruction is equal to that of construction. The very entrance has a threatening look, and the dash of the breakers and the measured singing fill one with a sense of peril which is not forgotten. I had been the goal of my ambition to get into Penobscot Bay, and a great weight of anxiety on account of my precious crew, the light of three households, was lifted from my heart as we flew past the grizzly head and into the intricate navigation of Muscle Ridge Channel, which I knew was as full of rocks as it was destitute of havens. I felt like one who had run the gauntlet, or just escaped from the pursuit of a ravenous beast, and it was not until we had run up the excellently marked channel, passed Ash Island and were fairly landlocked in Owl's Head Bay, that I felt all danger was past and I might take things easy. Perhaps I was nervous from close confinement and professional overwork, and a little too much worried over the manifold dangers of seafaring life to which I had been enducated in the navy, and from which I had been divorced for twenty years; but, as we hoisted our ensign and signal and saluted the keeper, who took off his hat to us just before he lighted up the great lamp in Owl's Head Lighthouse, I felt I could have hugged him for his recognition. We swept around the Head in a graceful manner, trimmed flat down, and had a fine run and a race with a little schooner up to our anchorage off the city of Rockland. We cast anchor south of the steamboat wharf and pretty well in, and sent Jack and Jamie ashore for newspapers and supplies, while Will started the oil stove and Bert and I furled the sails. When busy with the mainsail, we noticed to our consternation that we had drifted down almost afoul of a revenue cutter, and, upon trying the cable, we found it was hanging up and down. We had not given enough scope and had dragged into deep water. We had just enough time to make sail hurriedly, and ran back and anchored again and payed out ten fathoms. Then we held, and, finally, had all snug just as the boys came in the darkness and hailed, "Pilgrim ahoy!" They brought us fresh milk, fresh bread and one mince pie, which, added to hot coffee, tomatoes, canned turkey and pickles, made an excellent feast for our tired and hungry party. We had made an excellent run of about fifty miles in fine weather, notwithstanding the warning of the Signal Bureau and the sun dog of the fishermen, and we were snug in harbor and at 10 P. M. all snug in bed.

The sun dog and signal bureau were a day ahead of time. The wind came out S.E. and it began to rain after breakfast next morning, but we made sail, got out the spinnaker and started for Belfast. The wind was light and it was rather unpleasant wearing rubber clothes and dripping with rain water, but we managed to pass Camden under its mountain, and to get up to Northport about 2 P. M. and maneuvered off the Northport Methodist Camp ground in a way that makes me laugh when I think of it.

The place consists of several hotels, one large building for the meetings of the annual camping time in August, and several hundred cottages of the Swiss chalet style for families that come from all over New England to occupy them during the warm weather. The land is high along the shore and rolls back in beautiful wooded hills, rising high and higher, until at the south they end in veritable mountains around Lincolnville and Camden. The summer village generally has its hotels and cottages full of merry people during August, but we found, the 30th, that most of the visitors had gone on account of the cold spell of weather and the approach of the great State fair at Bangor the following week. My brothers had two cottages upon the ground, and as there was to be a family gathering I fully expected to find a joyous crowd to hail the Pilgrim. So I ran close in, and as we approached the lower cottages upon the bluff a crowd of gentlemen and ladies upon a cottage portico set up a tremendous shouting and hurrahing, and waved handkerchiefs and hats in such a lusty way that I took it for granted immediately that they were my kinsfolk.

The spinnaker was out to starboard, and while looking at the crowd ashore the boom rose up along side of the mast, the sail bellied into the jib and the main boom jibed. The spinnaker was taken no the jib hauled down, the anchor let go, and I started in the tender it, go ashore, but recognizing that the cottage was not a brother's, and that the people who were making such a hullabaloo were strangers, I came on board before landing, had the anchor weighed and made sail for Belfast, while Bert went out on the foot rope to cat the anchor. Just as the jib was hoisted and the yacht began to swing around, Bert missed his footing and plunged overboard to his waist, but saved himself from a complete ducking by catching the bobstay. The crowd ashore set up a tremendous shouting, as if it had been done for their amusement, while Bert went about his work cheerfully, and I was mad enough to blow that identical cottage and its inhabitants over the hills with a charge of grape and cannister.

A little further on a cottage hailed us and asked, "Is that the Pilgrim?" and when I answered "Yes," she said, "The family are all up at Belfast." Then we went to Belfast, found a good anchorage above the steamboat wharf, and had the family gathering before dark.

A few days' rest and we were afloat again before a stiff N.W. breeze, which carried us by Turtle Head and Castine in an hour, and, soon after, we passed around Cape Rosier and ran down Eggemoggin Reach to Byard's Point. This was the furthest east we reached during the summer, the season was over at Mt. Desert, and I decided to find a camp near at hand. We turned back therefore, had a lively beat against the sea with all sail on, and the lee rail under sufficiently often to satisfy my brother from Atlanta, whom we had taken aboard at Belfast. We anchored off a lovely sand beach between two rocky points at the entrance of Orcutt's Harbor, where we established Camp Myinno and improved our vitality by bathing, shooting, hunting, and doing anything our fancy dictated. Here we will leave the little Pilgrim off the camp with her flags floating in the summer breeze, having made a track across the chart all the way from Boston over which few yachts so small will dare to follow her, and carried into many places, where it had never been seen before, the pretty signal of the South Boston Y. C.

CRUISE OF THE COOT.

IX.

THANKSGIVING DAY brought with it an overcast sky and a strong wind from the northward, which furrowed the stream in dark looking ridges and brought the Coot's sail down to the second cringle, reducing the area by one-half. Several congenial spirits had gathered in Marmalade Lodge to camp over the holiday. From them parting well wishes were received with the latest newspaper. The weather was raw and cold, so the cruise began with uncongenial reminders of the rapid approach of winter. With sheet well off the Coot bounced along. She knocked down to the puff even under reduced sail in a way which suggested the need of more ballast. Of this she had about 400lbs. in iron pig, 200lbs. in two gravel boxes in the cockpit and perhaps 150lbs stowed in stores and supplies, a total of 750, whereas 1,000 would have been none too much. The gravel boxes, which I had at first intended to remove, were subsequently found so handy for trimming ship to an even draft and for listing to one side that they have been retained, cleats on the floor holding them from shifting, after once getting into trouble through their absence; one of the many things chargeable to the neglect of the builder in the first place. Across Newark Bay the wind howled and the sea boiled in seething foam, scattering many a bucketful along the decks, but none into the cockpit. The weather shore along the docks of Elizabethport made matters more comfortable and beyond that the trend of the Kills brought the wind right over the stern. Past the low reed girt marshes the yacht bowled away till a turn in the river called for a jibe and another, after which the sailing was simple enough through to Perth Amboy. Most of the distance was made in company with two oyster smacks whose tactics the Coot sought to follow, for I had no charts this side of the Delaware and was not well acquainted with the channel. The marshes are quite bold and with the exception of one shoal or grass-covered isle and some flats at several projecting points, indicated by outlying haystacks rising from the water, you may poke your bowsprit right over the waving reed tops before putting helm down for a turn. A good plan is to hold close to the banks on which you find bulkheads serving as wharves, for deep water can be depended upon close up. When I found the factories and settlements crossing to the opposite side, I followed suit, knowing that commerce would select the navigable channel.

The Kills are lined with establishments of many kinds, chemical and fertilizer works being the most numerous. The approach to Perth Amboy is heralded by a ridge of bluffs on Staten Island. The Kills widen out three miles above Amboy, and on both sides of the river can be seen the scattering colonies which betoken a city near by. The rumbling of trains was borne on the winds, while streamers of blue smoke ascended to the eye their snake-like threadings on shore. In the distance the mouth of the Kills opened into broad Raritan Bay, disclosing a great fleet of sail and many puffing little tugs. Abreast on the Jersey side high, gawky tressels poked their heads far out into the river, forming a long line of slips, with piers supporting coal pockets. Into these, like the pelting of distant hail, black diamonds were being tumbled from laden cars above, and from the pockets shoots led into the holds of huge coasting schooners receiving their cargoes destined for Eastern ports and manufacturing hives inland. Dusty and begrimed the neighborhood appeared, but signs of busy life and prosperity could be read all round. Vessels towed here and there, the clank of chains and creak of blocks as others got under way, a ferry boat churning its accustomed route with rhythmic slap of the paddles, yawl boats with crews lustily pulling at the oars, shouts and hails, everything on the move and everything engaged in doing something, all this gave to the surroundings an air of life and activity which I had never suspected.

The wind had fallen light, ugly clouds had parted and the sun shone forth bright and warm, as the Coot was introduced to the enlivening scenes around. So pleasant a contrast to the dreary morn, that we took several turns about the harbor before coming to. She was twisted through a score of oystermen at anchor, and round the point of bluffs, upon whose sunny side fine cottages and residences, embowered in bunches of evergreen trees, lend grace and beauty to the picture. Then she was tacked across the harbor out to the government tower marking the seaward end of a long shoal, a striking beacon by day, and by night a tireless sentinel whose bright red rays carry warning to the mariner picking his way into the welcome shelter of the port. Having made the circuit, the yacht brought up in a bight beyond the docks of South Amboy, and there lay for the night in perfectly smooth water, 6ft. deep and out of the channel. "You would have to get out there pretty quick if it blew in from the sea," volunteered a chance acquaintance as he sculled by in a boat. So I would, but as there was no appearance of any wind that night, certainly not from the eastward, the atmosphere being dry and frosty, this gave me no concern. The coal docks of the Lehigh Valley R. R. made shelter from the northward and westward, the quarter to look to for a blow just then. The sun set in a maze of glorious tints, in which gold and crimson predominated, the waters calmed down to a mirror, from which the brilliant hues above were faithfully reflected. The shores darkened into deep green, then slowly faded away into gray, while the skipper of the Coot stood in the cockpit and rested one arm on the cabin house, the other being free to handle the smoking bowl, which brought soothing thoughts and congratulations upon the happy inauguration of the voyage.

Say what they may, inveigh against the slow poison of nicotine, and hold forth upon the degradation of man in his slavish submission to the seductions of the plant, the austere high priests of total abstinence cannot deny the beneficent calm it brings, the spirit of philosophy begotten, the musings gentle and serene, the good intent, the tolerant liberality of mind and prudent resolutions for the future, which rise to the surface and pass in orderly review, as the devotee to the inspiring leaf, in collected self-possession, wafts pretty blue spirals upon the airs and watches their career as they soar with measured grace into the liberty of space above. Many a stormy day, many a cold night, I have passed in contentment and satisfaction in the Coot's cabin. Only has blue loneliness been driven over the Coot's side, and gloom and fret hunted down that hope and expectation might hold sway through the dainty, luscious flavor, the enticing aroma and virgin purity of "Seal of North Carolina," plug cut! Abstain and you will not die of poison at eighty, but you will slip your cable at fifty from sheer worry of life which has no such blessing as "Seal," plug cut. Over my pipe have I read and written. Over my pipe have I tickled the Coot through tight places. Over my pipe have I borne with harassing calms and numerous disappointments. Over my pipe have I enjoyed a spanking breeze and smart run. Over my pipe have I chummed in with the natives. Over my pipe have I studied the charts and planned the work for the next day. To "Seal," plug cut, my pacifier, companion and counseler, let me sing the praises justly due. Without "Seal" the pleasures of the cruise would have been curtailed not a little. Dull it must have dragged, unsociable, lacking in snugness, a task all but impossible that I should undertake.

It is a wonder that Perth Amboy should be so little known and visited by small yachts hailing about New York. It is seldom one can be seen steering through the Kills, yet the Staten Island Sound between Elizabethport and Raritan Bay is fine cruising water with width and depth sufficient for work against a head wind and winding enough to give occasional relief. If not imposing, the scenery is at least attractive and a change upon that so familiar in Long Island Sound. Once the marshes are left astern, the Highlands ahead are picturesque and pleasing, while the harbor of Perth Amboy, its traffic and tributary railroad bustle, make up an anchorage equal to anything on the Sound in appearance and interest. The Raritan River empties into the bay and itself affords many miles of broad reaches above the draw bridge at the city, before it narrows into a tortuous waterway. Amboy is also open to approach from the seaward side of Staten Island, offering a choice of routes according to tide and weather. As to depth of water there seemed to be plenty of it in the harbor, though of that a chart would give more reliable information. A local yacht club flourishes in the place, but when the Coot turned up late in November, that club had, of course, gone into winter quarters.

While I slumbered Jack Frost got to work and gave me a foretaste of what was coming. The thermometer fell below freezing point. Next morning the windows of the cabin were traced with all manner of fantastic cobwed patterns, the decks were clad in white and water had solidified into ice in the skiff astern, much to my consternation. Anxious as I was to proceed and escape from winter's threatened embrace, there was not wind enough to warrant lifting the anchor. Until late in the afternoon of the day as it had been left the night before. A catspaw now and then raised delusive hopes, though a good breeze and a lifted sheet would be needed to stem the ebb in the Raritan to the first lock of the canal at New Brunswick, a distance of twelve miles up. The favoring flood had run the length of its tether at noon, and with it expired all chance for the day. Letters were written and dispatched, some provisions laid in from a small store at the foot of the outer coal dock, and an attempt made to purchase a New York morning paper. The stock was exhausted, so the bespectacled young man who presides over the city news store in South Amboy imparted, an extraordinary demand having sprung up, owing to the sudden demise of Vice-President Hendricks.

For several weeks previous I had daily consulted the special weather forecasts in the "personal intelligence" of the *Herald*. These had been so uniformly accurate in every particular that I was loath to miss the information at a critical moment. Had freezing weather been announced, it was my intention to bitch astern of one of the regular tows of canal boats which daily ascend the Raritan to the persuasion of the fine Keystone line of iron tugs especially built for the service. These tows are made up around Whitehall in New York and proceed through the Kills and up the sinuous Raritan at a rate which, if slow, is independent of wind. Being left in the dark as to the weather, there was nothing to do but trust to better luck next day. Old Sol came out in all his glory and warmed the world up with his cheery smiles. So I betook myself to one of the piers in the Orange Blossom, and filled up the bunk breaker afresh from a watercoat, whose obliging owner refused any pay, and volunteered a lot of local gossip in a chat over a pipe we disposed of in company. Other yachts had preceded the Coot, bound to the same destination. One was a small schooner, probably the new light draft White recently launched from Poillon's for Florida cruising. Another was a large catboat with a couple of passengers, and a third was a peculiar sloop with two on board. The latter had but a few days the start, and, as will appear later on, was overhauled by the Coot in the Chesapeake, where a sudden acquaintance was equally suddenly brought to a close. A little man of much water likewise assured me that the propellers running to Philadelphia kept the canal open all winter. As the canal was billed to close Dec. 20, this goes to show that local luminaries are not infallible on home topics. His boy, whose youthful exuberance persisted in missing the bung hole of my breaker with the hose by about two feet, thereby squirting much of the old man's wealth into the sea, was so taken with the Orange Blossom that he went into juvenile ecstacy as I carefully landed the breaker in the bottom and took my seat at the oars. For the rest of the day the schooners working in against the light winds supplied material for observation, till red beams from the lighthouse sent me below to wrestle with gastronomic puzzles over the oil stove.

The mercury fell to 28° and sail and gear were frozen stiff, answering with ill grace to my tugs and swigs early on the following morn. A light westerly breeze was springing up, and, the tide serving, the Coot was under sail as the sun peeped above the land and bathed the treetops in rosy splendor. Fingers were nipped in the frosty air, but I was light in heart at the thought of making New Brunswick before ice should squeeze me tight in its grip.

The docks were soon rounded and a couple of boards saw the Coot up to the middle span of the railroad bridge across the Raritan. The bridge-tender had guessed my destination, for he swung the draw wide open as we approached without waiting for the customary toot from the horn.

"Where are you bound?" he queried, as he leaned conveniently against some of the iron lattice work.

"To Florida, if I can get there; anywhere out of the cold."

"Several yachts have gone the same way. You are pretty late in the season."

The wind had picked up to nice working strength, but it was dead ahead and the Coot had to be worked across the river the whole way, except where favorable turns enabled a straight course. Standing over to the southern shore, a man tonging for oysters was hailed as to the depth of water to be expected. He answered that after rounding the first point in sight, which should be given a good berth, the shores were bold all the way up. "What do you draw—not over two feet, I suppose?" "Two feet six," I replied. "You will have no trouble."

With this for general advice, I settled down at the stick for the twelve-mile beat, the flood horsing me up to windward in fine style, noted by the speed with which we weathered on various marks ashore. A lofty sail ahead, which could be seen across the marshes, pointed out the turns in the river and showed it to be very crooked. First the sail would be going the same way as the Coot, then at right angles, and occasionally seemed to be heading right back. A stern chase is a long one, but I could hold a much closer wind than the sloop, and in two hours had taken the lead, dispensing with the sloop's service as pilot. Numerous manufactories, especially pottery works, were passed, and several schooners coming down with the wind which was fair for them. The lower reaches were broad and well adapted for small boats, a rough sea being impossible owing to the twists. For canoeing no finer run could be imagined. The marshes gradually rose into dry land with banks two or three feet high, studded with great barn-like structures where the manufacture of bricks is carried on upon a great scale, some of the establishments looking like towns at a distance. The water front was lined with well preserved bulkheads, along which could be seen many of the typical brick sloops, so familiar to New Yorkers, with their high poops, gaudy colors, and general Dutch features, betokening their derivation from the old galliot introduced by the settlers from Holland who located their New Amsterdam on Manhattan Island, the foundation of the modern Babel known as New York.

About seven miles up, the river forked into two branches. I chose the widest as the most likely, nobody being within hail to question. After following its bends for two miles, it became very contracted and lost all appearances of leading anywhere in particular. Convinced that I had struck the wrong lead, the Coot was sailed up to a brick yard ahead where an old salt in oilskins aboard a sloop, after eyeing me for a while, as a queer sort of customer, kindly pointed out a canal as a short cut back into the Raritan whence I had come, adding that I was in South River which would take me up to Washington. After passing through the canal we came out again a mile below the fork and the circuit of three miles had been made for nothing. The old ground was again gone over when four miles remained to New Brunswick. Rolling hillocks in the foreground spoke of the highlands we were approaching. Fine farms dotted both shores, and clumps of trees relieved the monotony of tilled fields. Two miles below the first lock, the shores became bold, great rocky walls rising suddenly from the river, the first appearance of the red sandstone formation which underlies a large portion of New Jersey and contributes the red mud to the streets of Jersey towns, seen from the car windows of the railroad from New York to Philadelphia. Park-like forests of pines and evergreens topped the rocky promontories, their bows hanging over the bluffs like a green canopy.

The flood had about run its course and the wind fell very light. With the last breath the Coot was turned up successfully to the slimy bulkhead forming a leader into the first lock, and the city of New New Brunswick appeared in full view ahead. Located on a series of rising hills, climbing up into a ridge, with church spires glistening in the evening sun, the river coursing merrily through a gorge, spanned by the county and railroad bridges, the first sight of the busy town was picturesque and pleasing. As the Coot passed her lines to some old tree stumps ashore and got out fenders to protect her side from chafe, Helios bid the voyager good evening as he sank, blood red, below the darkening crests in the west. In the shades of twilight supper was dispatched, the cabin locked up, and a tour of inspection in the town undertaken. A two-gallon oil can was purchased and filled with headlight fluid to add to the supply on board, as the cold days and nights caused oil to be consumed in the stove at a rapid rate, each day requiring half a gallon for all purposes. C. P. K.

LIST OF WINNING YACHTS, 1885.

IN this list owners, rig and waterline length are given when known; abbreviations of club names same as in list of races.

4th or 5th in column of 3d prizes means a 4th or 5th prize; O and U in column of lengths stand for "Over" and "Under;" "22-25" shows length somewhere between the two figures; T stands for tons, 1st C for 1st class, etc.

A single leg for a championship pennant is shown by the club initial, as "D" means one race won in the Dorchester series, while D.Y.C. shows the winner of the whole series.

B.B. shows one leg for Buzzard's Bay Pennant of B.Y.C., and "B. B. Pen." the winner of it; Bur. Bay stands for a Burlington Bay Pennant race won.

In some races, as in B.Y.C. championship races, a boat could win a first prize and a leg for the pennant. In S.B.Y.C. a 1st and a 2d leg for two pennants was won in each race, and the two best averages at end of season took the pennants.

In some races where all boats raced for certain prizes and a part of them for additional prizes, the latter portion of the fleet is credited with two separate races; this applies to N.Y.Y.C. spring regatta, the trial races and the Douglass Cup race.

Although no prize was won by Puritan or Priscilla in the trial races or the matches with Genesta, each race is here treated as a separate race, and the winner is credited with one prize, the trial races being the only exception to the general rule followed, viz., to count nothing as a win unless a prize was actually taken.

As runs from port to port without prizes are not races of record they are not included.

P—Against names of Agnes and Athlon show races really won, but where prizes went to second boats being given by owners of winners. A—Against Bedouin means one leg for cup in races with Gracie.

A—Series of races entered as one race. B—And pennant on cruise.

YACHTING NOTES.—The schooner Norna has been through a gale off the Florida coast, in which she lost her bowsprit, head gear, and it is reported two of her crew. She put in to Nassau, and then to Pensacola for repairs. As the Norna is not a cutter, no special mention of her disaster has appeared in the daily papers ..The Great Head Y. C. gave its first annual ball at Winthrop last week, a very successful affair....Mr. Starbuck has sold his steam yacht Tillie to Mr. C. H. Osgood, of Norwich, Conn ...Ex-Com. Chase has sold his schooner Clio to Mr. S. L. Blood, N. Y. and Atlantic Y. C....Mr. Brook's schooner Montauk sailed on Jan. 13 for Nassau. The Nooya is nearly ready for a trip in the same direction....Mr. Morris's steam yacht Cora has left Norfolk for Florida....Mr. Stewart has sold his schooner Nokomis to Mr. Royal Phelps Carroll....Romeyn, Mr. W. R. Vermilye, has been sold to Mr. Wetmore, and her former owner has purchased the sloop Ariadne, built last year for Mr. Thomas Howe ...Nirvana, schooner, is now cruising in the South, and Carmelita is also off for the West Indies ...Knickerbocker Y. C.—The sloop Siren will have an iron keel of 1500 pounds. The sloop Melvina will be changed to a keel boat this winter. The Hornet will give up her bg jib for two head sails. The Whim has had a new cabin built on her....Club meetings.—New York Y. C., Feb. 4, election and general business. Atlantic Y. C., March 8, election.

YACHT BUILDING AT GLOUCESTER.—Messrs. Higgins & Gifford are now building a centerboard yacht to be cutter rigged, with cockpit, 35ft. long, 12ft. beam, 4ft. deep, from same model as the yacht Marshal Tarr, also one keel yacht, cutter rigged, with 1,200 pounds iron on keel, 36½ft long, 12½ft beam, 5ft. deep. Besides these they have a centerboard sloop with a large cabin and standing room, 25ft. over all, 10ft. beam, 3ft. deep, counter stern; and a centerboard sloop with low house, very light draft, expressly for speed, 25ft. long, 9½ft. beam, 2ft. deep, with large spread of canvas and very large centerboard; and a keel yacht 20ft. long, 9ft. wide, 2ft. deep; this boat is very flat, with long floor and has a keel 2½ft. deep with lead ballast in keel. They also have a contract for a steam launch 38ft. long, 8ft. beam, 2½ft. deep, 22in. draft. Extensive alterations are in progress on the yacht Louette, Com. L. M. Haskins, of the Sandy Bay Y. C. Petrel, Capt. H. H. Paul, of the same club, will have an addition of a house and round stern, and her rig will be changed from cat to a sloop. The Kittiwake, Capt. Chas. Cunningham, same club, is having a round stern and other improvements. The Evelyn is having a deep keel and general looking after sailing qualities. The Edith will also be overhauled and put in good order.

A PAINFUL SITUATION.—The report industriously circulated by several dailies, to the effect that Irex had challenged for the cup, has not only been proved to be without foundation, but it is denied by the English papers that her owner had any idea of challenging. The good work goes on, however, and each week some astounding novelties go the regular rounds. Last week's record included an announcement of the approaching dissolution of the American Y. C., since denied and also the following explanation of the trouble in the Seawanhaka C. Y. C., the utterance of the ubiquitous "prominent member" in the *Commercial Advertiser*: "The *Herald* says that the trouble arose from a quarrel between cutter men and sloop men. This is all wrong and is in no sense an element of the trouble. Mr. Stewart himself owns a centerboard schooner. A special bone of contention in the club is the admission of a lot of canoes. These fly the club colors and are entitled to a salute from any schooner in the club. There is a very strong feeling against the admission of these small boats." As Mr. Stewart is the owner of one of the largest schooners and also of one of the smallest of the three or four canoes in the club, this makes it all clear. Imagine the feelings of a yachtsman, who, on board of his imposing schooner, is obliged to lower himself by dipping his colors to his own canoe; or on the other hand, his mortification when, as owner of the little craft, he is coolly snubbed by himself in the capacity of the haughty master of a fine schooner. What a chance for Mr. Gilbert!

LARCHMONT Y. C.—A special meeting of the Larchmont Y. C. will be held at Delmonico's, Fifth avenue and Twenty-sixth street, on Monday evening, Jan. 25, at 8:30 o'clock, at which the following amendments to the constitution and by-laws have been proposed and will be acted upon at the meeting. Constitution, Article VIII.—The first sentence to be amended to read as follows: "The membership shall be limited to five hundred." By-Laws. Chapter III., Sec. 1.—To be amended to read as follows: "The initiation fee shall be fifty dollars." Sec. 2.—The first sentence to be amended to read as follows: "The yearly dues of each member shall be twenty dollars, payable at the annual meeting."

SMALL LAUNCHES.—Messrs. Powell & Douglas, Waukegan, Ill., are now building a 45ft. launch for Mr. J. A. Kirk, of Chicago, to be planked with cedar, copper fastened, and finished in mahogany. The same firm are now putting the Shipman engine into launches, and recommend it as simple, cheap and effective. These engines are now manufactured, after improved designs, by the Pope Manufacturing Company.

ATLANTIC Y. C.—The twentieth anniversary of the Atlantic Y. C, was celebrated by a dinner at the Hotel Brunswick on Friday last, at which Com. Hogins presided. A large number of members and guests, among the latter Mr. Edward Burgess, were present. It was proposed during the evening that the club should build a sloop from Mr. Phillip Ellsworth's model, large enough to meet Galatea.

TORONTO Y. C.—The Toronto Y. C. have their house open all winter, Monday evening of each week being devoted to a social meeting. A supper was lately given by the club to Mr. Duggan, at which Mr. Geo. E. Evans presided.

ADDRESS WANTED.—Will "W.," whose letter on stoves appeared on Dec. 31, please send his address to us?

ANSWERS TO CORRESPONDENTS.

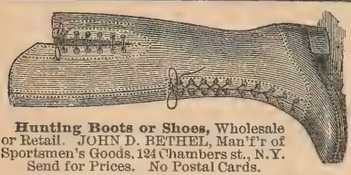
P. L.—Florida has no game law.

J. C. B.—Go to High Point, North Carolina.

H. B., Flatbush.—You will find it just as cheap to buy a new rifle.

F. E. T., Bangor, Me.—The book by Thad Norris will be the best for you.

VESPER.—Assume the 150yds. screen as the target and reduce its trajectory height to zero or muzzle height, as shown; then make proportionate reductions at the 50 and 100yd. screens as shown in our detailed explanation of the manner of working out the results.



AMATEUR, Rahway, N. J.—1. What constitutes "faking"? I cannot find it in Webster. 2. Does it in any way disqualify the animal on exhibition at bench shows? Ans. 1. To conceal the defect of an animal by artificial means. 2. Both may be disqualified, at the discretion of the managers.

C. H. S., Chestnut Hill.—Will you please inform me whether the gray partridge (*Perdix cinerea*) has been imported into this country from Sweden? and if it has, was the attempt to naturalize it successful? Where can they be obtained, and at what price? Do you think this climate would be too severe for them? Ans. The gray partridge has been imported, and in some cases, where the matter was properly attended to, has done well. There is no reason to suppose that the climate is too severe for these birds, though they might require a little looking after the first winter. On Mr. Lorillard's grounds in New Jersey the partridges have done very well and bred freely. They can probably be obtained of Reiche Brothers, in Chatham street, New York, at an expense of about $6 per pair.

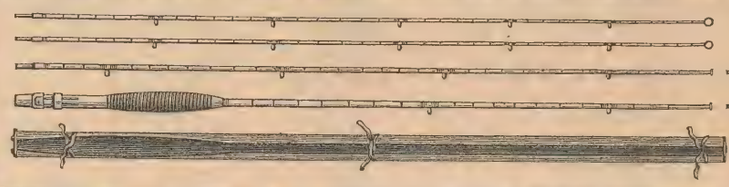
TO FLORIDA ANGLERS.



Keeping fully abreast with the times, we have the last few seasons given particular attention to the manufacture and introduction of tackle specially adapted to the needs of Florida anglers.

We have an unusually fine assortment of the following goods, used and recommended by expert Florida anglers:

Pearl Florida Spinners, Mottled Pearl Baits, Pearl Squids for Spanish Mackerel, Pearl Mullet, Florida Bass Flies, Tackle for Channel Bass, Red Snappers, Sheepshead, Salt Water Trout, Etc., Etc. Also a New and Special Tackle for TARPUM, including our famous Tarpum Line.

If your dealer does not keep our goods in stock, or will not order them for you, send us 50 cents for our 180-page folio illustrated catalogue.

ABBEY & IMBRIE,
18 Vesey Street (Fourth door from Astor House), New York City.

Split Bamboo Fly Rod.

This cut represents our No. 23 Split Bamboo Fly Rod with Grooved Wood Form. Length, 10½ft; weight, 8oz. We make same style rods for trout and bass to weigh from 5 to 12oz., also the "Standard Henshall Rod," Lancewood Rods, Reels, Turned Stock and Rod Trimmings of all descriptions. For New Illustrated Catalogue for 1886 address

THOS. H. CHUBB,
Orange County, Post Mills, Vermont.

A NEW RIFLE.

Can now furnish guns for the following sizes Center-Fire Cartridges:

.32, .38 and .44 Winchester,
.32-40, .38-55, .40-50 S. S.,
.40-70 S. S., .40-70 Ballard,
.45-70 U. S. G.

WINCHESTER SINGLE SHOT.

RIM-FIRE GUNS Not Yet Ready.

Weights from 6 3-4 to 12 lbs., according to caliber and size of barrel.

WINCHESTER REPEATING ARMS CO.,
NEW HAVEN, CONN.

Send for 76-page Illustrated Catalogue. Just out.

GRATEFUL—COMFORTING.
EPPS'S COCOA.
BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

JAMES EPPS & CO., Homœopathic Chemists, London, England.

PRICE, POSTPAID, $2.00.
FOREST AND STREAM PUBLISHING CO.,
39 Park Row, New York.

With the approach of a new year it is not necessary to announce any change in our manner of conducting this journal. Just what the FOREST AND STREAM has been in 1885 we hope to make it in 1886. It will be run on the same old principles, tested by experience and approved by prosperity. It will be just as entertaining, just as instructive, just as frank and outspoken, and just as helpful.

We are sometimes asked to explain the reason of the FOREST AND STREAM'S constantly widening influence and prosperity. Well, there is no

Trade-Secret

about it, and we do not mind telling you. It is this: We have not expended our energies in preposterous spread-eagle proclamations of tremendous attractions in the dim and distant future, but have pinned our faith to present performance, each week, and fifty-two weeks in the year. This in the kind of journalism that is bound to succeed. Nothing very occult about it, you see.

Another element of strength is the jealousy with which we have maintained the inherent dignity and entire respectability of the pastimes discussed in these pages, and the extreme care we have taken to keep the tone of the columns such as renders the paper fit for any man to receive into his family. We are assured by men, whose good opinion we value, that they do not think it necessary to make

A Weekly Scrutiny

of the contents of the FOREST AND STREAM before venturing to lay it on the family table, We determined, years ago, that a clean paper must win its way among sportsmen (not "sporting men"). The fact that it has done so is now cited, not that we may boast of our own prescience, but as a most gratifying evidence of the high standing of the field-sports to which this journal is devoted.

In other words, the reason why the "Forest and Stream" is liked by sportsmen is that the "Forest and Stream" is the kind of paper that sportsmen like.

GOOD THINGS IN STORE FOR 1886.

Among the papers and sketches to appear are the following:

Sam Lovel's Camps.

An account of Sam Lovel's experiences when he took Uncle Lisha's advice and went trapping on little Otter. By THE AUTHOR OF UNCLE LISHA'S SHOP.

To the Walled-in Lakes.

Sketches of exploration and hunting in the Northwest with the Blackfeet and Kootenays. By "Yo."

Cruise of the Coot.

An account of a voyage alone in a single-hander from New York along the Atlantic seaboard to Florida. By C. P. KUNHARDT.

Hunting in the Himalayas.

Scenes and incidents in the life of an Indian forester. By "SHIKAREE."

Falcons and Falconry.

An introduction to the sport of hawking, with illustrations, drawn from nature. By R. W. SEISS.

Game Preserving in Britain.

A comprehensive series of papers on practical game preserving in Great Britain, with descriptions of the game birds of the British Islands, and sketches of sport. By "MOORMAN."

Scrimshawing.

A popular account of how a whaler spends the idle hours aboard ship. By JAS. TEMPLETON BROWN.

The Lower Forms of Life.

A continuation of the admirable series of essays on the beginning of animal life. By JAMES STOLLER.

Studies in Botany.

New chapters on plants and plant life, written and illustrated from nature. By A. W. ROBERTS.

Land and Water Experience in Florida.

New chapters of experience on the Gulf Coast. By "NESSMUK."

Cruise of the Pilgrim.

A delightful description of a summer voyaging on the Atlantic in the cutter yacht Pilgrim. By W. H. WINSLOW.

Days with the Barmacide Club.

A vivacious account of angling luck, good and bad, in Adirondack waters, whose name, latitude and longitude the author refuses to disclose. By MILLARD.

Camps of the Kingfishers.

A further relation of what befel the Kingfishers in their sojourn at Carp Lake, Michigan.

Camp Flotsam.

A new series of the chronicles of the outers at Camp Flotsam, with accounts of bass fishing in Canadian waters. By WAWAYANDA.

The weekly issues of the FOREST AND STREAM form two volumes each year of twenty-six numbers, or 500 pages each, and the file constitutes a library of permanent worth. Twenty-four volumes have already been published. We furnish handsome file binders (price $1.50) which hold twenty-six numbers.

Subscriptions may begin at any time. Per year, $4; $2 for six months. Remit by post-office money order, draft or registered letter. Give name, town, county and State. Address

FOREST AND STREAM PUB. CO., 39 Park Row, N. Y.

CONICAL BULLET CAPS.

Made on same principal as regular Bullet Breech or Flobert Caps, but **Extra Strength,** *and 29 grain, 22 calibre Swaged Bullets for* **Accurate Target Shooting** *up to 60 feet.*

NO SMOKE! NO NOISE! FOR SHOOTING GALLERIES.

Adapted to all Rifles using 22 calibre Rim Fire Cartridges.

MANUFACTURED BY

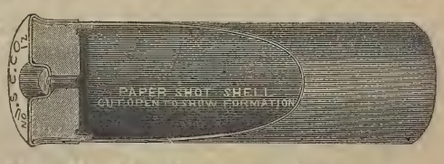
The Union Metallic Cartridge Co.

BRIDGEPORT, CONN. U. S. A.

22 CALIBRE LONG RIFLE CARTRIDGES

FOR RIFLES ONLY. Bullets are Swaged and weigh 11 grains more than Bullets in 22 long Pistol Cartridges.

FOR ACCURACY AND PENETRATION ARE THE BEST.



U. M. C. Goods can be obtained through all Ammunition Dealers.

BLACK PAPER SHOT SHELLS.

U. S. Shells are thoroughly Waterproof and Non-Swelling.

Best Grade, all Sizes & Lengths
from No. 10 to 20 inclusive.
Second Grade, - - Nos. 10 & 12 only.
Star Grade, - - - " 10 & 12 "
Climax Grade, Cheapest, " 10 & 12 "

Our Shells take U. S. Improved No. 2 Copper Primers, or No. 2 of other makers.

WE GUARANTEE OUR PRIMERS TO BE EQUAL TO ANY ON THE MARKET.

U. S. Black Waterproof Paper Shells are intended to overcome the great disadvantage which all other Paper Shells are subjected to when used in damp weather. They are so completely waterproof that WATER CANNOT PENETRATE INTO THE POWDER EVEN WHEN THEY ARE ENTIRELY SUBMERGED. Experience shows that Black Paper is the strongest paper for Shot Shells. The CHEAPEST GRADE Shell (Climax) now made by the U. S. Co. can be RELOADED FROM THREE TO FIVE TIMES.

Cutter Sails a Specialty

Mainsails cut with loose foot or lace to boom. Estimates, etc., on application.

Chester Folding Anchor.

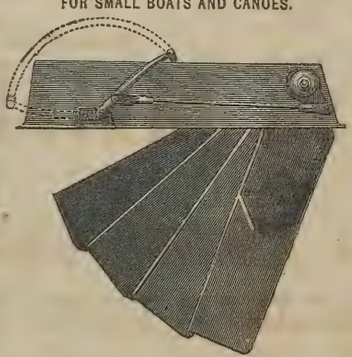
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

Atwood's Patent Center-Board

The Spencer Repeating Shotgun

Medal First Class over all competitors, New Orleans Exposition, 1885.

Will Fire Six Times in Three Seconds Without Removing the Gun from the Shoulder.

The Best Shooting Guns in the World!

The Magazine is located under the barrel and contains five cartridges; while one may be placed in the barrel. The backward movement of the slide on the Magazine, by the left hand, opens the breech, throws out the exploded shell and cocks the hammer. The forward motion puts a loaded cartridge into the barrel and closes the breech. After a little practice this motion becomes intuitive, and six shots can be fired as rapidly as desired. The shooting qualities are remarkable, both for pattern and penetration. The large demand proves their popularity. In addition to its repeating qualities the advantages offered are Strength, Symmetry, Durability and Cheapness. The parts are made of the best forged steel, and are warranted strong and durable. The barrels are of the finest Belgian of our own importation. All our guns at present are 12-gauge, Damascus barrels, Italian walnut, pistol-grip stock, checkered, and rubber butt plate. Length of barrel, 30 to 32 inches. Shorter barrels to order. For our illustrated Circular and other information address

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted fo "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

E. I. DUPONT DE NEMOURS & CO.,
87 Beaver street, New York.

N. B.—Use none but DUPONT'S Fg. or FFg. for long-range rifle shooting.

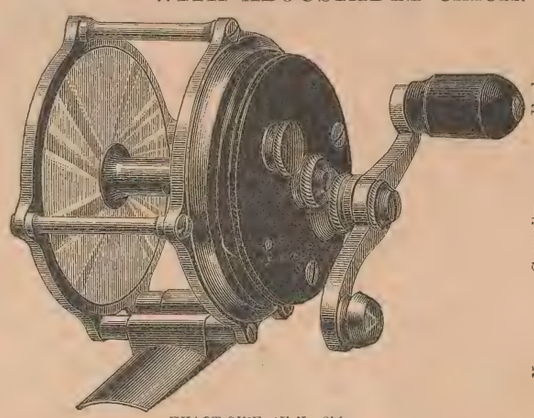
SCREW PLATES, TAPS, DIES, ETC., FOR gunsmiths and amateurs. Send for illustrated catalogue to S. W. CARD & CO., Mansfield, Mass

Sportsmen's Goods.

FOR BLACK BASS FISHING.



H. L. LEONARD'S
NEW C. V. BLACK BASS ROD.

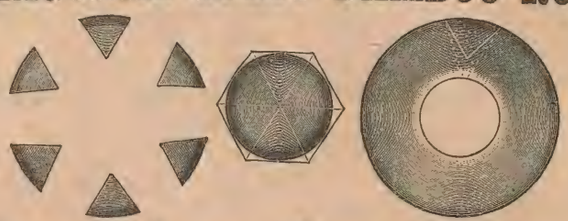
Price $30.00.

8 to 8¾ feet long, 8 to 8½ ounces in weight.

The finest and most practical rod ever made for Minnow Casting and General Black Bass Bait Fishing. This is the style of rod that was so generally admired at the last tournament at Central Park.

NEW "IMPERIAL" BLACK BASS REEL, STEEL PIVOT, WITH ADJUSTABLE CLICK.

EXACT SIZE OF No. 3½.



No.	Capacity.	Each.
2,	75 to 100 yards,	$16 00
3,	50 to 75 "	14 50
3½,	40 to 50 "	13 00

It is made of Rubber and German Silver, with raised pillar, making a reel of same capacity appear much smaller and of lighter weight than reels made in the old way, without raised pillar.

The favorable reception of this reel after its introduction last season has induced others to attempt to imitate it. We have improved the reel for this season, and offer it as the most practical reel made for Minnow Casting and general Black Bass Angling. It is also light enough and well suited for use on a fly-rod.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

The Kennel.

NEW PUBLICATION.

A STUDY OF THE

Theory and Practice of Canine Medicine.

DOGS,

Their Management and Treatment in

DISEASE.

By ASHMONT.

"All of the complaints to which dogs are subject are described in plain language, with their cause, symptoms, diagnosis, prognosis, treatment and medicines—prescriptions being given for each distinctive form of disease. It is a valuable compendium of "common sense" and medical knowledge upon the subject of dog diseases, and meets a want which is not so adequately supplied in any other book of this character with which we are acquainted."—*Boston Herald.*

"As a whole this work is a most valuable addition to the literature of its kind. Its great recommendation is that it is scientific and up to date, and at the same time quite intelligible to non-medical men. Its appearance might have been improved as regards type, but this has probably been subordinated to the idea of putting the work into compact, almost pocket size."—FOREST AND STREAM.

PRICE $2.00. FOR SALE BY

J. LORING THAYER,

No. 186 Tremont st., Boston, Mass.

Sent postpaid to any address.

Sole Agents for the U. S. and Canada.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer, NEWBURYPORT, MASS.

To Rid a Dog of Fleas

Use the **New Process Flea Soap.** It contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap. Delightfully perfumed and unexcelled as a dressing for a dog's coat.

IT WILL KILL FLEAS,

and keep them off a dog that is washed with it three times a week; also neutralizes all "doggy" odor. Sold by gunsmiths.

A trial cake mailed for 25 cents.

HUNTING!

This boot will give better satisfaction for all-round work than any covering yet invented for the feet. Double uppers, water-tight tongue at instep, snug adjustment at top, giving symmetrical application to conformation of foot, ankle and calf, and contributing thorough comfort, protection and warmth. Will not chafe the heel or ankle. The seams are rubber cemented before being stitched; the tongue is thoroughly waterproofed; bottoms put on with welt and hand sewed; no screw-nails used as in the cheap imitations. Thorough work and fit guaranteed.

From Toronto or Hamilton.

The only line running to the famous Canadian

MUSKOKA LAKES.

No better Hunting, Fishing, Camping or Family Resort to be found in America.

It is reached within five hours from Toronto or Hamilton. Connection at Muskoka Wharf is made with steamers of the Muskoka Lakes Navigation Company for principal points.

Parlor Cars. First-Class Hotels.

Accommodation is to be had at ports of call at from $1.00 to $2.50 per day. Camping parties can live for considerably less.

Guides, Boats, etc., obtained at any of the hotels at reasonable rates.

Moose, Deer, Bear, Partridge, Duck, Brook Trout, Maskalonge, Salmon Trout, Black Bass, Pickerel to be had in abundance. No long journey needed. You will not be disappointed.

TOURISTS' RATES.—Tourists' or Sportsmen's Tickets are good to stop over at any point north of Barrie and return up till close of navigation. Camp equipage, stores and dogs are carried free when accompanied by owners. Baggage checked through to principal points on Lakes.

For Tickets, Rates, Time Tables, etc., apply to Agents at all principal Ticket Offices in Canada or Unites States, or ROBERT QUINN, General Pass. Agent, N. & N. W. R'ys., Toronto

A. P. COCKBURN, Gen. Man. M. N. Co., Gravenhurst.

OLD DOMINION LINE.

The Steamers of this Line reach some of the finest waterfowl and upland shooting sections in the country. Connecting direct for Chincoteague Cobb's Island, and points on the Peninsula, City Point, James River, Currituck, Kittyhawk Club Grounds, Van Slyck's, etc., etc. These points can now be reached by rail and stage from Norfolk. Norfolk steamers sail from Pier 26, N. R., New York, Tuesday, Wednesday, Thursday and Saturday. Lewes, Del., Monday, Wednesday and Friday at 4 P. M.

Full information given at Co.'s office, 235 West street, New York.

Hotels and Resorts for Sportsmen.

"THE FISHING LINE."

TAKE THE

Grand Rapids and Indiana R. R.

THE DIRECT ROUTE TO THE

Trout, Grayling and Black Bass Fisheries,

AND THE

FAMOUS SUMMER, HEALTH AND GAME RESORTS AND LAKES OF

Northern Michigan,

THE WATERS OF THE

GRAND TRAVERSE REGION

and the Michigan North Woods are unsurpassed, unequaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory. The Sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthmatic Affections.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

For Tourists' Guide a handsomely illustrated book sent free. Time Cards, Folders and further information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

Guns, Ammunition, etc.

The Parker Gun.

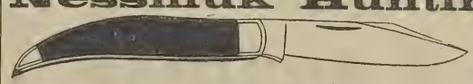
PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Latest Victory!



MR. C. M. STARK won the **Champion Diamond Badge with AMERICAN WOOD POWDER** at the First International Clay-Pigeon Tournament at Chicago, May 26 to 31, 1884, for best individual average.

Guns, Ammunition and Sportsman's Goods. Beef Flour.

VON LENGERKE & DETMOLD, 14 Murray St., New York.

Nessmuk Hunting Knife.

The only pocket hunting knife worth a sou. Full sized knife, 9½in. long open, and 5½in. long shut. Blade 1in. wide, and equal to the best razors, but not so hard. If you want one by mail, send plain address to GEO. ROCKWOOD, Wellsboro, Tioga Co., Pa., with postal note for $1.50. P.S.—See Forest and Stream for Sept. 18, page 147.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

WM. READ & SONS, 107 Washington st., Boston, SOLE AGENTS.

W. W. GREENER'S BREECH-LOADERS.

The letter given below was just received from a gentleman to whom I sent a Greener gun bored expressly for thin brass shells. At first trial he did not make the pattern which I guaranteed to him, and I wrote him to return the gun. In answer to this request I received the following letter:

DETROIT, Mich., July 18, 1885.

Henry C. Squires, Esq., 178 *Broadway, New York:*

Yours of July 15 received. At the same time that I wrote to you, I wrote to a friend at Ottawa, Ontario, who has one of Greener's guns chambered expressly for Kynoch's shells, and who claims that his gun, a 12-gauge, will kill a black duck each shot at 70yds. He sent me by express six shells loaded with No. 6 English shot, which I tried at a 30-inch circle, 40yds.: Right barrel, first 287, second 293, third 301; left barrel, first 230, second 241, third 249. He said in his letter he was sure that I did not load right. I loaded my shell his way with 3¾ drams powder and 1¼ shot, one common pink-edge wad and one cardboard over powder and one cardboard over shot, the right barrel putting 95 per cent. of the charge in circle all size of shot except BB, the left barrel putting the whole charge of sixty pellets in the circle. What ruined my pattern the first trial was too much wadding between powder and shot. I will keep the gun as it shoots the large sizes of shot the best of any gun I ever saw. I am going down to Galveston this fall. It will be just the gun for ducks and geese shooting on Galveston Bay.

Yours obediently,
ROBERT AITON.

THE GREAT OFFER

Is continued for a short time longer, as noted below.

Chester Folding Anchor.

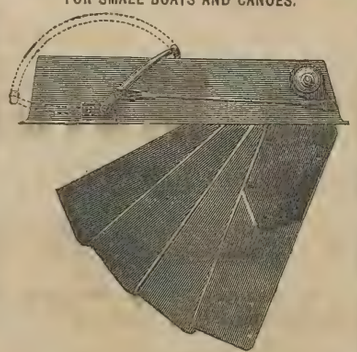
The Most Simple, Complete and Compact Anchor for Small Craft ever Invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed; the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

Atwood's Patent Center-Board

FOR SMALL BOATS AND CANOES.

ATWOOD BROS., Clayton, N. Y.

Our Boats, Oars & Trimmings

ARE SELLING LIKE

LEMONADE

On a hot day. We have them in all styles and all sizes, and now is just the time to buy. We can sell you a good boat for $35, including oars and rowlocks; better ones at higher prices, of course, but nowhere else in the city can be found boats of the same quality at anything like the price. We have also a good line of "Sprague's" celebrated boats, and they are just selling "hand over fist."

Our second lot of catalogues are out, and 10 cents in stamps will prove a potent factor in your receiving a copy.

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg, and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

The jointed handles are so arranged that one piece can be used as a short handle when required.

We can furnish rings of following sizes: 13x16, 12x15, 11x14, 10x13 inches. Additional rings, Brass 40cts.; Nickeled, 75cts. each. Nickel Plated Gaff Hooks to fit same handle—Bass sizes, $1 each; For Pickerel and large fish, $1 50 each.

WILLIAM MILLS & SON,
No. 7 Warren Street, N. Y.

Malleson's "Patent Perfection Treble Multiplying Reel"

CENTRAL ACTION,

RAISED PILLAR.

Patented September 4, 1883.

FLUSH BALANCE HANDLE, ADJUSTABLE CLICK.

Heretofore the mechanism of all Multiplying Reels necessitated the placing the handle below the center; in consequence a Multiplying Reel could never be used successfully in either fly or minnow casting, as the line would most surely catch upon the handle. This cannot occur in using the "PATENT PERFECTION," for it not only multiplies from the center, but the handle is fully protected by a projecting metal band. Another decided advantage peculiar to the PATENT PERFECTION REEL is that by means of the adjusting index (which lies between the handle and reel-plate) it can be changed in a second from a free-running Multiplying to a Click or Drag Multiplying, or vice versa.

FOR SALE BY ALL DEALERS IN FISHING TACKLE.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

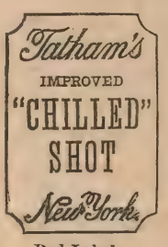
Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.



Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city or wholesale at our office.

The Kennel.

NEW PUBLICATION.

A STUDY OF THE

Theory and Practice of Canine Medicine.

DOGS,

Their Management and Treatment in

DISEASE.

By ASHMONT.

"All of the complaints to which dogs are subject are described in plain language, with their cause, symptoms, diagnosis, prognosis, treatment and medicines—prescriptions being given for each distinctive form of disease. It is a valuable compendium of "common sense" and medical knowledge upon the subject of dog diseases, and meets a want which is not so adequately supplied in any other book of this character with which we are acquainted."—*Boston Herald.*

"As a whole this work is a most valuable addition to the literature of its kind. Its great recommendation is that it is scientific and up to date, and at the same time quite intelligible to non-medical men. Its appearance might have been improved as regards type, but this has probably been subordinated to the idea of putting the work into compact, almost pocket size."—FOREST AND STREAM.

PRICE $2.00. FOR SALE BY

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,

NEWBURYPORT, MASS.

To Rid a Dog of Fleas

Use the **New Process Flea Soap.** It contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap. Delightfully perfumed and unexcelled as a dressing for a dog's coat.

IT WILL KILL FLEAS,

and keep them off a dog that is washed with it three times a week; also neutralizes all "doggy" odor. Sold by gunsmiths.

A trial cake mailed for 25 cents.

HUNTING!

This boot will give better satisfaction for all-round work than any covering yet invented for the feet. Double uppers, water-tight tongue at instep, snug adjustment at top, giving symmetrical application to conformation of foot, ankle and calf, and contributing thorough comfort, protection and warmth. Will not chafe the heel or ankle. The seams are rubber cemented before being stitched; the tongue is thoroughly waterproofed; bottoms put on with welt and hand sewed; no screw-nails used as in the cheap imitations. Thorough work and fit guaranteed.

Hotels and Resorts for Sportsmen.

"THE FISHING LINE."

TAKE THE

Grand Rapids and Indiana R. R.

THE DIRECT ROUTE TO THE

Trout, Grayling and Black Bass Fisheries,

AND THE

FAMOUS SUMMER, HEALTH AND GAME RESORTS AND LAKES OF

Northern Michigan,

THE WATERS OF THE

GRAND TRAVERSE REGION

and the Michigan North Woods are unsurpassed, unequaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory. The Sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthmatic Affections.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

For Tourists' Guide a handsomely illustrated book sent free. Time Cards, Folders and further information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

WM. READ & SONS, 107 Washington st., Boston, SOLE AGENTS.

Celerity! Comfort! Economy!

W. W. GREENER'S EJECTOR GUN.

This gun is unapproachable in value, mechanism is simple, principle strong and reliable, workmanship good. The model is the result of long experience and continual research in gun manufacture, the like success has never been obtained by a Breech-Loading Gun. It is rapidly making way, and is the admiration and desire of sportsmen. NO COMPLICATION OF PARTS, NO STRAIN, BUT MANY ADVANTAGES.

R. ROCHFORD BOYD, ESQ., writing to the London *Field*, April 4, says: "I received the Ejector last autumn. I returned three weeks since. It was never in that time out of my possession, was never out of gear in any way. It had done lots of work before it came into my hands and is as ready to go through as much more. . . . Its three advantages appear to me to be **CELERITY, COMFORT and ECONOMY.** An Ejector Gun **will** do the work of **two guns."**

IRA PAINE is now using an Ejector Gun with success never before equalled. With W. W. Greener's Ejector Gun more shots can be fired in *two* minutes than with any *two* repeating shotguns. The Ejector Gun is a sound weapon, has a fine exterior and is made only in finest quality. Its production is very limited, each gun being an *objet d'art.* All who wish to have a good modern gun should possess W. W. Greener's Ejector Gun. All other models will quickly become old-fashioned.

W. W. Greener is selling his ordinary Hammer and Hammerless Guns of various qualities at greatly reduced prices. Particulars of

HENRY C. SQUIRES, 178 Broadway, N. Y.,

who has also W. W. Greener's Ejector Guns in stock.

BLACK EDGE. PINK EDGE. 3/8 in. WHITE FELT

SUPERIOR, CHEMICALLY PREPARED

ELASTIC GUN WADS

MANUFACTURED BY THE

UNION METALLIC CARTRIDGE CO.,

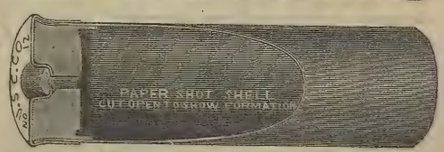
17 & 19 Maiden Lane, N. Y.
256 Market Street, San Francisco.

BRIDGEPORT, CONN.

Card Board Wads,
Black Edge Wads,
Pink Edge Wads,

ALSO 3-8 INCH

WHITE FELT WADS,



To which we call particular attention, as they are specially intended for use OVER POWDER. Will NOT blow to pieces and are guaranteed to give the BEST RESULTS. Are SUPERIOR IN QUALITY to the expensive imported Bag Wads, and are sold at about one-half the price. CAN BE PROCURED DIRECT, OR FROM ANY DEALER IN AMMUNITION.

BLACK PAPER SHOT SHELLS.

U. S. Shells are thoroughly Waterproof and Non-Swelling.

Best Grade, all Sizes & Lengths
from No. 10 to 20 inclusive.
Second Grade, - - Nos. 10 & 12 only.
Star Grade, - - - " 10 & 12 "
Climax Grade, Cheapest, " 10 & 12 "

Our Shells take U. S. Improved No. 2 Copper Primers, or No. 2 of other makers.

WE GUARANTEE OUR PRIMERS TO BE EQUAL TO ANY ON THE MARKET.

U. S. Black Waterproof Paper Shells are intended to overcome the great disadvantage which all other Paper Shells are subjected to when used in damp weather. They are so completely waterproof that WATER CANNOT PENETRATE INTO THE POWDER EVEN WHEN THEY ARE ENTIRELY SUBMERGED. Experience shows that Black Paper is the strongest paper for Shot Shells. The CHEAPEST GRADE Shell (Climax) now made by the U. S. Co. can be RELOADED FROM THREE TO FIVE TIMES.

PRICE, $3.00.

To be had from the author, or HENRY BESSEY, Sole Agent, 47 Cedar street, New York.

Chester Folding Anchor.

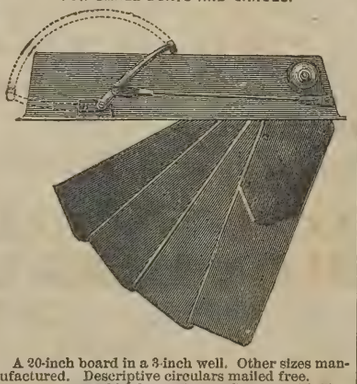
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

Atwood's Patent Center-Board

ATWOOD BROS., Clayton, N. Y.

Our Boats, Oars & Trimmings

ARE SELLING LIKE

LEMONADE

On a hot day. We have them in all styles and all sizes, and now is just the time to buy. We can sell you a good boat for $35, including oars and rowlocks; better ones at higher prices, of course, but nowhere else in the city can be found boats of the same quality at anything like the price. We have also a good line of "Sprague's" celebrated boats, and they are just selling "hand over fist."

Our second lot of catalogues are out, and 10 cents in stamps will prove a potent factor in your receiving a copy.

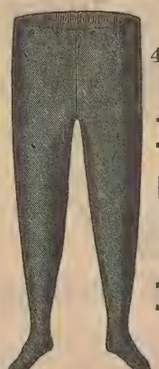
The Spencer Repeating Shotgun

Medal First Class over all competitors, New Orleans Exposition, 1885.

Will Fire Six Times in Three Seconds Without Removing the Gun from the Shoulder.

The Best Shooting Guns in the World!



The Magazine is located under the barrel and contains five cartridges; while one may be placed in the barrel. The backward movement of the slide on the Magazine, by the left hand, opens the breech, throws out the exploded shell and cocks the hammer. The forward motion puts a loaded cartridge into the barrel and closes the breech. After a little practice this motion becomes intuitive, and six shots can be fired as rapidly as desired. The shooting qualities are remarkable, both for pattern and penetration. The large demand proves their popularity. In addition to its repeating qualities the advantages offered are Strength, Symmetry, Durability and Cheapness. The parts are made of the best forged steel, and are warranted strong and durable. The barrels are of the finest Belgian of our own importation. All our guns at present are 12-gauge, Damascus barrels, Italian walnut, pistol-grip stock, checkered, and rubber butt plate. Length of barrel, 30 to 32 inches. Shorter barrels to order. For our illustrated Circular and other information address

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

The Kennel.

NEW PUBLICATION.

A STUDY OF THE

Theory and Practice of Canine Medicine.

DOGS,

Their Management and Treatment in

DISEASE.

By ASHMONT.

"All of the complaints to which dogs are subject are described in plain language, with their cause, symptoms, diagnosis, prognosis, treatment and medicines—prescriptions being given for each distinctive form of disease. It is a valuable compendium of "common sense" and medical knowledge upon the subject of dog diseases, and meets a want which is not so adequately supplied in any other book of this character with which we are acquainted."—*Boston Herald.*

"As a whole this work is a most valuable addition to the literature of its kind. Its great recommendation is that it is scientific and up to date, and at the same time quite intelligible to non-medical men. Its appearance might have been improved as regards type, but this has probably been subordinated to the idea of putting the work into compact, almost pocket size."—FOREST AND STREAM.

PRICE $2.00. FOR SALE BY

J. LORING THAYER,

No. 186 Tremont st., Boston, Mass.

Sent postpaid to any address.

Books by Hugh Dalziel.

Imported by us and now for sale at the low prices affixed:

Sole Agents for the U. S. and Canada.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,

NEWBURYPORT, MASS.

Sure Death to Fleas.

JULY 31, 1885.

Send me by mail four more cakes of your NEW PROCESS DOG SOAP. I have used it on several dogs, and it is the only soap that I ever used that was *sure to kill fleas.* C. H. WALLBRIDGE.

58 S. Clair st., Toledo, O.

NEW PROCESS DOG SOAP contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap; delightfully perfumed and unequaled as a dressing for even the most delicate toy dog. It not only kills fleas, but will keep them off any dog that is washed with it three times a week; also neutralizes the disagreeable "doggy" odor. Sold by druggists and gunsmiths. Trial cake mailed for 25 cents. ASSOCIATED FANCIERS, 237 South Eighth st., Philadelphia. Wholesale Agents, MEDFORD FANCY GOODS CO., 101 Chambers st., N. Y.

HUNTING!

This boot will give better satisfaction for all-round work than any covering yet invented for the feet. Double uppers, water-tight tongue at instep, snug adjustment at top, giving symmetrical application to conformation of foot, ankle and calf, and contributing thorough comfort, protection and warmth. Will not chafe the heel or ankle. The seams are rubber cemented before being stitched; the tongue is thoroughly waterproofed; bottoms put on with welt and hand sewed; no screw-nails used as in the cheap imitations. Thorough work and fit guaranteed.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages Price $1.00.

"THE FISHING LINE."

TAKE THE

Grand Rapids and Indiana R. R.

THE DIRECT ROUTE TO THE

Trout, Grayling and Black Bass Fisheries,

AND THE

FAMOUS SUMMER, HEALTH AND GAME RESORTS AND LAKES OF

Northern Michigan,

THE WATERS OF THE

GRAND TRAVERSE REGION

and the Michigan North Woods are unsurpassed, unequaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory. The Sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthmatic Affections.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

For Tourists' Guide a handsomely illustrated book sent free. Time Cards, Folders and further information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent.
Grand Rapids, Mich.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

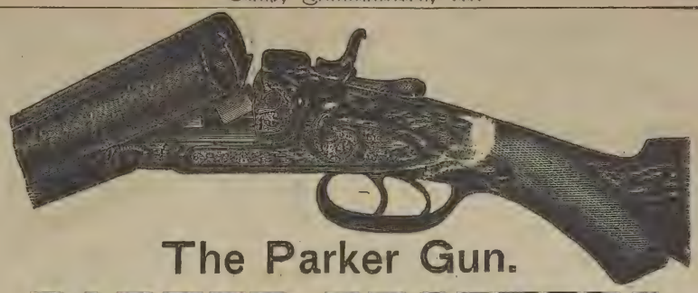
Send stamp for circulars of Guns and complete Fishing Tackle outfits. Something entirely new, and best value for money ever offered. **A. P CLARKE,**



92 Chambers street, New York.

Eaton's Rust Preventor.

For GUNS, CUTLERY and SURGICAL INSTRUMENTS. Specially adapted for salt water shooting. For sale at all principal gun stores. Western trade supplied dy E. E. EATON, 53 State street, Chicago, Ill. Cannot be sent by mail. Manufactured solely by

GEO. B. EATON, 570 Pavonia Avenue, Jersey City, N. J.

Guns, Ammunition, etc.

The Parker Gun.

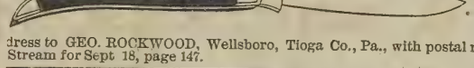
PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Latest Victory!



MR. C. M. STARK won the **Champion Diamond Badge with AMERICAN WOOD POWDER** at the First International Clay-Pigeon Tournament at Chicago, May 26 to 31, 1884. for best individual average.

Guns, Ammunition and Sportsman's Goods. Beef Flour.

VON LENGERKE & DETMOLD, 14 Murray St., New York.

Nessmuk Hunting Knife.

The only pocket hunting knife worth a sou. Full sized knife, 9½in. long open, and 5½in. long shut. Blade 1in wide, and equal to the best razors, but not so hard. If you want one by mail, send plain address to GEO. ROCKWOOD, Wellsboro, Tioga Co., Pa., with postal note for $1.50. P.S.—See Forest and Stream for Sept 18, page 147.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine un ess so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $3.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

THE NEW
"Yates" Breech-Loading Yacht Cannon,
FOR YACHTS AND STEAMERS.

Believed to be the best and safest gun yet introduced. System invented by Capt. S. Yates, of the U. S. Army, and is being applied to guns made by Ducrow & Co., and Lake. Guns are of best bronze metal, 1¼ inch caliber, and take ordinary paper shell. Carriages of finest mahogany. Illustrated circulars sent on application.

WM. READ & SONS, 107 Washington st., Boston, SOLE AGENTS.

W. W. GREENER'S BREECH-LOADERS.

The letter given below was just received from a gentleman to whom I sent a Greener gun bored expressly for thin brass shells. At first trial he did not make the pattern which I guaranteed to him, and I wrote him to return the gun. In answer to this request I received the following letter:

DETROIT, Mich., July 18, 1885.

Henry C. Squires, Esq., 178 Broadway, New York:

Yours of July 15 received. At the same time that I wrote to you, I wrote to a friend at Ottawa, Ontario, who has one of Greener's guns chambered expressly for Kynoch's shells, and who claims that his gun, a 12-gauge, will kill a black duck each shot at 70yds. He sent me by express six shells loaded with No. 6 English shot, which I tried at a 30-inch circle, 40yds.: Right barrel, first 287, second 293, third 301; left barrel, first 230, second 241, third 249. He said in his letter he was sure that I did not load right. I loaded my shell his way with 3¾ drams powder and 1¼ shot, one common pink-edge wad and one cardboard over powder and one cardboard over shot, the right barrel putting 95 per cent. of the charge in circle all size of shot except BB, the left barrel putting the whole charge of sixty pellets in the circle. What ruined my pattern the first trial was too much wadding between powder and shot. I will keep the gun as it shoots the large sizes of shot the best of any gun I ever saw. I am going down to Galveston this fall. It will be just the gun for ducks and geese shooting on Galveston Bay.

Yours obediently,
ROBERT AITON.

THE GREAT OFFER

Is continued for a short time longer, as noted below.

The Trap Gun, - - -	former price	$85.00	for $65.00

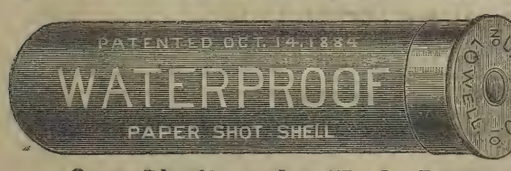
UNION METALLIC CARTRIDGE CO.,

17 & 19 Maiden Lane, N. Y.
256 Market Street, San Francisco.

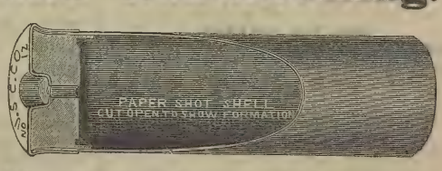
BRIDGEPORT, CONN.

Card Board Wads,
Black Edge Wads,
Pink Edge Wads,



ALSO 3-8 INCH

WHITE FELT WADS,



To which we call particular attention, as they are specially intended for use OVER POWDER. Will NOT blow to pieces and are guaranteed to give the BEST RESULTS. Are SUPERIOR IN QUALITY to the expensive imported Bag Wads, and are sold at about one-half the price. CAN BE PROCURED DIRECT, OR FROM ANY DEALER IN AMMUNITION.

BLACK PAPER SHOT SHELLS.

U. S. Shells are thoroughly Waterproof and Non-Swelling.

Best Grade, all Sizes & Lengths
from No. 10 to 20 inclusive.
Second Grade, - - Nos. 10 & 12 only.
Star Grade, - - - " 10 & 12 "
Climax Grade, Cheapest, " 10 & 12 "

Our Shells take U. S. Improved No. 2 Copper Primers, or No. 2 of other makers.

WE GUARANTEE OUR PRIMERS TO BE EQUAL TO ANY ON THE MARKET.

U. S. Black Waterproof Paper Shells are intended to overcome the great disadvantage which all other Paper Shells are subjected to when used in damp weather. They are so completely waterproof that WATER CANNOT PENETRATE INTO THE POWDER EVEN WHEN THEY ARE ENTIRELY SUBMERGED. Experience shows that Black Paper is the strongest paper for Shot Shells. The CHEAPEST GRADE Shell (Climax) now made by the U. S. Co. can be RELOADED FROM THREE TO FIVE TIMES.

Builder of the original Shadow and Sunbeam Canoe. Whitehall Boats and Shadow Sunbeam Canoes, a specialty. Always on hand.

Chester Folding Anchor.

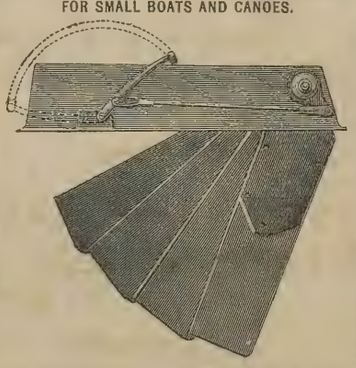
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

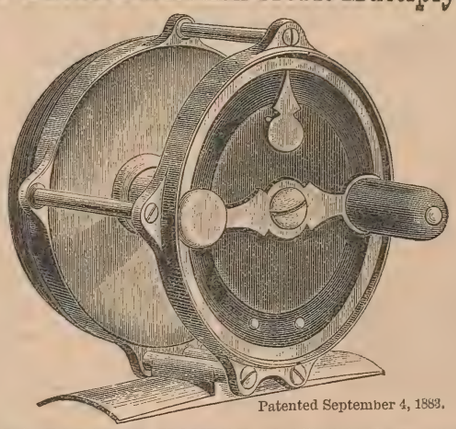
No. 2, 4 or 5 ft., Jointed Bamboo Handle,	**4.50**	**5.50 "**



The jointed handles are so arranged that one piece can be used as a short handle when required.

We can furnish rings of following sizes: 13x16, 12x15, 11x14, 10x13 inches. Additional rings, Brass 40cts.; Nickeled, 75cts. each. Nickel Plated Gaff Hooks to fit same handle—Bass sizes, $1 each; For Pickerel and large fish, $1 50 each.

WILLIAM MILLS & SON,
No. 7 Warren Street, N. Y.

Malleson's "Patent Perfection Treble Multiplying Reel"

CENTRAL ACTION,

RAISED PILLAR.

Patented September 4, 1883.

FLUSH BALANCE HANDLE, ADJUSTABLE CLICK.

Heretofore the mechanism of all Multiplying Reels necessitated the placing the handle below the center; in consequence a Multiplying Reel could never be used successfully in either fly or minnow casting, as the line would most surely catch upon the handle. This cannot occur in using the "PATENT PERFECTION," for it not only multiplies from the center, but the handle is fully protected by a projecting metal band. Another decided advantage peculiar to the PATENT PERFECTION REEL is that by means of the adjusting index (which lies between the handle and reel-plate) it can be changed in a second from a free-running Multiplying to a Click or Drag Multiplying, or vice versa.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city or wholesale at our office.

Forest and Stream Pub. Co.,

P. O. Box 2832. New York City

NEW PUBLICATION.

A STUDY OF THE

Theory and Practice of Canine Medicine

DOGS,

Their Management and Treatment in

DISEASE.

By ASHMONT.

"All of the complaints to which dogs are subject are described in plain language, with their cause, symptoms, diagnosis, prognosis, treatment and medicines—prescriptions being given for each distinctive form of disease. It is a valuable compendium of "common sense" and medical knowledge upon the subject of dog diseases, and meets a want which is not so adequately supplied in any other book of this character with which we are acquainted."—*Boston Herald.*

"As a whole this work is a most valuable addition to the literature of its kind. Its great recommendation is that it is scientific and up to date, and at the same time quite intelligible to non-medical men. Its appearance might have been improved as regards type, but this has probably been subordinated to the idea of putting the work into compact, almost pocket size."—FOREST AND STREAM.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,

NEWBURYPORT, MASS.

Sure Death to Fleas.

JULY 31, 1885.

Send me by mail four more cakes of your NEW PROCESS DOG SOAP. I have used it on several dogs, and it is the only soap that I ever used that was *sure to kill fleas.* C. H. WALLBRIDGE,

58 S. Clair st., Toledo, O.

NEW PROCESS DOG SOAP contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap; delightfully perfumed and unequaled as a dressing for even the most delicate toy dog. It not only kills fleas, but will keep them off any dog that is washed with it three times a week; also neutralizes the disagreeable "doggy" odor. Sold by druggists and gunsmiths. Trial cake mailed for 25 cents. ASSOCIATED FANCIERS, 237 South Eighth st., Philadelphia. Wholesale Agents, MEDFORD FANCY GOODS CO., 101 Chambers st., N. Y.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages Price $1.00.

Hotels and Resorts for Sportsmen.

"THE FISHING LINE."

TAKE THE

Grand Rapids and Indiana R. R.

THE DIRECT ROUTE TO THE

Trout, Grayling and Black Bass Fisheries,

AND THE

FAMOUS SUMMER, HEALTH AND GAME RESORTS AND LAKES OF

Northern Michigan,

THE WATERS OF THE

GRAND TRAVERSE REGION

and the Michigan North Woods are unsurpassed, unequaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory. The Sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthmatic Affections.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

For Tourists' Guide a handsomely illustrated book sent free. Time Cards, Folders and further information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent,

H. G. H. REED, Gen'l Superintendent. H. F. WHITCOMB, Gen'l Pass. Agent.

WM. READ & SONS, 107 Washington St., Boston, Mass.

Celerity! Comfort! Economy!

W. W. GREENER'S EJECTOR GUN.

This gun is unapproachable in value, mechanism is simple, principle strong and reliable, workmanship good. The model is the result of long experience and continual research in gun manufacture, the like success has never been obtained by a Breech-Loading Gun. It is rapidly making way, and is the admiration and desire of sportsmen. NO COMPLICATION OF PARTS, NO STRAIN, BUT MANY ADVANTAGES.

R. ROCHFORD BOYD, ESQ., writing to the London *Field*, April 4, says: "I received the Ejector last autumn. I returned three weeks since. It was never in that time out of my possession, was never out of gear in any way. It had done lots of work before it came into my hands and is as ready to go through as much more. . . . Its three advantages appear to me to be **CELERITY, COMFORT and ECONOMY.** An Ejector Gun **will** do the work of **two guns.**"

IRA PAINE is now using an Ejector Gun with success never before equalled. With W. W. Greener's Ejector Gun more shots can be fired in *two* minutes than with any *two* repeating shotguns. The Ejector Gun is a sound weapon, has a fine exterior and is made only in finest quality. Its production is very limited, each gun being an *objet d'art*. All who wish to have a good modern gun should possess W. W. Greener's Ejector Gun. All other models will quickly become old-fashioned.

W. W. Greener is selling his ordinary Hammer and Hammerless Guns of various qualities at greatly reduced prices. Particulars of

HENRY C. SQUIRES, 178 Broadway, N. Y.,

who has also W. W. Greener's Ejector Guns in stock.

W. W. GREENER, Birmingham, England, also at 68 Haymarket, London.

150 Colt 15-Shot Repeating Rifles.

Shoots the Winchester 44 Central Fire Carriage.

At Less than Cost to Manufacture.

Round Barrel, 15 Shots, $12.50. Octagon Barrel, 15 Shots, $13.50.

These prices are just one-half the factory prices.

These Rifles are manufactured by the Colt Fire Arms Co., of Hartford, Conn., and are the best and most durable repeating rifles in the market. The parts are all interchangeable, and the workmanship is the very best. The cartridges can be reloaded, which makes the cost of ammunition no more than for a muzzle-loader. We shall not sell at above prices after this lot is sold.

We have about 100 FLOBERT RIFLES which we have decided to close out at $2.35 each.

A Full Line of Fishing Tackle, Field Glasses, Dog Collars, Roller Skates, Etc., at very low prices.

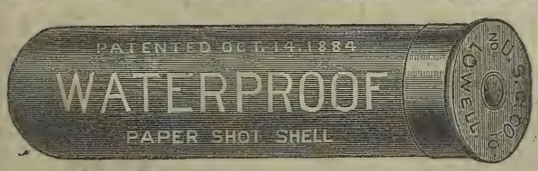
Black Edge Wads,
Pink Edge Wads,



ALSO 3-8 INCH

WHITE FELT WADS,

To which we call particular attention, as they are specially intended for use OVER POWDER. Will NOT blow to pieces and are guaranteed to give the BEST RESULTS. Are SUPERIOR IN QUALITY to the expensive imported Bag Wads, and are sold at about one-half the price. CAN BE PROCURED DIRECT, OR FROM ANY DEALER IN AMMUNITION.

BLACK PAPER SHOT SHELLS.

U. S. Shells are thoroughly Waterproof and Non-Swelling.

Best Grade, all Sizes & Lengths
from No. 10 to 20 inclusive.
Second Grade, - - Nos. 10 & 12 only.
Star Grade, - - - " 10 & 12 "
Climax Grade, Cheapest, " 10 & 12 "

Our Shells take U. S. Improved No. 2 Copper Primers, or No. 2 of other makers.

WE GUARANTEE OUR PRIMERS TO BE EQUAL TO ANY ON THE MARKET.

U. S. Black Waterproof Paper Shells are intended to overcome the great disadvantage which all other Paper Shells are subjected to when used in damp weather. They are so completely waterproof that WATER CANNOT PENETRATE INTO THE POWDER EVEN WHEN THEY ARE ENTIRELY SUBMERGED. Experience shows that Black Paper is the strongest paper for Shot Shells. The CHEAPEST GRADE Shell (Climax) now made by the U. S. Co. can be RELOADED FROM THREE TO FIVE TIMES.

Chester Folding Anchor.

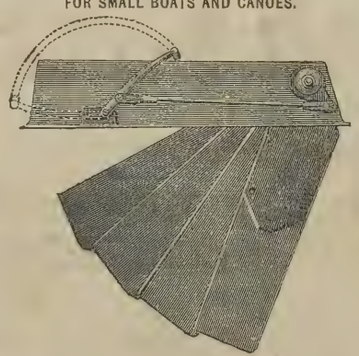
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

ARE SELLING LIKE

LEMONADE

On a hot day. We have them in all styles and all sizes, and now is just the time to buy. We can sell you a good boat for $35, including oars and rowlocks; better ones at higher prices, of course, but nowhere else in the city can be found boats of the same quality at anything like the price. We have also a good line of "Sprague's" celebrated boats, and they are just selling "hand over fist."

Our second lot of catalogues are out, and 10 cents in stamps will prove a potent factor in your receiving a copy.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

NEW PUBLICATION.

A STUDY OF THE

Theory and Practice of Canine Medicine

DOGS,

Their Management and Treatment in

DISEASE.

By ASHMONT.

"All of the complaints to which dogs are subject are described in plain language, with their cause, symptoms, diagnosis, prognosis, treatment and medicines—prescriptions being given for each distinctive form of disease. It is a valuable compendium of "common sense" and medical knowledge upon the subject of dog diseases, and meets a want which is not so adequately supplied in any other book of this character with which we are acquainted."—*Boston Herald.*

"As a whole this work is a most valuable addition to the literature of its kind. Its great recommendation is that it is scientific and up to date, and at the same time quite intelligible to non-medical men. Its appearance might have been improved as regards type, but this has probably been subordinated to the idea of putting the work into compact, almost pocket size."—FOREST AND STREAM.

PRICE $2.00. FOR SALE BY

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,

NEWBURYPORT, MASS.

Sure Death to Fleas.

JULY 31, 1885.

Send me by mail four more cakes of your NEW PROCESS DOG SOAP. I have used it on several dogs, and it is the only soap that I ever used that was *sure to kill fleas.* C. H. WALLBRIDGE,

58 S. Clair st., Toledo, O

NEW PROCESS DOG SOAP contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap; delightfully perfumed and unequaled as a dressing for even the most delicate toy dog. It not only kills fleas, but will keep them off any dog that is washed with it three times a week; also neutralizes the disagreeable "doggy" odor. Sold by druggists and gunsmiths. Trial cake mailed for 25 cents. ASSOCIATED FANCIERS, 237 South Eighth st., Philadelphia. Wholesale Agents, MEDFORD FANCY GOODS CO., 101 Chambers st., N. Y.

HUNTING!

This boot will give better satisfaction for all-round work than any covering yet invented for the feet. Double uppers, water-tight tongue at instep, snug adjustment at top, giving symmetrical application to conformation of foot, ankle and calf, and contributing thorough comfort, protection and warmth. Will not chafe the heel or ankle. The seams are rubber cemented before being stitched; the tongue is thoroughly waterproofed; bottoms put on with welt and hand sewed; no screw-nails used as in the cheap imitations. Thorough work and fit guaranteed.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.

Hotels and Resorts for Sportsmen.

"THE FISHING LINE."

TAKE THE

Grand Rapids and Indiana R. R.

THE DIRECT ROUTE TO THE

Trout, Grayling and Black Bass Fisheries,

AND THE

FAMOUS SUMMER, HEALTH AND GAME RESORTS AND LAKES OF

Northern Michigan,

THE WATERS OF THE

GRAND TRAVERSE REGION

and the Michigan North Woods are unsurpassed, unequaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory. The Sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthmatic Affections.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

For Tourists' Guide a handsomely illustrated book sent free. Time Cards, Folders and further information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Latest Victory!

MR. C. M. STARK won the **Champion Diamond Badge** with **AMERICAN WOOD POWDER** at the First International Clay-Pigeon Tournament at Chicago, May 26 to 31, 1884, for best individual average.

Guns, Ammunition and Sportsman's Goods. Beef Flour.

VON LENGERKE & DETMOLD, 14 Murray St., New York.

Nessmuk Hunting Knife.

The only pocket hunting knife worth a sou. Full sized knife, 9¼in. long open, and 5¼in. long shut. Blade 1in. wide, and equal to the best razors, but not so hard. If you want one by mail, send plain address to GEO. ROCKWOOD, Wellsboro, Tioga Co., Pa., with postal note for $1.50. P.S.—See Forest and Stream for Sept. 18, page 147.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

WM. READ & SONS, 107 Washington St., Boston, Mass.

W. W. GREENER'S BREECH-LOADERS.

The letter given below was just received from a gentleman to whom I sent a Greener gun bored expressly for thin brass shells. At first trial he did not make the pattern which I guaranteed to him, and I wrote him to return the gun. In answer to this request I received the following letter:

DETROIT, Mich., July 18, 1885.

Henry C. Squires, Esq., 178 Broadway, New York:

Yours of July 15 received. At the same time that I wrote to you, I wrote to a friend at Ottawa, Ontario, who has one of Greener's guns chambered expressly for Kynoch's shells, and who claims that his gun, a 12-gauge, will kill a black duck each shot at 70yds. He sent me by express six shells loaded with No. 6 English shot, which I tried at a 30-inch circle, 40yds.: Right barrel, first 287, second 293, third 301; left barrel, first 230, second 241, third 249. He said in his letter he was sure that I did not load right. I loaded my shell his way with 3¾ drams powder and 1¼ shot, one common pink-edge wad and one cardboard over powder and one cardboard over shot, the right barrel putting 95 per cent. of the charge in circle all size of shot except BB, the left barrel putting the whole charge of sixty pellets in the circle. What ruined my pattern the first trial was too much wadding between powder and shot. I will keep the gun as it shoots the large sizes of shot the best of any gun I ever saw. I am going down to Galveston this fall. It will be just the gun for ducks and geese shooting on G alveston Bay.

Yours obediently,
ROBERT AITON.

THE GREAT OFFER

Is continued for a short time longer, as noted below.

The Trap Gun, - - -	former price	$85.00	for $65.00

BLACK EDGE. PINK EDGE. 3/8 in. WHITE FELT

SUPERIOR, CHEMICALLY PREPARED

ELASTIC GUN WADS

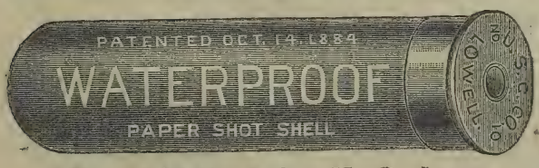
MANUFACTURED BY THE

UNION METALLIC CARTRIDGE CO.,

17 & 19 Maiden Lane, N. Y.
256 Market Street, San Francisco.

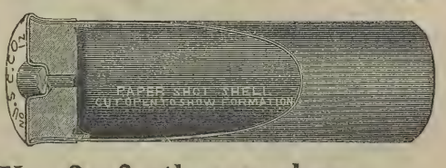
BRIDGEPORT, CONN.

Card Board Wads,
Black Edge Wads,
Pink Edge Wads,



ALSO 3-8 INCH

WHITE FELT WADS,



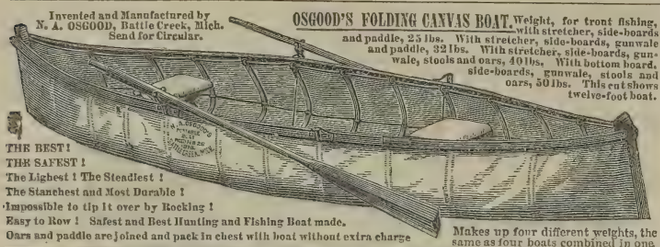
To which we call particular attention, as they are specially intended for use OVER POWDER. Will NOT blow to pieces and are guaranteed to give the BEST RESULTS. Are SUPERIOR IN QUALITY to the expensive imported Bag Wads, and are sold at about one-half the price. CAN BE PROCURED DIRECT, OR FROM ANY DEALER IN AMMUNITION.

BLACK PAPER SHOT SHELLS.

U. S. Shells are thoroughly Waterproof and Non-Swelling.

Best Grade, all Sizes & Lengths
from No. 10 to 20 inclusive.
Second Grade, - - Nos. 10 & 12 only.
Star Grade, - - - " 10 & 12 "
Climax Grade, Cheapest, " 10 & 12 "

Our Shells take U. S. Improved No. 2 Copper Primers, or No. 2 of other makers.



WE GUARANTEE OUR PRIMERS TO BE EQUAL TO ANY ON THE MARKET.

U. S. Black Waterproof Paper Shells are intended to overcome the great disadvantage which all other Paper Shells are subjected to when used in damp weather. They are so completely waterproof that WATER CANNOT PENETRATE INTO THE POWDER EVEN WHEN THEY ARE ENTIRELY SUBMERGED. Experience shows that Black Paper is the strongest paper for Shot Shells. The CHEAPEST GRADE Shell (Climax) now made by the U. S. Co. can be RELOADED FROM THREE TO FIVE TIMES.

Builder of the original Shadow and Sunbeam Canoe. Whitehall Boats and Shadow Sunbeam Canoes, a specialty. Always on hand.

Chester Folding Anchor.

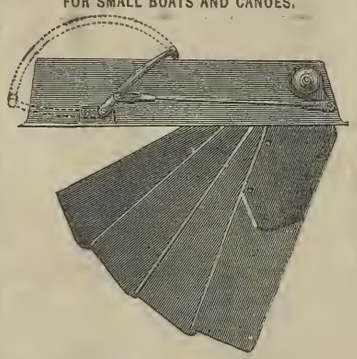
The Most Simple, Complete and Compact Anchor for Small Craft ever Invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

Atwood's Patent Center-Board

ATWOOD BROS., Clayton, N. Y.

Our Boats, Oars & Trimmings

ARE SELLING LIKE

LEMONADE

On a hot day. We have them in all styles and all sizes, and now is just the time to buy. We can sell you a good boat for $35, including oars and rowlocks; better ones at higher prices, of course, but nowhere else in the city can be found boats of the same quality at anything like the price. We have also a good line of "Sprague's" celebrated boats, and they are just selling "hand over fist."

Our second lot of catalogues are out, and 10 cents in stamps will prove a potent factor in your receiving a copy.

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

GUNPOWDER!
Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5; No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ¼ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

The jointed handles are so arranged that one piece can be used as a short handle when required.

We can furnish rings of following sizes: 13x16, 12x15, 11x14, 10x13 inches. Additional rings, Brass 40cts.; Nickeled, 75cts. each. Nickel Plated Gaff Hooks to fit same handle—Bass sizes, $1 each; For Pickerel and large fish, $1 50 each.

WILLIAM MILLS & SON,
No. 7 Warren Street, N. Y.

Malleson's "Patent Perfection Treble Multiplying Reel"

CENTRAL ACTION,

RAISED PILLAR.

Patented September 4, 1883.

FLUSH BALANCE HANDLE, ADJUSTABLE CLICK.

Heretofore the mechanism of all Multiplying Reels necessitated the placing the handle below the center; in consequence a Multiplying Reel could never be used successfully in either fly or minnow casting, as the line would most surely catch upon the handle. This cannot occur in using the "PATENT PERFECTION," for it not only multiplies from the center, but the handle is fully protected by a projecting metal band. Another decided advantage peculiar to the PATENT PERFECTION REEL is that by means of the adjusting index (which lies between the handle and reel-plate) it can be changed in a second from a free-running Multiplying to a Click or Drag Multiplying, or vice versa.

The Hazard Powder Co.
MANUFACTURERS OF
Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city or wholesale at our office.

PREPARATORY TO MOVING OUR KENNELS

From Angora, Pa., to Berlin, N. J., where they will occupy seventy-seven acres, we desire to close out a large lot of grown dogs and pups of various breeds. We have put such very low prices on them as will undoubtedly quickly accomplish this purpose. Write for the kind of dog you want, and see if we cannot give you a special bargain. Any dog purchased from us, if not satisfactory, can be returned, and we will refund money less express charges.

Forest and Stream Pub. Co.,

P. O. Box 2832. New York City

NEW PUBLICATION.

A STUDY OF THE

Theory and Practice of Canine Medicine

DOGS,

Their Management and Treatment in

DISEASE.

By ASHMONT.

"All of the complaints to which dogs are subject are described in plain language, with their cause, symptoms, diagnosis, prognosis, treatment and medicines—prescriptions being given for each distinctive form of disease. It is a valuable compendium of "common sense" and medical knowledge upon the subject of dog diseases, and meets a want which is not so adequately supplied in any other book of this character with which we are acquainted."—*Boston Herald.*

"As a whole this work is a most valuable addition to the literature of its kind. Its great recommendation is that it is scientific and up to date, and at the same time quite intelligible to non-medical men. Its appearance might have been improved as regards type, but this has probably been subordinated to the idea of putting the work into compact, almost pocket size."—FOREST AND STREAM.

PRICE $2.00. FOR SALE BY

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and carefu experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1 The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,

NEWBURYPORT, MASS.

Sure Death to Fleas.

JULY 31, 1885.

Send me by mail four more cakes of your NEW PROCESS DOG SOAP. I have used it on several dogs, and it is the only soap that I ever used that was *sure to kill fleas.* C. H. WALLBRIDGE,

58 S. Clair st., Toledo, O

NEW PROCESS DOG SOAP contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap; delightfully perfumed and unequaled as a dressing for even the most delicate toy dog. It not only kills fleas, but will keep them off any dog that is washed with it three times a week; also neutralizes the disagreeable "doggy" odor. Sold by druggists and gunsmiths. Trial cake mailed for 25 cents. ASSOCIATED FANCIERS, 237 South Eighth st., Philadelphia. Wholesale Agents, MEDFORD FANCY GOODS CO., 101 Chambers st., N. Y.

HUNTING!

This boot will give better satisfaction for all-round work than any covering yet invented for the feet. Double uppers, water-tight tongue at instep, snug adjustment at top, giving symmetrical application to conformation of foot, ankle and calf, and contributing thorough comfort, protection and warmth. Will not chafe the heel or ankle. The seams are rubber cemented before being stitched; the tongue is thoroughly waterproofed; bottoms put on with welt and hand sewed; no screw-nails used as in the cheap imitations. Thorough work and fit guaranteed.

Hotels and Resorts for Sportsmen.

"THE FISHING LINE."

TAKE THE
Grand Rapids and Indiana R. R.
THE DIRECT ROUTE TO THE
Trout, Grayling and Black Bass Fisheries,
AND THE
FAMOUS SUMMER, HEALTH AND GAME RESORTS AND LAKES OF
Northern Michigan,
THE WATERS OF THE
GRAND TRAVERSE REGION

and the Michigan North Woods are unsurpassed, unequaled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory. The Sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthmatic Affections.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

For Tourists' Guide a handsomely illustrated book sent free. Time Cards, Folders and further information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

THE
Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

Jersey City, N. J.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER,** loaded in the following manner.

No. 1.

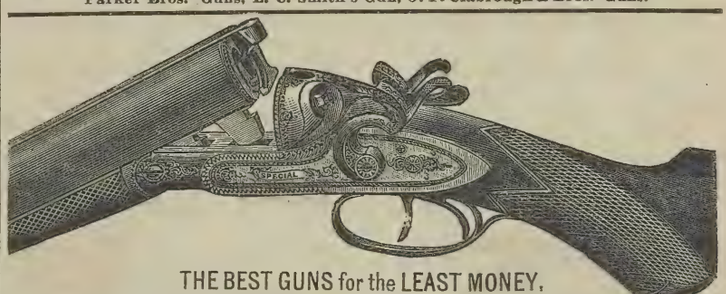
No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.



Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

AGENTS American Wood Powder Co.. American Clay Bird Co.. Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

WM. READ & SONS, 107 Washington St., Boston, Mass.

Celerity! Comfort! Economy!

W. W. GREENER'S EJECTOR GUN.

This gun is unapproachable in value, mechanism is simple, principle strong and reliable, workmanship good. The model is the result of long experience and continual research in gun manufacture, the like success has never been obtained by a Breech-Loading Gun. It is rapidly making way, and is the admiration and desire of sportsmen. NO COMPLICATION OF PARTS, NO STRAIN, BUT MANY ADVANTAGES.

R. ROCHFORD BOYD, ESQ., writing to the London *Field*, April 4, says: "I received the Ejector last autumn. I returned three weeks since. It was never in that time out of my possession, was never out of gear in any way. It had done lots of work before it came into my hands and is as ready to go through as much more. . . Its three advantages appear to me to be **CELERITY, COMFORT and ECONOMY.** An Ejector Gun **will** do the work of **two guns.**"

IRA PAINE is now using an Ejector Gun with success never before equalled. With W. W. Greener's Ejector Gun more shots can be fired in *two* minutes than with any *two* repeating shotguns. The Ejector Gun is a sound weapon, has a fine exterior and is made only in finest quality. Its production is very limited, each gun being an *objet d'art*. All who wish to have a good modern gun should possess W. W. Greener's Ejector Gun. All other models will quickly become old-fashioned.

W. W. Greener is selling his ordinary Hammer and Hammerless Guns of various qualities at greatly reduced prices. Particulars of

HENRY C. SQUIRES, 178 Broadway, N. Y.,

who has also W. W. Greener's Ejector Guns in stock.

W. W. GREENER, Birmingham, England, also at 68 Haymarket, London.

CIRCULARS FREE.

ENTERPRISE M'F'G O., Akron, Ohio.

150 Colt 15-Shot Repeating Rifles.

Shoots the Winchester 44 Central Fire Cartridge.

At Less than Cost to Manufacture.

Round Barrel, 15 Shots, $12.50. Octagon Barrel, 15 Shots, $13.50.
These prices are just one-half the factory prices.

These Rifles are manufactured by the Colt Fire Arms Co., of Hartford, Conn., and are the best and most durable repeating rifles in the market. The parts are all interchangeable, and the workmanship is the very best. The cartridges can be reloaded, which makes the cost of ammunition no more than for a muzzle-loader. We shall not sell at above prices after this lot is sold.

We have about 100 FLOBERT RIFLES which we have decided to close out at $2 85 each.

A Full Line of Fishing Tackle, Field Glasses, Dog Collars, Roller Skates, Etc., at very low prices.

Chester Folding Anchor.

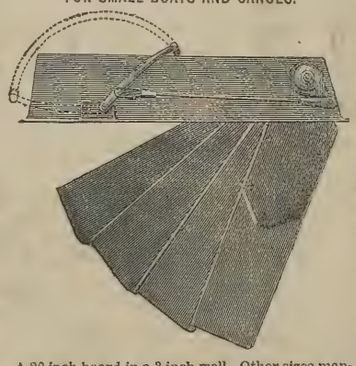
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

WM. MILLS & SON,

Fine Fishing Tackle,

No. 7 Warren Street, N. Y.

SOLE AGENTS FOR

H. L. Leonard's Split Bamboo Rods.

Note result of the English Anglers' Tournament, held near London August 22, 1885:

Mr. Geo. M. Kelson (of England.) **wins 1st prize with a cast of 27 yds.**
Mr. T. B. Mills (of New York.) **" 2d " " " 25½ "**

Both gentlemen using a Leonard Split Bamboo Trout Fly Rod.

Cut showing Patent Waterproof and Patent Split Ferrule.

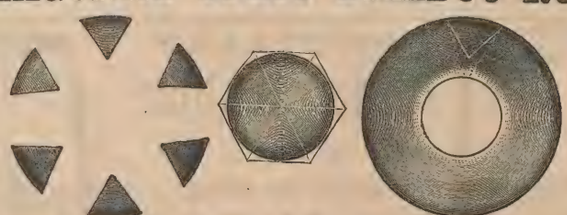
The latest pattern in these goods is the "C. V." Rod, which is just suited for the Black Bass fishing at this season.

They are made in lengths of 8 ft. to 8½ ft., and weigh from 8 ounces to 9 ounces.

Just the rod for casting a minnow, and when used with one of our "IMPERIAL" Steel Pivot, Raised Pillar, Multiplying Black Bass Reels, you have perfection itself.

From now until October first is the best season for catching large trout in Maine with the fly.

We recommend a Leonard Rod, 10½ ft. long, and to weigh from 8¼ to 9 ounces, for that fishing.



Our stock of Maine Trout Flies is complete, and consists of the most killing patterns, selected by one who knows from experience what the correct thing is.

J. LORING THAYER,

No. 186 Tremont St., Boston, Mass.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer, NEWBURYPORT, MASS.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1. The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory. The Sportsman can readily send trophies of his skill to his friends or "club" at home, as ice for packing fish can be had at nearly all points.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing. The climate is peculiarly beneficial to those suffering with

Hay Fever and Asthmatic Affections.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample accommodations for all.

The completion of this line from Petoskey to Mackinaw City forms the most direct route to Mackinac, St. Ignace, and in connection with the Detroit Mackinac & Marquette R. R., to Houghton, Hancock, Marquette, Negaunee, L'Anse and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to Tourists and Sportsmen.

Dogs, Guns and Fishing Tackle Carried Free at owner's risk.

For Tourists' Guide a handsomely illustrated book sent free. Time Cards, Folders and further information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

THE
Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

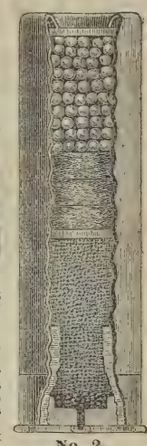
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co, Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, f rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

ENGLISH POWDER

PIGOU, WILKS & LAURENCE, Lim.

TRIAL OF EXPLOSIVES.

11 Queen Victoria Street, London, E. C.

PIGOU, WILKS & LAURENCE beg to call attention to the "Trial of Explosives," held at Wimbledon in May, 1878, under the management of the editor of the "Field," and take the liberty of annexing the following table, showing that the "final figure of merit" resulted in favor of their manufactures:

Final Figure of Merit.

1	Pigou, Wilks & Laurence,	34·84
2	John Hall & Son, - -	31·20
3	Curtis's & Harvey, - -	29·12
4	Schultze Wood Powder, -	25·39

See "Field," May 18, 1878.

In the Gun Trial at Wimbledon, under the auspices of the *Field* newspaper, April, 1875, when thirty-six gunmakers and 113 guns competed, the winner in three out of four classes used P., W. & L.'s No. 4 ALLIANCE Gunpowder.

The winner of the Grand Prix, Casino, Monaco, February, 1878, also used P., W. & L.'s No. 4 ALLIANCE Prize Powder.

P., W. & L. request that purchasers of the "ALLIANCE" PRIZE GUNPOWDER will be careful to see that the patent capsule covering the stopper and bearing the trade mark has not been tampered with.

A large shipment of this celebrated powder has been made to the United States, and can be supplied in any quantities by

HENRY C. SQUIRES, 178 Broadway, New York,

SOLE AGENT FOR THE UNITED STATES.

Gun of 14th Century.

A GREAT OFFER.

MR. W. W. GREENER, desiring to introduce his guns more generally in the United States, has authorized me to make the following offer for a short time only to individual sportsmen:

The Trap Gun for -	$65	Regular Price,	$85
The Far-Killing Duck Gun, 100		" "	120
The New Hammerless Gun, 100		" "	150

The two last named have the treble wedge-fast action. Above prices for 12-bores, 7 to 8¼ lbs. weight. Extra for 10-bores under 10 lbs., $5.00. These guns will be furnished from stock or to order at the same price. In latter case a deposit of $25.00 must accompany order.

No discounts of any kind from these prices. My large catalogue with full descriptions and much valuable matter, 115 pages, 263 illustrations, sent on receipt of 35 cents.

Address,

Chester Folding Anchor.

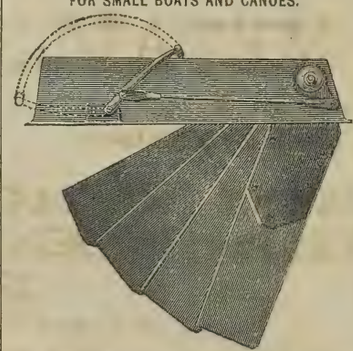
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

Atwood's Patent Center-Board

ATWOOD BROS., Clayton, N. Y.

Our Boats, Oars & Trimmings

ARE SELLING LIKE

LEMONADE

On a hot day. We have them in all styles and all sizes, and now is just the time to buy. We can sell you a good boat for $35, including oars and rowlocks; better ones at higher prices, of course, but nowhere else in the city can be found boats of the same quality at anything like the price. We have also a good line of "Sprague's" celebrated boats, and they are just selling "hand over fist."

Our second lot of catalogues are out, and 10 cents in stamps will prove a potent factor in your receiving a copy.

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

GUNPOWDER!
Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

WM. MILLS & SON,
Fine Fishing Tackle,
No. 7 Warren Street, N. Y.

SOLE AGENTS FOR

H. L. Leonard's Split Bamboo Rods.

Note result of the English Anglers' Tournament, held near London August 22, 1885:

Mr. Geo. M. Kelson (of England,) wins 1st prize with a cast of 27 yds.
Mr. T. B. Mills (of New York,) " 2d " " " 25½ "

Both gentlemen using a Leonard Split Bamboo Trout Fly Rod.

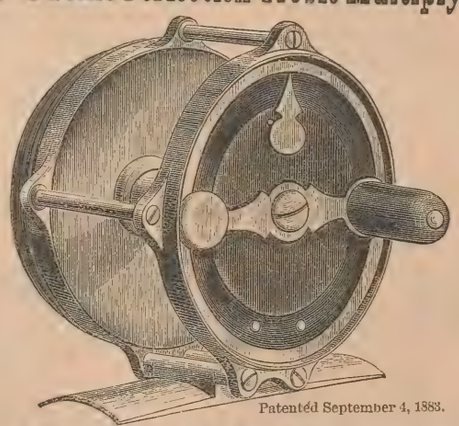
Cut showing Patent Waterproof and Patent Split Ferrule.

The latest pattern in these goods is the "C. V." Rod, which is just suited for the Black Bass fishing at this season.

They are made in lengths of 8 ft. to 8½ ft., and weigh from 8 ounces to 9 ounces.

Just the rod for casting a minnow, and when used with one of our "IMPERIAL" Steel Pivot, Raised Pillar, Multiplying Black Bass Reels, you have perfection itself.

From now until October first is the best season for catching large trout in Maine with the fly.



We recommend a Leonard Rod, 10½ ft. long, and to weigh from 8¼ to 9 ounces, for that fishing.

Our stock of Maine Trout Flies is complete, and consists of the most killing patterns, selected by one who knows from experience what the correct thing is.

WM. MILLS & SON, 7 Warren St., New York.

Malleson's "Patent Perfection Treble Multiplying Reel"

CENTRAL ACTION,

RAISED PILLAR.

Patented September 4, 1883.

FLUSH BALANCE HANDLE, ADJUSTABLE CLICK.

Heretofore the mechanism of all Multiplying Reels necessitated the placing the handle below the center; in consequence a Multiplying Reel could never be used successfully in either fly or minnow casting, as the line would most surely catch upon the handle. This cannot occur in using the "PATENT PERFECTION," for it not only multiplies from the center, but the handle is fully protected by a projecting metal band. Another decided advantage peculiar to the PATENT PERFECTION REEL is that by means of the adjusting index (which lies between the handle and reel-plate) it can be changed in a second from a free-running Multiplying to a Click or Drag Multiplying, or vice versa.

FOR SALE BY ALL DEALERS IN FISHING TACKLE.

The Hazard Powder Co.
MANUFACTURERS OF
Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

J. LORING THAYER,

No. 186 Tremont St., Boston, Mass.

GOODWIN'S Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer, NEWBURYPORT, MASS.

Sure Death to Fleas.

JULY 31, 1885.

Send me by mail four more cakes of your NEW PROCESS DOG SOAP. I have used it on several dogs, and it is the only soap that I ever used that was *sure to kill fleas.* C. H. WALLBRIDGE,
58 S. Clair st., Toledo, O

NEW PROCESS DOG SOAP contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap; delightfully perfumed and unequaled as a dressing for even the most delicate toy dog. It not only kills fleas, but will keep them off any dog that is washed with it three times a week; also neutralizes the disagreeable "doggy" odor. Sold by druggists and gunsmiths. Trial cake mailed for 25 cents. ASSOCIATED FANCIERS, 237 South Eighth st., Philadelphia. Wholesale Agents, MEDFORD FANCY GOODS CO., 101 Chambers st., N. Y.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with AMERICAN WOOD POWDER, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address Von Lengerke & Detmold,

14 Murray Street, New York.

WM. READ & SONS, 107 Washington St., Boston, Mass.

Celerity! Comfort! Economy!
W. W. GREENER'S EJECTOR GUN.

This gun is unapproachable in value, mechanism is simple, principle strong and reliable, workmanship good. The model is the result of long experience and continual research in gun manufacture, the like success has never been obtained by a Breech-Loading Gun. It is rapidly making way, and is the admiration and desire of sportsmen. NO COMPLICATION OF PARTS, NO STRAIN, BUT MANY ADVANTAGES.

R. ROCHFORD BOYD, ESQ., writing to the London *Field*, April 4, says: "I received the Ejector last autumn. I returned three weeks since. It was never in that time out of my possession, was never out of gear in any way. It had done lots of work before it came into my hands and is as ready to go through as much more. . . Its three advantages appear to me to be **CELERITY, COMFORT and ECONOMY.** An Ejector Gun **will** do the work of **two guns.**"
IRA PAINE is now using an Ejector Gun with success never before equalled. With W. W. Greener's Ejector Gun more shots can be fired in *two* minutes than with any *two* repeating shotguns. The Ejector Gun is a sound weapon, has a fine exterior and is made only in finest quality. Its production is very limited, each gun being an *objet d'art*. All who wish to have a good modern gun should possess W. W. Greener's Ejector Gun. All other models will quickly become old-fashioned.
W. W. Greener is selling his ordinary Hammer and Hammerless Guns of various qualities at greatly reduced prices. Particulars of

HENRY C. SQUIRES, 178 Broadway, N. Y.,
who has also W. W. Greener's Ejector Guns in stock.

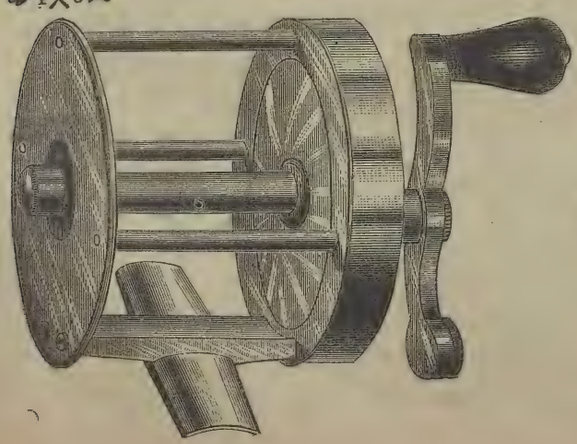
CIRCULARS FREE.
ENTERPRISE M'F'G CO., Akron, Ohio.

150 Colt 15-Shot Repeating Rifles.

Shoots the Winchester 44 Central Fire Cartridge.

At Less than Cost to Manufacture.



Round Barrel, 15 Shots, $12.50. Octagon Barrel, 15 Shots, $13.50.
These prices are just one-half the factory prices.

These Rifles are manufactured by the Colt Fire Arms Co., of Hartford, Conn., and are the best and most durable repeating rifles in the market. The parts are all interchangeable, and the workmanship is the very best. The cartridges can be reloaded, which makes the cost of ammunition no more than for a muzzle-loader. We shall not sell at above prices after this lot is sold.

We have about 100 FLOBERT RIFLES which we have decided to close out at $2.85 each.

A Full Line of Fishing Tackle, Field Glasses, Dog Collars, Roller Skates, Etc., at very low prices.

Chester Folding Anchor.

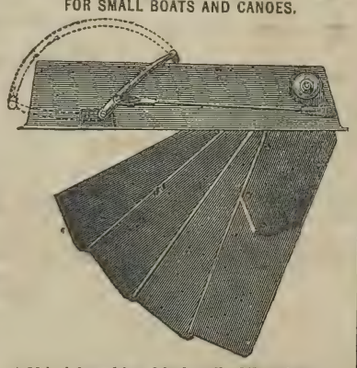
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

Atwood's Patent Center-Board

ATWOOD BROS., Clayton, N. Y.

Our Boats, Oars & Trimmings

ARE SELLING LIKE

LEMONADE

On a hot day. We have them in all styles and all sizes, and now is just the time to buy. We can sell you a good boat for $35, including oars and rowlocks; better ones at higher prices, of course, but nowhere else in the city can be found boats of the same quality at anything like the price. We have also a good line of "Sprague's" celebrated boats, and they are just selling "hand over fist."

Our second lot of catalogues are out, and 10 cents in stamps will prove a potent factor in your receiving a copy.

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half pound tins by Grocers, labelled thus:

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

WM. MILLS & SON,

Fine Fishing Tackle,

No. 7 Warren Street, N. Y.

SOLE AGENTS FOR

H. L. Leonard's Split Bamboo Rods.

Note result of the English Anglers' Tournament, held near London August 22, 1885:

Mr. Geo. M. Kelson (of England.) wins 1st prize with a cast of 27 yds.
Mr. T. B. Mills (of New York.) " 2d " " " 25½ "

Both gentlemen using a Leonard Split Bamboo Trout Fly Rod.

Cut showing Patent Waterproof and Patent Split Ferrule.

The latest pattern in these goods is the "C. V." Rod, which is just suited for the Black Bass fishing at this season.

They are made in lengths of 8 ft. to 8½ ft., and weigh from 8 ounces to 9 ounces.

Just the rod for casting a minnow, and when used with one of our "IMPERIAL" Steel Pivot, Raised Pillar, Multiplying Black Bass Reels, you have perfection itself.

From now until October first is the best season for catching large trout in Maine with the fly.

We recommend a Leonard Rod, 10½ ft. long, and to weigh from 8¼ to 9 ounces, for that fishing.

Our stock of Maine Trout Flies is complete, and consists of the most killing patterns, selected by one who knows from experience what the correct thing is.

WM. MILLS & SON, 7 Warren St., New York.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ⅛ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

J. LORING THAYER,

No. 186 Tremont St., Boston, Mass.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,
NEWBURYPORT, MASS.

English Setters

Sure Death to Fleas.

JULY 31, 1885.

Send me by mail four more cakes of your NEW PROCESS DOG SOAP. I have used it on several dogs, and it is the only soap that I ever used that was *sure to kill fleas.*

C. H. WALLBRIDGE,
58 S. Clair st., Toledo, O

NEW PROCESS DOG SOAP contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap; delightfully perfumed and unequaled as a dressing for even the most delicate toy dog. It not only kills fleas, but will keep them off any dog that is washed with it three times a week; also neutralizes the disagreeable "doggy" odor. Sold by druggists and gunsmiths. Trial cake mailed for 25 cents. ASSOCIATED FANCIERS, 237 South Eighth st., Philadelphia. Wholesale Agents, MEDFORD FANCY GOODS CO., 101 Chambers st., N. Y.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

Manufactured solely by

GEO. B. EATON, 570 Pavonia Avenue,
Jersey City, N. J.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co, Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, f rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

ENGLISH POWDER

PIGOU, WILKS & LAURENCE, Lim.

TRIAL OF EXPLOSIVES.

11 Queen Victoria Street, London, E. C.

PIGOU, WILKS & LAURENCE beg to call attention to the "Trial of Explosives," held at Wimbledon in May, 1878, under the management of the editor of the "Field," and take the liberty of annexing the following table, showing that the "final figure of merit" resulted in favor of their manufactures:

Final Figure of Merit
1 Pigou, Wilks & Laurence, 34·84
2 John Hall & Son, - - 31·20
3 Curtis's & Harvey, - - 29·12
4 Schultze Wood Powder, - 25·39

See "Field," May 18, 1878.

In the Gun Trial at Wimbledon, under the auspices of the *Field* newspaper, April, 1875, when thirty-six gunmakers and 113 guns competed, the winner in three out of four classes used P., W. & L.'s No. 4 ALLIANCE Gunpowder.

The winner of the Grand Prix, Casino, Monaco, February, 1878, also used P., W. & L.'s No. 4 ALLIANCE Prize Powder.

P., W. & L. request that purchasers of the "ALLIANCE" PRIZE GUNPOWDER will be careful to see that the patent capsule covering the stopper and bearing their trade mark has not been tampered with.

A large shipment of this celebrated powder has been made to the United States, and can be supplied in any quantities by

HENRY C. SQUIRES, 178 Broadway, New York,

SOLE AGENT FOR THE UNITED STATES.

Gun of 14th Century.

A GREAT OFFER.

MR. W. W. GREENER, desiring to introduce his guns more generally in the United States, has authorized me to make the following offer for a short time only to individual sportsmen:

The Trap Gun for -	$65	Regular Price,	$85
The Far-Killing Duck Gun, 100		" "	120
The New Hammerless Gun, 100		" "	150

The two last named have the treble wedge-fast action. Above prices for 12-bores, 7 to 8¼ lbs. weight. Extra for 10-bores under 10 lbs., $5.00. These guns will be furnished from stock or to order at the same price. In latter case a deposit of $25.00 must accompany order.

No discounts of any kind from these prices. My large catalogue with full descriptions and much valuable matter, 115 pages, 263 illustrations, sent on receipt of 35 cents.

Address,

Chester Folding Anchor.

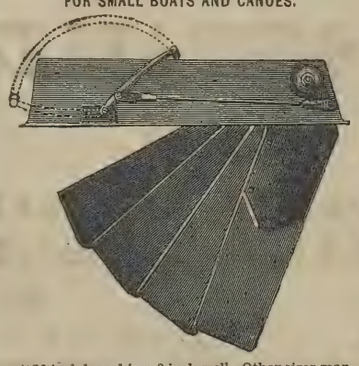
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 207 Federal treet, Boston, Mass.

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

WM. MILLS & SON,

Fine Fishing Tackle,

No. 7 Warren Street, N. Y.

SOLE AGENTS FOR

H. L. Leonard's Split Bamboo Rods.

Note result of the English Anglers' Tournament, held near London August 22, 1885:

Mr. Geo. M. Kelson wins 1st prize with a cast of 27 yds.
(of England.)
Mr. T. B. Mills " 2d " " " 25½ "
(of New York.)

Both gentlemen using a Leonard Split Bamboo Trout Fly Rod.

Cut showing Patent Waterproof and Patent Split Ferrule.

The latest pattern in these goods is the "C. V." Rod, which is just suited for the Black Bass fishing at this season.

They are made in lengths of 8 ft. to 8½ ft., and weigh from 8 ounces to 9 ounces.

Just the rod for casting a minnow, and when used with one of our "IMPERIAL" Steel Pivot, Raised Pillar, Multiplying Black Bass Reels, you have perfection itself.

From now until October first is the best season for catching large trout in Maine with the fly.

We recommend a Leonard Rod, 10½ ft. long, and to weigh from 8¼ to 9 ounces, for that fishing.

Our stock of Maine Trout Flies is complete, and consists of the most killing patterns, selected by one who knows from experience what the correct thing is.

CANOE HANDLING.

By C. B. VAUX ("DOT").

A complete manual for the management of a canoe. The author begins at the very beginning, describes and explains the rudiments in the simplest and plainest way possible. Everything is made intelligible for beginners; and besides this A B C teaching there are so many hints and wrinkles that the oldest canoeist afloat will find pleasure and profit in the study of these. The book is complete and concise—no useless duffle between its covers. The subjects treated are the choice of a canoe, paddling, sailing, care of the canoe, recipes and rules. The text is further elucidated by numerous practical drawings, and the beauty of the book is enhanced by the many ornamental vignettes. Pages 168; uniform with "Canoe Building." Price, postpaid, $1.00.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

SEVENTH ANNUAL TRIALS AND MEETING

—OF THE—

Eastern Field Trials Club

—TO BE HELD AT—

HIGH POINT, GUILFORD CO. NORTH CAROLINA.

COMMENCING MONDAY, NOVEMBER 16, 1885.

OPEN TO THE WORLD.

All trials to be run on Quails under Eastern Field Trials Club's Rules.

ORDER OF RUNNING:

MEMBERS' STAKE.

Open only to Members of the Club, each entry to be owned three months previous to closing of the Stake, and handled by the member making the nomination. Prizes: Piece of Plate, value $100, to be known as the Eastern Field Trials Cup of 1885. Also the Goodsell Cup, value $250. Forfeit $5; $5 addition to fill, payable at time of making nominations. Stake closes November 11, 1885; commences Nov. 12.

ALL-AGED POINTER STAKE.

Open to all pointers except any first-prize winners at any All-Aged Stake, or prize winner of any Special Pointer Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

ALL-AGED SETTER STAKE.

Open to all setters except any first prize winner of any All-Aged Stake, or prize winner of any Special Setter Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

CHAMPION SWEEPSTAKE.

Open to all setters and pointers which are first prize winners of 1885, also of previous years, and winners of Special Setter and Pointer cups. Entrance $50, to which the club adds $300 cash. All entry moneys to go with added club money. Three dogs, the property of different owners, to enter or no race.

EASTERN FIELD TRIALS DERBY.

Open to all puppies whelped on or after January 1st, 1884. Purse $500 cash. First prize, $250; second, $150; third, $100. Nominations closed for this stake May 1. Forfeit $5; $10 additional to fill.

The President offers a Cup, value $100, to be known as the "President's Cup," to the breeder of the best dog or bitch puppy competing in the Derby. The breeder to be the owner of the dam of such winning puppy at the time the bitch was bred to the dog.

NOTICE.—Any handler or owner working or shooting over any dog or dogs entered for these trials south of the railroad track of the Piedmont Air Line, etc., from October 15 until conclusion of trials, shall forfeit all entrance moneys, purses and cups.

Ample and good board at hotels can be had from $1.00 per day up. Ample transportation at moderate prices to and from the grounds. Dogs entered in trials of 1885 carried free on P. R. R. and Asso. R. R. of Va. and Carolinas on club passes.

J. OTTO DONNER, President.

For sale by all the principal booksellers, or sent postpaid on receipt of price by

J. LORING THAYER,

No. 186 Tremont St., Boston, Mass.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,
NEWBURYPORT, MASS.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

DOG-SKIN LEATHER JACKETS!

FOR FALL SHOOTING.

Soft and pliable as kid. Not shrunk or injured by water. Entirely waterproof and windproof. A complete protection to sportsmen or any exposed to cold or wet. For horseback riding, driving or walking in cold weather. Worn under the overcoat, they are a handsome garment and much used. A capital jacket for bicycle use, skating and sleighing.

We have just received and now offer the first lot for this season, and the present invoice comprises the finest skins we have imported for years.

☞WE TAKE THE ENTIRE PRODUCT OF THE MANUFACTURES OF ABOVE FINEST JACKETS, AND THIS MAKE CANNOT BE OBTAINED ELSEWHERE IN THE UNITED STATES.

An early selection is advised. Common qualities of other makes also in stock.

A quality, the very finest skin, - - - - - $18 00
" not as fine, - - - - $8 00, $10 00 and 15 00

Send measurement around chest outside vest. If money is sent with order we will forward free by mail, and if not satisfactory on receipt we will return money on return of Jacket. We are already selling many of them. Entirely different from any other make.

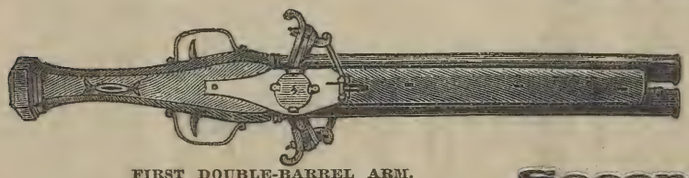
☞*As there are many different makes of Leather Jackets in the market advertised as finest, etc., mostly made here of common skins, we invite those desiring such to send for one of ours, and if not found superior on examination to any other, it can be returned at our expense or we will refund money.*

WILLIAM READ & SONS, 107 Washington St., Boston.
SOLE AMERICAN AGENTS FOR THESE FINEST IMPORTED SKINS.

The Gun and its Development, with Notes on Shooting.

By W. W. GREENER, Author of MODERN BREECHLOADERS, CHOKE-BORE GUNS, Etc.

Finely Illustrated with 500 Wood Engravings.



"The great and increasing desire for information upon Gunnery calls for a work that will deal concisely and exhaustively with the subject. With this intention 'The Gun and its Development' has been produced."—Vide Prospectus.

FIRST DOUBLE-BARREL ARM.

EARLY MATCH-LOCK GUN.

Second Edition.

OPINIONS OF THE PRESS.

"The title sounds comprehensive, and yet it is almost too modest. . . . The author has ransacked the whole range of literature on his subject, and extended his researches into all collections of weapons of any notoriety. Experts and gentlemen will be interested in examining intricacies of lock and action, as clearly set forth as diagrams can do it, whilst more popular with the generality of readers will be the engravings of those quaint old weapons, in which we may detect something more than the germ of almost every modern patent."—*Times, Aug.* 22, 1881.

"Not only sportsmen, but every one interested in firearms, will welcome Mr. Greener's book on the gun. It is a remarkably complete monograph on the subject, and although necessarily dealing a good deal with technical matters, is replete with interest from beginning to end. From whatever point of view it is regarded, the work is full of well-condensed and trustworthy information."—*Westminster Review, July*, 1881.

"Most certainly a valuable addition to the literature of firearms."—*Baily's Magazine, July*, 1881.

"Combines scientific accuracy with historic research. . . . Abounds in useful information. There is an excellent index, which, in a book of this sort, so full of scattered information, is indispensable."—*Home News.*

"Mr. Greener may claim to speak *ex cathedra* on the subject which he here handles, for no gunmaker has met with greater practical success in competitive scientific gun trials. Though Mr. Greener's own line of science lies more particularly in the manufacture of sporting weapons, his work is by no means confined to a disquisition of them; he deals with gunnery *ab ovo*, tracing the gradual development of cannon, musketry and sporting weapons from the days of their earliest use. . . . We have not space to follow Mr. Greener through his careful analysis of modern sporting shotguns; the chapter on gunmaking and the analysis of various locks and breechloading systems may well be read by every sportsman; they will interest and instruct to good purpose."—*Pall Mall Gazette.*

"In literary merit it is above the average of works of the kind, and in matter it is a compendious treatise, not only on the art of gunmaking, but on the history of firearms and on shooting as a sport. . . . All the successive stages in this remarkable development are dealt with at length, and are dwelt with, moreover, in a singularly agreeable and practical way. Next to the completeness with which the whole subject is covered, what strikes one most is the absence of those technicalities which are so puzzling to the ordinary reader."—*Liverpool Mercury.*

"Each subject treated upon seems dealt with carefully and conscientiously, and the vast amount of statistical and other information contained makes it a work that should be on the shelves of every sportsman's library."—*Field.*

"The chapter on 'Curious Arms' is remarkably interesting, the illustrations being admirable. Modern breechloading rifles are then dealt with, from the needle-gun and Chassepot to those most marvellously-accurate and far-reaching weapons, the English and American match-rifles. Bullets and projectiles for military rifles, as well as for those used for sporting purposes, and shotguns are dealt with in a way that cannot fail to interest any one who cares for guns. Whatever Mr. Greener has to say on guns, whether regarding his own or those of others, is to the point, as any sportsman who has any practical knowledge will at once recognize in reading this book."—*Land and Water, July* 2, 1881.

"The book is copiously illustrated throughout, and the various improvements in firearms are treated with care and knowledge. Much useful information is given as to the habits and peculiarities of game."—*Illustrated Sporting and Dramatic News, June* 25, 1881.

"The writer has succeeded in making his meaning clear, even when dealing with intricate technicalities, and presented to the public all information concerning the gun and its accessories in a form that is not merely readable but entertaining."—*Live Stock Journal, May* 18, 1881.

Builder of the original Shadow and Sunbeam Canoe. Whitehall Boats and Shadow Sunbeam Canoes, a specialty. Always on hand.

Chester Folding Anchor.

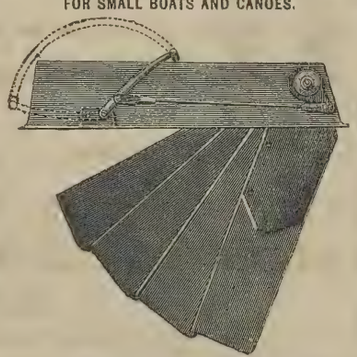
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

Atwood's Patent Center-Board

ATWOOD BROS., Clayton, N. Y.

Our Boats, Oars & Trimmings

ARE SELLING LIKE

LEMONADE

On a hot day. We have them in all styles and all sizes, and now is just the time to buy. We can sell you a good boat for $35, including oars and rowlocks; better ones at higher prices, of course, but nowhere else in the city can be found boats of the same quality at anything like the price. We have also a good line of "Sprague's" celebrated boats, and they are just selling "hand over fist."

Our second lot of catalogues are out, and 10 cents in stamps will prove a potent factor in your receiving a copy.

AUCTION SALE

OF ENGLISH AND AMERICAN

Breech-Loading Guns

By the following celebrated makers:

W. & C. SCOTT & SON, W. W. GREENER, COLT FIRE ARMS CO., PARKER BROS., PIEPER, L. C. SMITH, HOLLIS & SONS, SPENCER (REPEATER), RICHARDS and others, at

THE BARKER SALESROOMS,

47 & 49 LIBERTY STREET,

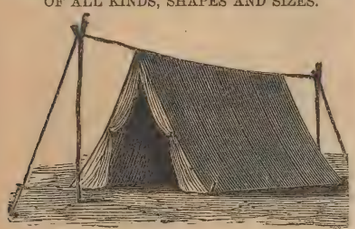
Tuesday and Wednesday, Oct 13 and 14,

Commencing at 1 o'clock P. M.

Guns will be on exhibition from Saturday morning, Oct. 10, from 9 A. M. to 6 P. M., until time of sale.

For the past nine years we have made a specialty of the sale by auction each fall of Breechloading Guns, during which time we have sold many thousand, including entire stock of several importers who have retired from business, viz.: Francis Tomes, R. V. R. Schuyler and E. S. Harris.

Our sale of next week will consist of about 100 new guns and about twenty-five slightly used weapons, with and without cases and necessary loading and cleaning implements, being the property of private parties who for various reasons have no further use for their outfits.



Full descriptive catalogues will be ready two days before the sale and will be mailed free.

GEORGE I. BANKS, Auctioneer.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

CANOE HANDLING.

By C. B. VAUX ("DOT").

A complete manual for the management of a canoe. The author begins at the very beginning, describes and explains the rudiments in the simplest and plainest way possible. Everything is made intelligible for beginners; and besides this A B C teaching there are so many hints and wrinkles that the oldest canoeist afloat will find pleasure and profit in the study of these. The book is complete and concise—no useless duffle between its covers. The subjects treated are the choice of a canoe, paddling, sailing, care of the canoe, recipes and rules. The text is further elucidated by numerous practical drawings, and the beauty of the book is enhanced by the many ornamental vignettes. Pages 168; uniform with "Canoe Building." Price, postpaid, $1.00.

SEVENTH ANNUAL TRIALS AND MEETING

—OF THE—

Eastern Field Trials Club

—TO BE HELD AT—

HIGH POINT, GUILFORD CO. NORTH CAROLINA.

COMMENCING MONDAY, NOVEMBER 16, 1885.

OPEN TO THE WORLD.

All trials to be run on Quails under Eastern Field Trials Club's Rules.

ORDER OF RUNNING:

MEMBERS' STAKE.

Open only to Members of the Club, each entry to be owned three months previous to closing of the Stake, and handled by the member making the nomination. Prizes: Piece of Plate, value $100, to be known as the Eastern Field Trials Cup of 1885. Also the Goodsell Cup, value $250. Forfeit $5; $5 addition to fill, payable at time of making nominations. Stake closes November 11, 1885; commences Nov. 12.

ALL-AGED POINTER STAKE.

Open to all pointers except any first-prize winners at any All-Aged Stake, or prize winner of any Special Pointer Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

ALL-AGED SETTER STAKE.

Open to all setters except any first prize winner of any All-Aged Stake, or prize winner of any Special Setter Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

CHAMPION SWEEPSTAKE.

Open to all setters and pointers which are first prize winners of 1885, also of previous years, and winners of Special Setter and Pointer cups. Entrance $30, to which the club adds $200 cash. All entry moneys to go with added club money. Three dogs, the property of different owners, to enter or no race.

EASTERN FIELD TRIALS DERBY.

Open to all puppies whelped on or after January 1st, 1884. Purse $500 cash. First prize, $250; second, $150; third, $100. Nominations closed for this stake May 1. Forfeit $5; $10 additional to fill.

The President offers a Cup, value $100, to be known as the "President's Cup," to the breeder of the best dog or bitch puppy competing in the Derby. The breeder to be the owner of the dam of such winning puppy at the time the bitch was bred to the dog.

NOTICE.—Any handler or owner working or shooting over any dog or dogs entered for these trials south of the railroad track of the Piedmont Air Line, etc., from October 15 until conclusion of trials, shall forfeit all entrance moneys, purses and cups.

Ample and good board at hotels can be had from $1.00 per day up. Ample transportation at moderate prices to and from the grounds. Dogs entered in trials of 1885 carried free on P. R. R. and Asso. R. R. of Va. and Carolinas on club passes.

J. OTTO DONNER, President.

Management in Health.

PRICE, $2.00.

For sale by all the principal booksellers, or sent postpaid on receipt of price by

J. LORING THAYER,

No. 186 Tremont St., Boston, Mass.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and carefu experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1 The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,

NEWBURYPORT, MASS.

Sure Death to Fleas.

JULY 31, 1885.

Send me by mail four more cakes of your NEW PROCESS DOG SOAP. I have used it on several dogs, and it is the only soap that I ever used that was *sure to kill fleas.* C. H. WALLBRIDGE,

58 S. Clair st., Toledo, O

NEW PROCESS DOG SOAP contains no carbolic acid or other poison. In quality it is equal to the finest oatmeal toilet soap; delightfully perfumed and unequaled as a dressing for even the most delicate toy dog. It not only kills fleas, but will keep them off any dog that is washed with it three times a week; also neutralizes the disagreeable "doggy" odor. Sold by druggists and gunsmiths. Trial cake mailed for 25 cents. ASSOCIATED FANCIERS, 237 South Eighth st., Philadelphia. Wholesale Agents, MEDFORD FANCY GOODS CO., 101 Chambers st., N. Y.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with AMERICAN WOOD POWDER, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

Address Von Lengerke & Detmold,

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co, Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tenmons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

WILL H. CRUTTENDEN, Cazenovia, Madison County, N. Y.

ENGLISH POWDER

PIGOU, WILKS & LAURENCE, Lim.

TRIAL OF EXPLOSIVES.

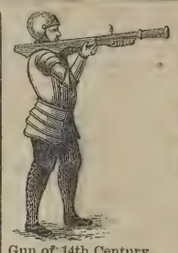
11 Queen Victoria Street, London, E. C.

PIGOU, WILKS & LAURENCE beg to call attention to the "Trial of Explosives," held at Wimbledon in May, 1878, under the management of the editor of the "Field," and take the liberty of annexing the following table, showing that the "final figure of merit" resulted in favor of their manufactures:

Final Figure of Merit

1	Pigou, Wilks & Laurence,	34·84
2	John Hall & Son, - -	31·20
3	Curtis's & Harvey, - -	29·12
4	Schultze Wood Powder, -	25·39

See "Field," May 18, 1878.



In the Gun Trial at Wimbledon, under the auspices of the *Field* newspaper, April, 1875, when thirty-six gunmakers and 113 guns competed, the winner in three out of four classes used P., W. & L.'s No. 4 ALLIANCE Gunpowder.

The winner of the Grand Prix, Casino, Monaco, February, 1878, also used P., W. & L.'s No. 4 ALLIANCE Prize Powder.

P., W. & L. request that purchasers of the "ALLIANCE" PRIZE GUNPOWDER will be careful to see that the patent capsule covering the stopper and bearing their trade mark has not been tampered with.

A large shipment of this celebrated powder has been made to the United States, and can be supplied in any quantities by

Builder of the original Shadow and Sunbeam Canoe. Whitehall Boats and Shadow Sunbeam Canoes, a specialty. Always on hand.

Chester Folding Anchor.

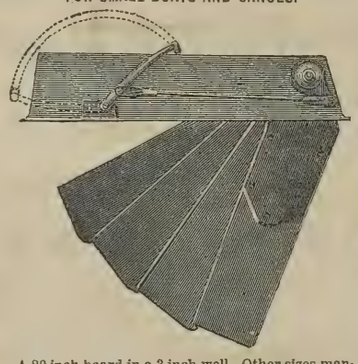
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

CANOE HANDLING.

By C. B. VAUX ("DOT").

A complete manual for the management of a canoe. The author begins at the very beginning, describes and explains the rudiments in the simplest and plainest way possible. Everything is made intelligible for beginners; and besides this A B C teaching there are so many hints and wrinkles that the oldest canoeist afloat will find pleasure and profit in the study of these. The book is complete and concise—no useless duffle between its covers. The subjects treated are the choice of a canoe, paddling, sailing, care of the canoe, recipes and rules. The text is further elucidated by numerous practical drawings, and the beauty of the book is enhanced by the many ornamental vignettes. Pages 168; uniform with "Canoe Building." Price, postpaid, $1.00.

SEVENTH ANNUAL TRIALS AND MEETING

—OF THE—

Eastern Field Trials Club

—TO BE HELD AT—

HIGH POINT, GUILFORD CO. NORTH CAROLINA.

COMMENCING MONDAY, NOVEMBER 16, 1885.

OPEN TO THE WORLD.

All trials to be run on Quails under Eastern Field Trials Club's Rules.

ORDER OF RUNNING:

MEMBERS' STAKE.

Open only to Members of the Club, each entry to be owned three months previous to closing of the Stake, and handled by the member making the nomination. Prizes: Piece of Plate, value $100, to be known as the Eastern Field Trials Cup of 1885. Also the Goodsell Cup, value $250. Forfeit $5; $5 addition to fill, payable at time of making nominations. Stake closes November 11, 1885; commences Nov. 12.

ALL-AGED POINTER STAKE.

Open to all pointers except any first-prize winners at any All-Aged Stake, or prize winner of any Special Pointer Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $ 150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

ALL-AGED SETTER STAKE.

Open to all setters except any first prize winner of any All-Aged Stake, or prize winner of any Special Setter Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

CHAMPION SWEEPSTAKE.

Open to all setters and pointers which are first prize winners of 1885, also of previous years, and winners of Special Setter and Pointer cups. Entrance $30, to which the club adds $200 cash. All entry moneys to go with added club money. Three dogs, the property of different owners, to enter or no race.

EASTERN FIELD TRIALS DERBY.

Open to all puppies whelped on or after January 1st, 1884. Purse $500 cash. First prize, $250; second, $150; third, $100. Nominations closed for this stake May 1. Forfeit $5; $10 additional to fill.

The President offers a Cup, value $100, to be known as the "President's Cup," to the breeder of the best dog or bitch puppy competing in the Derby. The breeder to be the owner of the dam of such winning puppy at the time the bitch was bred to the dog.

NOTICE.—Any handler or owner working or shooting over any dog or dogs entered for these trials south of the railroad track of the Piedmont Air Line, etc., from October 15 until conclusion of trials, shall forfeit all entrance moneys, purses and cups.

Ample and good board at hotels can be had from $1.00 per day up. Ample transportation at moderate prices to and from the grounds. Dogs entered in trials of 1885 carried free on P. R. R. and Asso. R. R. of Va. and Carolinas on club passes.

J. OTTO DONNER, President.

For sale by all the principal booksellers, or sent postpaid on receipt of price by

J. LORING THAYER,
No. 186 Tremont St., Boston, Mass.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1 The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.44-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead }	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

H. G. H. REED, Gen'l Superintendent. H. F. WHITCOMB, Gen'l Pass. Agent.
MILWAUKEE, WIS.

OLD DOMINION LINE.

The Steamers of this Line reach some of the finest waterfowl and upland shooting sections in the country. Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

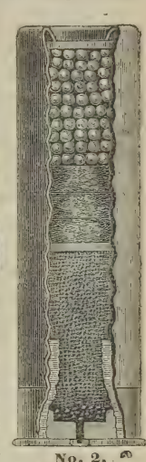
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co, Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

DOG-SKIN LEATHER JACKETS!

FOR FALL SHOOTING.

Soft and pliable as kid. Not shrunk or injured by water. Entirely waterproof and windproof. A complete protection to sportsmen or any exposed to cold or wet. For horseback riding, driving or walking in cold weather. Worn under the overcoat, they are a handsome garment and much used. A capital jacket for bicycle use, skating and sleighing.

We have just received and now offer the first lot for this season, and the present invoice comprises the finest skins we have imported for years.

☞WE TAKE THE ENTIRE PRODUCT OF THE MANUFACTURES OF ABOVE FINEST JACKETS, AND THIS MAKE CANNOT BE OBTAINED ELSEWHERE IN THE UNITED STATES.

An early selection is advised. Common qualities of other makes also in stock.

A quality, the very finest skin, - - - - - - $18 00
" not as fine, - - - - $8 00, $10 00 and 15 00

Send measurement around chest outside vest. If money is sent with order we will forward free by mail, and if not satisfactory on receipt we will return money on return of Jacket. We are already selling many of them. Entirely different from any other make.

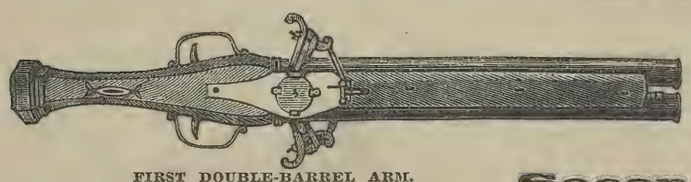
☞*As there are many different makes of Leather Jackets in the market advertised as finest, etc., mostly made here of common skins, we invite those desiring such to send for one of ours, and if not found superior on examination to any other, it can be returned at our expense or we will refund money.*

WILLIAM READ & SONS, 107 Washington St., Boston.
SOLE AMERICAN AGENTS FOR THESE FINEST IMPORTED SKINS.

The Gun and its Development, with Notes on Shooting.

By W. W. GREENER, Author of MODERN BREECHLOADERS, CHOKE-BORE GUNS, Etc.

Finely Illustrated with 500 Wood Engravings.



"The great and increasing desire for information upon Gunnery calls for a work that will deal concisely and exhaustively with the subject. With this intention 'The Gun and its Development' has been produced."—Vide Prospectus.

FIRST DOUBLE-BARREL ARM.

EARLY MATCH-LOCK GUN.

Second Edition.

OPINIONS OF THE PRESS.

"The title sounds comprehensive, and yet it is almost too modest. . . . The author has ransacked the whole range of literature on his subject, and extended his researches into all collections of weapons of any notoriety. Experts and gentlemen will be interested in examining intricacies of lock and action, as clearly set forth as diagrams can do it, whilst more popular with the generality of readers will be the engravings of those quaint old weapons, in which we may detect something more than the germ of almost every modern patent."—*Times, Aug.* 22, 1881.

"Not only sportsmen, but every one interested in firearms, will welcome Mr. Greener's book on the gun. It is a remarkably complete monograph on the subject, and although necessarily dealing a good deal with technical matters, is replete with interest from beginning to end. From whatever point of view it is regarded, the work is full of well-condensed and trustworthy information."—*Westminster Review, July*, 1881.

"Most certainly a valuable addition to the literature of firearms."—*Baily's Magazine, July*, 1881.

"Combines scientific accuracy with historic research. . . . Abounds in useful information. There is an excellent index, which, in a book of this sort, so full of scattered information, is indispensable."—*Home News.*

"Mr. Greener may claim to speak *ex cathedra* on the subject which he here handles, for no gunmaker has met with greater practical success in competitive scientific gun trials. Though Mr. Greener's own line of science lies more particularly in the manufacture of sporting weapons, his work is by no means confined to a disquisition of them; he deals with gunnery *ab ovo*, tracing the gradual development of cannon, musketry and sporting weapons from the days of their earliest use. . . . We have not space to follow Mr. Greener through his careful analysis of modern sporting shotguns; the chapter on gunmaking and the analysis of various locks and breechloading systems may well be read by every sportsman; they will interest and instruct to good purpose."—*Pall Mall Gazette.*

"In literary merit it is above the average of works of the kind, and in matter it is a compendious treatise, not only on the art of gunmaking, but on the history of firearms and on shooting as a sport. . . . All the successive stages in this remarkable development are dealt with at length, and are dwelt with, moreover, in a singularly agreeable and practical way. Next to the completeness with which the whole subject is covered, what strikes one most is the absence of those technicalities which are so puzzling to the ordinary reader."—*Liverpool Mercury.*

"Each subject treated upon seems dealt with carefully and conscientiously, and the vast amount of statistical and other information contained makes it a work that should be on the shelves of every sportsman's library."—*Field.*

"The chapter on 'Curious Arms' is remarkably interesting, the illustrations being admirable. Modern breechloading rifles are then dealt with, from the needle-gun and Chassepot to those most marvellously accurate and far-reaching weapons, the English and American match-rifles. Bullets and projectiles for military rifles, as well as for those used for sporting purposes, and shotguns are dealt with in a way that cannot fail to interest any one who cares for guns. Whatever Mr. Greener has to say on guns, whether regarding his own or those of others, is to the point, as any sportsman who has any practical knowledge will at once recognize in reading this book."—*Land and Water, July* 2, 1881.

"The book is copiously illustrated throughout, and the various improvements in firearms are treated with care and knowledge. Much useful information is given as to the habits and peculiarities of game."—*Illustrated Sporting and Dramatic News, June* 25, 1881.

"The writer has succeeded in making his meaning clear, even when dealing with intricate technicalities, and presented to the public all information concerning the gun and its accessories in a form that is not merely readable but entertaining."—*Live Stock Journal, May* 18, 1881.

Drawings made, specifications furnished, and building superintended. Models furnished if desired. Correspondence solicited. Address,

P. O. Box 338, Fall River, Mass.

Chester Folding Anchor.

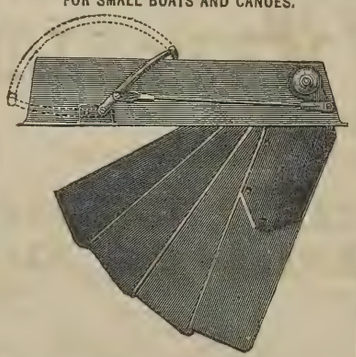
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.



Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

SEVENTH ANNUAL TRIALS AND MEETING

—OF THE—

Eastern Field Trials Club

—TO BE HELD AT—

HIGH POINT, GUILFORD CO., NORTH CAROLINA.

COMMENCING MONDAY, NOVEMBER 16, 1885.

OPEN TO THE WORLD.

All trials to be run on Quails under Eastern Field Trials Club's Rules.

ORDER OF RUNNING:

MEMBERS' STAKE.

Open only to Members of the Club, each entry to be owned three months previous to closing of the Stake, and handled by the member making the nomination. Prizes: Piece of Plate, value $100, to be known as the Eastern Field Trials Cup of 1885. Also the Goodsell Cup, value $250. Forfeit $5; $5 addition to fill, payable at time of making nominations. Stake closes November 11, 1885; commences Nov. 12.

ALL-AGED POINTER STAKE.

Open to all pointers except any first-prize winners at any All-Aged Stake, or prize winner of any Special Pointer Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

ALL-AGED SETTER STAKE.

Open to all setters except any first prize winner of any All-Aged Stake, or prize winner of any Special Setter Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

CHAMPION SWEEPSTAKE.

Open to all setters and pointers which are first prize winners of 1885, also of previous years, and winners of Special Setter and Pointer cups. Entrance $50, to which the club adds $300 cash. All entry moneys to go with added club money. Three dogs, the property of different owners, to enter or no race.

EASTERN FIELD TRIALS DERBY.

Open to all puppies whelped on or after January 1st, 1884. Purse $500 cash. First prize, $250; second, $150; third, $100. Nominations closed for this stake May 1. Forfeit $5; $10 additional to fill.

The President offers a Cup, value $100, to be known as the "President's Cup," to the breeder of the best dog or biten puppy competing in the Derby. The breeder to be the owner of the dam of such winning puppy at the time the bitch was bred to the dog.

NOTICE.—Any handler or owner working or shooting over any dog or dogs entered for these trials south of the railroad track of the Piedmont Air Line, etc., from October 15 until conclusion of trials, shall forfeit all entrance moneys, purses and cups.

Ample and good board at hotels can be had from $1.00 per day up. Ample transportation at moderate prices to and from the grounds. Dogs entered in trials of 1885 carried free on P. R. R. and Asso. R. R. of Va. and Carolinas on club passes.

J. OTTO DONNER, President.

The Kennel.

Books by Hugh Dalziel.

Imported by us and now for sale at the low prices affixed:

BRITISH DOGS.

Their Varieties, History, Characteristics, Breeding, Management and Exhibition. Illustrated with 52 portraits of the chief dogs of the day. By HUGH DALZIEL ("Corsincon"). Pages, 495. Price $3.

DISEASES OF DOGS.

Their Pathology, Diagnosis and Treatment, to which is added a complete Dictionary of Canine Materia Medica; Modes of Administering Medicines; Treatment in cases of Poisoning, and the Value of Disinfectants. For the use of Amateurs. By HUGH DALZIEL. New and enlarged edition. Cloth, pages, 116. Price $1.

OF ENGLISHE DOGGES.

The Diversities, the Natures and the Properties. A short treatise written in Latine by Johannes Caius of late memorie, Doctor of Phisicke in the Universitie of Cambridge, and newly drawne into Englishe by Abraham Fleming, Student. Imprinted at London, 1576. The earliest book in the English language on Dogs. Reprinted verbatim under the supervision of HUGH DALZIEL. Price 50 cents.

ASHMONT'S NEW PUBLICATION.

DOGS, Their Management and Treatment

—IN—

DISEASE.

This book has been honored by the endorsement

The Entire Kennel Press

and accepted as the

Standard Work on the Subject

by the leading sportsmen of

America and England.

Indispensable to owners of valuable dogs. It is not confined to Canine Diseases alone, but gives full instructions as to

Management in Health.

PRICE, $2.00.

For sale by all the principal booksellers, or sent postpaid on receipt of price by

J. LORING THAYER,
No. 186 Tremont St., Boston, Mass.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,
NEWBURYPORT, MASS.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

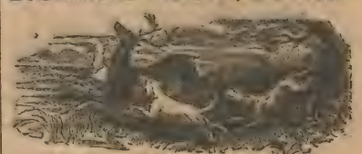
Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.



H. G. H. REED, Gen'l Superintendent. H. F. WHITCOMB, Gen'l Pass. Agent.
MILWAUKEE, WIS.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead }	24-inch. $23 00	28-inch. $25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

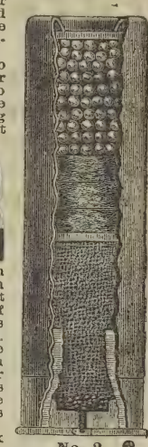
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with AMERICAN WOOD POWDER, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address Von Lengerke & Detmold,

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co, Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, f rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

ENGLISH POWDER

PIGOU, WILKS & LAURENCE, Lim.

TRIAL OF EXPLOSIVES.

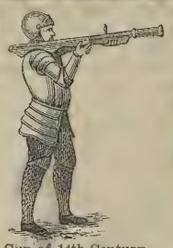
11 Queen Victoria Street, London, E. C.

PIGOU, WILKS & LAURENCE beg to call attention to the "Trial of Explosives," held at Wimbledon in May, 1878, under the management of the editor of the "Field," and take the liberty of annexing the following table, showing that the "final figure of merit" resulted in favor of their manufactures:

Final Figure of Merit
1 Pigou, Wilks & Laurence, 34·84
2 John Hall & Son, - - 31·20
3 Curtis's & Harvey, - - 29·12
4 Schultze Wood Powder, - 25·39

See "Field," May 18, 1878.

In the Gun Trial at Wimbledon, under the auspices of the *Field* newspaper, April, 1875, when thirty-six gunmakers and 113 guns competed, the winner in three out of four classes used P., W. & L.'s No. 4 ALLIANCE Gunpowder.



The winner of the Grand Prix, Casino, Monaco, February, 1878, also used P., W. & L.'s No. 4 ALLIANCE Prize Powder.

P., W. & L. request that purchasers of the "ALLIANCE" PRIZE GUNPOWDER will be careful to see that the patent capsule covering the stopper and bearing their trade mark has not been tampered with.

A large shipment of this celebrated powder has been made to the United States, and can be supplied in any quantities by

HENRY C. SQUIRES, 178 Broadway, New York,

DESIGNED BY

J. BEAVOR-WEBB.

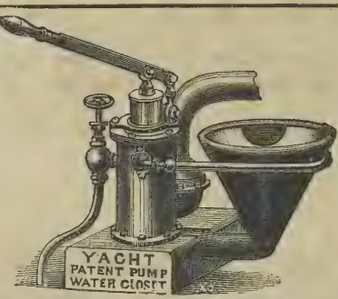
STEAM YACHTS A SPECIALTY. 18 Cranley Garden, London, S. W., England.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.



The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

CANOE
AND
BOAT
BUILDING
FOR
AMATEURS.

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 30ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 (fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest. Packed in 6¼ lb. kegs and 1 lb. canisters.

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Ammunition, etc.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

SEVENTH ANNUAL TRIALS AND MEETING

—OF THE—

Eastern Field Trials Club

—TO BE HELD AT—

HIGH POINT, GUILFORD CO., NORTH CAROLINA.

COMMENCING MONDAY, NOVEMBER 16, 1885.

OPEN TO THE WORLD.

All trials to be run on Quails under Eastern Field Trials Club's Rules.

ORDER OF RUNNING:

MEMBERS' STAKE.

Open only to Members of the Club, each entry to be owned three months previous to closing of the Stake, and handled by the member making the nomination. Prizes: Piece of Plate, value $100, to be known as the Eastern Field Trials Cup of 1885. Also the Goodsell Cup, value $250. Forfeit $5; $5 addition to fill, payable at time of making nominations. Stake closes November 11, 1885; commences Nov. 12.

ALL-AGED POINTER STAKE.

Open to all pointers except any first-prize winners at any All-Aged Stake, or prize winner of any Special Pointer Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

ALL-AGED SETTER STAKE.

Open to all setters except any first prize winner of any All-Aged Stake, or prize winner of any Special Setter Cup in All-Aged Stakes. Purse $400 cash. First prize, $250; second, $150. Forfeit $10, and $15 additional to fill. Nominations close November 1, 1885.

CHAMPION SWEEPSTAKE.

Open to all setters and pointers which are first prize winners of 1885, also of previous years, and winners of Special Setter and Pointer cups. Entrance $50, to which the club adds $200 cash. All entry moneys to go with added club money. Three dogs, the property of different owners, to enter or no race.

EASTERN FIELD TRIALS DERBY.

Open to all puppies whelped on or after January 1st, 1884. Purse $500 cash. First prize, $250; second, $150; third, $100. Nominations closed for this stake May 1. Forfeit $5; $10 additional to fill.

The President offers a Cup, value $100, to be known as the "President's Cup," to the breeder of the best dog or bitch puppy competing in the Derby. The breeder to be the owner of the dam of such winning puppy at the time the bitch was bred to the dog.

NOTICE.—Any handler or owner working or shooting over any dog or dogs entered for these trials south of the railroad track of the Piedmont Air Line, etc., from October 15 until conclusion of trials, shall forfeit all entrance moneys, purses and cups.

Ample and good board at hotels can be had from $1.00 per day up. Ample transportation at moderate prices to and from the grounds. Dogs entered in trials of 1885 carried free on P. R. R. and Asso. R. R. of Va. and Carolinas on club passes.

J. OTTO DONNER, President.

J. LORING THAYER,

No. 186 Tremont St., Boston, Mass.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,
NEWBURYPORT, MASS.

For Sale for Want of Use.

My English Setter Bitch Dora Aten, by Arnold Burgess's Druid out of Dr. Aten's Daisy, whelped May 19, 1882, chestnut and white, weight about 40 pounds; well-formed and handsome; thoroughly broken except retrieving; fast and stylish; fine nose; docile and obedient; fit to hunt or show in any company; in all respects a first-class animal and a good breeder. Price $100

A new .38-caliber Winchester rifle, half magazine, half octagon, 28in. barrel, fine walnut stock, checkered, case-hardened mountings, etc., reloading tools and 100 cartridges. Cost $35; never used. Price $25 cash.

The bitch will be sent on trial, provided satisfactory references are given and enough money to cover express charges both ways deposited with the agent; the consignee to be responsible to me for safety of bitch, he to look to express company for indemnification in case of damage. Rifle sent on deposit of money to cover charges; C. O. D. No trades, and not a nickle less than above prices taken. No money wanted until purchaser is satisfied. The bitch is one of the best—if not the very best—I ever owned, and a rare chance. Address AH-PE, Box 27, Madisonville, Tenn. oct29,2t

Prize-Bred St. Bernards.

The choice pups of a splendid litter of puppies by RENE (champion Bonivard—Elsa) out of MARGERY (champion Bonivard—Bounce) for sale. Well marked and with double dew claws. Parents have both won prizes. JAS. WATSON, P. O. Box 770, Philadelphia, Pa. oct29,2t

Champion Irish Setter Faun

FOR SALE.

Sire, Champion Elcho; Dam Champion Noreen.

As Mr. Budington has no further use for Faun, I offer her for sale. She is 3 yrs. old, and is full sister to champion Glencho. She has won a number of championships, and has never been beaten on the bench. Is probably the best-made Irish setter bitch living to-day, and is now in fine condition. Cost $150 when a puppy; price $275. Address W. H. PIERCE, Peekskill, N. Y. oct22,2t

Mill-Brook Kennels

Thoroughbred St. Bernards.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28 inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00

		24-inch.	28-inch.
.45 caliber	70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

H. G. H. REED, Gen'l Superintendent. H. F. WHITCOMB, Gen'l Pass. Agent. MILWAUKEE, WIS.

OLD DOMINION LINE.

The Steamers of this Line reach some of the finest waterfowl and upland shooting sections in the country. Connecting direct for City Point, James River, Currituck, Kittyhawk Club Grounds, Van Slyck's, etc., etc. These points can now be reached by rail and stage from Norfolk. Norfolk steamers sail from Pier 26, N. R., New York, Tuesday, Wednesday, Thursday and Saturday at 3 P. M.

Full information given at Co.'s office, 235 West street, New York.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

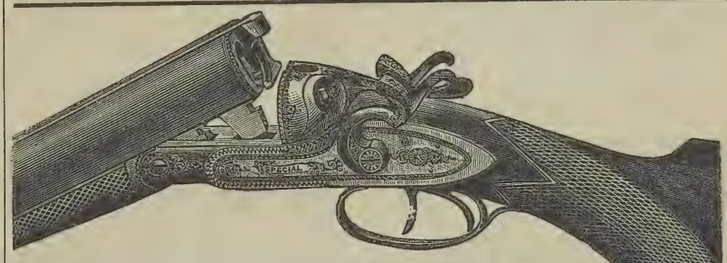
No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.



Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**
14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

DOG-SKIN LEATHER JACKETS!

FOR FALL SHOOTING.

Soft and pliable as kid. Not shrunk or injured by water. Entirely waterproof and windproof. A complete protection to sportsmen or any exposed to cold or wet. For horseback riding, driving or walking in cold weather. Worn under the overcoat, they are a handsome garment and much used. A capital jacket for bicycle use, skating and sleighing.

We have just received and now offer the first lot for this season, and the present invoice comprises the finest skins we have imported for years.

☞WE TAKE THE ENTIRE PRODUCT OF THE MANUFACTURES OF ABOVE FINEST JACKETS, AND THIS MAKE CANNOT BE OBTAINED ELSEWHERE IN THE UNITED STATES.

An early selection is advised. Common qualities of other makes also in stock.

A quality, the very finest skin, - - - - - $18 00
" not as fine, - - - $8 00, $10 00 and 15 00

Send measurement around chest outside vest. If money is sent with order we will forward free by mail, and if not satisfactory on receipt we will return money on return of Jacket. We are already selling many of them. Entirely different from any other make.

☞*As there are many different makes of Leather Jackets in the market advertised as finest, etc., mostly made here of common skins, we invite those desiring such to send for one of ours, and if not found superior on examination to any other, it can be returned at our expense or we will refund money.*

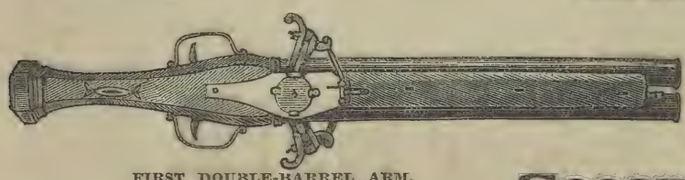
WILLIAM READ & SONS, 107 Washington St., Boston.

SOLE AMERICAN AGENTS FOR THESE FINEST IMPORTED SKINS.

The Gun and its Development, with Notes on Shooting.

By W. W. GREENER, Author of MODERN BREECHLOADERS, CHOKE-BORE GUNS, Etc.

Finely Illustrated with 500 Wood Engravings.



"The great and increasing desire for information upon Gunnery calls for a work that will deal concisely and exhaustively with the subject. With this intention 'The Gun and its Development' has been produced."—Vide Prospectus.

FIRST DOUBLE-BARREL ARM.

EARLY MATCH-LOCK GUN.

Second Edition.

OPINIONS OF THE PRESS.

"The title sounds comprehensive, and yet it is almost too modest. . . . The author has ransacked the whole range of literature on his subject, and extended his researches into all collections of weapons of any notoriety. Experts and gentlemen will be interested in examining intricacies of lock and action, as clearly set forth as diagrams can do it, whilst more popular with the generality of readers will be the engravings of those quaint old weapons, in which we may detect something more than the germ of almost every modern patent."—*Times, Aug.* 22, 1881.

"Not only sportsmen, but every one interested in firearms, will welcome Mr. Greener's book on the gun. It is a remarkably complete monograph on the subject, and although necessarily dealing a good deal with technical matters, is replete with interest from beginning to end. From whatever point of view it is regarded, the work is full of well-condensed and trustworthy information."—*Westminster Review, July*, 1881.

"Most certainly a valuable addition to the literature of firearms."—*Baily's Magazine, July*, 1881.

"Combines scientific accuracy with historic research. . . . Abounds in useful information. There is an excellent index, which, in a book of this sort, so full of scattered information, is indispensable."—*Home News.*

"Mr. Greener may claim to speak *ex cathedra* on the subject which he here handles, for no gunmaker has met with greater practical success in competitive scientific gun trials. Though Mr. Greener's own line of science lies more particularly in the manufacture of sporting weapons, his work is by no means confined to a disquisition of them; he deals with gunnery *ab ovo*, tracing the gradual development of cannon, musketry and sporting weapons from the days of their earliest use. . . . We have not space to follow Mr. Greener through his careful analysis of modern sporting shotguns; the chapter on gunmaking and the analysis of various locks and breechloading systems may well be read by every sportsman; they will interest and instruct to good purpose."—*Pall Mall Gazette.*

"In literary merit it is above the average of works of the kind, and in matter it is a compendious treatise, not only on the art of gunmaking, but on the history of firearms and on shooting as a sport. . . . All the successive stages in this remarkable development are dealt with at length, and are dwelt with, moreover, in a singularly agreeable and practical way. Next to the completeness with which the whole subject is covered, what strikes one most is the absence of those technicalities which are so puzzling to the ordinary reader."—*Liverpool Mercury.*

"Each subject treated upon seems dealt with carefully and conscientiously, and the vast amount of statistical and other information contained makes it a work that should be on the shelves of every sportsman's library."—*Field.*

"The chapter on 'Curious Arms' is remarkably interesting, the illustrations being admirable. Modern breechloading rifles are then dealt with, from the needle-gun and Chassepot to those most marvellously accurate and far-reaching weapons, the English and American match-rifles. Bullets and projectiles for military rifles, as well as for those used for sporting purposes, and shotguns are dealt with in a way that cannot fail to interest any one who cares for guns. Whatever Mr. Greener has to say on guns, whether regarding his own or those of others, is to the point, as any sportsman who has any practical knowledge will at once recognize in reading this book."—*Land and Water, July* 2, 1881.

"The book is copiously illustrated throughout, and the various improvements in firearms are treated with care and knowledge. Much useful information is given as to the habits and peculiarities of game."—*Illustrated Sporting and Dramatic News, June* 25, 1881.

"The writer has succeeded in making his meaning clear, even when dealing with intricate technicalities, and presented to the public all information concerning the gun and its accessories in a form that is not merely readable but entertaining."—*Live Stock Journal, May* 18, 1881.

DESIGNED BY
J. BEAVOR-WEBB,
STEAM YACHTS A SPECIALTY. 18 Cranley Garden, London, S. W., England.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever Invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

For Above or Below Water Line.

CANOE AND BOAT BUILDING

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires.

Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 (fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest. Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

SENSATION.

We have for sale a few copies of an elegant steel engraving of the celebrated pointer Sensation. Size of plate, 14x20; size of sheet, 22x28. Price, $1 each.

FOREST AND STREAM PUB. CO., 39 Park Row, N. Y.

For Sale for Want of Use.

My English Setter Bitch Dora Aten, by Arnold Burgess's Druid out of Dr. Aten's Daisy, whelped May 19, 1882, chestnut and white, weight about 40 pounds; well-formed and handsome; thoroughly broken except retrieving; fast and stylish; fine nose; docile and obedient; fit to hunt or show in any company; in all respects a first-class animal and a good breeder. Price $100

A new .38-caliber Winchester rifle, half magazine, half octagon, 28in. barrel, fine walnut stock, checkered, case-hardened mountings, etc., reloading tools and 100 cartridges. Cost $35; never used; price $25 cash. Also **Lefever Automatic Hammerless Gun,** latest model, safety on back strap; an extra fine gun made to my special order, with finest quality barrels, gun finished in C ($150) style, but in all respects equal to $300 grade; perfectly balanced and a most beautiful arm; no fault whatever; sold only for want of use, and fully guaranteed; new and perfect, only used a few times. Description: 12-bore, 30in. barrels, right modified choke and left closer but not closest choke; weight 6lbs. 12oz; stock 14½in. long, 3in. drop at butt, 2in. drop at comb, 2½in. drop forward of comb; comb ¾in. high, long, easy hand, (pistol grip), measuring 8in. from standing breech to comb. This is one of the best field guns I ever saw, and a magnificent shooter. Price $140 cash. No trades and no less. Sent C. O. D. on approval, upon deposit of $10 to cover charges and guarantee of safe return if unsatisfactory.

The bitch will be sent on trial, provided satisfactory references are given and enough money to cover express charges both ways deposited with the agent; the consignee to be responsible to me for safety of bitch, he to look to express company for indemnification in case of damage. Rifle sent on deposit of money to cover charges; C. O. D. No trades, and not a nickle less than above prices taken. No money wanted until purchaser is satisfied. The bitch is one of the best—if not the very best—I ever owned, and a rare chance. Address AH-PE, Box 27, Madisonville, Tenn. oct29,2t

GREYHOUNDS.

Mr. H. W. Smith, having decided to give up exhibiting and breeding greyhounds, offers for sale his celebrated kennel of prize winners.

CHAMPION MEMNON (E.K.C.S.B. 13,609), white and black, the acknowledged champion of England and America, and winner of more 1st prizes than any other greyhound living. Winnings: Runner-up for the Waterloo purse, winner of the Anglesea Cup, Burton-on-Trent stake, Ellesmere stakes, and many other prizes in the field. Champion cups, 1st prizes and specials at the Crystal Palace twice, Birmingham twice, Hull twice, Warwick, Sheffield and thirty other shows in England. In America: New York, Boston, Philadelphia twice, Toronto and Cincinnati. Memnon is a sure stock getter, "and there is nothing in the stud better bred to get winning merit."—*Bell's Life.*

MOTHER DEMDIKE (E.K.C.S.B. 14,596), black and white, champion bitch of America and considered by judges to be the most perfect greyhound living. The following is a cutting from the English *Kennel Review:* "Mother Demdike has gone to America. She is a wonderfully made one, having the greatest loins and thighs I ever saw, and yet not coarse. There have been no bitches out this year to approach her." The above is said in comparing her with Acalia, Lancashire Witch, Bonny Lass and others. Winner, 1st, champion cups and specials at Warwick, Farnworth, Clitherve, Lancaster, Skipton, Boston, New York twice, and Philadelphia. At Pembroke she beat the champion setter of America, Rockingham, the champion bulldog of America, Robinson Crusoe, the champion English fox-terriers Raby Nailer and Richmond Patchwork.

SKIPPING ROPE, a black and white dog, whelped May 20, by Memnon ex Mother Demdike; a very promising youngster, valuable for the stud. Price $40.

STEALING AWAY, brindle and white bitch, age 2½ yrs., very large and a splendid mother. Winner, 1st and special, Attleboro and Phila. Price $50.

STRAY SHOT, fawn bitch, age 2 yrs., now mother to ten pups, all sold, by champion Memnon. Price $20.

MEMNON EX CHAMPION FAN.—Four bitch and two dog puppies, the above whelped July 15, in perfect health, color black and white. Price for dog pups $25; bitches $20.

All the above must be sold at once, and satisfaction is guaranteed with any sale For pedigrees and particulars apply to H. W. SMITH, Box 876, Worcester, Mass. nov18,3t

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply beach shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,
NEWBURYPORT, MASS.

POINTERS.—FOR SALE—TO REDUCE STOCK we offer a number of liver and white and lemon and white pointer puppies, from 6 wks. to 5 mos. old. Puppies are strong and healthy and very promising. Hotels and Resorts for Sportsmen.

THE

Milwaukee, Lake Shore and Western Railway

Has opened a new field for Tourists, Pleasure and Health Seekers and Sportsmen, and is developing a new territory, offering unsurpassed inducements to business men of all classes.

The line runs from Milwaukee north and passes through the Dairy Region of Wisconsin, and its always cool and comfortable Summer Resorts, located on Lake Michigan, Sheboygan, Sheboygan Falls and Manitowoc.

Through the picturesque scenery of the Fox River Valley, and the cities of Kaukauna, and Appleton, noted for their vast Water Power and Manufacturing Facilities.

Through Northern Wisconsin and the Michigan Peninsula, the most beautiful Region of Forests, Streams and Lakes in the great Northwest.

Within its limits are located the best Fishing and Hunting Grounds in the country. The Equable Climate and the pure air of the Pine Forests, make it a most desirable Sanitarium, especially for sufferers from Hay Fever and Lung Diseases.

Good Hotels, Fleets of Pleasure Boats, and general facilities for comfort and pleasure at Lake Gogebic, the Eagle Waters and Pelican Lake.

Through the most wonderful Mineral Region of the United States: The Gogebic, Montreal and Penokee Iron Ranges. A new and rich field for the Prospector, Speculator and Capitalist. Picturesque Scenery and Interesting Sights for the Tourist. The Line terminates at Ashland, Lake Superior, well known as a desirable Summer Resort.

GUIDE BOOK containing Maps, Engravings and general information, free on application to the General Passenger Agent.

H. G. H. REED, Gen'l Superintendent. H. F. WHITCOMB, Gen'l Pass. Agent.
MILWAUKEE, WIS.

OLD DOMINION LINE.

The Steamers of this Line reach some of the finest waterfowl and upland shooting sections in the country. Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

ENGLISH POWDER

PIGOU, WILKS & LAURENCE, Lim.

TRIAL OF EXPLOSIVES.

11 Queen Victoria Street, London, E. C.

PIGOU, WILKS & LAURENCE beg to call attention to the "Trial of Explosives," held at Wimbledon in May, 1878, under the management of the editor of the "Field," and take the liberty of annexing the following table, showing that the "final figure of merit" resulted in favor of their manufactures:

Final Figure of Merit	1 Pigou, Wilks & Laurence,	34·84
	2 John Hall & Son,	31·20
	3 Curtis's & Harvey,	29·12
	4 Schultze Wood Powder,	25·39

See "Field," May 18, 1878.

In the Gun Trial at Wimbledon, under the auspices of the *Field* newspaper, April, 1875, when thirty-six gunmakers and 113 guns competed, the winner in three out of four classes used P., W. & L.'s No. 4 ALLIANCE Gunpowder.

The winner of the Grand Prix, Casino, Monaco, February, 1878, also used P., W. & L.'s No. 4 ALLIANCE Prize Powder.

P., W. & L. request that purchasers of the "ALLIANCE" PRIZE GUNPOWDER will be careful to see that the patent capsule covering the stopper and bearing their trade mark has not been tampered with.

A large shipment of this celebrated powder has been made to the United States, and can be supplied in any quantities by

Chester Folding Anchor.
The Most Simple, Complete and Compact Anchor for Small Craft ever Invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

CANOE

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of exaining to a novice an art in itself far from easy,

AND

and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his pur-

BOAT

pose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations

BUILDING

being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising

FOR

and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn

AMATEURS.

to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half pound tins by Grocers, labelled thus: JAMES EPPS & CO., Homœopathic Chemists, London, England.

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOODWIN'S Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used,
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40 caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead }	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

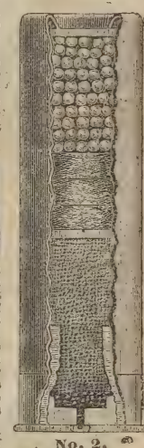
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

FIRST DOUBLE-BARREL ARM.

EARLY MATCH-LOCK GUN.

Second Edition.

OPINIONS OF THE PRESS.

"The title sounds comprehensive, and yet it is almost too modest. . . . The author has ransacked the whole range of literature on his subject, and extended his researches into all collections of weapons of any notoriety. Experts and gentlemen will be interested in examining intricacies of lock and action, as clearly set forth as diagrams can do it, whilst more popular with the generality of readers will be the engravings of those quaint old weapons, in which we may detect something more than the germ of almost every modern patent."—*Times, Aug.* 22, 1881.

"Not only sportsmen, but every one interested in firearms, will welcome Mr. Greener's book on the gun. It is a remarkably complete monograph on the subject, and although necessarily dealing a good deal with technical matters, is replete with interest from beginning to end. From whatever point of view it is regarded, the work is full of well-condensed and trustworthy information."—*Westminster Review, July*, 1881.

"Most certainly a valuable addition to the literature of firearms."—*Baily's Magazine, July*, 1881.

"Combines scientific accuracy with historic research. . . . Abounds in useful information. There is an excellent index, which, in a book of this sort, so full of scattered information, is indispensable."—*Home News.*

"Mr. Greener may claim to speak *ex cathedra* on the subject which he here handles, for no gunmaker has met with greater practical success in competitive scientific gun trials. Though Mr. Greener's own line of science lies more particularly in the manufacture of sporting weapons, his work is by no means confined to a disquisition of them; he deals with gunnery *ab ovo*, tracing the gradual development of cannon, musketry and sporting weapons from the days of their earliest use. . . . We have not space to follow Mr. Greener through his careful analysis of modern sporting shotguns; the chapter on gunmaking and the analysis of various locks and breechloading systems may well be read by every sportsman; they will interest and instruct to good purpose."—*Pall Mall Gazette.*

"In literary merit it is above the average of works of the kind, and in matter it is a compendious treatise, not only on the art of gunmaking, but on the history of firearms and on shooting as a sport. . . . All the successive stages in this remarkable development are dealt with at length, and are dwelt with, moreover, in a singularly agreeable and practical way. Next to the completeness with which the whole subject is covered, what strikes one most is the absence of those technicalities which are so puzzling to the ordinary reader."—*Liverpool Mercury.*

"Each subject treated upon seems dealt with carefully and conscientiously, and the vast amount of statistical and other information contained makes it a work that should be on the shelves of every sportsman's library."—*Field.*

"The chapter on 'Curious Arms' is remarkably interesting, the illustrations being admirable. Modern breechloading rifles are then dealt with, from the needle-gun and Chassepot to those most marvellously accurate and far-reaching weapons, the English and American match-rifles. Bullets and projectiles for military rifles, as well as for those used for sporting purposes, and shotguns are dealt with in a way that cannot fail to interest any one who cares for guns. Whatever Mr. Greener has to say on guns, whether regarding his own or those of others, is to the point, as any sportsman who has any practical knowledge will at once recognize in reading this book."—*Land and Water, July* 2, 1881.

"The book is copiously illustrated throughout, and the various improvements in firearms are treated with care and knowledge. Much useful information is given as to the habits and peculiarities of game."—*Illustrated Sporting and Dramatic News, June* 25, 1881.

"The writer has succeeded in making his meaning clear, even when dealing with intricate technicalities, and presented to the public all information concerning the gun and its accessories in a form that is not merely readable but entertaining."—*Live Stock Journal, May* 18, 1881.

DESIGNED BY

J. BEAVOR-WEBB.

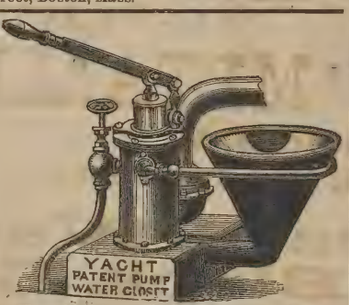
STEAM YACHTS A SPECIALTY. 18 Cranley Garden, London, S. W., England.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.



The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

CANOE AND BOAT BUILDING

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

GOODWIN'S
Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

CANOE HANDLING.

By C. B. VAUX ("DOT").

A complete manual for the management of a canoe. The author begins at the very beginning, describes and explains the rudiments in the simplest and plainest way possible. Everything is made intelligible for beginners: and besides this A B C teaching there are so many hints and wrinkles that the oldest canoeist afloat will find pleasure and profit in the study of these. The book is complete and concise—no useless duffle between its covers. The subjects treated are the choice of a canoe, paddling, sailing, care of the canoe, recipes and rules. The text is further elucidated by numerous practical drawings, and the beauty of the book is enhanced by the many ornamental vignettes. Pages 168; uniform with "Canoe Building." Price, postpaid, $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead }	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$4 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 12 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

WILL H. CRUTTENDEN, Cazenovia, Madison County, N. Y.

ENGLISH POWDER

PIGOU, WILKS & LAURENCE, Lim.

TRIAL OF EXPLOSIVES.

11 Queen Victoria Street, London, E. C.

PIGOU, WILKS & LAURENCE beg to call attention to the "Trial of Explosives," held at Wimbledon in May, 1878, under the management of the editor of the "Field," and take the liberty of annexing the following table, showing that the "final figure of merit" resulted in favor of their manufactures:

Final Figure of Merit		
1	Pigou, Wilks & Laurence,	34·84
2	John Hall & Son,	31·20
3	Curtis's & Harvey,	29·12
4	Schultze Wood Powder,	25·39

See "Field," May 18, 1878.

In the Gun Trial at Wimbledon, under the auspices of the *Field* newspaper, April, 1875, when thirty-six gunmakers and 113 guns competed, the winner in three out of four classes used P., W. & L.'s No. 4 ALLIANCE Gunpowder.

The winner of the Grand Prix, Casino, Monaco, February, 1878, also used P., W. & L.'s No. 4 ALLIANCE Prize Powder.

P., W. & L. request that purchasers of the "ALLIANCE" PRIZE GUNPOWDER will be careful to see that the patent capsule covering the stopper and bearing their trade mark has not been tampered with.

A large shipment of this celebrated powder has been made to the United States, and can be supplied in any quantities by

HENRY C. SQUIRES, 178 Broadway, New York,

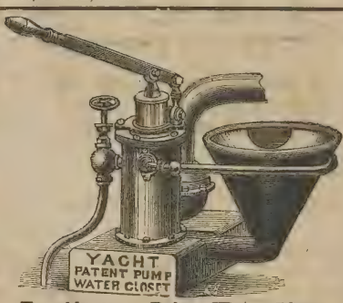
DESIGNED BY
J. BEAVOR-WEBB,
STEAM YACHTS A SPECIALTY. 18 Cranley Garden, London, S. W., England.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever Invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.



The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

CANOE AND BOAT BUILDING

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of examining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

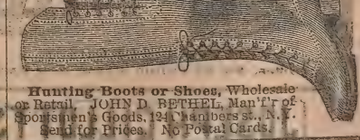
GRATEFUL- COMFORTING.



EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

Dupont's (Repauno) Mills, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Diamond Grain.—Nos. 1 (coarse) to 6 (fine); uncoated to strength, quickness and tight business, adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 (fine); burns slowly, strong and very clean; great penetration with close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breech loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Creole Rifle.—Specially adapted for Creedmoor Rifle Guns and particularly for prairie and rifle shooting. Burns slowly, strong and clean; does not foul or burn on the barrels; gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarser. Packed in 6¼ lb. kegs and 1 lb. canisters.

Dupont's Sterling Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle FG, "Long Shooting."—FFg and FFFg. The Fg for long-range rifle shooting, the FFg and FFFg for general use, priming and pistols; packed in ¼ lb., ½ lb. and 5 lb. canisters 6¼, 12½ and 25 lb. kegs. Fg coarse, FFFg fine.

Dupont's Sporting, Mining, Sporting and Blasting Powders of all sizes and descriptions. Special Sizes for Export. Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder. U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agents in all the principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and oarers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable, dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

No. 10-Gauge, 8½ to 11 lbs.

No. 12-Gauge, 7½ to 9½ lbs.

Ammunition, etc.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *quick*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER. Also SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city or wholesale at our office.

GOODWIN'S
Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00

		24-inch.	28-inch.
.45 caliber	70 grains powder, 405 grains lead / 85 grains powder, 385 grains lead	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

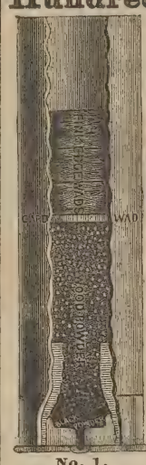
The Parker Gun.

PARKER BROTHERS,



MAKERS,

Meriden, Conn.

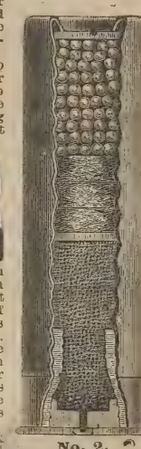
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

DOG-SKIN LEATHER JACKETS!

FOR FALL SHOOTING.

Soft and pliable as kid. Not shrunk or injured by water. Entirely waterproof and windproof. A complete protection to sportsmen or any exposed to cold or wet. For horseback riding, driving or walking in cold weather. Worn under the overcoat, they are a handsome garment and much used. A capital jacket for bicycle use, skating and sleighing.

We have just received and now offer the first lot for this season, and the present invoice comprises the finest skins we have imported for years.

☞WE TAKE THE ENTIRE PRODUCT OF THE MANUFACTURES OF ABOVE FINEST JACKETS, AND THIS MAKE CANNOT BE OBTAINED ELSEWHERE IN THE UNITED STATES.

An early selection is advised. Common qualities of other makes also in stock.

A quality, the very finest skin, - - - - - - $18 00
" not as fine, - - - $8 00, $10 00 and 15 00

Send measurement around chest outside vest. If money is sent with order we will forward free by mail, and if not satisfactory on receipt we will return money on return of Jacket. We are already selling many of them. Entirely different from any other make.

☞*As there are many different makes of Leather Jackets in the market advertised as finest, etc., mostly made here of common skins, we invite those desiring such to send for one of ours, and if not found superior on examination to any other, it can be returned at our expense or we will refund money.*

FIRST DOUBLE-BARREL ARM.

EARLY MATCH-LOCK GUN.

Second Edition.

OPINIONS OF THE PRESS.

"The title sounds comprehensive, and yet it is almost too modest. . . . The author has ransacked the whole range of literature on his subject, and extended his researches into all collections of weapons of any notoriety. Experts and gentlemen will be interested in examining intricacies of lock and action, as clearly set forth as diagrams can do it, whilst more popular with the generality of readers will be the engravings of those quaint old weapons, in which we may detect something more than the germ of almost every modern patent."—*Times, Aug.* 22, 1881.

"Not only sportsmen, but every one interested in firearms, will welcome Mr. Greener's book on the gun. It is a remarkably complete monograph on the subject, and although necessarily dealing a good deal with technical matters, is replete with interest from beginning to end. From whatever point of view it is regarded, the work is full of well-condensed and trustworthy information."—*Westminster Review, July*, 1881.

"Most certainly a valuable addition to the literature of firearms."—*Baily's Magazine, July*, 1881.

"Combines scientific accuracy with historic research. . . . Abounds in useful information. There is an excellent index, which, in a book of this sort, so full of scattered information, is indispensable."—*Home News.*

"Mr. Greener may claim to speak *ex cathedra* on the subject which he here handles, for no gunmaker has met with greater practical success in competitive scientific gun trials. Though Mr. Greener's own line of science lies more particularly in the manufacture of sporting weapons, his work is by no means confined to a disquisition of them; he deals with gunnery *ab ovo*, tracing the gradual development of cannon, musketry and sporting weapons from the days of their earliest use. . . . We have not space to follow Mr. Greener through his careful analysis of modern sporting shotguns; the chapter on gunmaking and the analysis of various locks and breechloading systems may well be read by every sportsman; they will interest and instruct to good purpose."—*Pall Mall Gazette.*

"In literary merit it is above the average of works of the kind, and in matter it is a compendious treatise, not only on the art of gunmaking, but on the history of firearms and on shooting as a sport. . . . All the successive stages in this remarkable development are dealt with at length, and are dwelt with, moreover, in a singularly agreeable and practical way. Next to the completeness with which the whole subject is covered, what strikes one most is the absence of those technicalities which are so puzzling to the ordinary reader."—*Liverpool Mercury.*

"Each subject treated upon seems dealt with carefully and conscientiously, and the vast amount of statistical and other information contained makes it a work that should be on the shelves of every sportsman's library."—*Field.*

"The chapter on 'Curious Arms' is remarkably interesting, the illustrations being admirable. Modern breechloading rifles are then dealt with, from the needle-gun and Chassepot to those most marvellously accurate and far-reaching weapons, the English and American match-rifles. Bullets and projectiles for military rifles, as well as for those used for sporting purposes, and shotguns are dealt with in a way that cannot fail to interest any one who cares for guns. Whatever Mr. Greener has to say on guns, whether regarding his own or those of others, is to the point, as any sportsman who has any practical knowledge will at once recognize in reading this book."—*Land and Water, July* 2, 1881.

"The book is copiously illustrated throughout, and the various improvements in firearms are treated with care and knowledge. Much useful information is given as to the habits and peculiarities of game."—*Illustrated Sporting and Dramatic News, June* 25, 1881.

"The writer has succeeded in making his meaning clear, even when dealing with intricate technicalities, and presented to the public all information concerning the gun and its accessories in a form that is not merely readable but entertaining."—*Live Stock Journal, May* 18, 1881.

BLACK PAPER SHOT SHELLS.

U. S. RIM AND CENTRAL FIRE CARTRIDGES ARE MADE WITH ESPECIAL CARE FOR ACCURATE PISTOL AND RIFLE TARGET SHOOTING.

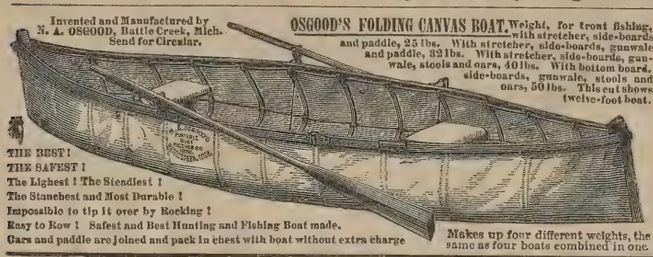
U. S. Paper Shells are Thoroughly Waterproof and Sure Fire.

These Shells are intended to overcome the great disadvantage which all other shells are subjected to *when used in damp weather.* They are so *completely waterproof* that no water can *penetrate* into the powder *even when entirely submerged.*

Use U. S. Improved No. 2 Copper Primers.

U. S. BULLET BREECH CAPS both CONICAL and ROUND BALL, with NEW EXPLOSIVE FILLING. ACCURATE AND CLEAN.

EXTRA STRENGTH AND SLIGHT REPORT.



Black Paper experience shows it to be the STRONGEST paper for Shot Shells. The CHEAPEST grade shell (Climax) now made by the U. S. Co. can be reloaded from three to five times.

UNITED STATES CARTRIDGE COMPANY, Lowell, Mass.

Yacht and Boat Builders, etc.

Invented and Manufactured by N. A. OSGOOD, Battle Creek, Mich. Send for Circular.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

For Sale.—The English cutter DAISY.

CANOE

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy,

AND

and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his pur-

BOAT

pose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires, following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations

BUILDING

being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising

FOR

and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn

AMATEURS.

to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

SOLD BY THE TRADE EVERYWHERE.

WINSTED, Conn.—Have tested the Stevens' Pet Rifle I got last winter, and am more than satisfied; in fact, several have tried it with me against several other makes, and the Stevens' took the lead.—H. M. S.

CLEVELAND, O.—I have used a Stevens' 15-inch New Model Pocket Rifle one year. I used it all last winter in California, killing in all over 150 birds, from a hummer to a pelican, sitting and flying, at from 25ft. to 250yds.—C. E. S.

BRIDGETON, Me.—The shooting qualities of the Stevens' Rifles, I think, are equal to any rifle made.—B. W. S.

NEW YORK CITY.—The Bicycle Rifle I purchased of you served me excellently last summer. I made it quite lively for the game; in about three hours I bagged thirteen squirrels. The excellent shooting qualities of the rifle, as well as its fine finish, elicited general praise.—L. S. S.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 (fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest. Packed in 6¼ lb. kegs and 1 lb. canisters.

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, Shipping and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

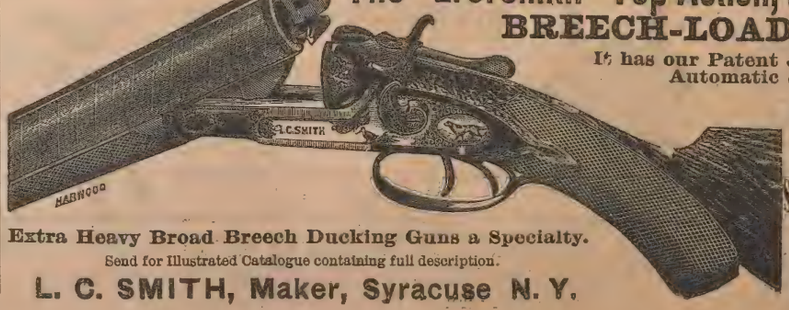
Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.
LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

PREJUDICE IS A THIEF,



And will rob you of many good things.

Our cigarettes are as fine as can be produced. They have lately been improved, are not hard nor dry. Will always smoke free and moist. Will not crumble in the pocket nor "catch you in the throat." If you are not opposed to a change and cannot obtain them of your dealer, send to the manufacturers for a sample.

Ammunition, etc.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ⅛ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city or wholesale at our office.

GOODWIN'S Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28 inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00

		24-inch.	28-inch.
.45 caliber	70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

Unequalled for Ease of Operation, Safety, Accuracy, Penetration, Style, Workmanship and Rapidity of fire. We guarantee our arms to be as represented and first-class in every particular. Send for Circular and Price List.

PIEPER

Nos. 586, 588, 589 and DIANA.

There is Nothing Else in the World Like Them for the Money.

Mr. W. K. Haynie, Chappell Hill, Texas, writes under the date of Aug. 21, 1885:

"I have given the Pieper Diana gun you sent me a thorough trial, and I endorse it in the strongest language. I am satisfied I have the best gun I ever shot, and I have used many of leading fine makes both English and American. I have broken glass balls at 87 yards, and killed ducks with No. 6 shot at 75 to 80 yards. It shoots buckshot equally well; I brought down two deer, one with the right and other with the left barrel. There is no possible shot the gun won't make. The finish is equal to the shooting. I am recommending the Pieper to all my friends."

For Sale by all First-Class Dealers in Arms.

IF YOUR DEALER HAS NONE, DON'T BUY TILL YOU INSPECT THE PIEPER. SEND FOR PIEPER CATALOGUE TO

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, f rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tenmons which prevent jounts getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $3.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

THOMAS J. CONROY,
MANUFACTURER, IMPORTER, WHOLESALE AND RETAIL DEALER IN
Fine Fishing Tackle and Camping Goods.
65 Fulton Street, New York.

CONROY'S CELEBRATED HEXAGONAL SPLIT BAMBOO RODS.
With Patent Serrated, Shouldered, Waterproof Ferrules and Patent Universal Reel Seat. Superior to all others. Quality Guaranteed.

FIG. 1.

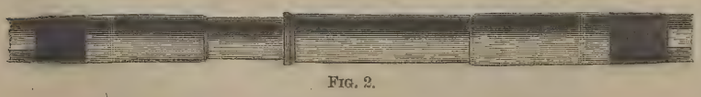

FIG. 2.

These rods are made in a great variety of styles suitable for every kind of fishing, and are unequalled for **Uniformity of Spring, Durability and Beauty of Finish.** The **"Serrated" Ferrule** is beyond all question the best ferrule for split bamboo rods ever invented. All other rod ferrules, whether split or otherwise, present a sharp, stiff edge to the bamboo, which tends to cut or crack the enamel when the rod is subjected to a strain, thereby increasing the liability of breaking the joints. The Serrated Ferrule *presents no edge to the bamboo whatever*, and this, with its "shoulder" which obviates the necessity of cutting or filing away the enamel, as is necessary with the ordinary rod ferrules, makes the rod *stronger at the ferrule than at any other part*. Fig. 1 shows the male and female ferrules. Fig. 2 shows the same mounted, the serrated ends being neatly wound with silk and varnished, which excludes all moisture. My **Patent Universal Reel Seat** will *fit perfectly* and *securely hold any reel* from the *smallest* to the *largest size made*. Descriptive circulars mailed free on application.

Send 25 cents for my 130-page Illustrated Catalogue and Handbook for Sportsmen, containing hints and directions for Fishing and Camping. Customers may deduct amount paid for catalogue from first purchase if it amounts to $1.00 or more.

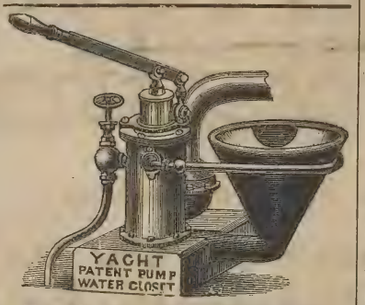
Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.



The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

CANOE AND BOAT BUILDING

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of examining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel built. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GRATEFUL- COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Made simply with boiling water or milk. Sold only in half-pound tins by Grocers, labelled thus:

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain. — Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, Shipping and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.
LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

PREJUDICE IS A THIEF,

And will rob you of many good things.

Our cigarettes are as fine as can be produced. They have lately been improved, are not hard nor dry. Will always smoke free and moist. Will not crumble in the pocket nor "catch you in the throat." If you are not opposed to a change and cannot obtain them of your dealer, send to the manufacturers for a sample.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

GOODWIN'S
Royal Dog Biscuit.

This bread is the result of repeated and carefu experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

GEO. KILIAN, Proprietor.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber, 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

PIEPER

Nos. 586, 588, 589 and DIANA.

There is Nothing Else in the World Like Them for the Money.

Mr. W. K. Haynie, Chappell Hill, Texas, writes under the date of Aug. 21, 1885:

"I have given the Pieper Diana gun you sent me a thorough trial, and I endorse it in the strongest language. I am satisfied I have the best gun I ever shot, and I have used many of leading fine makes both English and American. I have broken glass balls at 87 yards, and killed ducks with No. 6 shot at 75 to 80 yards. It shoots buckshot equally well; I brought down two deer, one with the right and other with the left barrel. There is no possible shot the gun won't make. The finish is equal to the shooting. I am recommending the Pieper to all my friends."

For Sale by all First-Class Dealers in Arms.

IF YOUR DEALER HAS NONE, DON'T BUY TILL YOU INSPECT THE PIEPER. SEND FOR PIEPER CATALOGUE TO

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

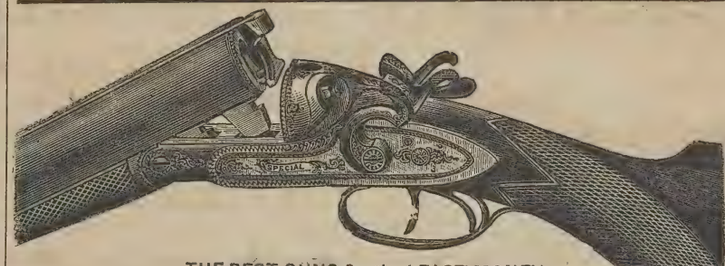
In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.



No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

We have just received and now offer the first lot for this season, and the present invoice comprises the finest skins we have imported for years.

☞WE TAKE THE ENTIRE PRODUCT OF THE MANUFACTURES OF ABOVE FINEST JACKETS, AND THIS MAKE CANNOT BE OBTAINED ELSEWHERE IN THE UNITED STATES.

An early selection is advised. Common qualities of other makes also in stock.

A quality, the very finest skin, - - - - - - $18 00
" not as fine, - - - $8 00, $10 00 and 15 00

Send measurement around chest outside vest. If money is sent with order we will forward free by mail, and if not satisfactory on receipt we will return money on return of Jacket. We are already selling many of them. Entirely different from any other make.

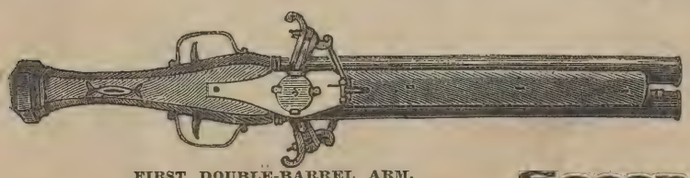
☞*As there are many different makes of Leather Jackets in the market advertised as finest, etc., mostly made here of common skins, we invite those desiring such to send for one of ours, and if not found superior on examination to any other, it can be returned at our expense or we will refund money.*

WILLIAM READ & SONS, 107 Washington St., Boston.
SOLE AMERICAN AGENTS FOR THESE FINEST IMPORTED SKINS.

The Gun and its Development, with Notes on Shooting.

By W. W. GREENER, Author of MODERN BREECHLOADERS, CHOKE-BORE GUNS, Etc.

Finely Illustrated with 500 Wood Engravings.



"The great and increasing desire for information upon Gunnery calls for a work that will deal concisely and exhaustively with the subject. With this intention 'The Gun and its Development' has been produced."—Vide Prospectus.

FIRST DOUBLE-BARREL ARM.

EARLY MATCH-LOCK GUN.

Second Edition.

OPINIONS OF THE PRESS.

"The title sounds comprehensive; and yet it is almost too modest. . . . The author has ransacked the whole range of literature on his subject, and extended his researches into all collections of weapons of any notoriety. Experts and gentlemen will be interested in examining intricacies of lock and action, as clearly set forth as diagrams can do it, whilst more popular with the generality of readers will be the engravings of those quaint old weapons, in which we may detect something more than the germ of almost every modern patent."—*Times, Aug.* 22, 1881.

"Not only sportsmen, but every one interested in firearms, will welcome Mr. Greener's book on the gun. It is a remarkably complete monograph on the subject, and although necessarily dealing a good deal with technical matters, is replete with interest from beginning to end. From whatever point of view it is regarded, the work is full of well-condensed and trustworthy information."—*Westminster Review, July*, 1881.

"Most certainly a valuable addition to the literature of firearms."—*Baily's Magazine, July.* 1881.

"Combines scientific accuracy with historic research. . . . Abounds in useful information. There is an excellent index, which, in a book of this sort, so full of scattered information, is indispensable."—*Home News.*

"Mr. Greener may claim to speak *ex cathedra* on the subject which he here handles, for no gunmaker has met with greater practical success in competitive scientific gun trials. Though Mr. Greener's own line of science lies more particularly in the manufacture of sporting weapons, his work is by no means confined to a disquisition of them; he deals with gunnery *ab ovo*, tracing the gradual development of cannon, musketry and sporting weapons from the days of their earliest use. . . . We have not space to follow Mr. Greener through his careful analysis of modern sporting shotguns; the chapter on gunmaking and the analysis of various locks and breechloading systems may well be read by every sportsman; they will interest and instruct to good purpose."—*Pall Mall Gazette.*

"In literary merit it is above the average of works of the kind, and in matter it is a compendious treatise, not only on the art of gunmaking, but on the history of firearms and on shooting as a sport. . . . All the successive stages in this remarkable development are dealt with at length, and are dwelt with, moreover, in a singularly agreeable and practical way. Next to the completeness with which the whole subject is covered, what strikes one most is the absence of those technicalities which are so puzzling to the ordinary reader."—*Liverpool Mercury.*

"Each subject treated upon seems dealt with carefully and conscientiously, and the vast amount of statistical and other information contained makes it a work that should be on the shelves of every sportsman's library."—*Field.*

"The chapter on 'Curious Arms' is remarkably interesting, the illustrations being admirable. Modern breech-loading rifles are then dealt with, from the needle-gun and Chassepot to those most marvellously accurate and far-reaching weapons, the English and American match-rifles. Bullets and projectiles for military rifles, as well as for those used for sporting purposes, and shotguns are dealt with in a way that cannot fail to interest any one who cares for guns. Whatever Mr. Greener has to say on guns, whether regarding his own or those of others, is to the point, as any sportsman who has any practical knowledge will at once recognize in reading this book."—*Land and Water, July* 2, 1881.

"The book is copiously illustrated throughout, and the various improvements in firearms are treated with care and knowledge. Much useful information is given as to the habits and peculiarities of game."—*Illustrated Sporting and Dramatic News, June* 25, 1881.

"The writer has succeeded in making his meaning clear, even when dealing with intricate technicalities, and presented to the public all information concerning the gun and its accessories in a form that is not merely readable but entertaining."—*Live Stock Journal, May* 18, 1881.

STEAM YACHTS A SPECIALTY. 18 Cranley Garden, London, S. W., England.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

CANOE

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy,

AND

and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his pur-

BOAT

pose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations

BUILDING

being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising

FOR

and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn

AMATEURS.

to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

Poems of the Rod and Gun.

OR,

SPORTS BY FLOOD AND FIELD.

By ISAAC McLELLAN,
(THE POET SPORTSMAN).

Edited, with a Memoir of the Author, by "WILL WILDWOOD" (F. E. POND), Author of "Memoirs of Eminent Sportsmen," Field Editor of *Turf, Field and Farm*, etc.

12mo., handsomely bound in cloth, and illustrated with an Etched Frontispiece by J. F. SABIN.

PRICE, $2.00.

Limited to 1,000 copies, printed from the type. Twenty-five copies will be left unbound and uncut, for illustration, or for those who would prefer to bind the book to suit their own taste. Price $2.

From Turf, Field and Farm, Dec. 4, 1885.

"POEMS OF THE ROD AND GUN."—"When the disastrous Park Row fire of January, 1882, consumed our office and effects, a manuscript volume of poems from the pen of Isaac McLellan, the poet sportsman, vanished in the sea of flames. In compliance with the wishes of sportsmen throughout the country, Mr. McLellan has again collected his poems for publication in book form, and the volume, which is now in press, will be issued before the holidays. We need scarcely add that the 'Poems of the Rod and Gun' will be an admirable holiday book for all lovers of field sport. It is edited by 'Will Wildwood,' and contains a memoir of the author. The volume may be had by addressing Mr. Henry Thorpe, 98 Nassau street, New York."

A Specialty of Hand-Made Bethabara Wood Bait and Fly Rods.

All Fly-Tyers' Requisites, Feathers, Hackles etc. Mountings for Amateur Rod Makers, in sets or separate.

The Celebrated Bethabara Wood in our judgment is the best known material for making Fishing Rods, being stronger than Split Bamboo, and as tough and elastic as tempered steel.

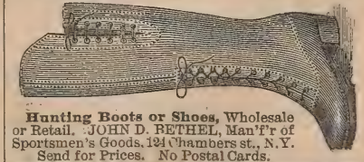
A Handy Tool for Sportsmen.



HENRY'S PATENT

Combination Haft.

It is the only haft or tool holder that carries the tools in the same end of the holder as they are used. No shaking the tools out into the hand to get the one wanted. The same motion that unscrews the instrument in use removes the cap that covers the surplus tools. No wrench to be used. It has a solid handle and can be used with a mallet. The tools are of Jessop's steel and nicely tempered.

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, Shipping and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.
LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

PREJUDICE IS A THIEF,

And will rob you of many good things.

Our cigarettes are as fine as can be produced. They have lately been improved, are not hard nor dry. Will always smoke free and moist. Will not crumble in the pocket nor "catch you in the throat." If you are not opposed to a change and cannot obtain them of your dealer, send to the manufacturers for a sample.

Ammunition, etc.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city or wholesale at our office.

Champ'n Bred English Bulldog Pups
FOR SALE.

By Guillermo (champion Moses—champion Juno), winner 1st and two specials (silver cup), Toronto, 1885, ex my recently imported brindle bitch Patti (champion Toreador—Betsy). Pups are all a rich brindle, strong, healthy and as good as have ever been offered for sale in America. Sire (Guillermo) is a grand young dog with immense skull, bone and substance, very wide chest and under jaw. Dam (Patti) combines the blood of the very cream of the breed, her sire being by champion Monarch ex champion Bellissima, both of which for years have stood at the very head of the breed in England; her dam is by champion Gamester ex Tortoise, by champion Tiger, no better pedigree in the world, and pups promise to be equally as good. Price $35 each. Address THOMAS W. MILLS, 106 Maple Avenue, Montreal, Can. dec17,1t

GOODWIN'S
Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead }	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00

"FOREST AND STREAM SERIES."

DEER HUNTING.

BY JUDGE JOHN DEAN CATON.

BY and by it will be time to hunt antelope and deer. It is always time to read about them. Judge Caton's book on the antelope, elk, deer, moose and caribou of America discusses in a readable way the life history of these animals and the methods of their capture. It is the work of an enthusiastic sportsman who has had a wide experience and has devoted the leisure of years to studying these interesting game animals. The volume is very fully illustrated, and is a perfect storehouse of information and entertainment. The first edition was sold by the Boston publishers at $4. Price $2.50.

WOODCRAFT.

BY "NESSMUK."

A COMPACT pocket handbook of condensed, boiled-down, concise, clear, comprehensive, sensible, practical camp gumption. "Nessmuk" has been "in the woods" in Michigan, New York, Pennsylvania, and South America, and this is a book for outers, wherever they kindle their camp-fire. The author believes in "smoothing it." He has learned how; now he tells others. It is much easier to learn from "Nessmuk" than from Dame Experience. We should not be surprised if "Woodcraft" completely revolutionized the methods of camping out. If you are going to the woods, read "Woodcraft" before you go. It may add to your trip a hundred fold. Price $1.00.

DOG TRAINING.

BY S. T. HAMMOND.

HE was a promising puppy, and when you turned him over to the breaker to be educated, you thought he was bound to make "the best dog in the world." And you'll not soon forget how disappointed and disgusted you were when the dog, the breaker and the big bill—all three turned up together, and you saw that the animal's spirit was broken and it would take a steam calliope to make him mind. Now, this could not have happened if you had been wise enough to buy a copy of Hammond's book, and in your odd leisure moments *train* the dog yourself instead of having him *broken* by some one else. We are selling edition after edition of this book, and it is revolutionizing the system of preparing dogs for work in the field. Price $1.00.

SHORE BIRDS.

A PAMPHLET for those who "gun" along the shore. Tells of: I. Haunts and Habits—Where the bay birds live and what they do at home. II. Range and Migration—Where they go to breed and where to spend the winter. III. A Morning Without the Birds—An episode of shore shooting. IV. Nomenclature—A list of our American species of *Limicolæ*, with a description of each species. V. Localities—Where to go to shoot them. VI. Blinds and Decoys—How to shoot them after you have reached the grounds. 45 pp., paper. Price 15 cents.

ANGLING TALKS.

BY GEORGE DAWSON.

AS a political writer of conceded power, Mr. Dawson wielded a trenchant pen; when he terned from the conflict of parties to the praise of the favorite pastime of "simple wise men," his essays, limpid as the crystal streams, are aglow with the soft summer sunlight and melodious with the songs of birds. When angling was the theme, he wrote from a full heart and in closest sympathy with the scenes and pursuits described. These "Talks" are brimful of manly, wholesome sentiment; there is in them all not a particle of cant. Their sincerity and overflowing spirit at once win the reader, and he perforce shares the author's enthusiasm. The effect is magical, like that of the mimic players in Xenophon's *Memorabilia:* he who reads, if he be an angler, must go a-fishing; and if he be not, straightway then must he become one.—*Extract from Publishers' Preface.* Cloth, price 50 cents.

CANOE "AURORA."

BY DR. C. A. NEIDÉ.

A CHARMINGLY written and always entertaining account of a canoe cruise from Lake George, New York, down the Ohio and Mississippi Rivers to the Gulf of Mexico, by the Secretary of the American Canoe Association. To read the cruise of the "Aurora" is the next best thing to having made it; and the reading is decidedly more pleasant than would have been participation in some of the misadventures related. 216 pp., cloth. Price $1.00.

Any of the above books can be obtained in London of Davies & Co., 1 Finch Lane, Cornhill.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER,** loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tenmons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

Fig. 1.

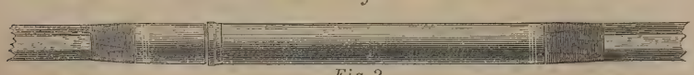

Fig. 2

Conroy's Celebrated Hexagonal Split Bamboo Rods
With Patent Serrated, Waterproof Ferrules and Patent Universal Reel Seat.
Unequalled for Uniformity of Spring, Durability and Beauty of Finish.

The Serrated Ferrule (Pat. July 21, 1885) is beyond all question the best ferrule for split bamboo rods ever invented. All other rod ferrules, whether *split* or otherwise, present a *sharp, unyielding edge* on which the bamboo impinges when the rod is bent under the strain, and which tends to cut or crack the enamel, thereby increasing the liability of breaking the joint at that point. The Serrated Ferrule, *presenting no edge to the bamboo whatever*, entirely overcomes this serious objection. A rod mounted with this ferrule, when under a strain, *is as strong at the ferrules as at any other part.* Fig. 1 shows the male and female ferrules. Fig. 2 shows the same jointed and mounted, the serrated ends being neatly wound with silk and varnished, which excludes all moisture. My **Patent Universal Reel Seat** will *fit perfectly* and *securely hold any reel* from the *smallest* to the *largest size made.* Descriptive circulars mailed free on application.

Send 25 cents for my 130-page Illustrated Catalogue and Handbook for Sportsmen, containing hints and directions for Fishing and Camping. Customers may deduct amount paid for catalogue from first purchase if it amounts to $1.00 or more.

STEAM YACHTS A SPECIALTY. 18 Cranley Garden, London, S. W., England.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever Invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

Or for sale at HENRY C. SQUIRES, 178 Broadway, New York, or L. W. FERDINAND, 267 Federal treet, Boston, Mass.

New York and Eastern YACHT AGENCY,

A. CARY SMITH, 51 West Tenth Street, New York.
BURGESS BROTHERS, 13 Exchange Place, Boston.
Yachts and vessels of all kinds sold, purchased and chartered. Special attention given to building, repairs and alterations. Surveys and inspections made. Designs and estimates furnished. A large number of first-class yachts now for sale.

For Sale.—The English cutter DAISY.

Yachts and Canoes For Sale.

FOR SALE CHEAP.—SCHOONER YACHT, 75ft. over all; good as new; especially well adapted for family cruising, hunting, fishing or scientific purposes. Large staterooms with water closets. Cabin 18ft., with six large berths. Large forecastle and kitchen, ice boxes, complete, new sails by Sawyer, blocks by McMillan. Built by day's work in most substantial manner. Outfit complete. Will exchange for productive city real estate. Address SCHOONER YACHT, this office.

WANTED.—A LARGE SECOND-HAND BOAT (schooner or yacht, about 80 to 100ft. long), interior all through standing room, being for pleasure and comfort, sailing qualities and speed not required, as it will be accompanied by a steam yacht. It must not draw more than 3 to 4ft. of water, as it will be used in small rivers in Canada. ALEXANDER MACDONALD, Fish and Game Club, Montreal, Can.

CANOE AND BOAT BUILDING

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of examining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel built. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

From Turf, Field and Farm, Dec. 4, 1885.

'POEMS OF THE ROD AND GUN."—"When the disastrous Park Row fire of January, 1882, consumed our office and effects, a manuscript volume of poems from the pen of Isaac McLellan, the poet sportsman, vanished in the sea of flames. In compliance with the wishes of sportsmen throughout the country, Mr. McLellan has again collected his poems for publication in book form, and the volume, which is now in press, will be issued before the holidays. We need scarcely add that the 'Poems of the Rod and Gun' will be an admirable holiday book for all lovers of field sport. It is edited by 'Will Wildwood,' and contains a memoir of the author. The volume may be had by addressing Mr. Henry Thorpe, 98 Nassau street, New York."

Sent by mail on receipt of price, on application to

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain. — Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.
LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

PREJUDICE IS A THIEF,

And will rob you of many good things.

Our cigarettes are as fine as can be produced. They have lately been improved, are not hard nor dry. Will always smoke free and moist. Will not crumble in the pocket nor "catch you in the throat." If you are not opposed to a change and cannot obtain them of your dealer, send to the manufacturers for a sample.

GOODWIN'S Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 160 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead }	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

"FOREST AND STREAM SERIES."

DEER HUNTING.

BY JUDGE JOHN DEAN CATON.

BY and by it will be time to hunt antelope and deer. It is always time to read about them. Judge Caton's book on the antelope, elk, deer, moose and caribou of America discusses in a readable way the life history of these animals and the methods of their capture. It is the work of an enthusiastic sportsman who has had a wide experience and has devoted the leisure of years to studying these interesting game animals. The volume is very fully illustrated, and is a perfect storehouse of information and entertainment. The first edition was sold by the Boston publishers at $4. Price $2.50.

WOODCRAFT.

BY "NESSMUK."

A COMPACT pocket handbook of condensed, boiled-down, concise, clear, comprehensive, sensible, practical camp gumption. "Nessmuk" has been "in the woods" in Michigan, New York, Pennsylvania, and South America, and this is a book for outers, wherever they kindle their camp-fire. The author believes in "smoothing it." He has learned how; now he tells others. It is much easier to learn from "Nessmuk" than from Dame Experience. We should not be surprised if "Woodcraft" completely revolutionized the methods of camping out. If you are going to the woods, read "Woodcraft" before you go. It may add to your trip a hundred fold. Price $1.00.

DOG TRAINING.

BY S. T. HAMMOND.

HE was a promising puppy, and when you turned him over to the breaker to be educated, you thought he was bound to make "the best dog in the world." And you'll not soon forget how disappointed and disgusted you were when the dog, the breaker and the big bill—all three turned up together, and you saw that the animal's spirit was broken and it would take a steam calliope to make him mind. Now, this could not have happened if you had been wise enough to buy a copy of Hammond's book, and in your odd leisure moments *train* the dog yourself instead of having him *broken* by some one else. We are selling edition after edition of this book, and it is revolutionizing the system of preparing dogs for work in the field. Price $1.00.

SHORE BIRDS.

A PAMPHLET for those who "gun" along the shore. Tells of: I. Haunts and Habits—Where the bay birds live and what they do at home. II. Range and Migration—Where they go to breed and where to spend the winter. III. A Morning Without the Birds—An episode of shore shooting. IV. Nomenclature—A list of our American species of *Limicolæ*, with a description of each species. V. Localities—Where to go to shoot them. VI. Blinds and Decoys—How to shoot them after you have reached the grounds. 45 pp., paper. Price 15 cents.

ANGLING TALKS.

BY GEORGE DAWSON.

AS a political writer of conceded power, Mr. Dawson wielded a trenchant pen; when he terned from the conflict of parties to the praise of the favorite pastime of "simple wise men," his essays, limpid as the crystal streams, are aglow with the soft summer sunlight and melodious with the songs of birds. When angling was the theme, he wrote from a full heart and in closest sympathy with the scenes and pursuits described. These "Talks" are brimful of manly, wholesome sentiment; there is in them all not a particle of cant. Their sincerity and overflowing spirit at once win the reader, and he perforce shares the author's enthusiasm. The effect is magical, like that of the mimic players in Xenophon's *Memorabilia:* he who reads, if he be an angler, must go a-fishing; and if he be not, straightway then must he become one.—*Extract from Publishers' Preface.* Cloth, price 50 cents.

CANOE "AURORA."

BY DR. C. A. NEIDÉ.

A CHARMINGLY written and always entertaining account of a canoe cruise from Lake George, New York, down the Ohio and Mississippi Rivers to the Gulf of Mexico, by the Secretary of the American Canoe Association. To read the cruise of the "Aurora" is the next best thing to having made it; and the reading is decidedly more pleasant than would have been participation in some of the misadventures related. 216 pp., cloth. Price $1.00.

Any of the above books can be obtained in London of Davies & Co., 1 Finch Lane, Cornhill.

SOLD BY THE TRADE EVERYWHERE.

WEST WATERVILLE, Me.

I sold a Stevens' 14-bore twist single breechloader this morning; they shot it 25 rods and killed a heron dead. If any one can beat that we will try again. C. W. F.

STATE LINE, N. H.

I have a Stevens' single breechloading shotgun, and it can't be beat around here for shooting. I have taken a 4-inch ring 15 rods twice out of three times, that is what I call good shooting for a 14-gauge gun. A. F.

NEW LYME STATION, O.

The Stevens' are the best little rifles I have ever seen. We have been shooting the 22-short 40 rods and doing good shooting. H. L. D.

COLEWARDEN, O.

My Stevens' pocket rifle is a splendid shooter. Has done the best shooting of any gun around these parts for the size of the gun—it is a .22-cal and 15-inch barrel Stevens' rifles and guns which I have bought are shooting as good records as this one, and the pocket rifles cannot be beat for accuracy. Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

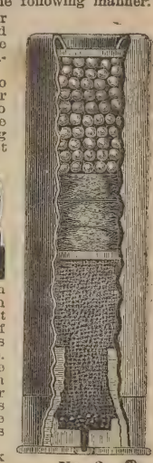
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 15 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**
14 Murray Street, New York.

DOG-SKIN LEATHER JACKETS!

FOR FALL SHOOTING.

Soft and pliable as kid. Not shrunk or injured by water. Entirely waterproof and windproof. A complete protection to sportsmen or any exposed to cold or wet. For horseback riding, driving or walking in cold weather. Worn under the overcoat, they are a handsome garment and much used. A capital jacket for bicycle use, skating and sleighing.

We have just received and now offer the first lot for this season, and the present invoice comprises the finest skins we have imported for years.

☞ WE TAKE THE ENTIRE PRODUCT OF THE MANUFACTURES OF ABOVE FINEST JACKETS, AND THIS MAKE CANNOT BE OBTAINED ELSEWHERE IN THE UNITED STATES.

An early selection is advised. Common qualities of other makes also in stock.

A quality, the very finest skin, - - - - - - $18 00
" not as fine, - - - $8 00, $10 00 and 15 00

Send measurement around chest outside vest. If money is sent with order we will forward free by mail, and if not satisfactory on receipt we will return money on return of Jacket. We are already selling many of them. Entirely different from any other make.

☞ *As there are many different makes of Leather Jackets in the market advertised as finest, etc., mostly made here of common skins, we invite those desiring such to send for one of ours, and if not found superior on examination to any other, it can be returned at our expense or we will refund money.*

WILLIAM READ & SONS, 107 Washington St., Boston.

SOLE AMERICAN AGENTS FOR THESE FINEST IMPORTED SKINS.

ANOTHER TRIUMPH!

W. W. GREENER'S EJECTOR GUN.

Celerity! Comfort! Economy!

Safety! Strength! Symmetry!

This gun has been proved of unequalled safety. R. Rochford-Boyd, Esq., writing to the London *Field*, of Nov. 7, 1885, says: "With reference to the safety of hammerless guns, I agree with you that a safety bolt to be of any value ought to be reliable, and to illustrate my meaning, the following may interest your readers: When grouse driving on the Berwyn Mountains, in Montgomeryshire, some ten days since, and using a Greener ejecting gun, with safety bolt, the rain commenced descending in torrents, and, as a fog seemed imminent, the order was given for home. Instead of following the downward track adopted by the keepers and beaters, I decided on a shorter line of country, and decided to make my way along the face of a steep hill, scantily covered with fern. Placing my gun, which was loaded, at 'safe,' I made the attempt, and got on fairly well for a hundred yards, when I suddenly slipped and began rapidly to descend. After going some forty feet, and finding the pace increasing, I was forced to let my gun go. Slipping and swinging round, presenting its stock and muzzle alternately at my head, it shot rapidly down the hill and disappeared over a cliff, toward which I unwillingly followed. My sensation at that moment I keep to myself. Luckily some friendly ferns checked my pace, and I brought up a few yards from the edge. Regaining my feet, I cautiously proceeded till I got on a sheep track, and succeeded by the aid of a boulder in gaining such a foothold as to enable me to approach the edge and attract the attention of the men, then hundreds of feet below me. Indicating that I had lost my gun, one of them with great difficulty climbed up the face of the hill, and after some time uttered a shout. Then, far below me and embedded half way up the barrels, with the stock sticking straight up, I perceived the gun. A mossy spring between two rocks had received it in its fall; a couple of yards to the right or left, and it would have been smashed to atoms. Twenty minutes later it was restored to me, the barrels plugged up for some inches, but apparently having received no external injury, save a few scratches, and a piece chipped off the heel plate. The trigger guard was, however, a study; bits of fern and rushes were twisted round the triggers, which caught in everything in the downward course; but the safety bolt had done its work, and the cartridges were intact. While I write there hangs above me an old and valued servant, a Greener gun, with rebounding locks. Nearly 100,000 shots have been fired out of that gun; had it, however, been with me on the hills that day, a different sequel might have been told. I always considered hammer guns with rebounding locks required care, not only in crossing fences and in covert, and from the liability to explode when dropped, but from the tendency of the hammers to catch in buttonholes and watch chains, as has frequently happened to me. Sportsmen have every reason to be thankful that science has invented such a boon as hammerless guns with reliable safety bolts—in my opinion the safest and pleasantest guns any one can desire—provided gentlemen recognize the fact that a cheap gun on that principle is one of the most dangerous things out, and, when they decide to go in for a hammerless gun, select a first-class gunmaker for the purpose."

Several splendid specimens of this Ejector Gun of finest finish and workmanship and at moderate prices to be seen at

MANUFACTURER, IMPORTER, WHOLESALE AND RETAIL DEALER IN

Fine Fishing Tackle and Camping Goods.

65 Fulton Street, New York.

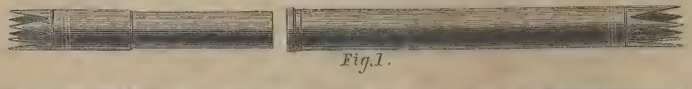

Fig. 1.

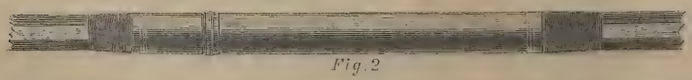

Fig. 2

Conroy's Celebrated Hexagonal Split Bamboo Rods

With Patent Serrated, Waterproof Ferrules and Patent Universal Reel Seat.

Unequalled for Uniformity of Spring, Durability and Beauty of Finish.

The Serrated Ferrule (Pat. July 21, 1885) is beyond all question the best ferrule for split bamboo rods ever invented. All other rod ferrules, whether *split* or otherwise, present a *sharp, unyielding edge* on which the bamboo impinges when the rod is bent under a strain, and which tends to cut or crack the enamel, thereby increasing the liability of breaking the joint at that point. The Serrated Ferrule, *presenting no edge to the bamboo whatever*, entirely overcomes this serious objection. A rod mounted with this ferrule, when under a strain, *is as strong at the ferrules as at any other part.* Fig. 1 shows the male and female ferrules. Fig. 2 shows the same joined and mounted, the serrated ends being neatly wound with silk and varnished, which excludes all moisture. My **Patent Universal Reel Seat** will *fit perfectly* and *securely hold any reel* from the *smallest* to the *largest size made.* Descriptive circular mailed free on application.

Send 25 cents for my 130-page Illustrated Catalogue and Handbook for Sportsmen, containing hints and directions for Fishing and Camping. Customers may deduct amount paid for catalogue from first purchase if it amounts to $1.00 or more.

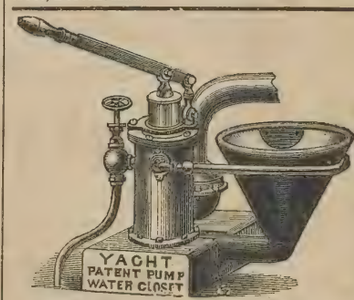
Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.



The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

H. C. CHESTER, Woods Holl, Mass.

For Sale.—The English cutter DAISY.

CANOE AND BOAT BUILDING

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain. — Nos. 1 (cosrse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 (fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, Shipping and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.
LONDON: DAVIES & Co., 1 Finch Lane, Cornhill.

PREJUDICE IS A THIEF,

And will rob you of many good things.

Our cigarettes are as fine as can be produced. They have lately been improved, are not hard nor dry. Will always smoke free and moist. Will not crumble in the pocket nor "catch you in the throat." If you are not opposed to a change and cannot obtain them of your dealer, send to the manufacturers for a sample.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

The IDEAL KENNEL is a private kennel, conducted for pleasure and not for profit alone, and it is purposed to breed only pure blooded COCKER SPANIELS, from the best of stock regardless of expense. All puppies purchased from this kennel possess the required points of merit and beauty, and only strong and healthy ones are ever sold. Our stock is small and compactly built, bred to the standard of the American Spaniel Association, which is *the only* recognized authority. Our patrons receive with every purchase a correct printed pedigree. Several fine stud dogs attached to kennel. Fees reasonable.

Sale of Foxhounds.

One of the oldest and most celebrated fox hunting clubs in America has placed in our hands for immediate sale over fifty of their hounds, both broken dogs and bitches and pups of both sexes.

As prices will be merely nominal, this is an unusual opportunity to secure the best stock for practical fox hunting in the world. The only reason for disposing of the hounds is that the pack contains too many. This is the first time in the history of the club that any of their stock has been offered for sale.

For descriptive price list address,

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

JUST OUT!

Marlin Rifle with Pistol Grip.

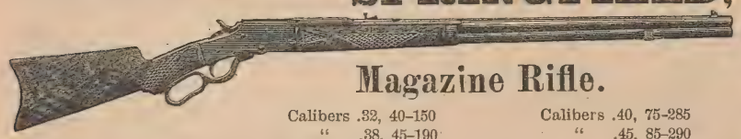
The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 285 grains lead }	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:



Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

Unequalled for Ease of Operation, Safety, Accuracy, Penetration, Style, Workmanship and Rapidity of fire. We guarantee our arms to be as represented and first-class in every particular. Send for Circular and Price List.

"FOREST AND STREAM SERIES."

DEER HUNTING.

BY JUDGE JOHN DEAN CATON.

BY and by it will be time to hunt antelope and deer. It is always time to read about them. Judge Caton's book on the antelope, elk, deer, moose and caribou of America discusses in a readable way the life history of these animals and the methods of their capture. It is the work of an enthusiastic sportsman who has had a wide experience and has devoted the leisure of years to studying these interesting game animals. The volume is very fully illustrated, and is a perfect storehouse of information and entertainment. The first edition was sold by the Boston publishers at $4. Price $2.50.

WOODCRAFT.

BY "NESSMUK."

A COMPACT pocket handbook of condensed, boiled-down, concise, clear, comprehensive, sensible, practical camp gumption. "Nessmuk" has been "in the woods" in Michigan, New York, Pennsylvania, and South America, and this is a book for outers, wherever they kindle their camp-fire. The author believes in "smoothing it." He has learned how; now he tells others. It is much easier to learn from "Nessmuk" than from Dame Experience. We should not be surprised if "Woodcraft" completely revolutionized the methods of camping out. If you are going to the woods, read "Woodcraft" before you go. It may add to your trip a hundred fold. Price $1.00.

DOG TRAINING.

BY S. T. HAMMOND.

HE was a promising puppy, and when you turned him over to the breaker to be educated, you thought he was bound to make "the best dog in the world." And you'll not soon forget how disappointed and disgusted you were when the dog, the breaker and the big bill—all three turned up together, and you saw that the animal's spirit was broken and it would take a steam calliope to make him mind. Now, this could not have happened if you had been wise enough to buy a copy of Hammond's book, and in your odd leisure moments *train* the dog yourself instead of having him *broken* by some one else. We are selling edition after edition of this book, and it is revolutionizing the system of preparing dogs for work in the field. Price $1.00.

SHORE BIRDS.

A PAMPHLET for those who "gun" along the shore. Tells of: I. Haunts and Habits—Where the bay birds live and what they do at home. II. Range and Migration—Where they go to breed and where to spend the winter. III. A Morning Without the Birds—An episode of shore shooting. IV. Nomenclature—A list of our American species of *Limicolæ*, with a description of each species. V. Localities—Where to go to shoot them. VI. Blinds and Decoys—How to shoot them after you have reached the grounds. 45 pp., paper. Price 15 cents.

ANGLING TALKS.

BY GEORGE DAWSON.

AS a political writer of conceded power, Mr. Dawson wielded a trenchant pen; when he terned from the conflict of parties to the praise of the favorite pastime of "simple wise men," his essays, limpid as the crystal streams, are aglow with the soft summer sunlight and melodious with the songs of birds. When angling was the theme, he wrote from a full heart and in closest sympathy with the scenes and pursuits described. These "Talks" are brimful of manly, wholesome sentiment; there is in them all not a particle of cant. Their sincerity and overflowing spirit at once win the reader, and he perforce shares the author's enthusiasm. The effect is magical, like that of the mimic players in Xenophon's *Memorabilia:* he who reads, if he be an angler, must go a-fishing; and if he be not, straightway then must he become one.—*Extract from Publishers' Preface.* Cloth, price 50 cents.

CANOE "AURORA."

BY DR. C. A. NEIDÉ.

A CHARMINGLY written and always entertaining account of a canoe cruise from Lake George, New York, down the Ohio and Mississippi Rivers to the Gulf of Mexico, by the Secretary of the American Canoe Association. To read the cruise of the "Aurora" is the next best thing to having made it; and the reading is decidedly more pleasant than would have been participation in some of the misadventures related. 216 pp., cloth. Price $1.00.

Any of the above books can be obtained in London of Davies & Co., 1 Finch Lane, Cornhill.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

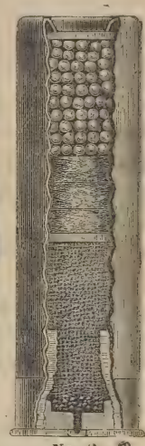
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tennons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed throughout, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

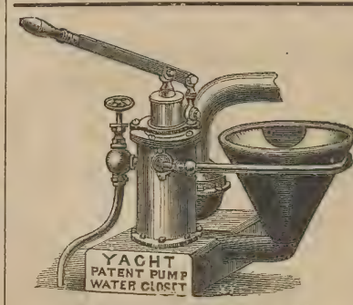
STEAM YACHTS A SPECIALTY. 18 Cranley Garden, London, S. W., England.

Chester Folding Anchor.

The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.

It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.



The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.

When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.

Orders and communications regarding it should be addressed to

For Sale.—The English cutter DAISY.

CANOE

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy,

AND

and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his pur-

BOAT

pose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires, following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations

BUILDING

being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising

FOR

and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn

AMATEURS.

to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain.—Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.
LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

PREJUDICE IS A THIEF,

And will rob you of many good things.

Our cigarettes are as fine as can be produced. They have lately been improved, are not hard nor dry. Will always smoke free and moist. Will not crumble in the pocket nor "catch you in the throat." If you are not opposed to a change and cannot obtain them of your dealer, send to the manufacturers for a sample.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting"

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ¼ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Sale of Foxhounds.

One of the oldest and most celebrated fox hunting clubs in America has placed in our hands for immediate sale over fifty of their hounds, both broken dogs and bitches and pups of both sexes.

As prices will be merely nominal, this is an unusual opportunity to secure the best stock for practical fox hunting in the world. The only reason for disposing of the hounds is that the pack contains too many. This is the first time in the history of the club that any of their stock has been offered for sale.

FOX-TERRIERS.

The Clovernook Kennel offer the following high-bred terriers, by

SPICE, winner of over fifty cups and specials in England, including F. T. C.'s grand challenge in 1881, 1883 and 1884, at Oxford, Preston and Manchester. Also winner of A. F. T. C.'s cup for best terrier, ditto silver pitcher, ditto silver pitcher with Delta for best pair at W. K. C.'s show, N. Y., 1885, and

SCARSDALE, winner in 1884 of 2d, W. K. C., N. Y.; 1st, Chicago; champion, Montreal; 2d, Philadelphia; 2d, non-sporting show in 1885; 2d, New Haven; 2d, W. K. C., N. Y.; 1st, Cincinnati, and 2d, Philadelphia spring and autumn shows. Sire of Scarsdale Joe, winner in puppy classes in 1885 of 1st, New Haven and special; 1st, Boston, and 2d, W. K. C., N. Y.

One dog, black and white, whelped July 5, 1885, by Spice ex Prisrill (dam of Scarsdale Joe), by Joker ex Warren Bessie. Price $30.

One dog, black and white, litter brother to above. Price $30.

One dog, black and white, whelped July 8, 1885, by Spice ex Clover Blossom, by Dynamite Joe (by Belgrave Joe) ex Puzzle (by Buff). Price $50.

One dog, black and white, whelped July 19, by Scarsdale ex Delta, by Belgrave Joe ex Rank (by Rasper). Price $25.

One dog, white and black spots, litter brother to above. Price $25.

One bitch, black and white, litter sister to above. Price $15.

Spice was undeniably the best fox-terrier of his day.

Scarsdale's blood is valuable as an out cross from Belvoir blood and for handsome markings.

CLOVERNOOK KENNEL,

Annual Subscription, 13 Shillings.

OFFICES: 139 and 140 Fleet street, E. C., London.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and carefu experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1 The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

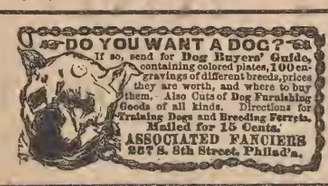
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now p. ady to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,
NEWBURYPORT, MASS.

Stratfield Kennels.

JAS. SEELEY. GEO. D. MACDOUGALL.



Dogs of all breeds boarded and conditioned for shows. Setters and pointers trained for field trials or private use. JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 385 grains lead }	24-inch. $23 00	28-inch. $25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00	Our new Catalogue is just out. Send for it.

"FOREST AND STREAM SERIES."

DEER HUNTING.

BY JUDGE JOHN DEAN CATON.

BY and by it will be time to hunt antelope and deer. It is always time to read about them. Judge Caton's book on the antelope, elk, deer, moose and caribou of America discusses in a readable way the life history of these animals and the methods of their capture. It is the work of an enthusiastic sportsman who has had a wide experience and has devoted the leisure of years to studying these interesting game animals. The volume is very fully illustrated, and is a perfect storehouse of information and entertainment. The first edition was sold by the Boston publishers at $4. Price $2.50.

WOODCRAFT.

BY "NESSMUK."

A COMPACT pocket handbook of condensed, boiled-down, concise, clear, comprehensive, sensible, practical camp gumption. "Nessmuk" has been "in the woods" in Michigan, New York, Pennsylvania, and South America, and this is a book for outers, wherever they kindle their camp-fire. The author believes in "smoothing it." He has learned how; now he tells others. It is much easier to learn from "Nessmuk" than from Dame Experience. We should not be surprised if "Woodcraft" completely revolutionized the methods of camping out. If you are going to the woods, read "Woodcraft" before you go. It may add to your trip a hundred fold. Price $1.00.

DOG TRAINING.

BY S. T. HAMMOND.

HE was a promising puppy, and when you turned him over to the breaker to be educated, you thought he was bound to make "the best dog in the world." And you'll not soon forget how disappointed and disgusted you were when the dog, the breaker and the big bill—all three turned up together, and you saw that the animal's spirit was broken and it would take a steam calliope to make him mind. Now, this could not have happened if you had been wise enough to buy a copy of Hammond's book, and in your odd leisure moments *train* the dog yourself instead of having him *broken* by some one else. We are selling edition after edition of this book, and it is revolutionizing the system of preparing dogs for work in the field. Price $1.00.

SHORE BIRDS.

A PAMPHLET for those who "gun" along the shore. Tells of: I. Haunts and Habits—Where the bay birds live and what they do at home. II. Range and Migration—Where they go to breed and where to spend the winter. III. A Morning Without the Birds—An episode of shore shooting. IV. Nomenclature—A list of our American species of *Limicolæ*, with a description of each species. V. Localities—Where to go to shoot them. VI. Blinds and Decoys—How to shoot them after you have reached the grounds. 45 pp., paper. Price 15 cents.

ANGLING TALKS.

BY GEORGE DAWSON.

AS a political writer of conceded power, Mr. Dawson wielded a trenchant pen; when he terned from the conflict of parties to the praise of the favorite pastime of "simple wise men," his essays, limpid as the crystal streams, are aglow with the soft summer sunlight and melodious with the songs of birds. When angling was the theme, he wrote from a full heart and in closest sympathy with the scenes and pursuits described. These "Talks" are brimful of manly, wholesome sentiment; there is in them all not a particle of cant. Their sincerity and overflowing spirit at once win the reader, and he perforce shares the author's enthusiasm. The effect is magical, like that of the mimic players in Xenophon's *Memorabilia:* he who reads, if he be an angler, must go a-fishing; and if he be not, straightway then must he become one.—*Extract from Publishers' Preface.* Cloth, price 50 cents.

CANOE "AURORA."

BY DR. C. A. NEIDÉ.

A CHARMINGLY written and always entertaining account of a canoe cruise from Lake George, New York, down the Ohio and Mississippi Rivers to the Gulf of Mexico, by the Secretary of the American Canoe Association. To read the cruise of the "Aurora" is the next best thing to having made it; and the reading is decidedly more pleasant than would have been participation in some of the misadventures related. 216 pp., cloth. Price $1.00.

Any of the above books can be obtained in London of Davies & Co., 1 Finch Lane, Cornhill.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

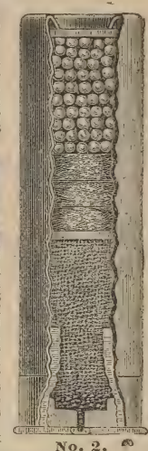
At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER,** loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.



In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

DOG-SKIN LEATHER JACKETS!

FOR FALL SHOOTING.

Soft and pliable as kid. Not shrunk or injured by water. Entirely waterproof and windproof. A complete protection to sportsmen or any exposed to cold or wet. For horseback riding, driving or walking in cold weather. Worn under the overcoat, they are a handsome garment and much used. A capital jacket for bicycle use, skating and sleighing.

We have just received and now offer the first lot for this season, and the present invoice comprises the finest skins we have imported for years.

☞WE TAKE THE ENTIRE PRODUCT OF THE MANUFACTURES OF ABOVE FINEST JACKETS, AND THIS MAKE CANNOT BE OBTAINED ELSEWHERE IN THE UNITED STATES.

An early selection is advised. Common qualities of other makes also in stock.

A quality, the very finest skin, - - - - - - $18 00
" not as fine, - - - $8 00, $10 00 and 15 00

Send measurement around chest outside vest. If money is sent with order we will forward free by mail, and if not satisfactory on receipt we will return money on return of Jacket. We are already selling many of them. Entirely different from any other make.

☞*As there are many different makes of Leather Jackets in the market advertised as finest, etc., mostly made here of common skins, we invite those desiring such to send for one of ours, and if not found superior on examination to any other, it can be returned at our expense or we will refund money.*

ANOTHER TRIUMPH!

W. W. GREENER'S EJECTOR GUN.

Celerity!
Comfort!
Economy!

Safety! Strength!
Symmetry!

This gun has been proved of unequalled safety. R. Rochford-Boyd, Esq., writing to the London *Field*, of Nov. 7, 1885, says: "With reference to the safety of hammerless guns, I agree with you that a safety bolt to be of any value ought to be reliable, and to illustrate my meaning, the following may interest your readers: When grouse driving on the Berwyn Mountains, in Montgomeryshire, some ten days since, and using a Greener ejecting gun, with safety bolt, the rain commenced descending in torrents, and, as a fog seemed imminent, the order was given for home. Instead of following the downward track adopted by the keepers and beaters, I decided on a shorter line of country, and decided to make my way along the face of a steep hill, scantily covered with fern. Placing my gun, which was loaded, at 'safe,' I made the attempt, and got on fairly well for a hundred yards, when I suddenly slipped and began rapidly to descend. After going some forty feet, and finding the pace increasing, I was forced to let my gun go. Slipping and swinging round, presenting its stock and muzzle alternately at my head, it shot rapidly down the hill and disappeared over a cliff, toward which I unwillingly followed. My sensation at that moment I keep to myself. Luckily some friendly ferns checked my pace, and I brought up a few yards from the edge. Regaining my feet, I cautiously proceeded till I got on a sheep track, and succeeded by the aid of a boulder in gaining such a foothold as to enable me to approach the edge and attract the attention of the men, then hundreds of feet below me. Indicating that I had lost my gun, one of them with great difficulty climbed up the face of the hill, and after some time uttered a shout. Then, far below me and embedded half way up the barrels, with the stock sticking straight up, I perceived the gun. A mossy spring between two rocks had received it in its fall; a couple of yards to the right or left, and it would have been smashed to atoms. Twenty minutes later it was restored to me, the barrels plugged up for some inches, but apparently having received no external injury, save a few scratches, and a piece chipped off the heel plate. The trigger guard was, however, a study; bits of fern and rushes were twisted round the triggers, which caught in everything in the downward course; but the safety bolt had done its work, and the cartridges were intact. While I write there hangs above me an old and valued servant, a Greener gun, with rebounding locks. Nearly 100,000 shots have been fired out of that gun; had it, however, been with me on the hills that day, a different sequel might have been told. I always considered hammer guns with rebounding locks required care, not only in crossing fences and in covert, and from the liability to explode when dropped, but from the tendency of the hammers to catch in buttonholes and watch chains, as has frequently happened to me. Sportsmen have every reason to be thankful that science has invented such a boon as hammerless guns with reliable safety bolts—in my opinion the safest and pleasantest guns any one can desire—provided gentlemen recognize the fact that a cheap gun on that principle is one of the most dangerous things out, and, when they decide to go in for a hammerless gun, select a first-class gun maker for the purpose."

Several splendid specimens of this Ejector Gun of finest finish and workmanship and at moderate prices to be seen at

Chester Folding Anchor.
The Most Simple, Complete and Compact Anchor for Small Craft ever invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.
It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.

The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.
When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.
Orders and communications regarding it should be addressed to

CANOE
AND
BOAT
BUILDING
FOR
AMATEURS.

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy, and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his purpose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain. — Nos. 1 (coarse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb. canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for "Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ½ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 3 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle."

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ½ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

Pictures of the Field.

Photographs and Phototypes of the Pictures by John M. Tracy.

MR. JOHN M. TRACY has won a reputation for his faithful portraits of dogs and his beautiful and sympathetic delineations of the incidents of the field. All the poetry and grace of a pointer or setter in the stubble have been caught with the eye of the artist and the enthusiasm of the sportsman, and transferred to the living canvas with a skill which has given Mr. Tracy a name above that of any other American artist in the same field.

We have for sale a series of admirable photographs of these paintings, and a set of phototype (photographs in printer's ink), which preserve with admirable fidelity the spirit of the originals. The photographs are 20x26 inches, the phototypes 15x20 inches. They are as follows:

PHOTOGRAPHS.

Annual Subscription, 13 Shillings.

OFFICES: 139 and 140 Fleet street, E. C., London.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and carefu experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1. The large proportion of finely ground meat contains.
2. That only perfectly fresh beef and sound flour and meal are used.
3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer,
NEWBURYPORT, MASS.

Opens Dec. 16, 1885.

JUST OUT!

Marlin Rifle with Pistol Grip.

The Pistol grip on the Marlin not only adds to the appearance of the rifle, but is *really* serviceable in making the weapon handle better. Above cut shows a selected and checkered stock having the grip, with case hardened and engraved frame.

PRICE LIST OF MARLIN RIFLES:

	24-inch.	28-inch.
.32 caliber, 40 grains powder, 165 grains lead	$22 00	$24 00
.38 caliber, 55 grains powder, 255 grains lead	22 00	24 00
.40-caliber, 60 grains powder, 260 grains lead	23 00	25 00
.45 caliber { 70 grains powder, 405 grains lead / 85 grains powder, 385 grains lead }	$23 00	$25 00

These charges can be reduced to suit the sportsman's wants, as the Marlin is now constructed to take any cartridges, not exceeding the extreme length of a .45 Government, *no matter how much shorter they may be.*

EXTRAS:

Double Set Triggers	$5 00	Case Hardened Receiver	$1 00
Engraving	5 00	Pistol Grip, Plain Wood	5 00
Selected Walnut Stock and Fore Arm	5 00	Pistol Grip, Selected and Checkered	15 00
Checkering Stock and Fore Arm	5 00		

Our new Catalogue is just out. Send for it.

SMALL YACHTS.

Their Design and Construction, Exemplified by the Ruling Types of Modern Practice.

By C. P. KUNHARDT.

THE FOREST AND STREAM PUBLISHING COMPANY takes pleasure in announcing the publication of a magnificent quarto volume, bearing the above title. This book covers the eld of Small Yachts, with special regard to their design, construction, equipment and keep. The opening chapters are devoted to a consideration of the model and the draft, their relations to one another, and the purposes which they subserve. Full directions are given for producing the plans of a yacht with reference to the chief points in design, and the method of taking off the lines of a boat already built is likewise described in detail.

All elements entering into design, such as Resistance, Stability, Balance of Rig, Handiness, Displacement, etc., are dealt with in separate chapters. The rules necessary for the mathematical computations, and a review of theory and practice close the first division of the book.

The second portion comprises the description of the Plates, covering the whole range of type in small yachts, from the shoal catboat and American centerboard sloop to examples of the narrowest and deepest British cutter yet built. These yachts have their lines, build and fittings depicted in the Plates, which are drawn to scale. With their aid and the specifications presented, the reader is placed in possession of accurate information concerning the mould, accommodations, rig and characteristics of all styles of yachts which have received favorable recognition. Sporting boats, combination row and sailboats, and various examples of special form are introduced.

The third division offers a comprehensive review of single-hand sailing, to which small yachts are especially adapted. Directions are given as a guide in selection of type and sail plan, and subsequent equipment and proper management.

The iron work of yachts, their gear, yawls, stearing apparatus, boat building and much other closely related matter is entered upon. The new International Rules of the Road, Signal Service, and a bibliography appear in the Appendix.

The work is profusely and handsomely illustrated with 150 illustrations inserted in the text, besides the sixty-three plates.

A folio volume (size of page 14½x12½ inches), printed on paper specially manufactured for it, and with great beauty of execution and finish in every detail, making a volume vastly superior to any other work of the kind ever published. Pages 370, with 136 plate pages additional, or a total of more than 500.

Now Ready. Price, postpaid, $7.00.

CANOE HANDLING.

By C. B. VAUX ("DOT").

A complete manual for the management of a canoe. The author begins at the very beginning, describes and explains the rudiments in the simplest and plainest way possible. Everything is made intelligible for beginners; and besides this A B C teaching there are so many hints and wrinkles that the oldest canoeist afloat will find pleasure and profit in the study of these. The book is complete and concise—no useless duffle between its covers. The subjects treated are the choice of a canoe, paddling, sailing, care of the canoe, recipes and rules. The text is further elucidated by numerous practical drawings, and the beauty of the book is enhanced by the many ornamental vignettes. Pages 168; uniform with "Canoe Building." Price, postpaid, $1.00.

LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 12 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**
14 Murray Street, New York.

AGENTS American Wood Powder Co., American Clay Bird Co., Lefever Arms Co., Parker Bros.' Guns, L. C. Smith's Gun, J. P. Clabrough & Bros.' Guns.

CRUTTENDEN FLY ROD.

It has Nickle Plated Patented Solid Reel Plate which prevents Reel getting fast by swelling of wood, if rod should get wet. Full Nickle Plated, Patented Ferrules, allowing the wood to be used the full size, thus preventing rod breaking where wood and ferrules join. Metal Tenmons which prevent joints getting stuck together. The entire rod is made from the best selected lancewood, left natural color, varnished and polished. This makes a handsome finish, and is less liable to be seen by the wary fish than a dark rod. The butt is wound with cane and silk in an artistic manner, which not only gives it the appearance, but also the feeling of the high-priced rods. The complete rod has a look of beauty, which is a joy to every fisherman's heart while using it. It is well and neatly ringed through out, and has an extra winding between each ring. There has been so many rods made of an inferior quality that resemble this, that all from this date will have stamped on reel plate "W. H. Cruttenden," and none genuine unless so stamped. Length, 10½ft; weight, 9½ to 10ozs. All the parts are interchangeable, and if, by accident, any part should get broken, can send duplicate without rod being returned. The best made rod in the United States, and we will guarantee it in every way. With short tip it makes an excellent bass rod. Sent to any part of U. S. in case, 1 bass, 1 trout tip, prepaid, for $5.35; bass tips, $1.00; trout tips, $1.25. General agent for Card's Rotating Trap. Guns, Pistols and Fishing Tackle. Gunmaking and repairing by J. W. Livingstone. New Illustrated Catalogue in colors now ready, and sent free on application.

PARISHVILLE, ST. LAWRENCE CO., N. Y.

Chester Folding Anchor.
The Most Simple, Complete and Compact Anchor for Small Craft ever Invented.

Experiments have shown that it is much superior in holding power to the ordinary Anchor of the same weight, but its great advantage consists in its compactness and the small space it occupies when not in use, as it takes up less than one-fourth of the space of an ordinary Anchor of the same weight. It has only to be seen to be appreciated.
It is invaluable for small craft where economy of space is a desideratum being especially adapted to the wants of Canoes, Rowboats, Sailboats, Yachts, Steam Launches etc.
The Anchor has a straight, stockless shank, to the lower end of which are attached the four arms or flukes; these arms have a flat inner surface extending nearly to the point, giving the maximum holding power. On the shank is a ring which slides down over the points of the arms, to hold them in position when folded, where it is retained by a pin.
When it is desired to unfold the anchor, the pin is removed, the ring is raised to clear the arms, and the latter unfold and spread apart, dropping to the position indicated in Fig. 1, the ring slides down the shank until it brings up against the unfolded arms, and at a point in the shank just above the top of the ring when in this position is a second hole, in which the locking pin is inserted, so as to hold the ring down upon the arms, which are thus held securely open.
Orders and communications regarding it should be addressed to

WHITNEY ARMS CO., New Haven, Conn.

CANOE

THE FOREST AND STREAM began a year ago the publication of a series of papers on canoe construction, by Mr. W. P. Stephens, of the New York C. C., widely known as an expert on canoe design and building. These papers, having appeared through the year in our columns, have since been rewritten, and with numerous additions are now published in a handsome volume under the title of "Canoe and Boat Building for Amateurs." Mr. Stephens is peculiarly fitted for the preparation of such a work, beginning as an amateur, and having after a long experience of the difficulties attending a learner, taken a prominent place among canoe builders, due both to the model and workmanship of his canoes. Realizing fully the difficulty of explaining to a novice an art in itself far from easy,

AND

and with which he is entirely unfamiliar, the book begins with a description of the various classes of canoes in general use, with their main features and dimensions, and definitions of the terms used in connection with them. Numerous examples of canoes are given, and in connection with them, such plain instructions in designing as will enable the beginner to select intelligently the proper craft for his pur-

BOAT

pose, and to plan her dimensions, details and fittings. To this end designs of all classes of canoes are given, with full dimensions and details. The object has been not merely to enable the tyro to build one boat as described, but to teach him the principles of designing and building in such a way that he may construct such a craft as he desires. Following the chapters on designing, the construction of a canoe is taken up in detail, the tools and appliances being first clearly described, as well as the various materials, after which follows the actual work of building. Every operation is taken up in order, from the selection of the keel to the varnishing of the finished boat, and illustrated with numerous diagrams.

A chapter on sails describes all the varieties in use by canoeists, down to the new Mohican settee, with directions for making, rigging and measuring them, while the method of proportioning the sails to the boat is clearly explained, all the calculations

BUILDING

being worked out in detail. The many minor points of a canoe, paddles, steering gears, rudders, aprons, and camp outfit are also described at length, while a chapter is devoted to canvas canoes.

The subject of boat building is fully treated, a rowboat of the usual construction being taken as an example, and described in all its parts in such a manner as to make clear the principles involved, and their application to any form of boat, either lapstreak or carvel build. Each of the numerous technical terms belonging to the subject is defined clearly when it first occurs, and as the index is full and complete, the book is in itself a glossary.

In addition to the numerous diagrams in the body of the work, twenty-four large plates are printed on bond paper, containing the working drawings of canoes for paddling, sailing, cruising

FOR

and racing, with their sail plans, rowing sailing boats, large canoe yawls, and various boats for special purposes, such as gunning boats, yacht boats, and the widely known sneakbox.

The canoe yawl, a boat between a canoe and a yacht, is illustrated by examples of various craft from 17 to 20ft. long, and suitable for a crew of two or three on a cruise. This class of boat, while little known among us as yet, is admirably fitted for cruising, and will meet the wants of many who object to a canoe as being too small, and yet desire a boat with the same excellent qualities. The boats and canoes illustrated are in all cases among the best of their class, the list of canoes including English, Scotch and American craft, and are all drawn

AMATEURS.

to scale, so as to be available as working drawings. The plates, for convenience in using, are placed loose in a tough manilla envelope and accompany the book.

Pp. 168, with 24 plates of working drawings. Price $1.50. Address,

GUNPOWDER!

Dupont's Rifle, Sporting and Blasting Powder.

THE MOST POPULAR POWDER IN USE!

DUPONT'S GUNPOWDER MILLS, established in 1802, have maintained their great reputation for eighty-three years. Manufacture the following celebrated brands of powder:

Dupont's Crystal Grain.—Nos. 1 (cosrse) to 4 (fine) unequaled in strength, quickness and cleanliness; adapted for glass-ball and pigeon shooting. Packed in 1 lb canisters.

Dupont's Eagle Ducking.—Nos. 1 (coarse) to 3 fine); burns slowly, strong and very clean; great penetration, with a close pattern; adapted for glass-ball, pigeon, duck and other shooting, with either muzzle or breach loaders. Packed in 1 lb. and 5 lb. canisters and 6¼ and 12½ lb. kegs.

Dupont's Choke Bore.—Specially adapted for Choke Bore" Guns, and particularly for prairie and upland shooting. Burns slowly, strong and moist; does not cake or burn on the barrels, gives both a good penetration and a close pattern; will be found well adapted for glass-ball and pigeon shooting. Made of two sizes, only No. 7 and No. 5, No. 7 being the coarsest Packed in 6¼ lb. kegs and 1 lb. canisters

Dupont's Eagle Rifle.—A quick, strong and clean powder, of very fine grain, for pistol shooting. Packed in 1 lb. canisters and 6¼ lb. kegs.

Dupont's Rifle Fg. "Sea-Shooting."—FFg. and FFFg. The Fg. for long-range rifle shooting, the FFg. and FFFg. for general use, burning strong and moist. Packed in ⅛ lb., 1 lb. and 5 lb. canisters, 6¼, 12½ and 25 lb. kegs. Fg. coarse, FFFg. fine.

Dupont's Sporting, Mining, SHIPPING and Blasting Powders of all sizes and descriptions. **Special Grades for Export.** Also Rifle, Cartridge, Musket, Cannon, Mortar, Mammoth, Hexagonal, Cubical and Pellet Powder U. S. Government Standard.

Powder manufactured to order of any required grain or proof.

Agencies in all the cities and principal towns throughout the United States.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 96 pages. Price $1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 39 Park Row.
LONDON: DAVIES & CO., 1 Finch Lane, Cornhill.

AIR GUNS

PRICES: $6, $9, $10, $12, $15, $18 and $20.

FOR PROFIT AND PLEASURE.

The gun shown above is our **NEW COMBINATION AIR GUN.** This is the most complete arrangement ever offered. It combines two pieces in one (a perfect Rifle to shoot a regular .22-100 cartridge, and a superior Air Gun to shoot darts, slugs and shot). It can be instantly changed from one to the other, and has a steel barrel rifled. All the parts extra heavy, and so constructed of best material to stand continuous service, making the most durable gun manufactured, and by far the most practical long-range Air Gun ever made for gallery or field. WE MANUFACTURE A FULL ASSORTMENT OF AIR GUNS SUITED TO MEET THE TASTES AND WANTS OF EVERY ONE. The quality of our goods has established them in all the principal markets of the world, and their superiority has induced the United States Navy to place them, with success, on their school ships. ☞Illustrated price lists sent upon application. Address

H. M. QUACKENBUSH, Manufacturer, Herkimer, N. Y., U. S. A.

NOTE.—We stamp our name plainly on each gun we make. Send for catalogue B.

PREJUDICE IS A THIEF,

And will rob you of many good things.

Our cigarettes are as fine as can be produced. They have lately been improved, are not hard nor dry. Will always smoke free and moist. Will not crumble in the pocket nor "catch you in the throat." If you are not opposed to a change and cannot obtain them of your dealer, send to the manufacturers for a sample,

Enclose Three Red Stamps. **WM. S. KIMBALL & CO., Rochester, N. Y.**

Ammunition, etc.

The Hazard Powder Co.

MANUFACTURERS OF

Gunpowder

Hazard's "Electric Powder."

Nos. 1 (fine) to 7 (coarse). Unsurpassed in point of strength and cleanliness. Packed in square canisters of one pound *only*.

Hazard's "American Sporting."

Nos. 1 (fine) to 2 (coarse). In 1 lb. canisters and 6¼ lb. kegs. A fine grain, quick and clean, for upland prairie shooting. Well adapted to short guns.

Hazard's "Duck Shooting."

Nos. 1 (fine) to 6 (coarse). In 1 and 5 lb. canisters and 6¼ and 12½ lb. kegs. Burns *slowly*, and very clean, shooting remarkably close and with *great penetration*. For field, forest or water shooting it ranks any other brand and is equally serviceable for muzzle or breechloaders.

Hazard's "Kentucky Rifle,"

FFFG, FFG and "Sea Shooting" FG in kegs of 25, 12½ and 6¼ lbs. and cans of 5lbs. FFFG is also packed in 1 and ⅛ lb. canisters. Burns strong and *moist*. The FFFG and FFG are favorite brands for ordinary sporting and the "Sea Shooting" FG is the standard *Rifle* Powder of the Country.

Superior Mining and Blasting Powder.

GOVERNMENT CANNON and MUSKET POWDER; also, SPECIAL GRADES FOR EXPORT OF ANY REQUIRED GRAIN OR PROOF MANUFACTURED TO ORDER.

The above can be had of dealers, or of the Company's Agents, in every prominent city or wholesale at our office.

Pictures of the Field.

Photographs and Phototypes of the Pictures by John M. Tracy.

MR. JOHN M. TRACY has won a reputation for his faithful portraits of dogs and his beautiful and sympathetic delineations of the incidents of the field All the poetry and grace of a pointer or setter in the stubble have been caught with the eye of the artist and the enthusiasm of the sportsman, and transferred to the living canvas with a skill which has given Mr. Tracy a name above that of any other American artist in the same field.

We have for sale a series of admirable photographs of these paintings, and a set of phototype (photographs in printer's ink), which preserve with admirable fidelity the spirit of the originals. The photographs are 20x20 inches, the phototypes 15x20 inches. They are as follows:

OFFICES: 139 and 140 Fleet street, E. C., London.

GOODWIN'S

Royal Dog Biscuit.

This bread is the result of repeated and careful experiments for my own kennel, but its superior qualities attracted so much attention that I have been persuaded to manufacture for sale. The advantages claimed for it are:

1 The large proportion of finely ground meat contains.

2. That only perfectly fresh beef and sound flour and meal are used.

3. No foreign substance is used to imitate meat.

Finally, it is a nutritious and perfectly wholesome and safe food for dogs of any age or condition of health. The voluntary endorsements and large orders from prominent breeders are its highest recommendations. We are now ready to supply bench shows, kennel clubs, and dog owners in quantities to suit.

D. A. GOODWIN, JR., Sole Manufacturer.

The Celebrated "UNION HILL."

First target represents 10 consecutive shots made by Otto Jaeger, June 10, 1885, at Wheeling, W. Va., 200 yards off hand, with some wind, using a No. 6½ Off-Hand, .32-caliber. It counts 94 on Massachusetts Decimal and 117 on Massachusetts Target. The cut is one-half size.

Second target represents 5 consecutive shots made by J. D. Marks, June 24, 1885, at Springfield, Mass., 200 yards, with rest, using a Union Hill, .32-caliber. The entire five shots are inside of a 1⅝-inch circle. The cut is full size.

This style of Ballard Rifle and the "Off-Hand" are the standard guns for target shooting, carrying off nearly all the prizes. **Send for Catalogue:** **THE MARLIN FIRE ARMS CO., New Haven, Conn.**

SMALL YACHTS.

Their Design and Construction, Exemplified by the Ruling Types of Modern Practice.

By C. P. KUNHARDT.

THE FOREST AND STREAM PUBLISHING COMPANY takes pleasure in announcing the publication of a magnificent quarto volume, bearing the above title. This book covers th eld of Small Yachts, with special regard to their design, construction, equipment and keep. The opening chapters are devoted to a consideration of the model and the draft, thei relations to one another, and the purposes which they subserve. Full directions are given for producing the plans of a yacht with reference to the chief points in design, and the metho of taking off the lines of a boat already built is likewise described in detail.

All elements entering into design, such as Resistance, Stability, Balance of Rig, Handiness, Displacement, etc., are dealt with in separate chapters. The rules necessary for th mathematical computations, and a review of theory and practice close the first division of the book.

The second portion comprises the description of the Plates, covering the whole range of type in small yachts, from the shoal catboat and American centerboard sloop to example of the narrowest and deepest British cutter yet built. These yachts have their lines, build and fittings depicted in the Plates, which are drawn to scale. With their aid and the specif cations presented, the reader is placed in possession of accurate information concerning the mould, accommodations, rig and characteristics of all styles of yachts which have receive favorable recognition. Sporting boats, combination row and sailboats, and various examples of special form are introduced.

The third division offers a comprehensive review of single-hand sailing, to which small yachts are especially adapted. Directions are given as a guide in selection of type and sa plan, and subsequent equipment and proper management.

The iron work of yachts, their gear, yawls, stearing apparatus, boat building and much other closely related matter is entered upon. The new International Rules of the Road Signal Service, and a bibliography appear in the Appendix.

The work is profusely and handsomely illustrated with 150 illustrations inserted in the text, besides the sixty-three plates.

A folio volume (size of page 14½x12½ inches), printed on paper specially manufactured for it, and with great beauty of execution and finish in every detail, making a volum vastly superior to any other work of the kind ever published. Pages 370, with 136 plate pages additional, or a total of more than 500.

Now Ready. Price, postpaid, $7.00.

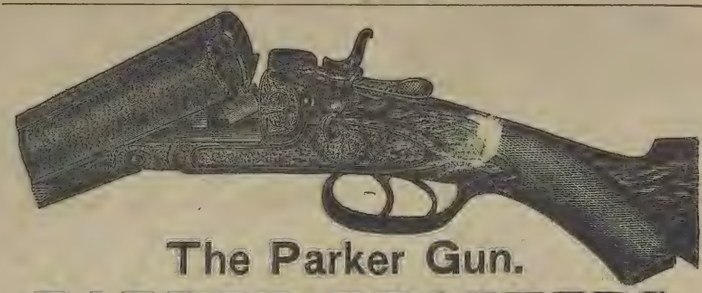
CANOE HANDLING.



By C. B. VAUX ("DOT").

A complete manual for the management of a canoe. The author begins at the very beginning, describes and explains the rudiments in the simplest and plainest way possible. Everything is made intelligible for beginners; and besides this A B C teaching there are so many hints and wrinkles that the oldest canoeist afloat will find pleasure and profit in the study of these. The book is complete and concise—no useless duffle between its covers. The subjects treated are the choice of a canoe, paddling, sailing, care of the canoe, recipes and rules. The text is further elucidated by numerous practical drawings, and the beauty of the book is enhanced by the many ornamental vignettes. Pages 168; uniform with "Canoe Building." Price, postpaid, $1.00.

Guns, Ammunition, etc.

The Parker Gun.

PARKER BROTHERS,

MAKERS,

Meriden, Conn.

At the Second International Clay-Pigeon Tournament, held at New Orleans, La., Feb. 11 to 16, 1885, the First Prize and Diamond Badge in the Individual Championship Match, open to all the world, was won by B. Tiepel with a Parker gun. Among the contestants shooting other guns were such champions as Carver, Bogardus, Cody, Stubbs, Erb, and others. During the entire tournament more prizes were won with Parker guns, in proportion to the number used, than with any other gun.

Hundreds of Prizes

have been won with **AMERICAN WOOD POWDER**, loaded in the following manner.

No. 1.

No. 1 represents the exact proportion of a Wood-Powder Shell properly wadded before the wads have been rammed down. No matter what kind of wads are used, the same should be tough and hard, and the same *thickness* of wadding should be used as shown in these Cuts.

In many Parker, Colt and other guns, wads of one or two sizes larger than bore of shell must be used, as the inner diameter of the barrels of such guns is from one-half to two calibre larger than that of paper shells, preventing the necessary confinement and causing half of the charge being thrown out unburnt. This is the secret of failures to get the desired penetration with AMERICAN

WOOD POWDER

In the absence of stronger primers than used for American Shells, we advise to put a little black powder in the bottom of the shell, which will generate about the same initial heat as a stronger primer and help burning the whole charge of Wood Powder, even when not confined as thoroughly as W. P. must be, to give best possible results when used pure.

No. 2 represents the properly loaded cartridge. The wads have been *rammed* down about three-eighths of an inch with two or three hard blows of a mallet or hammer and a tight fitting ramming-stick, until the Wood Powder is pressed into a solid mass. The shot is then put on in the ordinary way and shells crimped down tightly. For brass shells use wads two sizes larger than gauge.

Up to one dram more Wood Powder may be used than black powder with comfort, and increased penetration and pattern.

No. 2.

Address **Von Lengerke & Detmold,**

14 Murray Street, New York.

ANOTHER TRIUMPH!

W. W. GREENER'S EJECTOR GUN.

Celerity!
Comfort!
Economy!

Safety! Strength!
Symmetry!

This gun has been proved of unequalled safety. R. Rochford-Boyd, Esq., writing to the London *Field*, of Nov. 7, 1885, says: "With reference to the safety of hammerless guns, I agree with you that a safety bolt to be of any value ought to be reliable, and to illustrate my meaning, the following may interest your readers: When grouse driving on the Berwyn Mountains, in Montgomeryshire, some ten days since, and using a Greener ejecting gun, with safety bolt, the rain commenced descending in torrents, and, as a fog seemed imminent, the order was given for home. Instead of following the downward track adopted by the keepers and beaters, I decided on a shorter line of country, and decided to make my way along the face of a steep hill, scantily covered with fern. Placing my gun, which was loaded, at 'safe,' I made the attempt, and got on fairly well for a hundred yards, when I suddenly slipped and began rapidly to descend. After going some forty feet, and finding the pace increasing, I was forced to let my gun go. Slipping and swinging round, presenting its stock and muzzle alternately at my head, it shot rapidly down the hill and disappeared over a cliff, toward which I unwillingly followed. My sensation at that moment I keep to myself. Luckily some friendly ferns checked my pace, and I brought up a few yards from the edge. Regaining my feet, I cautiously proceeded till I got on a sheep track, and succeeded by the aid of a boulder in gaining such a foothold as to enable me to approach the edge and attract the attention of the men, then hundreds of feet below me. Indicating that I had lost my gun, one of them with great difficulty climbed up the face of the hill, and after some time uttered a shout. Then, far below me and embedded half way up the barrels, with the stock sticking straight up, I perceived the gun. A mossy spring between two rocks had received it in its fall; a couple of yards to the right or left, and it would have been smashed to atoms. Twenty minutes later it was restored to me, the barrels plugged up for some inches, but apparently having received no external injury, save a few scratches, and a piece chipped off the heel plate. The trigger guard was, however, a study; bits of fern and rushes were twisted round the triggers, which caught in everything in the downward course; but the safety bolt had done its work, and the cartridges were intact. While I write there hangs above me an old and valued servant, a Greener gun, with rebounding locks. Nearly 100,000 shots have been fired out of that gun; had it, however, been with me on the hills that day, a different sequel might have been told. I always considered hammer guns with rebounding locks required care, not only in crossing fences and in covert, and from the liability to explode when dropped, but from the tendency of the hammers to catch in buttonholes and watch chains, as has frequently happened to me. Sportsmen have every reason to be thankful that science has invented such a boon as hammerless guns with reliable safety bolts—in my opinion the safest and pleasantest guns any one can desire—provided gentlemen recognize the fact that a cheap gun on that principle is one of the most dangerous things out, and, when they decide to go in for a hammerless gun, select a first-class gun maker for the purpose."

Several splendid specimens of this Ejector Gun of finest finish and workmanship and at moderate prices to be seen at
